A.
1952

PREFACE.

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered "to make laws for the peace, order, and good government of the Commonwealth, with respect to Census and Statistics." In the exercise of the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the thirty-ninth Official Year Book issued under the authority of the Commonwealth Government.

The synopsis on pp. viii to xxvii immediately following shows the general arrangement of the work. The special index (following the general index) provided at the end of the volume, together with certain references given in the various Chapters, will assist in tracing in previous issues special articles and other more or less important miscellaneous matter which, owing to limitations of space, have been omitted or are not printed fully in the present volume. Where, in the general index, more than one reference to a subject is given, the chief reference (or references) has been specially indicated wherever possible.

Every endeavour has been made to meet the demand occasioned by the current economic and financial conditions for new information, or information expressed in new terms, concerning many branches of statistics, while a diary of the principal financial and economic events of the years 1948 to 1951 is inserted after the last chapter.

It is not proposed to refer here to the whole of the new matter or to the new treatment of existing matter incorporated in the present volume, but attention may be drawn to the following :—

Chapter III. General Government.—Qualifications for franchise for, and membership of, State Parliaments (pp. 73–6); Parliamentary Superannuation Funds' Finances (p. 77) (*See also* Chapter XVI.—Private Finance); Successive Holders of Portfolio in Commonwealth Ministries, 9th February, 1923 to 31st July, 1951 (pp. 79–88)—continuing a series last appearing in issue No. 21.

Chapter V. Transport and Communication.—Traffic Accidents—additional information about Persons Killed and Injured and the type of Vehicle, Road User, etc. involved (pp. 181–2).

Chapter VI. Education.—Universities—New Students Enrolled (p. 221); Degrees Conferred and Diplomas and Certificates Granted (p. 225); New South Wales University of Technology (pp. 228–30); Commonwealth Scholarship Scheme (p. 235); Libraries—extensive revision (pp. 241–51).

Chapter VIII. Public Health and Related Institutions.—Animal and Plant Quarantine (pp. 287–8); Cremations (p. 300).

Chapter IX. Welfare Services.—Commonwealth Expenditure on Social and Health Services in each State (p. 307.)

Chapter X. The Territories of Australia.—Extensive revision, particularly to Papua and New Guinea sections.

Chapter XI. Labour, Wages and Prices.—Wholesale Price Indexes compiled by Bureau (pp. 394–5 and 397); Basic Wage Inquiry, 1949–50—Court judgments and declarations (p. 415).

Chapter XII. Trade.—Australian Index of Export Prices—description revised (pp. 500–4); The Australian Balance of Payments—Statistics for years 1948–49 to 1950–51 (pp. 508–13).

Chapter XIII. Population.—"Assisted" and "Unassisted" Migration—new table showing arrivals and departures 1901–1950 (p. 559); Age Distribution, Conjugal Condition and Occupations of Permanent Arrivals and Departures (p. 564).

Chapter XIV. Vital Statistics.—Deaths—1950 particulars according to Classification approved by International Conference for the Sixth Revision of the International List of Diseases and Causes of Death, 1948 (pp. 617, etc.).

Chapter XVI. Private Finance.—State Lotteries and Betting (pp. 753–5); Government, Semi-Governmental and Parliamentary Pension and Superannuation Schemes (pp. 755–7).

Chapter XVII. Public Finance.—Commonwealth Expenditure on Subsidies and Bounties (pp. 786–7).

M 12706 11/32 new

32

OCT 27 1953

Chapter XVIII. Mineral Industry.—Sections dealing with Silver, Lead and Zinc redrafted. This Chapter in general had extensive revision.

Chapter XX. Agricultural Production.—Bulk Handling of Wheat in Australia (pp. 954–8); Tractors on Rural Holdings (p. 1017).

Chapter XXIV. Manufacturing Industry.—Growth of the Manufacturing Industry in Australia, etc., Definitions in Factory Statistics, Classification of Factories (pp. 1084–8); Principal Factory Products—quantities manufactured in Australia, 1947–48 to 1949–50 (pp. 1119–22).

Chapter XXV. Electric Power Generation and Distribution.—Special article contributed by Division of Industrial Development, Commonwealth Ministry of National Development—dealing with origins, development, present situation and new projects of the various electrical systems throughout Australia.

Chapter XXIX. Miscellaneous.—Australian Broadcasting Control Board (pp. 1283–4); Australian Road Safety Council (pp. 1287–8); Retail Trade—number of establishments and value of retail sales (pp. 1305–9).

Chapter XXX. Statistical Organization and Sources of Information.—Statistical Organization in Australia (pp. 1315–7); The Third Conference of British Commonwealth Statisticians, Canberra, 1951 (p. 1320).

Appendix.—Commonwealth Conciliation and Arbitration Tribunal (pp. 1357–8).

Statistical Summary.—Taken back to 1861—ten-yearly series.

Throughout this issue graphical presentation has been improved by the addition of new graphs and the redrawing of the other graphs.

The material in the Year Book has been carefully checked throughout, but I shall be grateful to those who will be kind enough to point out defects or make suggestions.

Printing difficulties are still being experienced and have delayed the publication of this volume. In a publication of more than 1,400 pages, a considerable time must necessarily elapse between the handling, by both author and printer, of the earlier and later parts of the work; this is so in normal circumstances, and particularly so when, as at present, great demands are being made on the printing facilities available. The result, in a statistical publication, is an unevenness in the periods to which the statistics relate. To overcome this difficulty at least partially, much more use is now made of the Appendix to the Year Book. Wherever available, and as far as space permits, the latest particulars of many statistical series appearing in preceding Chapters are inserted in the Appendix. The insertions are restricted to figures mainly, as the inclusion of current textual matter is not generally practicable.

The Appendix to this issue contains information relating to the years 1950, 1950–51, 1951 or 1951–52, that is, one, and in some instances two, years in advance of that contained in the body of the book.

It is not inappropriate to mention here that for the most recent statistics the reader should refer to other publications issued by this Bureau, notably the *Monthly Review of Business Statistics* and the *Quarterly Summary of Australian Statistics*. There are also numerous mimeographed statements issued from time to time on a wide range of subjects. Particulars of these may be had on application. (*See also* pp. 1317–9 of this volume.)

Commencing with issue No. 38 a change in the title of the Year Book was made, the year now shown being the year of issue.

My thanks are tendered to the State Statisticians, who have collected and compiled the data on which a great part of the information given in the Official Year Book is based. Thanks are also tendered to the responsible officers of the various Commonwealth and State Departments, and to others who have kindly, and often at considerable trouble, supplied information.

An expression of keen appreciation is due in respect of the valuable work performed by Mr. S. H. Begley, Editor of Publications, Mr. J. M. Jones, B.A., and Mr. E. H. Harry, B.A., B.Com., Assistant Editors, and the other officers of the Publications Division, and of the services rendered by the officers in charge of the several branches of the Commonwealth Bureau of Census and Statistics upon whom has devolved the duty of revising the Chapters relative to their respective branches.

S. R. CARVER,
Acting Commonwealth Statistician.

SYNOPSIS.

CHAPTER I.—DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA.

PAGE

§ 1. Early Knowledge and Discovery of Australia—
1. Introduction 1
2. Early Tradition 1
3. Discovery of Australia 1
4. Discoveries by the English .. 3

§ 2. The Annexation of Australia—
1. Annexation of Eastern Part of Australia, 1770 3
2. Original Extent of New South Wales 4
3. Extension of New South Wales Westward, 1825 4
4. Annexation of Western Australia, 1827 4

§ 3. The Creation of the Several Colonies—
1. New South Wales 5
2. Tasmania 5
3. Western Australia 5
4. South Australia 5
5. New Zealand 5
6. Victoria 5
7. Queensland 5

PAGE

§ 4. Establishment of the Commonwealth of Australia—
1. General 6
2. Transfer of the Northern Territory to the Commonwealth 6
3. Transfer of the Australian Capital Territory to the Commonwealth .. 6
4. Transfer of British New Guinea or Papua 7
5. Transfer of Norfolk Island .. 7
6. Territory of New Guinea .. 7
7. Nauru 7
8. Territory of Ashmore and Cartier Islands 7
9. Australian Antarctic Territory .. 7
10. Macquarie Island and Heard Island 8

§ 5. The Exploration of Australia 8

§ 6. The Constitutions of the States and of the Commonwealth—
1. General 8
2. Commonwealth Constitution Act .. 8
3. The Royal Proclamation .. 26

CHAPTER II.—PHYSIOGRAPHY.

§ 1. General Description of Australia—
1. Geographical Position 27
2. Area of Australia compared with Areas of other Countries .. 27
3. Areas of Political Subdivisions .. 29
4. Coastal Configuration 29
5. Geographical Features 29
6. Fauna, Flora, etc. 29

§ 2. Climate and Meteorology of Australia—
1. Introductory 30
2. Temperature 30
3. Humidity 49
4. Evaporation 49
5. Rainfall 50

§ 2. Climate and Meteorology of Australia— *continued.*
6. Remarkable Falls of Rain .. 53
7. Snowfall 55
8. Hail 55
9. Barometric Pressures 55
10. Wind 55
11. Influences affecting Australian Climate 57
12. Rainfall and Temperatures, Various Cities 57
13. Climatological Tables 57

§ 3. Standard Times in Australia 65

CHAPTER III.—GENERAL GOVERNMENT.

§ 1. Scheme of Parliamentary Government—
1. General 66
2. Powers and Functions of the Governor-General and of the State Governors 66
3. The Cabinet and Executive Government 66
4. Number and Salary of Members of the Legislatures 68
5. Enactments of the Parliament .. 68

§ 2. Parliaments and Elections—
1. Commonwealth 69
2. State Elections 72
3. The Parliament of New South Wales 72
4. ,, ,, ,, Victoria .. 73
5. ,, ,, ,, Queensland .. 74
6. ,, ,, ,, South Australia 75
7. ,, ,, ,, Western Australia .. 75
8. ,, ,, ,, Tasmania .. 76

§ 3. Superannuation Funds of the Parliaments of the Commonwealth and of the Australian States—
1. General 77
2. Finances 77

§ 4. Administration and Legislation—
1. The Commonwealth Parliaments .. 78
2. Governors-General and Commonwealth Ministries 78
3. Governors and State Ministers .. 89
4. The Course of Legislation 91
5. Legislation during 1949 and 1950 .. 91

§ 5. Commonwealth Government Departments 100

§ 6. Cost of Parliamentary Government .. 101

§ 7. Government Employees—
1. Australia 103
2. Commonwealth and States, etc. .. 104

CHAPTER IV.—LAND TENURE AND SETTLEMENT.

PAGE

§ 1. Introduction—
- 1. General 105
- 2. State, etc., Land Legislation .. 105
- 3. Administration and Classification of Crown Lands 105
- 4. Classification of Tenures 106

§ 2. Free Grants and Reservations—
- 1–7. States and Northern Territory 106–107
- 8. Summary 108

§ 3. Unconditional Purchases of Freehold—
- 1–6. States 108–109

§ 4. Conditional Purchases of Freehold—
- 1. General 110
- 2–7. States 110

§ 5. Leases and Licences under Land Acts—
- 1. General 110
- 2–9. States and Territories .. 111–113
- 10. Summary 113

§ 6. Leases and Licences under Mining Acts—
- 1. General 113
- 2–8. States and Northern Territory 113–116
- 9. Summary 117

§ 7. Closer Settlement—
- 1. General 117
- 2–7. States 117–118

PAGE

§ 9. Settlement of Returned Service Personnel : 1939–45 War—
- 1. War Service Land Settlement Scheme 120
- 2. Loans and Allowances (Agricultural Occupations) Scheme 122
- 3. War Service Land Settlement Division—Total Expenditure .. 123

§ 10. Advances to Settlers—
- 1. General 123
- 2–8. States and Northern Territory 124–127
- 9. Summary of Advances 127

§ 11. Alienation and Occupation of Crown Lands—
- 1. General 128
- 2–9. States and Territories .. 128–131
- 10. Summary 132
- 11. Diagram showing Condition of Public Estate 133

CHAPTER V.—TRANSPORT AND COMMUNICATION.

A. SHIPPING.

§ 1. System of Record 134

§ 2. Oversea Shipping—
- 1. Total Movement 134
- 2. Total Oversea Shipping, States .. 135
- 3. Shipping Communication with various Countries 135
- 4. Nationality of Oversea Shipping .. 136

§ 3. Shipping at Principal Ports—
- 1. Total Shipping, Australia .. 138
- 2. Total Shipping—Australia, New Zealand and United Kingdom .. 139

§ 4. Vessels Built and Registered—
- 1. Vessels Built 139
- 2. Vessels Registered 140
- 3. World Shipping Tonnage .. 140

§ 5. Interstate Shipping—
- 1. System of Record 141
- 2. Interstate Movement 142
- 3. Shipping engaged Solely in Interstate Trade 144
- 4. Interstate and Coastal Shipping Services 145

§ 6. Shipping Cargo—
- 1. Oversea and Interstate Cargo .. 145
- 2. Oversea Cargo by Nationality of Vessels Carrying 147

§ 7. Control of Shipping—
- 1. War-time Control 147
- 2. Post-war Control and Developments 147

§ 8. Miscellaneous—
- 1. Lighthouses 148
- 2. Distances by Sea 148
- 3. Shipping Freight Rates 149
- 4. Depth of Water at Main Ports .. 149
- 5. Shipping Casualties 149
- 6. Commonwealth Navigation and Shipping Legislation 149
- 7. Ports and Harbours 149

B. RAILWAYS.

§ 1. General—
- 1. Introduction 149
- 2. Railway Communication in Australia 149

B. RAILWAYS—*continued.*

§ 1. General—*continued.*
- 3. Standardization of Railway Gauges 149
- 4. Government Railways. Lines under construction and Lines authorized 150
- 5. Grafton-South Brisbane (Uniform Gauge) Line 150
- 6. Mileage Open for Traffic, all Lines .. 150
- 7. Comparative Railway Facilities .. 151
- 8. Classification of Lines according to Gauge 152
- 9. Summary of Operations 153

§ 2. Government Railways—
- 1. Summary 153
- 2. Expenditure on Construction and Equipment from Revenue and from Loans 154
- 3. Gross Revenue 154
- 4. Working Expenses 156
- 5. Net Revenue 158
- 6. Interest 159
- 7. Profit or Loss 159
- 8. Traffic 159
- 9. Rolling Stock 164
- 10. Accidents 164
- 11. Consumption of Oil and Coal .. 164
- 12. Staff Employed and Salaries and Wages Paid 165

§ 3. Private Railways—
- 1. General 165
- 2. Lines Open for General Traffic .. 165

C. TRAMWAYS.

- 1. Systems in Operation 166
- 2. Summary of Operations, Australia .. 167
- 3. Traffic and Accidents 167
- 4. State Details 168

D. MOTOR OMNIBUS SERVICES

- 1. General 173
- 2. Government and Municipal Services 174
- 3. Private Services 174

E. FERRY (PASSENGER) SERVICES.

- 1. General 175
- 2. Summary of Operations 175

CHAPTER V.—TRANSPORT AND COMMUNICATION—*continued.*

F. MOTOR VEHICLES.

1. Motor Industry 176
2. Registration 176
3. Taxi-cabs and Other Hire Vehicles 176
4. Motor Omnibuses 176
5. Motor Vehicles on the Register, etc. 177
6. New Vehicles Registered 179
7. World Motor Vehicle Statistics .. 179
8. Survey of Motor Vehicles 179

G. TRAFFIC ACCIDENTS.

1. General 180
2. Total Accidents Reported 180
3. Persons Killed or Injured in Traffic Accidents 182

H. AVIATION.

1. Historical 183
2. Foundation and Administration of Civil Aviation 183
3. International Activity 183
4. Regular Air Services within Australia 185
5. Air Ambulance Services 185
6. Training of Air Pilots 185
7. Gliding Clubs 185
8. Airways Engineering 185
9. Air Traffic Control 186
10. Meteorological Aids to Civil Aviation 186
11. Construction and Development of Airports 186
12. Aircraft Parts and Materials .. 187
13. Aircraft Maintenance, Certificates of Repair 187
14. Test and Examination of Aircraft Parts and Materials 187
15. Statistical Summaries 187
16. New Guinea Activities 188

I. POSTS, TELEGRAPHS, TELEPHONES AND WIRELESS.

§ 1. General—
1. The Commonwealth Postal Department 189
2. Postal Facilities 189
3. Gross Revenue, Branches—Postmaster-General's Department .. 191
4. Expenditure, Postmaster-General's Department 192
5. Profit or Loss, Postmaster-General's Department 192
6. Fixed Assets 193

I. POSTS, TELEGRAPHS, TELEPHONES AND WIRELESS—*continued.*

§ 2. Posts—
1. Postal Matter Dealt with .. 194
2. Cash on Delivery Parcels Post .. 195
3. Total Cost of Carriage of Mails .. 196
4. Transactions of the Dead Letter Offices 196
5. Money Orders and Postal Notes .. 196

§ 3. Telegraphs—
1. General 198
2. Telegraphs and Telephone Mileages 198
3. Telegraph Offices and Telegrams Dispatched within Australia .. 199

§ 4. Oversea Cable and Radio Communication—
1. First Cable Communication with the Old World 200
2. General Cable Service 200
3. Merging of Cable and Wireless Interests 200
4. Oversea Cable and Radio Traffic .. 200

§ 5. Telephones—
1. General 201
2. Summary for States 202
3. Subscribers' Lines and Calling-Rates 202
4. Effective Paid Local Calls .. 203
5. Trunk Line Calls and Revenue .. 203
6. Revenue from Telephones .. 204
7. World Telephone Statistics .. 204

§ 6. Radio, Telegraphy and Telephony—
1. General 204
2. Radio-communication Stations Authorized 204
3. Broadcast Licences Issued .. 207
4. Broadcasting 208
5. Oversea Communication by Wireless 209

CHAPTER VI.—EDUCATION.

§ 1. General—
1. Evolution of Educational Systems of the States 210
2. Later Development in State Educational Systems 210
3. School Age 210
4. Australian Council for Educational Research 210

§ 2. Census Records 211

§ 3. State Schools—
1. General 211
2. Returns 211
3. Distribution of Educational Facilities 213
4. Training Colleges 215
5. Expenditure 215
6. School Banking 217

§ 4. Private Schools—
1. Returns 217
2. Growth of Private Schools .. 218
3. Registration of Private Schools .. 218

§ 5. Free Kindergartens 218

§ 6. Universities—
1. Origin and Development .. 219
2. Teaching and Research Staff .. 219
3. Students 219
4. University Receipts .. 222
5. Principal University Benefactions .. 222

§ 6. Universities—*continued.*
6. University Expenditure 224
7. Extra-University Activities .. 224
8. Degrees Conferred, etc. 225
9. The Australian National University 226
10. Canberra University College .. 227
11. New England University College .. 228
12. New South Wales University of Technology 228
13. Adult Education 230
14. Workers' Educational Associations 232

§ 7. The Commonwealth Office of Education—
1. Establishment 233
2. Functions 233
3. Activities 233

§ 8. The Universities Commission—
1. General 234
2. Financial Assistance 235
3. Commonwealth Reconstruction Training Scheme 236

§ 9. Technical Education—
1. General 238
2. Schools, Teachers and Students .. 239
3. Expenditure 239

§ 10. Commonwealth War-time Technical Training Scheme—
1. Origin of the Scheme 240
2. Training 240

CHAPTER VI.—EDUCATION—*continued*.

PAGE

§ 11. Commonwealth Reconstruction Training Scheme—
1. Object of the Scheme 240
2. Closing Date 240
3. Types of Training 240
4. Allowances 240
5. Part-time Training 240
6. Organization and Administration .. 240
7. Number Trained 241

§ 12. Libraries—
1. General 241
2. Commonwealth 241
3. States 244
4. University Libraries 247
5. Children's Libraries and School Libraries 249

5. High Court of Australia 270
6. Commonwealth Court of Conciliation and Arbitration 271

§ 4. Police and Prisons—
1. General 271
2. Duties of the Police 271
3. Strength of Police Force 271
4. Prison Accommodation and Prisoners 273
5. Prisoners in Gaol 273
6. Improvement in Prison Methods .. 274

§ 5. Cost of Administration of Justice—
1. Expenditure by the States .. 274
2. Commonwealth Expenditure .. 275

CHAPTER VIII.—PUBLIC HEALTH AND RELATED INSTITUTIONS.

A. PUBLIC HEALTH.

§ 1. State Public Health Legislation and Administration—
1–6. States 276–280

§ 2. The National Health and Medical Research Council 280

§ 3. The Commonwealth Department of Health—
1. General 281
2. The Commonwealth Serum Laboratories 282
3. The Commonwealth Health Laboratories 282
4. Commonwealth Acoustic Laboratories 283
5. Commonwealth Bureau of Dental Standards 283
6. The School of Public Health and Tropical Medicine 284
7. The Australian Institute of Anatomy 284
8. The Northern Territory Medical Service 284
9. National Fitness 285
10. The Pre-school Child 285
11. Organization for the Control of Cancer 286
12. Animal Quarantine 287
13. Plant Quarantine 288

§ 4. Control of Infectious and Contagious Diseases—
1. General 288
2. Quarantine 288
3. Notifiable Diseases 289
4. Vaccination 291

§ 5. Inspection and Sale of Food and Drugs .. 291

§ 6. Supervision of Dairies, Milk Supply, etc.—
1. General 291
2. Number of Dairy Premises Registered 291

A. PUBLIC HEALTH—*continued*.

§ 7. Medical Inspection of School Children—
1. General 292
2–8. States and Australian Capital Territory 292–296

§ 8. Supervision and Care of Infant Life—
1. General 296
2. Government Activities 297
3. Nursing Activities 297

§ 9. Hospital Benefits Act 298

§ 10. Mental Institution Benefits Act .. 298

§ 11. Tuberculosis Act 298

D. INSURANCE.

§ 1. Insurance, General—

1. Legislation 735
2. Insurance Act 1932–1937 735
3. Life Insurance Act 1945–50 .. 736

§ 2. Life Assurance—

1. General 736
2. Offices Transacting Business .. 736
3. Australian Business—Policies in Existence 736
4. New Policies issued in Australia .. 738
5. Policies Matured or Otherwise discontinued in Australia 739
6. Premiums and Claims, Australia .. 742
7. Total Revenue and Expenditure .. 744
8. Liabilities and Assets 745
9. Loans 748

§ 3. Fire, Marine and General Insurance—

1. Australasian Companies 749
2. Aggregate Australian Business .. 749

E. FRIENDLY SOCIETIES.

1. General 751
2. Number of Societies, Lodges and Members 751
3. Sickness and Death Returns .. 751
4. Revenue and Expenditure .. 752
5. Funds 753

F. PROBATES AND LETTERS OF ADMINISTRATION. .. 753

G. STATE LOTTERIES AND BETTING.

§ 1. State Lotteries 753

§ 2. Totalizator Investments 755

H. GOVERNMENT, SEMI-GOVERNMENTAL AND PARLIAMENTARY PENSION AND SUPERANNUATION SCHEMES.

§ 1. Government and Semi-Governmental Pension and Superannuation Schemes 755

§ 2. Parliamentary Pension and Superannuation Schemes 756

CHAPTER XVII.—PUBLIC FINANCE.

A. COMMONWEALTH FINANCE.

§ 1. General—

1. Financial Provisions of the Constitution 758
2. Accounts of Commonwealth Government 759

§ 2. Consolidated Revenue Fund—

DIVISION I.—NATURE OF FUND.

1. Provisions of the Constitution .. 759
2. Annual Results of Transactions .. 759

DIVISION II.—REVENUE.

1. General 760
2. Taxation 761
3. Business Undertakings 772
4. Other Sources of Revenue .. 773

DIVISION III.—EXPENDITURE.

1. Details of Expenditure from Consolidated Revenue 773
2. Total Cost of Departments .. 775
3. Subsidies and Bounties 786
4. Capital Works and Services .. 788
5. Defence, War and Repatriation Services 788

DIVISION IV.—PAYMENTS TO OR FOR THE STATES.

1. General 788
2. Financial Agreement 788
3. Special Grants 788
4. States Grants (Tax Reimbursement) Acts 789
5. Additional Financial Assistance .. 790
6. Grants for Road Construction .. 790
7. Amounts Paid 791

A. COMMONWEALTH FINANCE—*continued.*

§ 3. Commonwealth Trust Funds—

1. Receipts, Expenditure and Balances 792
2. Summary 793

§ 4. Commonwealth Loan Funds 794

§ 5. Commonwealth Expenditure on Capital Works and Services 795

§ 6. Commonwealth Expenditure on Defence Services 796

§ 7. War and Repatriation Services and Post-War Charges 798

B. STATE FINANCE.

§ 1. General—

1. Functions of State Governments .. 799
2. Accounts of State Governments .. 799
3. Inter-relation of Commonwealth and State Finances 799

§ 2. State Consolidated Revenue Funds—

DIVISION I.—REVENUE.

1. General 800
2. Revenue Received 800
3. Sources of Revenue 801

DIVISION II.—EXPENDITURE.

1. General 809
2. Total Expenditure 810
3. Details of Expenditure 810

DIVISION III.—SURPLUS REVENUE. 812

§ 3. State Trust Funds 812

CHAPTER XVII.—PUBLIC FINANCE—*continued.*

PAGE

B. STATE FINANCE—*continued.*

§ 4. State Loan Funds—
1. General 812
2. Details of Loan Expenditure .. 813
3. Loan Expenditure on Works, Services, etc. 814
4. Total Net Loan Expenditure .. 816
5. Total Loan Expenditure 817

C. COMMONWEALTH AND STATE FINANCE.

1. Revenue and Expenditure .. 818
2. Taxation 819

D. COMMONWEALTH AND STATE PUBLIC DEBT.

§ 1. General 820

§ 2. The Financial Agreement between the Commonwealth and the States—
1. General 820
2. Australian Loan Council 820
3. Loan Raisings for the Commonwealth and States 820
4. Taking over of State Public Debts .. 820
5. Transferred Properties 821
6. Payment of Interest 821
7. Sinking Fund 821
8. Borrowing by Semi-Governmental Authorities 822

§ 3. Commonwealth and State Public Debt Outstanding—
1. Public Debt and Annual Interest Payable, 30th June, 1951 .. 822
2. Public Debt and Annual Interest Payable, 1939 and 1947 to 1951 .. 824
3. State Public Debt and Annual Interest Payable, 30th June, 1951 825
4. State Public Debt, 1939 and 1947 to 1951 827

PAGE

D. COMMONWEALTH AND STATE PUBLIC DEBT—*continued.*

§ 3. Commonwealth and State Public Debt Outstanding—*continued.*
5. Public Debt and Interest Payable in Australian Currency .. 827
6. Public Debt at each Rate of Interest 829
7. Dates of Maturity 831
8. Short Term Debt 832
9. State and Municipal and Semi-Governmental Authority Public Debt 833

§ 4. Commonwealth Loan Raisings—
1. New Loans Raised 834
2. Conversion and Redemption Loans 835
3. International Bank for Reconstruction and Development Loan .. 837
4. Summary of Loan Transactions .. 837

§ 5. National Debt Sinking Fund—
1. Commonwealth Public Debt .. 838
2. State Public Debt 838

E. TAXES ON INCOME.

1. General 840
2. Present Taxes 840
3. Assessable Income 840
4. Taxes on Individuals 840
5. Concessional Deductions 841
6. Lodgment of Returns and Assessment of Tax 841
7. Deductions from Wages and Salaries 842
8. Provisional Tax 842
9. Effective Exemptions from Tax .. 842
10. Rates of Tax on Individuals .. 842
11. Taxes on Sample Individual Incomes 844
12. Company Income Taxes 846
13. Yield of Income Taxes 847

CHAPTER XVIII.—MINERAL INDUSTRY.

§ 1. The Mineral Wealth of Australia—
1. Place of Mining in Australian Development 849
2. Extent of Mineral Wealth .. 849
3. Quantity and Value of Production .. 849
4. Value of Production 852
5. Total Production to end of 1949 .. 852
6. Quarries 853

§ 2. Gold—
1. Discovery in Various States .. 854
2. Production at Various Periods .. 854
3. Changes in Relative Positions of States as Gold Producers .. 855
4. Place of Australia in the World's Gold Production 856
5. Employment in Gold-mining .. 857
6. Tax on Gold 857
7. Bounty on Production 857

§ 3. Silver, Lead and Zinc—
1. Production 858
2. Production, Sales and Stocks of Refined Silver, Lead and Zinc .. 862
3. World Production 863
4. Silver, Lead and Zinc Production in Principal Countries 863
5. Prices of Silver, Lead and Zinc .. 864
6. Employment in Silver, Lead and Zinc-mining 864

§ 4. Copper—
1. Production 865
2. Sources of Production 865
3. Production, Sales and Stocks of Refined Copper 866
4. World Production of Copper .. 867
5. Prices 867
6. Employment in Copper-mining .. 868

§ 5. Tin—
1. Production 868
2. Sources of Production 868
3. World Production 869
4. Prices 870
5. Employment in Tin-mining .. 870

CHAPTER XVIII.—MINERAL INDUSTRY—*continued.*

§ 6. Iron—

1. General 870
2. Production 870
3. Iron and Steel Bounties 873
4. Production of Iron and Steel in Principal Countries 873

§ 7. Other Metallic Minerals—

1. Tungsten 875
2. Cadmium and Cobalt 875
3. Platinoid Metals 876
4. Other 876

§ 8. Coal—

1. Production in each State .. 877
2. Distribution and Production of Coal in each State 877
3. Production in Various Countries .. 882
4. Exports 882
5. Consumption in Australia .. 883
6. Coal Value at Pit's Mouth in New South Wales 885
7. Prices in New South Wales, Great Britain, Canada and the United States of America 885
8. Employment in Coal-mines .. 886
9. Accidents in Coal-mining 886
10. Commonwealth Board of Inquiry into the Coal Mining Industry .. 887
11. Joint Coal Board 887

§ 9. Coke—

1. General 888
2. Total Production, Australia .. 888

§ 10. Other By-products from Coal 888

§ 11. Shale Oil and Mineral Oil—

1. Shale Oil 889
2. Coal Oil 889
3. Natural Oil 889

§ 12. Gems and Gemstones—

1. Diamonds 890
2. Sapphires 891
3. Precious Opal 891
4. Other Gems 891

§ 13. Number Engaged, Wages Paid, and Accidents in Mining—

1. Total Employment in Mining .. 892
2. Wages Paid in Mining 893
3. Accidents in Mining 893

§ 14. Government Aid to Mining and Mineral Control—

1. Aid to Mining 894
2. Control of Minerals 896

CHAPTER XIX.—PASTORAL PRODUCTION.

§ 1. Initiation and Growth of Pastoral Industry—

1. General 898
2. Live-stock Numbers since 1860 .. 898
3. Fluctuations 898
4. Minor Classes of Live-stock .. 899
5. Net Exports of Principal Pastoral Products 899
6. Value of Pastoral Production .. 900
7. Consumption of Meats 902
8. Marketing of Meat 902

§ 2. Horses—

1. Suitability of Australia for Horse-breeding 904
2. Distribution throughout Australia .. 904
3. Oversea Trade in Horses .. 904

§ 3. Cattle—

1. Purposes for which Raised .. 909
2. Distribution throughout Australia .. 909
3. Classification of Cattle according to Purpose 910
4. Size Classifications of Cattle Herds 910
5. Comparison with other Countries .. 910
6. Imports and Exports of Cattle .. 911
7. Cattle Slaughtered 912
8. Production of Beef and Veal .. 912
9. Consumption of Beef and Veal .. 912
10. Exports of Frozen Beef and Veal .. 913

§ 4. Sheep—

1. Initiation of the Pastoral Industry .. 914
2. Movement in Sheep Numbers .. 914
3. Distribution throughout Australia .. 914
4. Classification of Sheep According to Age, Sex and Breed 915
5. Numbers of Sheep on Rural Holdings 916
6. Comparison with other Countries .. 916

CHAPTER XIX.—PASTORAL PRODUCTION—*continued.*

PAGE

§ 4. Sheep—*continued.*
- 7. Oversea Imports and Exports of Sheep 916
- 8. Sheep Slaughtered 917
- 9. Production of Mutton and Lamb .. 917
- 10. Consumption of Mutton and Lamb .. 918
- 11. Exports of Frozen Mutton and Lamb 918

§ 5. Wool—
- 1. General 919
- 2. Greasy and Scoured Wool .. 920
- 3. Production 920
- 4. Care Needed in Comparing Clips .. 920
- 5. Average Weights of Fleeces Shorn .. 921
- 6. World Wool Production 921
- 7. War-time Contracts 922
- 8. Australian Wool Realization Commission 923
- 9. Post-war Marketing of Wool .. 925
- 10. Wool Publicity and Research .. 926

PAGE

§ 5. Wool—*continued.*
- 11. Consumption of Locally Processed Wool 926
- 12. Exports of Wool 927
- 13. Local Sales of Wool 928
- 14. Value 928
- 15. United Kingdom Importation of Wool 929
- 16. Principal Importing Countries and Sources of Supply 930

§ 6. Trade in Hides and Skins—
- 1. Extent of Trade 930
- 2. Sheepskins with Wool 930
- 3. ,, without Wool .. 930
- 4. Hides 931
- 5. Furred Skins 931
- 6. Marketing of Hides and Skins .. 932

§ 7. Tallow—
- 1 Production 933
- 2. Consumption 933
- 3. Marketing 933

CHAPTER XX.—AGRICULTURAL PRODUCTION.

§ 1. Introductory 934

§ 2. Progress of Agriculture—
- 1. Early Records 934
- 2. Progress of Cultivation 934
- 3. Area under Sown Pastures .. 935
- 4. Australian Agricultural Council .. 935

§ 3. Distribution, Production and Value of Crops—
- 1. Distribution of Crops 936
- 2. Relative Areas of Crops in States and Territories 936
- 3. Area of Principal Crops in Australia 937
- 4. Weights and Measures 937
- 5. Production of Principal Crops in Australia 938
- 6. Average Yield per Acre of Principal Crops in Australia 939
- 7. Gross Value of Agricultural Production in Australia 939
- 8. Value of Production 939

§ 4. Wheat—
- 1. Royal Commission on the Wheat Industry 941
- 2. Wheat Costs of Production Committee 941
- 3. Licensing of Areas Sown to Wheat, and Acreages Sown 941
- 4. Legislation Relating to Wheat Industry 941
- 5. War-time and Post-war Marketing of Wheat 942
- 6. International Wheat Agreement .. 944
- 7. Wheat Farms 945
- 8. Area, Production and Average Yield 946
- 9. Varieties of Wheat Sown .. 947
- 10. F.A.Q. Standard of Wheat .. 948
- 11. Price of Wheat 949
- 12. Value of the Wheat Crop 950
- 13. Production and Disposal of Wheat in Australia 951
- 14. Consumption of Wheat in Australia 952
- 15. Exports of Wheat and Flour .. 952
- 16. Stocks of Wheat and Flour .. 953
- 17. Flour Milling 954
- 18. Bulk Handling of Wheat in Australia 954
- 19. World Area and Production of Wheat 959
- 20. Exports—Principal Countries .. 960
- 21. Imports— ,, ,, .. 961

§ 5. Oats—
- 1. Area, Production and Average Yield 962
- 2. Price of Oats 963
- 3. Value of Oat Crop 963
- 4. Imports and Exports 963
- 5. Oatmeal, etc. 964
- 6. World Production 964

§ 6. Maize—
- 1. States Growing Maize 964
- 2. Area, Production and Average Yield 964
- 3. Price of Maize 965
- 4. Value of Crop 966
- 5. Maize Products 966
- 6. Oversea Imports and Exports .. 966
- 7. World Production 966

§ 7. Barley—
- 1. Area, Production and Average Yield 967
- 2. Australian Barley Board .. 968
- 3. Prices 969
- 4. Value of Barley Crop 969
- 5. Imports and Exports 970
- 6. Malt 970
- 7. World Production 971

§ 8. Rice 971

§ 9. Sorghum for Grain—
- 1. Area, Production and Average Yield 972
- 2. Queensland-British Food Corporation Project 979

§ 10. Other Grain and Pulse Crops 979

§ 11. Potatoes—
- 1. Area, Production and Average Yield 979
- 2. Gross Value of Potato Crop .. 981
- 3. Consumption 981
- 4. Australian Potato Committee .. 981
- 5. Post-war Marketing 981
- 6. Imports and Exports 981

§ 12. Onions—
- 1. Area, Production and Average Yield 982
- 2. Gross Value of Onion Crop .. 983
- 3. Consumption 983
- 4. Imports and Exports 983

§ 13. Hay—
- 1. General 983
- 2. Value of Hay Crop 985
- 3. Farm Stocks of Hay 985
- 4. Imports and Exports 985

CHAPTER XX.—AGRICULTURAL PRODUCTION—*continued*.

PAGE

§ 14. Green Fodder—

1. Nature and Extent 985
2. Value of Green Fodder Crops .. 986

§ 15. Sugar-cane and Sugar-beet—

1. Sugar-cane 986
2. Sugar-beet 989
3. Sugar Agreement in Australia—Embargo on Imports, etc. .. 989
4. International Sugar Agreement .. 989
5. Net Return for Sugar Crop .. 990
6. Imports and Exports of Sugar .. 990
7. Sugar By-products 991
8. Sugar Prices 991
9. War and Post-war Arrangements .. 991

§ 16. Vineyards—

1. Progress of Cultivation 992
2. Imports and Exports of Wine .. 993
3. Overseas Marketing of Wine .. 994
4. Other Viticultural Products .. 994
5. Production and Disposal of Dried Vine Fruit 995
6. Exports of Raisins and Currants .. 996
7. War-time Contract 996
8. Post-war Contract 996
9. Overseas Marketing of Dried Fruits 996

§ 17. Orchards and Fruit-Gardens—

1. Area 997
2. Varieties of Crops 997
3. Principal Fruit Crops 999
4. Production of Jams and Jellies and Preserved Fruit 999
5. Consumption of Fruit and Fruit Products 1000
6. Imports and Exports of Fruit ..1000
7. Marketing of Apples and Pears ..1002
8. Overseas Marketing of Canned Fruit 1003

§ 18. Vegetables for Human Consumption—

1. Area and Production of Fresh Vegetables 1004
2. Production of Canned Vegetables ..1004
3. Production of Dehydrated Vegetables 1005
4. Imports and Exports of Vegetables 1005
5. Consumption of Vegetables ..1005

PAGE

§ 19. Minor Crops—

1. General 1005
2. Grass Seed 1005
3. Other Grains from Sorghums ..1005
4. Tobacco 1006
5. Hops 1007
6. Flax 1008
7. Peanuts 1009
8. Broom Millet 1010
9. Nurseries 1010
10. Cotton 1010
11. Other Crops 1011

§ 20. Bounties, etc.—

1. Bounties 1011
2. Other Financial Assistance to Primary Producers 1011

§ 21. Fertilizers—

1. General 1013
2. Fertilizers Acts 1014
3. Imports 1014
4. Exports 1014
5. Quantities Locally Used 1015
6. Local Production 1015

§ 22. Ensilage—

1. Government Assistance in Production 1015
2. Quantity Made 1016
3. Stocks Held on Farms 1016

§ 23. Agricultural Colleges and Experimental Farms 1016

§ 24. Tractors on Rural Holdings 1017

§ 25. Number and Area of Rural Holdings and Permanent Employment Thereon—

1. General 1018
2. Number and Area 1018
3. Analysis of Holdings 1018
4. Special Tabulation Relating to Rural Holdings 1019
5. Permanent Employment on Rural Holdings 1020

CHAPTER XXI.—FARMYARD, DAIRY AND BEE PRODUCTS.

§ 1. Introductory—

1. General 1022
2. Mixed Farming 1022
3. Employment 1022
4. Growth of the Dairying Industry ..1023
5. Official Supervision of the Dairying Industry 1023

§ 2. Dairy Cattle and Dairy Products—

1. Dairy Herds 1023
2. Size of Dairy Herds 1025
3. Factory System.. 1025
4. Butter and Cheese—Stabilization Schemes 1025
5. Commonwealth Subsidies ..1025
6. Total Dairy Production 1027
7. Whole Milk 1028
8. Butter Production 1029
9. Cheese Production 1030
10. Condensed, Concentrated and Powdered, etc., Milk Production ..1031
11. Local Consumption of Butter and Cheese 1032
12. Marketing of Dairy Products ..1032
13. Butter and Cheese Contracts ..1033
14. Oversea Trade in Butter, Cheese and Milk 1034

§ 3. Pigs and Pig Products—

1. Pigs 1036
2. Size of Pig Herds 1036
3. Pork 1037
4. Bacon and Ham 1038
5. United Kingdom Contracts ..1039
6. Oversea Trade in Pigs and Pig Products 1039

§ 4. Value of Dairy Production (including Pig Farming) 1040

§ 5. Poultry-farming—

1. General 1041
2. Numbers of Poultry 1041
3. Recorded Production and Disposal of Eggs 1041
4. Production and Consumption of Eggs 1043
5. Marketing of Eggs 1044
6. Oversea Trade in Poultry Products 1045
7. Value of Poultry Products ..1047

§ 6. Bee-farming—

1. General 1047
2. Production of Honey and Bees-wax 1048
3. Value of Production 1049
4. Oversea Trade in Bee Products ..1050

§ 7. Exports of Australian Farmyard, Dairy and Bee Products 1050

§ 8. Imports of Dairy and Farmyard Products into United Kingdom—

1. Summary, Principal Products ..1052
2. Butter 1052
3. Cheese 1053
4. Bacon 1053
5. Pork 1053
6. Eggs 1053
7. Milk Products 1053
8. Other Products 1053

CHAPTER XXII.—FORESTRY.

§ 1. General—

PAGE
1. Objects of Forestry 1054
2. General Account of Forests and Timbers 1054
3. Extent of Forests 1055
4. Forest Reservations 1056
5. Plantations 1057

§ 2. Forestry Activities of the Commonwealth—

1. Prior to 1925 1057
2. Commonwealth Forestry Bureau ..1057
3. Wartime Control of Timber ..1058
4. Forestry and Timber Bureau ..1058
5. Commercial Forests 1060
6. Forest Products Research ..1060

§ 3. Forest Congresses 1060

§ 4. State Forestry Departments—

PAGE
1. Functions 1061
2. Forest Reservations 1061
3. Reforestation, Afforestation, etc. ..1062
4. Revenue and Expenditure ..1062

§ 5. Forestry Production—

1. Timber 1062
2. Paper and Wood Pulp 1064
3. Other Forest Products 1065
4. Value of Production 1066
5. Employment 1067

§ 6. Oversea Trade—

1. Imports 1068
2. Exports 1069
3. Classification of Imports and Exports 1070

CHAPTER XXIII.—FISHERIES.

§ 1. General—

1. Fish Stocks 1072
2. Fishing Areas 1072
3. „ Boats and Equipment ..1072
4. Administration 1073

§ 2. Development and Present Condition of the Fishery—

1. Fisheries Proper 1073
2. Oysters and Shell Fisheries ..1075
3. Pearl-shell, Trochus and Bêche-de-mer 1075

§ 3. Marketing and Distribution—

1. Marketing 1075
2. Consumption of Fish 1076
3. Processing, including Canning ..1076
4. By-products 1076

§ 4. Inquiries and Research—

1. General 1076
2. Commonwealth Scientific and Industrial Research Organization, Division of Fisheries 1076
3. Commonwealth Fisheries Authority 1077
4. North Australia Development Committee 1077
5. Whaling 1077

§ 5. The Fishing Industry—

1. Boats and Men Engaged, and Take 1078
2. Value of Production 1080
3. Fish Preserving 1081
4. State Revenue from Fisheries ..1081

§ 6. Oversea Trade in Fishery Products—

1. Imports of Fish 1082
2. Exports of Fish 1083
3. „ Pearl and Other Shell ..1083

CHAPTER XXIV.—MANUFACTURING INDUSTRY.

§ 1. General—

1. Introduction 1084
2. Decentralization of Manufacturing Industries 1084
3. Commonwealth Division of Industrial Development 1085
4. Customs and Excise Tariffs and Bounties on Manufactures ..1085
5. Scientific Research and Standardization 1085
6. Definitions in Factory Statistics ..1086
7. Classification of Factories ..1087
8. Factory Development since 1901—Australia 1088

§ 2. Number of Factories—

1. Number of Factories in each State..1089
2. „ „ „ Industrial Classes..1089

§ 3. Classification of Factories according to Number of Persons Employed—

1. General 1090
2. States 1090
3. Australia 1091

§ 4. Power Equipment in Factories—

1. General 1092
2. Rated Horse-power of Engines in Factories other than Central Electric Stations 1092
3. Rated Horse-power of Engines and Electric Motors Ordinarily in Use 1092
4. Capacity of Engines and Generators installed in Central Electric Stations 1094

§ 5. Employment in Factories—

1. Number Employed 1094
2. Rates of Increase 1096
3. Persons Employed in Classes of Industry 1096
4. Persons Employed According to Occupational Status 1097
5. Monthly Employment 1098
6. Distribution of Employees According to Age 1099

§ 6. Sex Distribution in Factories—

1. Distribution according to Sex of Persons Employed 1100
2. Rate of Variation for each Sex ..1101
3. Masculinity of Persons Employed in Factories 1101
4. Employment of Females in Particular Industries 1102

CHAPTER XXIV.—MANUFACTURING INDUSTRY—*continued.*

PAGE
§ 7. Child Labour in Factories—
1. Conditions of Child Labour ..1103
2. Number of Children Employed ..1103
3. Proportion of Children Employed to Total Employees 1103
4. Industries Employing Child Labour 1104
5. Apprenticeship 1104

§ 8. Salaries and Wages Paid and Value of Production—
1. General 1105
2. Salaries and Wages Paid ..1105
3. Power, Fuel and Light Used ..1109
4. Value of Materials Used 1110

§ 9. Settlement of Returned Service Personnel: 1939–45 War—
War Service Land Settlement Scheme 1345
§ 11. Alienation and Occupation of Crown Lands—
Summary 1345

Chapter V.—Transport and Communication—

(A) SHIPPING—
§ 2. Oversea Shipping and § 5. Interstate Shipping—
Summary of Movements 1345
§ 6. Tonnage of Cargo—
Oversea and Interstate Cargo .. 1346
(B) RAILWAYS—
§ 1. General—
Summary of Operations 1346
(C) TRAMWAYS—
Summary of Operations 1347
(D) MOTOR OMNIBUS PASSENGER SERVICES—
Government and Municipal Services 1347
Private Services 1347
(F) MOTOR VEHICLES—
Motor Vehicle Registrations .. 1347
(G) TRAFFIC ACCIDENTS—
Total Accidents Reported 1348
(H) AVIATION—
Statistical Summaries 1348
(I) POSTS, TELEGRAPHS, TELEPHONES AND WIRELESS—
§ 1. General to § 5. Telephones—
Summary of Operations 1349
§ 6. Radio Telegraphy and Telephony—
Radio-communication Stations Authorized 1349
Broadcast Licences Issued .. 1349
Broadcasting—Broadcast Listeners' Licences 1349

Chapter VI.—Education—

§ 3. State Schools, § 4. Private Schools and § 9. Technical Education—
Returns for year 1950 1350
§ 6. Universities—
Teaching and Research Staff, etc. .. 1350

PAGE

Chapter VII.—Public Justice—

§ 1. Lower (Magistrates') Courts, § 2. Superior (Judges') Courts, § 3. Civil Courts, § 4. Police and Prisons and § 5. Cost of Administration of Justice—
Convictions, Divorces, Bankruptcies, Police, Prisons, etc. 1351

Chapter VIII.—Public Health and Related Institutions—

(A). PUBLIC HEALTH—
§ 4. Control of Infectious and Contagious Diseases.—
Notifiable Diseases. 1352
(B) INSTITUTIONS—
§ 2. Public Hospitals (other than Mental Hospitals)—
Number, Staff, etc. 1353
§ 4. Mental Hospitals.—
Number, Staff, etc. 1353

Chapter IX.—Welfare Services—

(A) COMMONWEALTH SOCIAL SERVICE BENEFITS—
§ 1. Introduction—
Social and Health Services .. 1354
§ 2. Age and Invalid Pensions, § 3. Maternity Allowances, § 4. Child Endowment, and § 5. Widows' Pensions—
General 1354
§ 6. Unemployment and Sickness Benefits—
Statistics 1355

Chapter XI.—Labour, Wages and Prices—

(A) RETAIL PRICES AND PRICE INDEXES—
§ 7. Tabular Statements of Retail Price Index-Numbers—
All Items ("C" Series) Retail Price Index 1356
(B) WHOLESALE PRICES AND PRICE INDEXES—
§ 2. Wholesale Price (Basic Materials and Foodstuffs) Index—
Index-numbers 1357
§ 3. Melbourne Wholesale Price Index—
Index-numbers 1357
(D) WAGES—
The Commonwealth Conciliation and Arbitration Tribunal .. 1357
§ 2. Rates of Wage and Hours of Labour—
Weekly Rates of Wage 1358
§ 3. Basic Wages in Australia—
Commonwealth Basic Wage Rates .. 1359
State Basic Wage Rates 1359
Average Weekly Total Wages paid and Average Earnings 1360
(E) EMPLOYMENT—
§ 1. Employment—
Wage and Salary Earners in Employment 1361
§ 2. Unemployment—
Unemployment of Members of Trade Unions 1361
§ 4. Industrial Disputes—
Summary of Disputes (involving Stoppage of Work) 1362

APPENDIX—*continued.*

Chapter XII.—Trade—

§ 5. Oversea Trade—
Summary of Movements 1362

§ 6. Direction of Oversea Trade—
Imports according to Country of Origin and Exports according to Country of Destination ..1362

§ 9. Classified Summary of Australian Oversea Trade—
Imports and Exports in Statistical Classes 1364

§ 13. Australian Index of Export Prices—
Monthly Index (Fixed Weights) ..1365

§ 17. The Australian Balance of Payments—
Balance of Payments on Current and Capital Account 1366
Balance of Payments on Current Account—Various Countries ..1366
Balance of Payments with the Dollar Area 1367

Chapter XIII—Population—

§ 3. Growth and Distribution of Population—
Growth of Population 1368

§ 4. Mean Population—
Mean Population. 1369

§ 5. Elements of Increase—
Natural Increase, Increase by Net Migration and Total Increase ..1369

§ 7. General Characteristics—
Age Distribution 1370

§ 9. Oversea Migration—
Classes of Arrivals and Departures 1370

Chapter XIV.—Vital Statistics—

§ 1. Marriages, § 2. Fertility and Reproduction, and § 3. Mortality—
Numbers and Rates 1370

Chapter XVI.—Private Finance—

(A) CURRENCY—

§ 2. Coinage—
Issues of Australian Coins.. ..1371

§ 3. Notes—
The Australian Note Issue ..1371

(B) BANKING—

§ 1. Cheque-paying Banks—
Commonwealth Bank 1371
Private Trading Banks 1371
Classification of Advances within Australia 1372
Clearing House Returns 1372
Debits to Customers' Accounts ..1372

§ 2. Savings Banks—
All Savings Banks 1372

(D) INSURANCE—

§ 2. Life Assurance—
Life Assurance 1372

Chapter XVII.—Public Finance—

(A) COMMONWEALTH FINANCE—
Consolidated Revenue Fund ..1373

(C) COMMONWEALTH AND STATE FINANCE—
Revenue and Expenditure ..1373

(D) COMMONWEALTH AND STATE PUBLIC DEBT—

§ 3. Commonwealth and State Public Debt Outstanding—
Public Debt and Annual Interest Payable 1374

§ 4. Commonwealth Loan Raisings—
Loans Raised 1374

(E) TAXES ON INCOME—
General 1375
Taxes on Individuals 1375
Concessional Deductions 1375
Rates of Income Tax and Social Services Contribution on Individuals 1375
Company Income Taxes 1375

Chapter XVIII.—Mineral Industry—

§ 1. The Mineral Wealth of Australia—
Quantity and Value of Production..1376

Chapter XIX.—Pastoral Production—
Live-stock, Meat and Wool Produced 1376

Chapter XX.—Agricultural Production—

§ 3. Distribution, Production and Value of Crops—
Principal Crops 1377

Chapter XXI.—Farmyard, Dairy and Bee Products—
Principal Farmyard, Dairy and Bee Products 1378

Chapter XXIV.—Manufacturing Industry—
Summary 1378
Value of Production in Classes of Industry 1379
Principal Factory Products ..1379

Chapter XXV.—Electric Power Generation and Distribution—
(E) STATISTICAL SUMMARY 1380

Chapter XXVIII.—Repatriation—

§ 2. War Pensions and § 3. Service Pensions—
Pension Rates 1381
Number of Pensioners and Expenditure 1381

Chapter XXIX.—Miscellaneous—

§ 19. New Building—
Summary 1382

§ 22. Valuation of Australian Production—
Net Value of Production.. ..1382

§ 24. Retail Trade—
Value of Retail Sales 1383

Australian currency values. (*e*) In terms of greasy. (*f*) Includes packets. (*g*) Figures for first four years are averages for December quarter, the remainder for the June quarter. All cheque-paying banks to 1931-32, Nine Trading Banks thereafter. (*h*) Decrease due to prohibition of re-issue. (*i*) Includes Commonwealth Savings Bank deposits. (*j*) End of June. (*k*) First four years at 31st December, thereafter at 30th June. (*l*) Year ended 31st December.

CHRONOLOGICAL TABLE.

CHRONOLOGICAL TABLE OF CHIEF EVENTS SINCE THE ESTABLISHMENT OF SETTLEMENT IN AUSTRALIA.

NOTES.—For each earlier year this table contains rarely more than two or three items; for recent years, however, in order to provide a wide cover of events, etc., it includes a much greater number. Both the nature of the Table and considerations of space render necessary a continual reduction in these items, and for more information the reader should therefore consult earlier issues.

The Government was centralized in Sydney, New South Wales, up to 1825, when Tasmania (Van Diemen's Land) was made a separate colony. In the Table the names now borne by the States serve to indicate the localities.

Year.	
1788	N.S.W.—Arrival of "First Fleet", under Captain Arthur Phillip, at Botany Bay. Land in vicinity being found unsuitable for settlement, the expedition moved to Sydney Cove, and formal possession of the colony was taken on 26th January. Formal proclamation of colony and establishment of regular government on 7th February. Branch Settlement established at Norfolk Island. French navigator Lapérouse visited Botany Bay. First cultivation of wheat and barley. First grape vines planted.
1789	N.S.W.—First wheat harvest at Parramatta, near Sydney. Discovery of Hawkesbury River.
1790	N.S.W.—Scarcity of provisions. "Second Fleet" reached Port Jackson. Landing of the New South Wales Corps.
1791	N.S.W.—Arrival of "Third Fleet". Territorial seal brought by Governor King.
1792	N.S.W.—Visit of *Philadelphia*, first foreign trading vessel.
1793	N.S.W.—First free immigrants arrived in the *Bellona*. First Australian church opened at Sydney. Tas.—D'Entrecasteaux discovered the Derwent River.
1794	N.S.W.—Establishment of settlement at Hawkesbury River.
1795	N.S.W.—Erection of the first printing press at Sydney. Descendants of strayed cattle discovered at Cowpastures, Nepean River.
1796	N.S.W.—First Australian theatre opened at Sydney. Coal discovered by fishermen at Newcastle.
1797	N.S.W.—Introduction of merino sheep from Cape of Good Hope.
1798	Tas.—Insularity of Tasmania proved by voyage of Bass and Flinders.
1800	N.S.W.—Hunter River coal-mines worked. First Customs House in Australia established at Sydney. Flinders' charts published.
1801	N.S.W.—First colonial manufacture of blankets and linen.
1802	Vic.—Discovery of Port Phillip by Lieut. Murray. Q'land.—Discovery of Port Curtis and Port Bowen by Flinders. S.A.—Discovery of Spencer's and St. Vincent Gulfs by Flinders.
1803	N.S.W.—First Australian wool taken to England by Capt. Macarthur. Issue of "The Sydney Gazette", first Australian newspaper. Vic.—Attempted settlement at Port Phillip by Collins. Discovery of Yarra by Grimes. Tas.—First settlement formed at Risdon by Lieut. Bowen.
1804	Vic.—Abandonment of settlement at Port Phillip. Tas.—Foundation of settlement at Hobart by Collins.
1805	N.S.W.—First extensive sheep farm established at Camden by Capt. Macarthur.
1806	N.S.W.—"The great flood" on the Hawkesbury. Shortage of provisions. Tas.—Settlement at Launceston.
1807	N.S.W.—First shipment of merchantable wool (245 lb.) to England.
1808	N.S.W.—Deposition of Governor Bligh.
1809	N.S.W.—Free school established.
1810	N.S.W.—Post Office officially established at Sydney.
1813	N.S.W.—Passage across Blue Mountains discovered by Wentworth, Lawson and Blaxland. Macquarie River discovered by Evans.
1814	N.S.W.—Flinders suggested the name "Australia", instead of "New Holland". Creation of Civil Courts.
1815	N.S.W.—First steam engine in Australia erected at Sydney. Lachlan River discovered by Evans. Tas.—Arrival of first immigrant ship with free settlers. First export of wheat to Sydney.
1816	N.S.W.—Sydney Hospital opened.

Year.

1817 N.S.W.—Oxley's first exploration inland. Discovery of Lakes George and Bathurst and the Goulburn Plains by Meehan and Hume. First bank in Australia—Bank of New South Wales—opened at Sydney.

1818 N.S.W.—Liverpool Plains, and the Peel, Hastings and Manning Rivers discovered by Oxley, and Port Essington (N.T.) by Captain King.

1819 N.S.W.—First Savings Bank in Australia opened at Sydney.

1820 Tas.—First importation of pure merino sheep from Camden Park (N.S.W.) flocks.

1821 Tas.—Establishment of penal settlement at Macquarie Harbour.

1822 N.S.W.—Formation of Agricultural Society of New South Wales.

1823 N.S.W.—New South Wales Judicature Act passed. Discovery of gold at Fish River by Assistant-Surveyor McBrien. Qld.—Brisbane River discovered by Oxley.

1824 N.S.W.—Constituted a Crown Colony. Executive Council formed. Establishment of Supreme Court at Sydney, and introduction of trial by jury. First Australian Enactment (Currency Bill) passed by the Legislative Council. Proclamation of freedom of the press. First manufacture of sugar. Vic.—Hume and Hovell, journeying overland from Sydney, arrived at Corio Bay. Qld.—Penal settlement founded at Moreton Bay (Brisbane). Fort Dundas Settlement formed at Melville Island, N. Terr.

1825 Tas.—Van Diemen's Land (Tasmania) proclaimed a separate colony. Qld.—Major Lockyer explored Brisbane River to its source and discovered coal.

1826 N.S.W.—Settlement in Illawarra District. Vic.—Settlement at Corinella, Western Port, formed by Captain Wright.

1827 Qld.—Darling Downs and the Condamine River discovered by Allan Cunningham. W.A.—Military settlement founded at King George's Sound by Major Lockyer. First official claim of British Sovereignty over all Australia.

1828 N.S.W.—Second constitution. First Census. Sturt's expedition down Darling River. Gas first used at Sydney. Richmond and Clarence Rivers discovered by Captain Rous. Vic.—Abandonment of settlement at Western Port. Qld.—Cunningham discovered a route from Brisbane to the Darling Downs, and explored Brisbane River.

1829 N.S.W.—Sturt's expedition down Murrumbidgee River. W.A.—Foundation of settlement at Swan River. Foundation of Perth.

1830 N.S.W.—Sturt, voyaging down Murrumbidgee and Murray Rivers, arrived at Lake Alexandrina. Tas.—Black line organized to force aborigines into Tasman's Peninsula, but failed. Small remnant subsequently (1830 to 1835) persuaded to settle on Flinders Island.

1831 N.S.W.—Crown lands first disposed of at auction. Mitchell's explorations north of Liverpool Plains. SS. *Surprise*, first steamship built in Australia, launched at Sydney. First coal shipped from Australian Agricultural Company's workings at Newcastle, N.S.W. First assisted immigration to N.S.W. S.A.—Wakefield's first colonization committee. W.A.—Appointment of Executive and Legislative Councils.

1832 N.S.W.—State Savings Bank established.

1833 N.S.W.—First School of Arts established at Sydney.

1834 N.S.W.—First settlement at Twofold Bay. Vic.—Settlement formed at Portland Bay by Henty Brothers. S.A.—Formation of the South Australian Association. W.A.—Severe reprisals against Murray River natives at Pinjarrab for continued attacks on settlers.

1835 Vic.—John Batman arrived at Port Phillip; foundation of Melbourne.

1836 N.S.W.—Mitchell's overland journey from Sydney to Cape Northumberland. Vic.—Proclamation of Port Phillip district as open for settlement. S.A.—Settlement founded at Adelaide under Governor Hindmarsh.

1837 N.S.W.—Appointment in London of Select Committee on Transportation. Vic.—First overlanders from Sydney arrived at Port Phillip.

1838 N.S.W.—Discontinuance of assignment of convicts. Qld.—Settlement of German missionaries at Brisbane—first free colonists. S.A.—"Overlanding" of cattle from Sydney to Adelaide along the Murray route by Hawdon and Bonney. Settlement at Port Essington, Northern Territory, formed by Captain Bremer.

Year.

1839 N.S.W.—Gold found at Vale of Clwydd by Count Strzlecki. S.A.—Lake Torrens discovered by Eyre. Port Darwin discovered by Captain Stokes. W.A.—Murchison River discovered by Captain Grey.

1840 N.S.W.—Abolition of transportation to New South Wales. Land regulations—proceeds of sales to be applied to payments for public works and expenditure on immigration. Vic.—Determination of northern boundary. Qld.—Penal settlement broken up and Moreton Bay district thrown open. S.A.—Eyre began his overland journey from Adelaide to King George's Sound.

1841 N.S.W.—Gold found near Hartley. W.A.—Completion of Eyre's overland journey from Adelaide to King George's Sound. New Zealand proclaimed a separate colony.

1842 N.S.W.—Incorporation of Sydney. Vic.—Incorporation of Melbourne. S.A.—Discovery of copper at Kapunda.

1843 N.S.W.—First Representative Constitution (under Act of 1842). Qld.—Moreton Bay granted legislative representation as a distinct electoral division.

1844 Qld.—Leichhardt's expedition to Port Essington (N.T.). S.A.—Sturt's last expedition inland.

1845 N.S.W.—Mitchell's explorations on the Barcoo. Qld.—Explorations by Mitchell and Kennedy. S.A.—Discovery of the Burra copper deposits. Sturt discovered Cooper's Creek.

1846 N.S.W.—Initiation of meat-preserving. Qld.—Foundation of settlement at Port Curtis. S.A.—Proclamation of North Australia.

1847 N.S.W.—Iron-smelting commenced near Berrima. Overland mail established between Sydney and Adelaide. Qld.—Explorations by Leichhardt, Burnett and Kennedy.

1848 N.S.W.—National and Denominational School Boards established. Qld.—Leichhardt's last journey. Kennedy speared by the blacks at York Peninsula. Chinese brought in as shepherds.

1849 N.S.W.—Indignation of colonists at arrival of convict ship *Hashemy*. Exodus of population to gold-fields of California. Vic.—*Randolph* prevented from landing convicts. Qld.—Assignation of *Hashemy* convicts to squatters on Darling Downs. W.A.—Commencement of transportation to Western Australia.

1850 N.S.W.—Final abolition of transportation. First sod of first Australian railway turned at Sydney. Sydney University founded. Vic.—Gold discovered at Clunes. Representative government granted. S.A.—Representative government granted. W.A.—Pearl oysters found by Lieut. Helpman at Saturday Island Shoal. Tas.—Representative government granted.

1851 N.S.W.—Payable gold discovered by Hargraves at Lewis Ponds and Summerhill Creek. Vic.—Port Phillip created an independent colony under the name of Victoria. Discovery of gold in various localities. W.A.—Proclamation of Legislative Council Act.

1852 N.S.W.—Arrival of the *Chusan*, first P. and O. mail steamer from England. S.A.—First steamer ascended the Murray River to the junction with the Darling. Tas.—Meeting of first elective Council protested against transportation. Payable gold discovered at The Nook, near Fingal, and at Nine Mile Springs.

1853 Tas.—Abolition of transportation. Vic.—Melbourne University founded.

1854 Vic.—Opening of first Victorian railway—Flinders-street to Port Melbourne. Riots on Ballarat gold-fields. Storming of the Eureka Stockade, 3rd Dec. Telegraph first used.

1855 N.S.W.—Opening of railway—Sydney to Parramatta. Mint opened.

1856 N.S.W.—Pitcairn Islanders placed on Norfolk Island. W.A.—A. C. Gregory's expedition in search of Leichhardt.

Responsible Governments in N.S.W., Vic., S.A. and Tas. (Act of 1855).

1857 N.S.W.—Select Committee on Federation. Vic.—Manhood suffrage and vote by ballot. S.A.—Passage of Torrens' Real Property Act.

1858 N.S.W.—Establishment of manhood suffrage and vote by ballot. Telegraphic communication between Sydney, Melbourne and Adelaide. Qld.—Canoona gold rush.

Population of Australia reached 1,000,000.

Year.

1859 Qld.—Proclamation of Queensland as separate colony. Tas.—First submarine cable, via Circular Head and King Island to Cape Otway.

1860 Vic.—Burke and Wills left Melbourne and crossed to Gulf of Carpentaria. S.A.—Copper discoveries at Wallaroo and Moonta. McDouall Stuart reached centre of continent and named "Central Mount Stuart".

1861 N.S.W.—Anti-Chinese riots at Lambing Flat and Burrangong gold-fields. Opening of first tramway in Sydney. Regulation of Chinese immigration. Vic.—Burke and Wills perished at Cooper's Creek, near Innamincka, S.A.

1862 N.S.W.—Abolition of State aid to religion. Real Property (Torrens) Act passed. S.A.—Stuart crossed the Continent from south to north. W.A.—First export of pearl-shell.

1863 Vic.—Intercolonial Conference at Melbourne. S.A.—Northern Territory taken over. W.A.—Initiation of settlement in the north-west district. Henry Maxwell Lefroy discovered and traversed area now comprised in the Coolgardie-Kalgoorlie gold-field.

1864 Qld.—First sugar made from Queensland cane.

1865 N.S.W.—Destruction by fire of St. Mary's Cathedral, Sydney.

1866 N.S.W.—Passage of Public Schools Act of (Sir) Henry Parkes. S.A.—Introduction of camels for exploration, etc.

1867 Vic.—Imposition of protective tariff. Qld.—Discovery of gold at Gympie.

1868 W.A.—Arrival of the *Hougomont*, last convict ship.

1869 Vic.—Record gold nugget "Welcome Stranger" 2,284 oz. found near Dunolly. W.A.—First telegraph line opened from Perth to Fremantle.

1870 N.S.W.—Intercolonial Exhibition opened at Sydney. Imperial troops withdrawn. Vic.—Intercolonial Congress at Melbourne. S.A.—Commencement of transcontinental telegraph.

1871 N.S.W.—Permanent military force raised. W.A.—Forrest's explorations. Tas.—Discovery of tin at Mount Bischoff.

1872 Vic.—Mint opened. S.A.—Cable from Java to Port Darwin. Completion of transcontinental telegraph line.

1873 N.S.W.—Intercolonial Conference at Sydney. First volunteer encampment. Inauguration of mail service with San Francisco.

1874 N.S.W.—Triennial Parliaments Act passed. Intercolonial Conference. S.A.—University of Adelaide founded. W.A.—John and Alexander Forrest arrived at Overland Telegraph from Murchison.

1875 Qld.—Transfer of Port Albany Settlement to Thursday Island.

1876 N.S.W.—Completion of cable—Sydney to Wellington. W.A.—Giles crossed colony from east to west. Tas.—Death of Truganini, last representative of Tasmanian aborigines.

1877 W.A.—Opening of telegraphic communication with South Australia.
Population of Australia reached 2,000,000.

1878 Qld.—Restriction of Chinese immigration.
Introduction of telephone into Australia.

1879 N.S.W.—First artesian bore at Kallara Station, near Bourke. First steam tramway. W.A.—A. Forrest's explorations in the Kimberley district, and discovery of the Fitzroy pastoral country.

1880 N.S.W.—Public Instruction Act passed. Vic.—First Australian Telephone Exchange opened in Melbourne.
Federal Conference at Melbourne and Sydney.

1881 N.S.W.—Further restrictions on Chinese immigration.
First Australia-wide censuses on same date taken.

1882 W.A.—Nugget of gold found between Roebourne and Cossack.

1883 N.S.W.—Discovery of silver at Broken Hill. Completion of railway between New South Wales and Victoria. Qld.—Annexation of New Guinea—repudiated by Imperial authorities.
Federal Conference held at Sydney. Federal Council created.

1884 Federation Bill passed in Victoria and rejected in New South Wales. British protectorate declared over New Guinea.

Year.	
1885	N.S.W.—Military contingent sent to the Sudan. Opening of the Broken Hill Proprietary Silver Mines. W.A.—Gold found by prospectors on the Margaret and Ord Rivers in the Kimberley district. Tas.—Silver-lead discovered at Mount Zeehan.
1886	Tas.—Discovery of gold and copper at Mount Lyell. First session of Federal Council met at Hobart on 26th January.
1887	W.A.—Gold discovered at Southern Cross. First "Colonial" Conference in London. Australasian Naval Defence Force Act passed.
1888	N.S.W.—Restrictive legislation against Chinese, imposing poll-tax of £100. Qld.—Railway communication opened between Sydney and Brisbane. Conference of Australian Ministers at Sydney to consider question of Chinese immigration First meeting of the Australasian Association for the Advancement of Science held in Sydney.
1889	Qld.—Railway communication established between Brisbane and Adelaide. W.A.—Framing of new Constitution. Tas.—University of Tasmania founded. Population of Australia reached 3,000,000.
1890	W.A.—Responsible Government granted. Meeting at Melbourne of Australasian Federation Conference.
1891	N.S.W.—Arrival of Australian Auxiliary Squadron. Cessation of assisted immigration. W.A.—Discovery of gold on the Murchison. First Federal Convention in Sydney, draft bill framed and adopted.
1892	W.A.—Discovery of gold at Coolgardie.
1893	Financial crisis, chiefly affecting the eastern States.
1894	S.A.—Women's suffrage granted—first State to do so.
1895	N.S.W.—Free-trade tariff. Land and income taxes introduced. Conference of Premiers on Federation at Hobart.
1896	N.S.W.—People's Federal Convention at Bathurst. Vic.—Wages Board system established by Act of Parliament.
1897-8	Sessions of Federal Convention at Adelaide, Sydney and Melbourne.
1898	Draft Federal Constitution Bill submitted to electors in Victoria, New South Wales, South Australia and Tasmania. Requisite statutory number of votes not obtained in New South Wales.
1899	First contingent of Australian troops sent to South Africa. Conference of Premiers in Melbourne to consider amendments to Federal Constitution Bill. Referendum—Bill accepted by New South Wales, Victoria, Queensland, South Australia and Tasmania. First Labour Government (Queensland).
1900	N.S.W.—Old-age pensions instituted. Contingents of naval troops sent to China. Commonwealth Constitution Act received Royal Assent, 9th July. Proclamation of Commonwealth signed, 17th September. Mr. (afterwards Sir) Edmund Barton formed first Federal Ministry.
1901	Proclamation of the Commonwealth at Sydney. First Federal Parliament opened at Melbourne by the Duke of Cornwall and York. Interstate free-trade established.
1902	Completion of Pacific Cable (all-British). First Federal Tariff.
1903	Coolgardie and Kalgoorlie Water Supply Scheme completed. Inauguration of the Federal High Court.
1904	Commonwealth Conciliation and Arbitration Act.
1905	Population of Australia reached 4,000,000. Re-introduction of assisted immigration in New South Wales.
1906	Wireless telegraphy installed between Queenscliff, Vic., and Devonport, Tas. Papua taken over by Commonwealth. Excise Tariff Act imposed duties on agricultural machinery except when manufactured "under conditions as to the remuneration of labour which are declared . . . . to be fair and reasonable . . . ."
1907	First telephone trunk line service between Capital Cities, i.e., Sydney and Melbourne. Imperial Conference in London. Declaration of first basic wage in "Harvester Judgment".
1908	Canberra chosen as site of Australian Capital.

Year.

1909 Imperial Defence Conference in London. Visit of Lord Kitchener to report and advise on Australian military defence. Queensland University founded.

1910 Penny Postage. Arrival of *Yarra* and *Parramatta*, first vessels built for the Royal Australian Navy. Australian Notes Act passed and first Commonwealth notes issued. Admiral Sir R. Henderson visited Australia to advise on naval defence.

1911 First Federal Census. Transfer of Australian Capital Territory and Northern Territory to Commonwealth. Introduction of compulsory military training. University of Western Australia founded.

1912 Opening of Commonwealth Bank. First payments of Maternity Bonus. First sod turned at Port Augusta of Trans-Australian Railway.

1913 Australian Capital named Canberra and foundation stone laid. Appointment of Interstate Commission.

1914 Visit of General Sir Ian Hamilton to report on military defence scheme. Double dissolution of Federal Parliament. Transfer of Norfolk Island to Commonwealth.

European War declared 4th August. Australian Navy transferred to British Navy. Australian offer to equip and furnish 20,000 troops accepted. German possessions in South-West Pacific seized by Australian Naval and Military Expeditionary Force. German cruiser *Emden* destroyed by H.M.A.S. *Sydney* at Cocos Islands, 9th November. First contingent landed in Egypt. Australian and New Zealand Army Corps (A.N.Z.A.C.) formed under Sir William Birdwood.

1915 Opening of Broken Hill Proprietary's Ironworks at Newcastle, N.S.W.

Australian and New Zealand troops landed at Gallipoli, 25th April. Evacuation, 18th–20th December. Australian warships with Grand Fleet.

1916 Purchase of steamships by the Commonwealth.

Australian and New Zealand mounted troops organized in mounted divisions and camel corps, operating thereafter in Egypt, Palestine and Syria. Other troops transferred to France. First proposal for compulsory military service overseas defeated by referendum.

1917 National Ministry formed under Rt. Hon. W. M. Hughes. Transcontinental (Kalgoorlie-Port Augusta) Railway completed.

Australian Flying Corps operating with R.F.C. in Palestine and France.

Second proposal for compulsory military service overseas defeated by referendum.

1918 Population of Australia reached 5,000,000. Australia House (Strand, London) opened by the King.

Five Australian divisions in France formed into army corps, 1st January. Armistice with Germany, 11th November. Repatriation Commission created.

1919 Peace Conference. Return of Australian troops. Flight England to Australia by Capt. (Sir) Ross Smith and Lieut. (Sir) Keith Smith. Peace Treaty signed at Versailles, 28th June.

1920 Visit to Australia of H.R.H. the Prince of Wales. Imperial Statistical Conference in London.

1921 Mandate given to Australia over Territory of New Guinea. First direct wireless press message, England to Australia. Second Federal Census.

1922 First lock on River Murray opened at Blanchetown, South Australia. Queensland Legislative Council abolished.

1923 First sod turned on the site of Federal Parliament House at Canberra.

1924 Directorate of Commonwealth Bank appointed. Australian Loan Council formed.

1925 Population of Australia reached 6,000,000. Solar Observatory established at Canberra.

1926 Council for Scientific and Industrial Research established. Imperial Conference. Dominion Status defined.

1927 Transfer of Seat of Commonwealth Government from Melbourne to Canberra. Beam wireless established.

1928 Financial agreement of Commonwealth and States: State Debts referendum carried.

1929 Commonwealth Bank empowered to mobilize gold reserve. Abolition of peacetime compulsory military training in favour of voluntary system.

Year.

1930 Effects of world-wide severe economic depression felt throughout Australia.

Brisbane–Grafton (N.S.W.) railway, first step towards uniform gauge railway communication between capitals of mainland States, opened. First Australian—Rt. Hon. Sir Isaac Alfred Isaacs, G.C.M.G., Chief Justice of the High Court—appointed Governor-General of Australia.

1931 Depression continues. Initiation of Premiers' Conference plan to meet the financial situation. Commonwealth Bank Act amended to provide for temporary lower reserve against notes. England departed from gold standard. Commonwealth Bank assumed control of exchange rate and lowered it to 125 (previously 130).

1932 Sydney Harbour Bridge opened. Australian Broadcasting Commission established. Legislation passed enabling note reserve to be held in sterling securities. Imperial Economic Conference at Ottawa.

1933 World Economic Conference in London. Secession Referendum carried (Western Australia.) Antarctica and Ashmore and Cartier Islands taken over by the Commonwealth. Third Federal Census.

1934 Inauguration of England-Australia Air Mail Service.

1935 Empire Statistical Conference at Ottawa.

1936 Joint Commonwealth and State Marketing Schemes invalidated by decision of the Privy Council in the James case. Tasmania linked with mainland by submarine telephone cable.

1937 Imperial Conference in London. Report of the Royal Commission on Monetary and Banking Systems in Australia.

1938 New Defence Programme involving expenditure of £63,000,000 over three years. New Trade Treaty with Japan.

1939 Population of Australia reached 7,000,000.

War declared on Germany, 3rd September. Royal Australian Navy placed at disposal of Great Britain. Advance party of Australians embarked for Middle East, 15th December.

1940 Exchange of Ministers between Australia and United States of America marked Australia's entry into field of direct diplomatic representation with countries other than the United Kingdom.

First Australian convoy (6th Australian Division) sailed for Middle East. Cruiser *Sydney* crippled Italian cruiser *Bartolomeo Colleoni*.

1941 Establishment of Commonwealth Child Endowment Scheme. United States Congress passed Lend-Lease Bill.

Arrival of units of Eighth Australian Division in Malaya. Australian destroyers in "Tobruk Ferry Run". *Sydney* lost after fight with *Steiermark*. R.A.A.F. in defence of Britain, in Middle East and at Singapore. Australian forces engaged in Middle East, Greece, Crete and Syria. Japanese attack on Pearl Harbour. Australia declared war on Japan, 9th December.

1942. Federal uniform taxation adopted. Commonwealth widows' pensions introduced. Rationing of commodities.

Japanese landed at Rabaul. Fall of Singapore. Darwin bombed. United States armed forces landed in Australia. Head-quarters of South-west Pacific Command set up by General Douglas MacArthur in Melbourne. Coral Sea Battle. Japanese midget submarines in Sydney Harbour. Australian cruisers in attack on Solomon Islands. Australians withdrew from Kokoda. Japanese forced to withdraw from Milne Bay. Owen Stanley Ranges offensive. Ninth Australian Division at El Alamein (North Africa). Kokoda recaptured. Further Australian successes in New Guinea.

1943 Price Stabilization Scheme. Mortgage Bank Department of Commonwealth Bank opened. National Works Council formed.

Australian forces combined with American forces to recapture many places in New Guinea. Commencement of long series of amphibious operations in which R.A.N. ships took part. R.A.A.F. from 1943 till end of war operated on all fronts.

1944 Pay-as-you-earn taxation operated from 1st July. Referendum refused Commonwealth Government increased powers in post-war period.

Year.

Australian advances in Northern New Guinea. Allied invasion of France. Australians landed on New Britain; took over from Americans in Bougainville, Solomon Islands, and at Aitape, New Guinea.

1945 Captain Cook Dock opened by Governor-General, the Duke of Gloucester. Re-establishment and Employment Act. Banking Act to regulate banking and to protect the currency and public credit. Australia ratified United Nations Charter. General demobilization commenced.

Cessation of hostilities in Europe, 8th May. Cessation of hostilities against Japan, 15th August. Australian forces operating in New Guinea, Solomon Islands and Borneo.

1946 Cessation of man-power controls. Commonwealth Government accepted responsibility for supply and maintenance of BCOF in Japan. Inauguration of Commonwealth Employment Service. United Kingdom and Dominion Wool Disposals Ltd. (Joint Organization) commenced operations. Act to establish National University at Canberra. Coal Industry Act. Commonwealth and State agreement on housing. Commonwealth Trans-Australia Airlines began operations. Constitution Alteration Referendum granted powers in regard to social services to Commonwealth. Double taxation relief agreement between Australia and Britain. Approval for establishment of guided missile range in Central Australia. Reciprocal air transport agreement between Australia and United States of America. Defence (Transitional Provisions) Act. Expiry of National Security Act.

1947 End of demobilization. Post-war defence programme to extend over five years approved. Census of Australia—first since 1933. Full High Court declared invalid section of Banking Act 1945 prohibiting banks from conducting business for State authorities. Legislation to nationalize trading banks enacted (*see* 1948). Australian National Antarctic Research Expedition to establish scientific research station at Heard Island. First "displaced persons" reached Australia.

1948 Forty-hour week effective throughout Australia. Membership of Commonwealth Parliament increased. Constitution Alteration (Rents and Prices) proposal defeated. High Court declared invalid certain vital sections of Banking Act 1947. Professor Marcus L. Oliphant, F.R.S., accepted appointment as Director of Post-Graduate Research School of Physical Sciences at Australian National University. Tuberculosis Act. Opening session of Economic Commission for Asia and Far East at Lapstone (N.S.W.). First display of new Australian-made car, the "Holden". International Trade Organization Act (General Agreement on Tariffs and Trade and Havana Charter for International Trade Organization).

1949 Nationality and Citizenship Act operative. Broadcasting Control Board came into operation. New Guinea placed under international trusteeship and administrative union of Papua and New Guinea established. Certain Australian aborigines for first time granted franchise at Federal elections. Agreement reached on arrangements for increasing meat exports from Australia to United Kingdom (subsequent legislation to assist in facilitating movement of livestock in Australia). Melbourne selected as site for 1956 Olympic Games. Provision in Tasmania for compulsory X-ray examination and treatment of all persons suffering from tuberculosis. Establishment of New South Wales University of Technology. Ratification completed by all Governments concerned of Murray River Agreement for enlarging of Hume Weir. Border River scheme commenced on Dumaresq River. Dispute over claims for 35-hour week, 30s. a week wage increase, and long-service leave rendered all Australian black coal mines idle from 27th June until 15th August, causing restrictions in dependent services and unemployment. Australia ratified International Wheat Agreement. Conciliation and Arbitration Act amended to prevent irregularities in elections for offices in organizations registered under Act. Establishment of Australian Whaling Commission. Liquid fuel importers required by law to hold stocks of fuel for defence needs. Following report on Finance Ministers Conference in

Year.

1949—*contd.* London, Federal Cabinet sub-committee approved 25 per cent. reduction in Australia's imports from dollar areas. Coal Industry Tribunal granted long-service leave to miners throughout Australia—not to be commenced before June, 1954. Devaluation of sterling against American dollar, and commensurate devaluation of Australian pound to two dollars twenty-four cents. Establishment of Immigration Planning Council to assist in assimilation of migrants into industry and the community. Commencement of Snowy Mountains Hydro-electric Power Scheme. Agreement on rail standardization, replacing original agreement of 1946, ratified by Commonwealth and South Australian Governments. Australia's population reached 8,000,000. Balance of Australia's lend-lease debt to United States liquidated by Fullbright Agreement.

1950 Projected commencement announced of uranium production in South Australia. Conference of British Commonwealth Foreign Ministers at Colombo discussed Japanese peace treaty problems. Australian Citizenship Convention to assist in assimilation of migrants opened at Canberra. Petrol rationing abolished for second time since end of war. Melbourne to be declared an international airport. International Labour Office Conference in Sydney on subject of pneumoconiosis. Opening of Nineteenth Commonwealth Parliament. Loan of £625,000 to Burma by Commonwealth Government. Senate and House of Representatives failed to agree on Commonwealth Bank Bill. Severest flooding for twenty-five years in south-east corner of New South Wales. Commonwealth Crimes Act proclaimed to combat rolling strikes on Brisbane water-front. Motion to have New England District made a separate State and to hold referendum rejected in New South Wales Legislative Assembly. Sir Owen Dixon, Justice of High Court, chosen as United Nations mediator for Kashmir dispute. Appointment of first Australian ambassador to United States of Indonesia. Report released of Victorian Royal Commission on origins, aims, objects, funds and activities of Communist Party. Tenders accepted in Victoria for supply of 293 prefabricated school units capable of accommodating 23,000 children. British Consultative Committee meeting in Sydney on ways of assisting development of south and south-east Asia in co-operation with other interested governments. Appointment of first Australian Minister to Philippines. British Government approval of plan to recruit British migrants, including tradesmen, to serve in Australian Regular Army, and afterwards settle in Australia. Australian Dakota Transport Squadron to assist United Kingdom forces in Malaya; later decided to send squadron of heavy bombers also. Sir Thomas Blamey first Australian to be elevated to rank of Field-Marshal. Arrival of Field-Marshal Sir William Slim, Chief of Imperial General Staff, for defence talks. First Minister for Israel in Australia arrived. Abolition of butter rationing. Constitution (Avoidance of Double Dissolution Deadlocks) Bill referred by Senate to a Select Committee. Communist Party Dissolution Bill formally laid aside after failure of Senate and House of Representatives to agree. Disastrous floods on north coast of New South Wales. Crash of airliner *Amana* near Perth, with loss of 28 lives, worst disaster in Australian civil aviation. Following attacks by forces of North Korea on forces of Republic of Korea and failure of Security Council's call for immediate cessation of hostilities, the Council called on members to furnish assistance to Republic of Korea. Australian naval and air forces in vicinity of Korea placed at disposal of United Nations, and decision to withdraw Australian troops with BCOF in Japan countermanded. Scheme of reserve prices for wool to replace existing Joint Organization system enacted (*see* below). Abolition of tea rationing ended retail rationing in Australia. Queensland Government to proceed with plans to build Burdekin Dam and Tully Falls hydro-electric scheme. Arrival of first ambassador for United States of Indonesia. Prime Minister left on visit to London, Washington, Ottawa, Vancouver and New Zealand for discussions on defence, migration and financial matters; negotiated $100,000,000 loan for Australia with International Bank for Reconstruction and Development. Commencement

Year.

1950—*contd.* of new scheme of tuberculosis allowances. Initial force of 1,000 ground troops to be recruited for service in Korea. Validity of Commonwealth wool levy scheme challenged in High Court, but hearing subsequently postponed pending result of referendum of woolgrowers (*see* 1951). Inauguration of modified free medicine scheme, covering 135 expensive drugs, including sulpha drugs, penicillin, insulin and vitamin B. Announcement of King and Queen's intention to carry out their postponed (1949) visit to Australia and New Zealand in 1952, possibly accompanied by the Princess Margaret (*see* 1951). All volunteers in Australian Regular Army and Citizen Military Forces to be liable for service anywhere in the world. Australian ground troops joined British Commonwealth Brigade in Korean conflict. Orders placed by Commonwealth and States for importation of 10,440 prefabricated houses. Opening of drive for recruits to Australian permanent, reserve and part-time forces. Introduction of Commonwealth Bank Bill 1950 (No. 2) in House of Representatives (referred to Select Committee 14th March, 1951). Adult franchise for Victorian Legislative Council replaced existing franchise dependent on property qualifications. Commonwealth Court of Conciliation and Arbitration ruling of increase of £1 in male basic wage, and increase in female basic wage from 54 to 75 per cent. of male rate. Railway dispute caused cessation of railway services in Victoria from 16th October to 8th December, and in South Australia from 23rd October to 19th November. Communist Party Dissolution Bill 1950 (No. 2) assented to. Validity of Act challenged in High Court (declared invalid on 9th March, 1951). "Food for Britain" Fund closed after five years of existence, after despatch of 12,000 tons of food. Agreement to bring 25,000 Dutch migrants to Australia in 1951 and larger numbers in future years. National Service Bill to establish a system of national training for defence forces of Australia introduced in House of Representatives—provides for compulsory registration and call-up at 18 years of age of all male British and certain non-British subjects resident in Australia (Act assented to 17th March, 1951). Volunteers in Australian Citizen Military Forces to be liable for oversea service only in the event of a major war. Scheme for pre-emption of 100,000,000 lb. of wool for military reserve for United States of America declared impracticable at present. National Security Resources Board appointed to advise Government on best use of Australia's resources in interests of national security. Act to provide Commonwealth assistance to States to enable them to supply free milk to school children. Defence (Transitional Provisions) Act extending for one year a number of national security regulations and orders. Commonwealth Government to contribute £31,250,000 to Colombo Plan for Co-operative Economic Development in South and South-east Asia and £3,500,000 for technical assistance programme. Five-year migration agreement with Italy under which not more than 15,000 Italians will enter Australia in initial period of operation. Conference of Commonwealth Prime Ministers in London.

1951 Opening of Jubilee celebrations to mark the fiftieth year of Australian federation. Violent eruption of Mt. Lamington in Papua, in which 35 Europeans and about 2,000 Papuans perished. Meeting of Governors of central banks of Australia, Ceylon, Ireland, New Zealand, Pakistan, South Africa and the United Kingdom to discuss general banking problems and the international economic situation. British Government's confirmation of transfer of Heard Island and the Macdonald Islands (Southern Indian Ocean) to Australia as from 26th December, 1947. Arrival in Canberra of President's Truman's special Envoy, Mr. John Foster Dulles, for talks on a Japanese peace treaty. Death of Professor L. F. Giblin, D.S.O., M.C., noted Australian economist. Governor-General granted double dissolution of nineteenth Parliament on the grounds that the Senate had "failed to pass" the Commonwealth Bank Bill. (*See* 1950). Survey flight to Chile by Captain P. G. Taylor. Chief Justice of the High Court of Australia, Sir John Latham, retired from active duty. Return of Menzies–Fadden Government after general election following

Year.

1951—*contd.* double dissolution (*see* above). Death of Very Reverend John Flynn, "Flynn of the Inland", who was largely responsible for "Flying Doctor" services and the accompanying system of radio communication. First wool from Hallstrom Live-stock Experimental Station, New Guinea, auctioned at Sydney wool sales. Death of Field-Marshal Sir Thomas Blamey (*see* 1950). The Governor-General opened the twentieth Parliament with special Jubilee ceremonies. Death of the Leader of the Federal Opposition, and former Prime Minister and Treasurer, the Rt. Hon. J. B. Chifley. Official cessation of hostilities with Germany. Large upward adjustments in federal basic wage (13s. in six capital cities average). Defence Preparations Act to adjust the nation's economy to meet the threat of war. Final liquidation of the stock of the United Kingdom—Dominion Wool Disposals Ltd. (Joint Organization). Conference of representatives of the Commonwealth and State Governments, employers and trade unions, and other sections of the community, called by the Prime Minister to discuss means of combating inflation. First youths to receive call-up notices under National Service Act 1951 commenced training. Royal Commission to inquire into hotel control, operation of Liquor Act, and distribution of liquor in New South Wales. The Governor of the Commonwealth Bank, the heads of commercial banks and the Secretary to the Treasury in conference called by the Prime Minister to discuss bank credit policy. General financial and investment policy considered at conference between the Government and representatives of insurance companies. Loan Council approved a rise in the long-term bond rate from 3⅛ per cent. to 3¾ per cent. to apply to Thirteenth Security Loan. Woolgrowers at a referendum rejected the proposal for a reserve price plan for wool (*see* 1950). Prices at new season's (August) wool auctions in Sydney 25 per cent. below those of June. Security Treaty signed in Washington by the United States of America, Australia and New Zealand for action in the event of an armed attack in the Pacific. Arrival at Port Kembla of first shipment of iron ore from Yampi Sound, Western Australia. Japanese Peace Treaty signed at San Francisco by 49 nations, including Australia. Constitution Alteration (Powers to deal with Communists and Communism) referendum resulted in a decision against the proposed Act. Extensive bushfires during October in Queensland, Northern Territory and northern New South Wales. Australia to provide an additional infantry battalion for United Nations forces in Korea. The Prime Minister announced that Australia would spend about £700,000,000 on defence during the next three years. Announcement of intended visit in 1952 of Princess Elizabeth and the Duke of Edinburgh to Australia and New Zealand in place of the King and Queen.* Further large upward adjustments (*see* above) in federal basic wage—11s. for six capital cities average. The Governor-General, the Right Honorable W. J. McKell, K.C., created Knight Grand Cross of the Order of St. Michael and St. George. Third Conference of Government Statisticians of the British Commonwealth, held in Canberra. Opening of new Legislative Council of Papua and New Guinea, which included, for the first time in the history of Australian Legislature, representatives of the native peoples. New mace presented to the House of Representatives by a delegation from the House of Commons, to commemorate the Jubilee of the Australian Commonwealth. Serious bushfires in Blue Mountains, New South Wales. Act to re-establish Commonwealth Joint Parliamentary Committee of Public Accounts.

---

* This visit was cancelled following the death, on 6th February, 1952, of His Majesty King George VI.

OFFICIAL YEAR BOOK

OF THE

COMMONWEALTH OF AUSTRALIA.

CHAPTER I.

DISCOVERY, COLONIZATION AND FEDERATION OF AUSTRALIA.

§ 1. Early Knowledge and Discovery of Australia.

1. **Introduction.**—Only a brief summary of the more important facts relating to the early history of Australian discovery is given in this Chapter. A more complete account of this subject, together with bibliographical references thereto, may be found in Official Year Book No. 1 (pp. 45–51), although this account must be modified somewhat in view of later investigations.

2. **Early Tradition.**—It would appear that there was an early Chaldean tradition as to the existence of an Austral land to the south of India. Rumours to that effect in the course of time found their way to Europe, and were probably spread by travellers from Indian seas, more especially by the Greek soldiers who accompanied Alexander the Great (356–323 B.C.) to India. References to this *Terra Australis* are found in the works of Ælianus (A.D. 205–234), Manilius (probably a contemporary of Augustus or Tiberius Cæsar), and Ptolemy (A.D. 107–161). In some of the maps of the first period of the Middle Ages there is evidence which might warrant the supposition of the knowledge of the existence of a *Terra Australis*, while some idea of the Austral land appears in the maps and manuscripts of the fourteenth and fifteenth centuries. But much of the map-drawing in these early days was more or less fanciful, and there is no evidence definitely connecting this so-called *Terra Australis* with Australia.

3. **Discovery of Australia.**—(i) *General.* The Venetian traveller Marco Polo (1254–1324) refers to a land called Locac, which through a misunderstanding of his meaning was long thought to be Australia. But Marco Polo knew nothing of any land to the south of Java, and in any case the description given of the so-called Locac could not possibly be applied to Australia, as the writer speaks of elephants, etc. On a Mappamundi in the British Museum, of not later date than 1489, there is a coast-line which has been considered to represent the west coast of Australia. Investigation by Wood and others proves this claim to be merely fanciful. Martin Behaim's globe, the oldest known globe extant, constructed in 1492, also shows what purports to be a part of Australia's coast-line, and a globe discovered in Paris bears an inscription to the effect that the *Terra Australis* was discovered in 1499. These also have other countries located in impossible positions. The term *Terra Australis* was, however, also applied to the region now known as Tierra del Fuego, hence little weight can be attached to this reference.

In the Dauphin map (about 1530–1536) Java la Grande has been supposed by some to represent Australia, but an inspection of the unreal animals and other figures thereon lends no weight to the idea. As a matter of fact, much of this map drawing was simply an attempt to support the old notion that the land surface of the southern hemisphere must balance that of the northern.

(ii) *Arab Expeditions.* It has been stated that the Arabs had come to Australia long before the Portuguese, the Spaniards or the Dutch, but there is no evidence to support the statement.

(iii) *Spanish and Portuguese Expeditions.* The last decade of the fifteenth century and the commencement of the sixteenth saw numerous expeditions equipped in the ports of Spain and Portugal for the purpose of exploiting the new world. The Portuguese rounded the Cape of Good Hope in 1487 and eleven years later pushed eastward to India. The Spaniards, relying on the scientific conclusion that the world was spherical, attempted to get to the East by deliberately starting out west, Magalhaens by so doing reaching the Philippine Islands in 1521.

In 1606 Quiros, on reaching the island that has retained the name of Espiritu Santo (the largest island of the New Hebrides group), thought that he had discovered the great land of the south, and therefore named the group *La Australia del Espiritu Santo.* After leaving the New Hebrides, Quiros sailed eastward, but Torres, his second-in-command, took a westerly course and passed through the strait that now bears his name. In all probability he sighted the Australian Continent, but no mention is made of this fact in his records. This voyage marks the close of Spanish activity in the work of discovery in the South Seas.

(iv) *Discoveries by the Dutch.* With the decline of Portuguese and Spanish naval supremacy came the opportunity of the Dutch for discovery. Cornelius Wytfliet's map, of which there was an English edition, published in Louvain in 1597, indicates roughly the eastern and western coasts of Australia, as well as the Gulf of Carpentaria. The following oft-quoted passage occurs in Wytfliet's *Descriptionis Ptolemaicae Augmentum:* "The *Australis Terra* is the most southern of all lands. It is separated from New Guinea by a narrow strait. Its shores are hitherto but little known, since after one voyage and another, that route has been deserted and seldom is the country visited, unless when sailors are driven there by storms. The *Australis Terra* begins at one or two degrees from the equator, and is maintained by some to be so great in extent that, if it were thoroughly explored, it would be regarded as a fifth part of the world." According to Wood this passage has its origin in the voyages through the Straits of Magellan and the discovery of Tierra del Fuego rather than that of Australia.

The Dutch discovered Australia when the Dutch East India Company sent the *Duyfken* from Bantam to explore the islands of New Guinea. During March, 1606 the *Duyfken* coasted along the southern shores of New Guinea, and followed the west coast of Cape York peninsula as far as Cape Keer-Weer (Turn Again). Dirck Hartogs (on the plate in the Amsterdam Museum recording his voyage the name is written Dirck Hatichs), in the *Eendracht* in 1616, sailed along a considerable part of the west coast of the continent. It may be mentioned that the route was not definitely selected, but that the navigator simply went farther east than the usual course from the Cape to Java.

In 1618 the *Zeewolf* found land in latitude 20° 15′ south, and in the following year Frederik Houtman discovered the reef of the west coast, now known as *Houtman's Abrolhos.*

In 1622 the Dutch vessel *Leeuwin* rounded the Cape, which now bears that name, at the south-west of the continent, and in 1623 the Dutch vessels *Pera* and *Arnhem* discovered Arnhem Land, the peninsula on the western side of the Gulf of Carpentaria, which was so named in compliment to Peter Carpentier, Governor of the Dutch East India Company.

In 1627 Francis Thysz, Commander of the *Gulde Zeepaerd,* with Pieter Nuyts of the Dutch Council of Seventeen on board, coasted along a portion of the shore of the Great Australian Bight. In 1628 De Witt, Commander of the *Vianen,* discovered land on the north-west, namely, in about latitude 21° S. The *Batavia,* commanded by Francis Pelsart, was wrecked on the western coast of Australia in 1629. Pelsart was the first to carry to Europe an authentic account of the west coast of Australia, which, however, be described in the most unfavourable terms. The yachts *Amsterdam* and *Wesel,* under Gerrit Pool, visited the Gulf of Carpentaria in 1636.

Abel Janszoon Tasman, in command of two vessels, the *Heemskerck* and *Zeehan,* set out from Batavia in 1642 to ascertain the extent of the great southern continent. He named Van Diemen's Land, imagining it to be part of Australia proper, and sailing north-easterly discovered New Zealand and returned to Batavia. In his second voyage in 1644 Tasman visited the northern coast of Australia, sailing round the Gulf of Carpentaria and along the north-west coast as far down as the tropic of Capricorn.

William de Vlamingh landed at the mouth of the Swan River at the end of 1696 and an exploring squadron under Martin Van Delft explored and named part of the north-west coast in 1705, but the period of Dutch discoveries may be said to have ended with Tasman's second voyage, and, with the decline of her maritime power, the Dutch interest in Australian discovery disappeared.

4. **Discoveries by the English.**—In the meantime the English had made their first appearance on the Australian coast in 1688, when the north-westerly shores were visited by William Dampier, as supercargo of the *Cygnet*, a trading vessel whose crew had turned buccaneers. In describing the country, Dampier stated that he was certain that it joined neither Asia, Africa nor America. In 1699 he again visited Australia, in command of H.M.S. *Roebuck*, and on his return to England published an account in which a description is given of trees, flowers, birds and reptiles observed, and of encounters with natives.

It was a question at the end of the seventeenth century whether Tasmania and New Zealand were parts of Australia, or whether they were separated from it, but themselves formed part of a great Antarctic Continent. Lieutenant James Cook's first voyage, though primarily undertaken for the purpose of observing the transit of Venus from Otaheite, had also for its objective to ascertain whether the unexplored part of the southern hemisphere was only an immense mass of water or contained another continent. In command of H.M.S. *Endeavour*, a barque of 370 tons burden, carrying about 85 persons, and accompanied by Sir Joseph Banks, Dr. Solander the naturalist, Green the astronomer, draughtsmen and servants, Cook, after observing the transit of Venus at Otaheite, turned towards New Zealand, sighting that land on 7th October, 1769 in the neighbourhood of Poverty Bay. Circumnavigating the North and South Islands, he proved that New Zealand was connected neither with the supposed Antarctic Continent nor with Australia, and took formal possession thereof in the name of the British Crown. On 20th April, 1770, at 6 a.m., Cook sighted the Australian mainland at a place he called Point Hicks, naming it after his first-lieutenant, who first saw it. Coasting northwards, Botany Bay was discovered on 29th April, 1770. The *Endeavour* dropped anchor and Cook landed on the same day. Cook sailed along the coast in a northerly direction for nearly 1,300 miles until 11th June, 1770, when the *Endeavour* was seriously damaged by striking a coral reef in the vicinity of Trinity Bay. Repairs occupied nearly two months, and the *Endeavour* then again set her course to the north, sailing through Torres Strait and anchoring in the Downs on 13th July, 1771. In 1772 Cook was put in command of the ships *Resolution* and *Adventure*, with a view to ascertaining whether a great southern continent existed. Having satisfied himself that, even if it did, it lay so far to the south as to be useless for trade and settlement, he returned to England in 1774. Cook's last voyage was undertaken in 1776, and he met his death on 14th February, 1779, by which date practically the whole coast of Australia had been explored. The only remaining discovery of importance was the existence of a channel between Tasmania and Australia. This was made by Flinders and Bass in 1798.

§ 2. The Annexation of Australia.

1. **Annexation of Eastern Part of Australia, 1770.**—Although representatives of the nations mentioned in the previous section landed or claimed to have landed on the shores of Australia on various occasions during the sixteenth and seventeenth centuries, it was not until 23rd August, 1770 that the history of Australia was brought into definite political connexion with Western civilization. It was on that date that Captain Cook took possession "of the whole eastern coast, from latitude 38° to this place, latitude $10\frac{1}{2}°$ S., in right of His Majesty King George the Third." Cook, however, proclaimed British sovereignty over only what are now the eastern parts of New South Wales and Queensland, and formal possession, on behalf of the British Crown, of the whole of the eastern part of the Australian continent and Tasmania was not taken until 26th January, 1788. It was on this last date that Captain Phillip's commission, first issued to him on 12th October, 1786, and amplified on 2nd April, 1787, was read to the people whom he had brought with him in the "First Fleet."

A full historical account of the period referred to may be found in the *Historical Records of New South Wales* Vol. I., parts 1 and 2.

2. **Original Extent of New South Wales.**—The commission appointed Phillip "Captain-General and Governor-in-Chief in and over our territory called New South Wales, extending from the Northern Cape or extremity of the coast called Cape York, in the latitude of ten degrees thirty-seven minutes south, to the southern extremity of the said territory of New South Wales or South Cape, in the latitude of forty-three degrees thirty-nine minutes south, and of all the country inland westward as far as the one hundred and thirty-fifth degree of east longitude reckoning from the meridian of Greenwich, including all the islands adjacent in the Pacific Ocean within the latitudes aforesaid of ten degrees thirty-seven minutes south and forty-three degrees thirty-nine minutes south."

Although in November, 1769 Captain Cook had taken possession of the North Island of New Zealand, and in January, 1770 also of the South Island, it is a matter of doubt whether, at the time when Captain Phillip's commission was drawn up, New Zealand was considered as one of the "islands adjacent in the Pacific Ocean." The facts that under the Supreme Court Act (Imperial) of 1823 British residents in New Zealand were brought under the jurisdiction of the Court at Sydney, while in 1839 there was a proposal on the part of the British Government to appoint a consul in New Zealand, would leave this an open question, as nothing more than extra-territorial jurisdiction may have been intended. Various hoistings of flags notwithstanding, New Zealand does not appear to have unequivocally become British territory until 1840. In that year, on 29th January, Captain Hobson arrived at the Bay of Islands. On the following day he read the commission, which extended the boundaries of the Colony of New South Wales so as to embrace and comprehend the islands of New Zealand. On 5th February the Treaty of Waitangi, made with the native chiefs, was signed. Finally, on 21st May, British sovereignty over the islands of New Zealand was explicitly proclaimed.

3. **Extension of New South Wales Westward, 1825.**—On 17th February, 1824 Earl Bathurst advised Sir Thomas Brisbane that he had recommended to His Majesty the dispatch of a ship of war to the north-west coast of New Holland for the purpose of taking possession of the coast between the western coast of Bathurst Island and the eastern side of Coburg Peninsula. Captain James J. Gordon Bremer of H.M.S. *Tamar*, who was selected for the purpose, took possession on 20th September, 1824 of the coast from the 135th to the 129th degree of east longitude. On 16th July, 1825 the whole territory between those boundaries was described in Darling's commission as being within the boundaries of New South Wales, thus increasing its area by 518,134 square miles, and making it, including New Zealand and excluding Tasmania, 2,076,308 square miles, or also excluding New Zealand, 1,972,446 square miles.

4. **Annexation of Western Australia, 1827.**—An expedition under Major Lockyer, sent by Lieutenant-General Sir Ralph Darling, then Governor of New South Wales, to found a settlement at King George III. Sound, sailed from Sydney on 9th November, 1826, landed at the Sound on 26th December following, and hoisted the British flag. Captain Stirling, in command of H.M.S. *Success*, arrived at Sydney a few weeks after the departure of the expedition to King George's Sound. He obtained the Governor's permission to visit Swan River with a view to seizing a position on the western coast and reporting upon its suitability as a place of settlement. Captain Stirling left Sydney on 17th January, 1827, and on his return in the following April submitted a glowing report on what he described as a "rich and romantic country," urging its occupation for the purpose of settlement. He left for England in July, 1827, continuing his advocacy—notwithstanding much discouragement—with unabated enthusiasm. He was at last successful, the result being mainly due to the formation of an association of prospective settlers having capital at their disposal. He was appointed Lieutenant-Governor and with a party of settlers arrived at Garden Island, near the Swan River,

in the ship *Parmelia* in June, 1829. On the 2nd of the preceding month Captain Fremantle, in command of H.M.S. *Challenge*, arrived and hoisted the British flag on the south head of Swan River, again asserting possession of "all that part of New Holland, which is not included within the territory of New South Wales." Thus, before the middle of 1829, the whole territory now known as the Commonwealth of Australia had been constituted a dependency of the United Kingdom.

§ 3. The Creation of the Several Colonies.

1. **New South Wales.**—In Governor Phillip's commission of 1786 the mainland of Australia was divided by the 135th meridian of east longitude into two parts. The earliest colonists believed that the present State of Tasmania was actually joined to the mainland, and it was not till 1798 that the contrary was known. In that year, by sailing through Bass Strait, Flinders and Bass proved that it was an island. The territory of New South Wales, as originally constituted, and of New Zealand, which may be included although Cook's annexation was not properly given effect to until 1840, consisted of 1,584,389 square miles. A further area of 518,134 square miles was added in 1825, when the western boundary was extended to the 129th meridian. The territory was subsequently reduced by the separation of various areas to form the other colonies, and at the time of the establishment of the Commonwealth the area of New South Wales was 310,372 square miles.

2. **Tasmania.**—In 1825 Van Diemen's Land, as Tasmania was then called, was politically separated from New South Wales, being constituted a separate colony on 14th June of that year. The area of the colony was 26,215 square miles.

3. **Western Australia.**—The territory westward of the 129th meridian comprising 975,920 square miles was constituted a colony under the name of Western Australia in June, 1829. It was always distinct and independent of New South Wales, though until 1831 the settlement on King George's Sound remained under the latter jurisdiction.

4. **South Australia.**—On 15th August, 1834 the Act 4 and 5 William IV., cap. 95, was passed, creating South Australia a "province," and towards the end of the year 1836 settlement took place. The first Governor, Captain Hindmarsh, R.N., arrived at Holdfast Bay on 28th December, 1836, and on the same day the new colony was officially proclaimed. The new colony embraced 309,850 square miles of territory, lying south of the 26th parallel of south latitude, and between the 141st and 132nd meridians of east longitude. On 10th December, 1861, by the authority of the Imperial Act 24 and 25 Vic., cap. 44, the western boundary of South Australia was extended to coincide with the eastern boundary of Western Australia, namely, the 129th meridian. The area of the extension was approximately 70,220 square miles. Nearly two years later, on 6th July, 1863, the Northern Territory comprising 523,620 square miles was, by letters patent, brought under the jurisdiction of South Australia, which therefore controlled an area of 903,690 square miles.

5. **New Zealand.**—New Zealand, nominally annexed by Captain Cook and formally declared by proclamation in 1840 as a dependency of New South Wales, was, by letters patent of 16th November of that year, constituted a separate colony under the powers of the Act 3 and 4 Vic., cap. 62, of 7th August, 1840. Proclamation of the separation was made on 3rd May, 1841. The area of the colony was 103,862 square miles.

6. **Victoria.**—In 1851 what was known as the "Port Phillip District" of New South Wales was constituted the colony of Victoria, "bounded on the north and northwest by a straight line drawn from Cape Howe to the nearest source of the River Murray and thence by the course of that river to the eastern boundary of the colony of South Australia." The area of the new colony was 87,884 square miles, and its separate existence took effect from 1st July, 1851, upon the issuing of the writs for the first election of elective members of the Legislative Council.

7. **Queensland.**—The northern squatting districts of Moreton, Darling Downs, Burnett, Wide Bay, Maranoa, Leichhardt and Port Curtis, together with the reputed county of Stanley, were granted an independent administration and formed into a distinct colony under the name of Queensland by letters patent dated 6th June, 1859, although separation from New South Wales was not consummated until 10th December of the same year, upon the assumption of office of the first Governor. The

territory comprised in the new colony was so much of the colony of New South Wales as lies northwards of a line commencing on the sea-coast at Point Danger in latitude about 28° 8′ south, running westward along the Macpherson and Dividing Ranges and the Dumaresq River to the MacIntyre River, thence downward to the 29th parallel of south latitude, and following that parallel westerly to the 141st meridian of east longitude, which is the eastern boundary of South Australia, together with all the adjacent islands, their members, and appurtenances in the Pacific Ocean. The area of the colony thus constituted was 554,300 square miles. By letters patent dated 13th March, 1861, forwarded by the Colonial Secretary to the Governor of Queensland on 12th April, 1862, the area of Queensland was increased by the annexation of "so much of the colony of New South Wales as lies to the northward of the 26th parallel of south latitude, and between the 141st and 138th meridians of east longitude, together with all and every the adjacent islands, their members, and appurtenances, in the Gulf of Carpentaria." With this addition the area of Queensland became 670,500 square miles.

§ 4. Establishment of the Commonwealth of Australia.

1. **General.**—On 1st January, 1901 the colonies mentioned, with the exception of New Zealand, were federated under the name of the "Commonwealth of Australia," the designation of "Colonies"—except in the case of the Northern Territory, to which the designation "Territory" is applied—being at the same time changed into that of "States." The total area of the Commonwealth of Australia is 2,974,581 square miles. The dates of creation and the areas of its component parts, as determined on the final adjustment of their boundaries, are shown below :—

THE COMMONWEALTH OF AUSTRALIA : AREA, ETC., OF COMPONENT PARTS.

State.	Year of Formation into Separate Colony.	Present Area in Square Miles.	State.	Year of Formation into Separate Colony.	Present Area in Square Miles.
New South Wales(a)	1786	310,372	Tasmania ..	1825	26,215
Victoria ..	1851	87,884	Northern Territory	1863	523,620
Queensland ..	1859	670,500			
South Australia ..	1834	380,070	Area of the Commonwealth ..	..	2,974,581
Western Australia	1829	975,920			

(a) Includes the Australian Capital Territory embracing an area of 911 square miles, and 28 square miles at Jervis Bay. *See* par. 3 below.

2. **Transfer of the Northern Territory to the Commonwealth.**—On 7th December, 1907 the Commonwealth and the State of South Australia entered into an agreement for the surrender to and acceptance by the Commonwealth of the Northern Territory, subject to approval by the Parliaments of the Commonwealth and the State. This approval was given by the South Australian Parliament under the Northern Territory Surrender Act 1907 (assented to on 14th May, 1908), and by the Commonwealth Parliament under the Northern Territory Acceptance Act 1910 (assented to on 16th November, 1910). The Territory was formally transferred to the Commonwealth on 1st January, 1911, and became the Northern Territory of Australia.

3. **Transfer of the Australian Capital Territory to the Commonwealth.**—On 18th October, 1909 the Commonwealth and the State of New South Wales entered into an agreement for the surrender to and acceptance by the Commonwealth of an area of 911 square miles as the seat of Government of the Commonwealth. In December, 1909 Acts were passed by the Commonwealth and New South Wales Parliaments approving the agreement, and on 5th December, 1910 a proclamation was issued vesting the Territory in the Commonwealth on and from 1st January, 1911. By the Jervis Bay Territory Acceptance Act 1915, an area of 28 square miles at Jervis Bay, surrendered by New South Wales according to an agreement made in 1913, was accepted by the Commonwealth, and was transferred as from 4th September, 1915.

4. **Transfer of British New Guinea or Papua.**—Under the administration of the Commonwealth, but not included in it, is British New Guinea or Papua, finally annexed by the British Government in 1884. This Territory was for a number of years administered by the Queensland Government, but was transferred to the Commonwealth by proclamation on 1st September, 1906, under the authority of the Papua Act (Commonwealth) of 16th November, 1905. The area of Papua is about 90,540 square miles.

5. **Transfer of Norfolk Island.**—Although administered for many years by the Government of New South Wales, this Island was a separate Crown Colony until 1st July, 1914, when it was transferred to the Commonwealth under the authority of the Norfolk Island Act 1913. The Island is situated in latitude 29° 3′ 45″ S. longitude 167° 56′ 29″ E., and comprises an area of 8,528 acres.

6. **Territory of New Guinea.**—In 1919 it was agreed by the Principal Allied and Associated Powers that a mandate should be conferred on Australia for the government of the former German territories and islands situated in latitude between the Equator and 8° S., and in longitude between 141° E. and 159° 25′ E. The mandate was issued by the League of Nations on 17th December, 1920. The Governor-General of the Commonwealth was authorized to accept the mandate by the New Guinea Act 1920, which also declared the area to be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea. The Territory comprises about 93,000 square miles, and the administration under the mandate dated from 9th May, 1921. New Guinea is now administered under Trusteeship Agreement with the United Nations, approved 13th December, 1946. For further particulars *see* Chapter X.—The Territories of Australia.

7. **Nauru.**—In 1919 the Governments of the United Kingdom, Australia and New Zealand entered into an agreement to make provision for the exercise of the mandate conferred on the British Empire for the administration of the island of Nauru, and for the mining of the phosphate deposits thereon. The island is situated in latitude 0° 32′ south of the Equator and longitude 166° 55′ east of Greenwich, and comprises about 5,263 acres. The agreement provided that the administration of the island should be vested in an administrator, the first appointment to be made by the Commonwealth Government, and thereafter in such manner as the three Governments decided. The agreement was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919, and a supplementary agreement of 30th May, 1923, giving the Government immediately responsible for the administration greater powers of control over the Administrator, was approved in 1932. The administration under the mandate has operated from 17th December, 1920, and so far the administrators have been appointed by the Commonwealth Government. As with the Territory of New Guinea, Nauru is now administered under Trusteeship Agreement with the United Nations.

8. **Territory of Ashmore and Cartier Islands.**—By Imperial Order in Council, dated 23rd July, 1931, Ashmore Islands, known as Middle, East and West Islands, and Cartier Island, situated in the Indian Ocean off the North-west Coast of Australia, were placed under the authority of the Commonwealth. The Islands were accepted by the Commonwealth in the Ashmore and Cartier Islands Acceptance Act 1933 under the name of the Territory of Ashmore and Cartier Islands and were transferred on 10th May, 1934. The Act authorized the Governor of Western Australia to make ordinances having the force of law in and in relation to the Territory. An amendment to the 1933 Act in July, 1938 annexed the Islands to the Northern Territory, whose laws, ordinances and regulations, wherever applicable, thereupon applied.

9. **Australian Antarctic Territory.**—An Imperial Order in Council of 7th February, 1933 placed under Australian authority "all the islands and territories other than Adélie Land which are situated south of the 60th degree of South Latitude and lying between the 160th degree of East Longitude and the 45th degree of East Longitude."

The Order came into force with a proclamation issued by the Governor-General on 24th August, 1936, after the Commonwealth Parliament had passed the Australian Antarctic Territory Acceptance Act on 13th June, 1933. The boundaries of Adélie Land were definitely fixed by a decree of 1st April, 1938 as latitude 60° S., longitude 136° E. and longitude 142° E.

10. **Macquarie Island and Heard Island.**—Macquarie Island, about 1,000 miles south-east of Hobart, has been a dependency of Tasmania since the nineteenth century. Heard Island, about 2,500 miles south-west of Fremantle, was transferred from United Kingdom to Australian control as from 26th December, 1947.

§ 5. The Exploration of Australia.

A fairly complete, though brief, account of the exploration of Australia was given in Official Year Book No. 2 (pp. 20–39), and a summary of the more important facts relating to the subject was embodied in this Chapter in succeeding issues up to and including No. 22.

§ 6. The Constitutions of the States and of the Commonwealth.

1. **General.**—Information regarding the development of the Constitutions of the various Colonies (now States), together with a brief history of the Federal movement in Australia, was embodied in this Chapter in issues of the Official Year Book up to No. 22.

2. **Commonwealth Constitution Act.**—The Commonwealth of Australia Constitution Act, 63 and 64 Vict., Chapter 12, namely : "An Act to constitute the Commonwealth of Australia," as amended by the Constitution Alteration (Senate Elections) 1906, the Constitution Alteration (State Debts) 1909, the Constitution Alteration (State Debts) 1928, and the Constitution Alteration (Social Services) 1946, is given *in extenso* hereunder, and the text contains all the alterations of the Constitution which have been made up to and including 31st July, 1951.

THE COMMONWEALTH OF AUSTRALIA CONSTITUTION ACT,
63 & 64 VICT., CHAPTER 12.

An Act to constitute the Commonwealth of Australia. [9th July, 1900.]

WHEREAS the people of New South Wales, Victoria, South Australia, Queensland and Tasmania, humbly relying on the blessing of Almighty God, have agreed to unite in one indissoluble Federal Commonwealth under the Crown of the United Kingdom of Great Britain and Ireland, and under the Constitution hereby established :

And whereas it is expedient to provide for the admission into the Commonwealth of other Australasian Colonies and possessions of the Queen :

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :—

1. This Act may be cited as the Commonwealth of Australia Constitution Act.

2. The provisions of this Act referring to the Queen shall extend to Her Majesty's heirs and successors in the sovereignty of the United Kingdom.

3. It shall be lawful for the Queen, with the advice of the Privy Council, to declare by proclamation that, on and after a day therein appointed, not being later than one year after the passing of this Act, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also, if Her Majesty is satisfied that the people of Western Australia have agreed thereto, of Western Australia, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia. But the Queen may, at any time after the proclamation, appoint a Governor-General for the Commonwealth.

4. The Commonwealth shall be established, and the Constitution of the Commonwealth shall take effect, on and after the day so appointed. But the Parliaments of the several colonies may at any time after the passing of this Act make any such laws, to come into operation on the day so appointed, as they might have made if the Constitution had taken effect at the passing of this Act.

5. This Act, and all laws made by the Parliament of the Commonwealth under the Constitution, shall be binding on the courts, judges, and people of every State and of every part of the Commonwealth, notwithstanding anything in the laws of any State ; and the laws of the Commonwealth shall be in force on all British ships, the Queen's ships of war excepted, whose first port of clearance and whose port of destination are in the Commonwealth.

6. "The Commonwealth" shall mean the Commonwealth of Australia as established under this Act.

"The States" shall mean such of the colonies of New South Wales, New Zealand, Queensland, Tasmania, Victoria, Western Australia, and South Australia, including the northern territory of South Australia, as for the time being are parts of the Commonwealth, and such colonies or territories as may be admitted into or established by the Commonwealth as States; and each of such parts of the Commonwealth shall be called "a State."

"Original States" shall mean such States as are parts of the Commonwealth at its establishment.

7. The Federal Council of Australasia Act, 1885, is hereby repealed, but so as not to affect any laws passed by the Federal Council of Australasia and in force at the establishment of the Commonwealth.

Any such law may be repealed as to any State by the Parliament of the Commonwealth, or as to any colony not being a State by the Parliament thereof.

8. After the passing of this Act the Colonial Boundaries Act, 1895, shall not apply to any colony which becomes a State of the Commonwealth; but the Commonwealth shall be taken to be a self-governing colony for the purposes of that Act.

9. The Constitution of the Commonwealth shall be as follows:—

THE CONSTITUTION.

This Constitution is divided as follows:—

Chapter I.—The Parliament:
    Part I.—General:
    Part II.—The Senate:
    Part III.—The House of Representatives:
    Part IV.—Both Houses of the Parliament:
    Part V.—Powers of the Parliament:
Chapter II.—The Executive Government:
Chapter III.—The Judicature:
Chapter IV.—Finance and Trade:
Chapter V.—The States:
Chapter VI.—New States:
Chapter VII.—Miscellaneous:
Chapter VIII.—Alteration of the Constitution.
The Schedule.

CHAPTER I.—THE PARLIAMENT.

PART I.—GENERAL.

1. The legislative power of the Commonwealth shall be vested in a Federal Parliament, which shall consist of the Queen, a Senate, and a House of Representatives, and which is hereinafter called "The Parliament," or "The Parliament of the Commonwealth."

2. A Governor-General appointed by the Queen shall be Her Majesty's representative in the Commonwealth, and shall have and may exercise in the Commonwealth during the Queen's pleasure, but subject to this Constitution, such powers and functions of the Queen as Her Majesty may be pleased to assign to him.

3. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salary of the Governor-General, an annual sum which, until the Parliament otherwise provides, shall be ten thousand pounds.

The salary of a Governor-General shall not be altered during his continuance in office.

4. The provisions of this Constitution relating to the Governor-General extend and apply to the Governor-General for the time being, or such person as the Queen may appoint to administer the Government of the Commonwealth; but no such person shall be entitled to receive any salary from the Commonwealth in respect of any other office during his administration of the Government of the Commonwealth.

5. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives.

After any general election the Parliament shall be summoned to meet not later than thirty days after the day appointed for the return of the writs.

The Parliament shall be summoned to meet not later than six months after the establishment of the Commonwealth.

6. There shall be a session of the Parliament once at least in every year, so that twelve months shall not intervene between the last sitting of the Parliament in one session and its first sitting in the next session.

PART II.—THE SENATE.

7. The Senate shall be composed of senators for each State, directly chosen by the people of the State, voting, until the Parliament otherwise provides, as one electorate.

But until the Parliament of the Commonwealth otherwise provides, the Parliament of the State of Queensland, if that State be an Original State, may make laws dividing the State into divisions and determining the number of senators to be chosen for each division, and in the absence of such provision the State shall be one electorate.

Until the Parliament otherwise provides there shall be six senators for each Original State[*]. The Parliament may make laws increasing or diminishing the number of senators for each State, but so that equal representation of the several Original States shall be maintained and that no Original State shall have less than six senators.

The senators shall be chosen for a term of six years, and the names of the senators chosen for each State shall be certified by the Governor to the Governor-General.

8. The qualification of electors of senators shall be in each State that which is prescribed by this Constitution, or by the Parliament, as the qualification for electors of members of the House of Representatives; but in the choosing of senators each elector shall vote only once.

9. The Parliament of the Commonwealth may make laws prescribing the method of choosing senators, but so that the method shall be uniform for all the States. Subject to any such law, the Parliament of each State may make laws prescribing the method of choosing the senators for that State.

The Parliament of a State may make laws for determining the times and places of elections of senators for the State.

10. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State, for the time being, relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections of senators for the State.

11. The Senate may proceed to the despatch of business, notwithstanding the failure of any State to provide for its representation in the Senate.

12. The Governor of any State may cause writs to be issued for elections of senators for the State. In case of the dissolution of the Senate the writs shall be issued within ten days from the proclamation of such dissolution.

13. As soon as may be after the Senate first meets, and after each first meeting of the Senate following a dissolution thereof, the Senate shall divide the senators chosen for each State into two classes, as nearly equal in number as practicable; and the places of the senators of the first class shall become vacant at the expiration of [the third year] *three years*,[†] and the places of those of the second class at the expiration of [the sixth year] *six years*,[†] from the beginning of their term of service; and afterwards the places of senators shall become vacant at the expiration of six years from the beginning of their term of service.

The election to fill vacant places shall be made [in the year at the expiration of which] *within one year before*[†] the places are to become vacant.

---

[*] The Parliament has otherwise provided, by means of the Representation Act 1948, that the number of senators shall be ten for each State, from the first meeting of Parliament after the first dissolution of the House of Representatives occurring after the commencement of the Act (18th May, 1948).

[†] As amended by Section 2 of the Constitution Alteration (Senate Elections) 1906. The words in square brackets have been repealed; amendments are shown in italics.

For the purposes of this section the term of service of a senator shall be taken to begin on the first day of [January] *July** following the day of his election, except in the cases of the first election and of the election next after any dissolution of the Senate, when it shall be taken to begin on the first day of [January] *July** preceding the day of his election.

14. Whenever the number of senators for a State is increased or diminished, the Parliament of the Commonwealth may make such provision for the vacating of the places of senators for the State as it deems necessary to maintain regularity in the rotation.

15. If the place of a senator becomes vacant before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, sitting and voting together, choose a person to hold the place until the expiration of the term, or until the election of a successor as hereinafter provided, whichever first happens. But if the Houses of Parliament of the State are not in session at the time when the vacancy is notified, the Governor of the State, with the advice of the Executive Council thereof, may appoint a person to hold the place until the expiration of fourteen days after the beginning of the next session of the Parliament of the State, or until the election of a successor, whichever first happens.

At the next general election of members of the House of Representatives, or at the next election of senators for the State, whichever first happens, a successor shall, if the term has not then expired, be chosen to hold the place from the date of his election until the expiration of the term.

The name of any senator so chosen or appointed shall be certified by the Governor of the State to the Governor-General.

16. The qualifications of a senator shall be the same as those of a member of the House of Representatives.

17. The Senate shall, before proceeding to the despatch of any other business, choose a senator to be the President of the Senate; and as often as the office of President becomes vacant the Senate shall again choose a senator to be the President.

The President shall cease to hold his office if he ceases to be a senator. He may be removed from office by a vote of the Senate, or he may resign his office or his seat by writing addressed to the Governor-General.

18. Before or during any absence of the President, the Senate may choose a senator to perform his duties in his absence.

19. A senator may, by writing addressed to the President, or to the Governor-General if there is no President or if the President is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

20. The place of a senator shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the Senate, fails to attend the Senate.

21. Whenever a vacancy happens in the Senate, the President, or if there is no President or if the President is absent from the Commonwealth, the Governor-General, shall notify the same to the Governor of the State in the representation of which the vacancy has happened.

22. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the senators shall be necessary to constitute a meeting of the Senate for the exercise of its powers.

23. Questions arising in the Senate shall be determined by a majority of votes, and each senator shall have one vote. The President shall in all cases be entitled to a vote; and when the votes are equal the question shall pass in the negative.

PART III.—THE HOUSE OF REPRESENTATIVES.

24. The House of Representatives shall be composed of members directly chosen by the people of the Commonwealth, and the number of such members shall be, as nearly as practicable, twice the number of the senators.

---

* As amended by Section 2 of the Constitution Alteration (Senate Elections) 1906. The words in square brackets have been repealed; amendments are shown in Italics.

The number of members chosen in the several States shall be in proportion to the respective numbers of their people, and shall, until the Parliament otherwise provides, be determined, whenever necessary, in the following manner :—

(i) A quota shall be ascertained by dividing the number of the people of the Commonwealth, as shown by the latest statistics of the Commonwealth, by twice the number of the senators ;

(ii) The number of members to be chosen in each State shall be determined by dividing the number of the people of the State, as shown by the latest statistics of the Commonwealth, by the quota ; and if on such division there is a remainder greater than one-half of the quota, one more member shall be chosen in the State.

But notwithstanding anything in this section five members at least shall be chosen in each Original State.

25. For the purposes of the last section, if by the law of any State all persons of any race are disqualified from voting at elections for the more numerous House of the Parliament of the State, then, in reckoning the number of the people of the State or of the Commonwealth, persons of that race resident in that State shall not be counted.

26. Notwithstanding anything in section twenty-four, the number of members to be chosen in each State at the first election shall be as follows :—

New South Wales ..	23	South Australia ..	6
Victoria	20	Tasmania	5
Queensland	8		

Provided that if Western Australia is an Original State, the numbers shall be as follows :—

New South Wales ..	26	South Australia ..	7
Victoria	23	Western Australia ..	5
Queensland	9	Tasmania	5

27. Subject to this Constitution, the Parliament may make laws for increasing or diminishing the number of the members of the House of Representatives.

28. Every House of Representatives shall continue for three years from the first meeting of the House, and no longer, but may be sooner dissolved by the Governor-General.

29. Until the Parliament of the Commonwealth otherwise provides, the Parliament of any State may make laws for determining the divisions in each State for which members of the House of Representatives may be chosen, and the number of members to be chosen for each division. A division shall not be formed out of parts of different States.

In the absence of other provision, each State shall be one electorate.

30. Until the Parliament otherwise provides, the qualification of electors of members of the House of Representatives shall be in each State that which is prescribed by the law of the State as the qualification of electors of the more numerous House of Parliament of the State ; but in the choosing of members each elector shall vote only once.*

31. Until the Parliament otherwise provides, but subject to this Constitution, the laws in force in each State for the time being relating to elections for the more numerous House of the Parliament of the State shall, as nearly as practicable, apply to elections in the State of members of the House of Representatives.

32. The Governor-General in Council may cause writs to be issued for general elections of members of the House of Representatives.

After the first general election, the writs shall be issued within ten days from the expiry of a House of Representatives or from the proclamation of a dissolution thereof.

33. Whenever a vacancy happens in the House of Representatives, the Speaker shall issue his writ for the election of a new member, or if there is no Speaker or if he is absent from the Commonwealth the Governor-General in Council may issue the writ.

---

* The Parliament has otherwise provided, by means of the Commonwealth Electoral Act 1918-1949, Section 39 (repealing an earlier provision made by the Commonwealth Franchise Act 1902). For present qualifications see Chapter III.—General Government.

34. Until the Parliament otherwise provides, the qualifications of a member of the House of Representatives shall be as follows :—

(i) He must be of the full age of twenty-one years, and must be an elector entitled to vote at the election of members of the House of Representatives, or a person qualified to become such elector, and must have been for three years at the least a resident within the limits of the Commonwealth as existing at the time when he is chosen :

(ii) He must be a subject of the Queen, either natural-born or for at least five years naturalized under a law of the United Kingdom, or of a Colony which has become or becomes a State, or of the Commonwealth, or of a State.*

35. The House of Representatives shall, before proceeding to the despatch of any other business, choose a member to be the Speaker of the House, and as often as the office of Speaker becomes vacant the House shall again choose a member to be the Speaker.

The Speaker shall cease to hold his office if he ceases to be a member. He may be removed from office by a vote of the House, or he may resign his office or his seat by writing addressed to the Governor-General.

36. Before or during any absence of the Speaker, the House of Representatives may choose a member to perform his duties in his absence.

37. A member may by writing addressed to the Speaker, or to the Governor-General if there is no Speaker or if the Speaker is absent from the Commonwealth, resign his place, which thereupon shall become vacant.

38. The place of a member shall become vacant if for two consecutive months of any session of the Parliament he, without the permission of the House, fails to attend the House.

39. Until the Parliament otherwise provides, the presence of at least one-third of the whole number of the members of the House of Representatives shall be necessary to constitute a meeting of the House for the exercise of its powers.

40. Questions arising in the House of Representatives shall be determined by a majority of votes other than that of the Speaker. The Speaker shall not vote unless the numbers are equal, and then he shall have a casting vote.

PART IV.—BOTH HOUSES OF THE PARLIAMENT.

41. No adult person who has or acquires a right to vote at elections for the more numerous House of the Parliament of a State shall, while the right continues, be prevented by any law of the Commonwealth from voting at elections for either House of the Parliament of the Commonwealth.

42. Every senator and every member of the House of Representatives shall before taking his seat make and subscribe before the Governor-General, or some person authorized by him, an oath or affirmation of allegiance in the form set forth in the schedule to this Constitution.

43. A member of either House of the Parliament shall be incapable of being chosen or of sitting as a member of the other House.

44. Any person who—

(i) Is under any acknowledgment of allegiance, obedience, or adherence to a foreign power, or is a subject or a citizen or entitled to the rights or privileges of a subject or a citizen of a foreign power : or

(ii) Is attainted of treason, or has been convicted and is under sentence, or subject to be sentenced, for any offence punishable under the law of the Commonwealth or of a State by imprisonment for one year or longer : or

(iii) Is an undischarged bankrupt or insolvent : or

(iv) Holds any office of profit under the Crown, or any pension payable during the pleasure of the Crown out of any of the revenues of the Commonwealth : or

---

* The Parliament has otherwise provided, by means of the Commonwealth Electoral Act 1918–1949, Section 69. For present qualifications *see* Chapter III.—General Government.

(v) Has any direct or indirect pecuniary interest in any agreement with the Public Service of the Commonwealth otherwise than as a member and in common with the other members of an incorporated company consisting of more than twenty-five persons :

shall be incapable of being chosen or of sitting as a senator or a member of the House of Representatives.

But sub-section iv. does not apply to the office of any of the Queen's Ministers of State for the Commonwealth, or of any of the Queen's Ministers for a State, or to the receipt of pay, half-pay, or a pension by any person as an officer or member of the Queen's navy or army, or to the receipt of pay as an officer or member of the naval or military forces of the Commonwealth by any person whose services are not wholly employed by the Commonwealth.

45. If a senator or member of the House of Representatives—

(i) Becomes subject to any of the disabilities mentioned in the last preceding section : or

(ii) Takes the benefit, whether by assignment, composition, or otherwise, of any law relating to bankrupt or insolvent debtors : or

(iii) Directly or indirectly takes or agrees to take any fee or honorarium for services rendered to the Commonwealth, or for services rendered in the Parliament to any person or State :

his place shall thereupon become vacant.

46. Until the Parliament otherwise provides, any person declared by this Constitution to be incapable of sitting as a senator or as a member of the House of Representatives shall, for every day on which he so sits, be liable to pay the sum of one hundred pounds to any person who sues for it in any court of competent jurisdiction.

47. Until the Parliament otherwise provides, any question respecting the qualification of a senator or of a member of the House of Representatives, or respecting a vacancy in either House of the Parliament, and any question of a disputed election to either House, shall be determined by the House in which the question arises.

48. Until the Parliament otherwise provides, each senator and each member of the House of Representatives shall receive an allowance of four hundred pounds a year, to be reckoned from the day on which he takes his seat.*

49. The powers, privileges, and immunities of the Senate and of the House of Representatives, and of the members and the committees of each House, shall be such as are declared by the Parliament, and until declared shall be those of the Commons House of Parliament of the United Kingdom, and of its members and committees, at the establishment of the Commonwealth.

50. Each House of the Parliament may make rules and orders with respect to—

(i) The mode in which its powers, privileges, and immunities may be exercised and upheld :

(ii) The order and conduct of its business and proceedings either separately or jointly with the other House.

---

* The Parliamentary allowance was increased to £600 per annum in 1907 (except in the cases of Ministers, the Presiding Officers of the two Houses, and the Chairmen of Committees, whose allowances remained at £400, in addition to the emoluments of office), and to £1,000 per annum in 1920 (Ministers, etc., £800). Under financial emergency legislation Parliamentary salaries and allowances were reduced generally, the lowest level reached in respect of the Parliamentary allowance being £750 per annum in 1932. Subsequently there was a gradual restoration to former levels, the allowance reaching £1,000 per annum again in 1938 when, also, the proviso for the reduced allowance to Ministers, etc. was removed. In 1947 the Parliamentary allowance was increased to £1,500 per annum. In 1920 additional allowances of £200 and £400 per annum, respectively, were granted to the Leaders of the Opposition in the Senate and the House of Representatives, and in 1947 they were increased to £300 and £600 respectively. In 1947, also, an additional allowance of £400 per annum was granted to the Leader in the House of Representatives (other than the Leader of the Opposition) of a recognized political party which has not less than ten members in the House of Representatives, and of which no member is a Minister.

PART V.—POWERS OF THE PARLIAMENT.*

51. The Parliament shall, subject to this Constitution, have power to make laws for the peace, order, and good government of the Commonwealth with respect to—

(i) Trade and commerce with other countries, and among the States :
(ii) Taxation ; but so as not to discriminate between States or parts of States :
(iii) Bounties on the production or export of goods, but so that such bounties shall be uniform throughout the Commonwealth :
(iv) Borrowing money on the public credit of the Commonwealth :
(v) Postal, telegraphic, telephonic, and other like services :
(vi) The naval and military defence of the Commonwealth and of the several States, and the control of the forces to execute and maintain the laws of the Commonwealth :
(vii) Lighthouses, lightships, beacons and buoys :
(viii) Astronomical and meteorological observations :
(ix) Quarantine :
(x) Fisheries in Australian waters beyond territorial limits :
(xi) Census and statistics :
(xii) Currency, coinage, and legal tender :
(xiii) Banking, other than State banking ; also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money :
(xiv) Insurance, other than State insurance ; also State insurance extending beyond the limits of the State concerned :
(xv) Weights and measures :
(xvi) Bills of exchange and promissory notes :
(xvii) Bankruptcy and insolvency :
(xviii) Copyrights, patents of inventions and designs, and trade marks :
(xix) Naturalization and aliens :
(xx) Foreign corporations, and trading or financial corporations formed within the limits of the Commonwealth :
(xxi) Marriage :
(xxii) Divorce and matrimonial causes ; and in relation thereto, parental rights, and the custody and guardianship of infants :
(xxiii) Invalid and old-age pensions :
(xxiiiA) †*The provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances :*
(xxiv) The service and execution throughout the Commonwealth of the civil and criminal process and the judgments of the courts of the States :
(xxv) The recognition throughout the Commonwealth of the laws, the public Acts and records, and the judicial proceedings of the States :
(xxvi) The people of any race, other than the aboriginal race in any State, for whom it is deemed necessary to make special laws :
(xxvii) Immigration and emigration :
(xxviii) The influx of criminals :
(xxix) External affairs :
(xxx) The relations of the Commonwealth with the islands of the Pacific :
(xxxi) The acquisition of property on just terms from any State or person for any purpose in respect of which the Parliament has power to make laws :
(xxxii) The control of railways with respect to transport for the naval and military purposes of the Commonwealth :
(xxxiii) The acquisition, with the consent of a State, of any railways of the State on terms arranged between the Commonwealth and the State :

---

* Particulars of proposed laws which were submitted to referenda are referred to in Chapter III., General Government.

† Under Section 2 of the Constitution Alteration (Social Services) 1946, the Constitution was amended by the insertion of this paragraph.

(xxxiv) Railway construction and extension in any State with the consent of that State:

(xxxv) Conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State:

(xxxvi) Matters in respect of which this Constitution makes provision until the Parliament otherwise provides:

(xxxvii) Matters referred to the Parliament of the Commonwealth by the Parliament or Parliaments of any State or States, but so that the law shall extend only to States by whose Parliaments the matter is referred, or which afterwards adopt the law:

(xxxviii) The exercise within the Commonwealth, at the request or with the concurrence of the Parliaments of all the States directly concerned, of any power which can at the establishment of this Constitution be exercised only by the Parliament of the United Kingdom or by the Federal Council of Australasia:

(xxxix) Matters incidental to the execution of any power vested by this Constitution in the Parliament or in either House thereof, or in the Government of the Commonwealth, or in the Federal Judicature, or in any department or officer of the Commonwealth.

52. The Parliament shall, subject to this Constitution, have exclusive power to make laws for the peace, order, and good government of the Commonwealth with respect to—

(i) The seat of Government of the Commonwealth, and all places acquired by the Commonwealth for public purposes:

(ii) Matters relating to any department of the public service the control of which is by this Constitution transferred to the Executive Government of the Commonwealth:

(iii) Other matters declared by this Constitution to be within the exclusive power of the Parliament.

53. Proposed laws appropriating revenue or moneys, or imposing taxation, shall not originate in the Senate. But a proposed law shall not be taken to appropriate revenue or moneys, or to impose taxation, by reason only of its containing provisions for the imposition or appropriation of fines or other pecuniary penalties, or for the demand or payment or appropriation of fees for licences, or fees for services under the proposed law.

The Senate may not amend proposed laws imposing taxation, or proposed laws appropriating revenue or moneys for the ordinary annual services of the Government.

The Senate may not amend any proposed laws so as to increase any proposed charge or burden on the people.

The Senate may at any stage return to the House of Representatives any proposed law which the Senate may not amend, requesting, by message, the omission or amendment of any items or provisions therein. And the House of Representatives may, if it thinks fit, make any of such omissions or amendments, with or without modifications.

Except as provided in this section, the Senate shall have equal power with the House of Representatives in respect of all proposed laws.

54. The proposed law which appropriates revenue or moneys for the ordinary annual services of the Government shall deal only with such appropriation.

55. Laws imposing taxation shall deal only with the imposition of taxation, and any provision therein dealing with any other matter shall be of no effect.

Laws imposing taxation, except laws imposing duties of customs or of excise, shall deal with one subject of taxation only; but laws imposing duties of customs shall deal with duties of customs only, and laws imposing duties of excise shall deal with duties of excise only.

56. A vote, resolution, or proposed law for the appropriation of revenue or moneys shall not be passed unless the purpose of the appropriation has in the same session been recommended by message of the Governor-General to the House in which the proposal originated.

57. If the House of Representatives passes any proposed law, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, and if after an interval of three months the House of Representatives, in the same or the next session, again passes the proposed law with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may dissolve the Senate and the House of Representatives simultaneously. But such dissolution shall not take place within six months before the date of the expiry of the House of Representatives by effluxion of time.

If after such dissolution the House of Representatives again passes the proposed law, with or without any amendments which have been made, suggested, or agreed to by the Senate, and the Senate rejects or fails to pass it, or passes it with amendments to which the House of Representatives will not agree, the Governor-General may convene a joint sitting of the members of the Senate and of the House of Representatives.

The members present at the joint sitting may deliberate and shall vote together upon the proposed law as last proposed by the House of Representatives, and upon amendments, if any, which have been made therein by one House and not agreed to by the other, and any such amendments which are affirmed by an absolute majority of the total number of the members of the Senate and House of Representatives shall be taken to have been carried, and if the proposed law, with the amendments, if any, so carried is affirmed by an absolute majority of the total number of members of the Senate and House of Representatives, it shall be taken to have been duly passed by both Houses of the Parliament, and shall be presented to the Governor-General for the Queen's assent.

58. When a proposed law passed by both Houses of the Parliament is presented to the Governor-General for the Queen's assent, he shall declare, according to his discretion, but subject to this Constitution, that he assents in the Queen's name, or that he withholds assent, or that he reserves the law for the Queen's pleasure.

The Governor-General may return to the House in which it originated any proposed law so presented to him, and may transmit therewith any amendments which he may recommend, and the Houses may deal with the recommendation.

59. The Queen may disallow any law within one year from the Governor-General's assent, and such disallowance on being made known by the Governor-General by speech or message to each of the Houses of the Parliament, or by Proclamation, shall annul the law from the day when the disallowance is so made known.

60. A proposed law reserved for the Queen's pleasure shall not have any force unless and until within two years from the day on which it was presented to the Governor-General for the Queen's assent the Governor-General makes known, by speech or message to each of the Houses of the Parliament, or by Proclamation, that it has received the Queen's assent.

CHAPTER II.—THE EXECUTIVE GOVERNMENT.

61. The executive power of the Commonwealth is vested in the Queen and is exercisable by the Governor-General as the Queen's representative, and extends to the execution and maintenance of this Constitution, and of the laws of the Commonwealth.

62. There shall be a Federal Executive Council to advise the Governor-General in the government of the Commonwealth, and the members of the Council shall be chosen and summoned by the Governor-General and sworn as Executive Councillors, and shall hold office during his pleasure.

63. The provisions of this Constitution referring to the Governor-General in Council shall be construed as referring to the Governor-General acting with the advice of the Federal Executive Council.

64. The Governor-General may appoint officers to administer such departments of State of the Commonwealth as the Governor-General in Council may establish.

Such officers shall hold office during the pleasure of the Governor-General. They shall be members of the Federal Executive Council, and shall be the Queen's Ministers of State for the Commonwealth.

After the first general election no Minister of State shall hold office for a longer period than three months unless he is or becomes a senator or a member of the House of Representatives.

65. Until the Parliament otherwise provides, the Ministers of State shall not exceed seven in number, and shall hold such offices as the Parliament prescribes, or, in the absence of provision, as the Governor-General directs.*

66. There shall be payable to the Queen out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of the Ministers of State, an annual sum which until the Parliament otherwise provides, shall not exceed twelve thousand pounds a year.*

67. Until the Parliament otherwise provides, the appointment and removal of all other officers of the Executive Government of the Commonwealth shall be vested in the Governor-General in Council, unless the appointment is delegated by the Governor-General in Council or by a law of the Commonwealth to some other authority.

68. The command in chief of the naval and military forces of the Commonwealth is vested in the Governor-General as the Queen's representative.

69. On a date or dates to be proclaimed by the Governor-General after the establishment of the Commonwealth the following departments of the public service in each State shall become transferred to the Commonwealth :—

Posts, telegraphs, and telephones :	Lighthouses, lightships, beacons, and buoys :
Naval and military defence :	Quarantine.

But the departments of customs and of excise in each State shall become transferred to the Commonwealth on its establishment.

70. In respect of matters which, under this Constitution, pass to the Executive Government of the Commonwealth, all powers and functions which at the establishment of the Commonwealth are vested in the Governor of a Colony, or in the Governor of a Colony with the advice of his Executive Council, or in any authority of a Colony, shall vest in the Governor-General, or in the Governor-General in Council, or in the authority exercising similar powers under the Commonwealth, as the case requires.

CHAPTER III.—THE JUDICATURE.

71. The judicial power of the Commonwealth shall be vested in a Federal Supreme Court, to be called the High Court of Australia, and in such other federal courts as the Parliament creates, and in such other courts as it invests with federal jurisdiction. The High Court shall consist of a Chief Justice, and so many other Justices, not less than two, as the Parliament prescribes.†

72. The Justices of the High Court and of the other Courts created by the Parliament—

(i) Shall be appointed by the Governor-General in Council :

(ii) Shall not be removed except by the Governor-General in Council, on an address from both Houses of the Parliament in the same session, praying for such removal on the ground of proved misbehaviour or incapacity :

(iii) Shall receive such remuneration as the Parliament may fix; but the remuneration shall not be diminished during their continuance in office.†

---

* The Ministers of State were increased to eight in 1915, to nine in 1917, to ten in 1935, to eleven in 1938, and to nineteen in 1941, a special war-time provision during the continuance in operation of the National Security Act which was extended in 1946 on the expiry of that Act. In 1951 the number was increased to twenty. The annual appropriation for Ministers' salaries received in addition to their allowances as Members (*see* page 14), was increased to £13,650 in 1915 and to £15,300 in 1917. Under financial emergency legislation in addition to the reductions in Members' allowances the appropriation for Ministers was also reduced, in 1932 reaching the level of £10,710. The reductions were removed gradually, and finally in 1938, when the appropriation was £16,950. At the same time, an additional allowance of £1,500 per annum was granted to the Prime Minister, and the proviso for the reduced Parliamentary allowance to Ministers was removed. In 1941 the annual appropriation for Ministers was increased, as a war-time provision, to £21,250. This was extended in 1946. In 1947 the appropriation was increased to £27,650, and in 1951 to £29,000.

† The Judiciary Act 1903 provided for a Chief Justice and two other Justices. Subsequent amendments to the Act increased the number of other Justices to four and later six, and then reduced it to five. In 1946 the number was again increased to six. The Judiciary Act 1903 also provided for the payment of a salary of £3,500 per annum to the Chief Justice and of £3,000 per annum to each other Justice. In 1947 these salaries were increased respectively to £4,500 and £4,000 per annum and in 1950 to £5,000 and £4,500 per annum.

73. The High Court shall have jurisdiction, with such exceptions and subject to such regulations as the Parliament prescribes, to hear and determine appeals from all judgments, decrees, orders, and sentences—

(i) Of any Justice or Justices exercising the original jurisdiction of the High Court:
(ii) Of any other federal court, or court exercising federal jurisdiction; or of the Supreme Court of any State, or of any other court of any State from which at the establishment of the Commonwealth an appeal lies to the Queen in Council:
(iii) Of the Inter-State Commission, but as to questions of law only:

and the judgment of the High Court in all such cases shall be final and conclusive.

But no exception or regulation prescribed by the Parliament shall prevent the High Court from hearing and determining any appeal from the Supreme Court of a State in any matter in which at the establishment of the Commonwealth an appeal lies from such Supreme Court to the Queen in Council.

Until the Parliament otherwise provides, the conditions of and restrictions on appeals to the Queen in Council from the Supreme Courts of the several States shall be applicable to appeals from them to the High Court.

74. No appeal shall be permitted to the Queen in Council from a decision of the High Court upon any question, howsoever arising, as to the limits *inter se* of the Constitutional powers of the Commonwealth and those of any State or States, or as to the limits *inter se* of the Constitutional powers of any two or more States, unless the High Court shall certify that the question is one which ought to be determined by Her Majesty in Council.

The High Court may so certify if satisfied that for any special reason the certificate should be granted, and thereupon an appeal shall lie to Her Majesty in Council on the question without further leave.

Except as provided in this section, this Constitution shall not impair any right which the Queen may be pleased to exercise by virtue of Her Royal prerogative to grant special leave of appeal from the High Court to Her Majesty in Council. The Parliament may make laws limiting the matters in which such leave may be asked, but proposed laws containing any such limitation shall be reserved by the Governor-General for Her Majesty's pleasure.

75. In all matters—

(i) Arising under any treaty:
(ii) Affecting consuls or other representatives of other countries:
(iii) In which the Commonwealth, or a person suing or being sued on behalf of the Commonwealth, is a party:
(iv) Between States, or between residents of different States, or between a State and a resident of another State:
(v) In which a writ of Mandamus or prohibition or an injunction is sought against an officer of the Commonwealth:

the High Court shall have original jurisdiction.

76. The Parliament may make laws conferring original jurisdiction on the High Court in any matter—

(i) Arising under this Constitution, or involving its interpretation:
(ii) Arising under any laws made by the Parliament:
(iii) Of Admiralty and maritime jurisdiction:
(iv) Relating to the same subject-matter claimed under the laws of different States.

77. With respect to any of the matters mentioned in the last two sections the Parliament may make laws—

(i) Defining the jurisdiction of any federal court other than the High Court:
(ii) Defining the extent to which the jurisdiction of any federal court shall be exclusive of that which belongs to or is invested in the courts of the States:
(iii) Investing any court of a State with federal jurisdiction.

78. The Parliament may make laws conferring rights to proceed against the Commonwealth or a State in respect of matters within the limits of the judicial power.

79. The federal jurisdiction of any court may be exercised by such number of judges as the Parliament prescribes.

80. The trial on indictment of any offence against any law of the Commonwealth shall be by jury, and every such trial shall be held in the State where the offence was committed, and if the offence was not committed within any State the trial shall be held at such place or places as the Parliament prescribes.

CHAPTER IV.—FINANCE AND TRADE.

81. All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution.

82. The costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund shall form the first charge thereon; and the revenue of the Commonwealth shall in the first instance be applied to the payment of the expenditure of the Commonwealth.

83. No money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law.

But until the expiration of one month after the first meeting of the Parliament the Governor-General in Council may draw from the Treasury and expend such moneys as may be necessary for the maintenance of any department transferred to the Commonwealth and for the holding of the first elections for the Parliament.

84. When any department of the public service of a State becomes transferred to the Commonwealth, all officers of the department shall become subject to the control of the Executive Government of the Commonwealth.

Any such officer who is not retained in the service of the Commonwealth shall, unless he is appointed to some other office of equal emolument in the public service of the State, be entitled to receive from the State any pension, gratuity, or other compensation, payable under the law of the State on the abolition of his office.

Any such officer who is retained in the service of the Commonwealth shall preserve all his existing and accruing rights, and shall be entitled to retire from office at the time, and on the pension or retiring allowance, which would be permitted by the law of the State if his service with the Commonwealth were a continuation of his service with the State. Such pension or retiring allowance shall be paid to him by the Commonwealth; but the State shall pay to the Commonwealth a part thereof, to be calculated on the proportion which his term of service with the State bears to his whole term of service, and for the purpose of the calculation his salary shall be taken to be that paid to him by the State at the time of the transfer.

Any officer who is, at the establishment of the Commonwealth, in the public service of a State, and who is, by consent of the Governor of the State with the advice of the Executive Council thereof, transferred to the public service of the Commonwealth, shall have the same rights as if he had been an officer of a department transferred to the Commonwealth and were retained in the service of the Commonwealth.

85. When any department of the public service of a State is transferred to the Commonwealth—

- (i) All property of the State of any kind, used exclusively in connexion with the department, shall become vested in the Commonwealth; but, in the case of the departments controlling customs and excise and bounties, for such time only as the Governor-General in Council may declare to be necessary:
- (ii) The Commonwealth may acquire any property of the State, of any kind used, but not exclusively used in connexion with the department; the value thereof shall, if no agreement can be made, be ascertained in, as nearly as

may be, the manner in which the value of land, or of an interest in land, taken by the State for public purposes is ascertained under the law of the State in force at the establishment of the Commonwealth :

(iii) The Commonwealth shall compensate the State for the value of any property passing to the Commonwealth under this section ; if no agreement can be made as to the mode of compensation, it shall be determined under laws to be made by the Parliament :

(iv) The Commonwealth shall, at the date of the transfer, assume the current obligations of the State in respect of the department transferred.

86. On the establishment of the Commonwealth, the collection and control of duties of customs and of excise, and the control of the payment of bounties, shall pass to the Executive Government of the Commonwealth.

87. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, of the net revenue of the Commonwealth from duties of customs and of excise not more than one-fourth shall be applied annually by the Commonwealth towards its expenditure.

The balance shall, in accordance with this Constitution, be paid to the several States, or applied towards the payment of interest on debts of the several States taken over by the Commonwealth.

88. Uniform duties of customs shall be imposed within two years after the establishment of the Commonwealth.

89. Until the imposition of uniform duties of customs—

(i) The Commonwealth shall credit to each State the revenues collected therein by the Commonwealth.

(ii) The Commonwealth shall debit to each State—

(*a*) The expenditure therein of the Commonwealth incurred solely for the maintenance or continuance, as at the time of transfer, of any department transferred from the State to the Commonwealth ;

(*b*) The proportion of the State, according to the number of its people, in the other expenditure of the Commonwealth.

(iii) The Commonwealth shall pay to each State month by month the balance (if any) in favour of the State.

90. On the imposition of uniform duties of customs the power of the Parliament to impose duties of customs and of excise, and to grant bounties on the production or export of goods, shall become exclusive.

On the imposition of uniform duties of customs all laws of the several States imposing duties of customs or of excise, or offering bounties on the production or export of goods, shall cease to have effect, but any grant of or agreement for any such bounty lawfully made by or under the authority of the Government of any State shall be taken to be good if made before the thirtieth day of June, one thousand eight hundred and ninety-eight, and not otherwise.

91. Nothing in this Constitution prohibits a State from granting any aid to or bounty on mining for gold, silver, or other metals, nor from granting, with the consent of both Houses of the Parliament of the Commonwealth expressed by resolution, any aid to or bounty on the production or export of goods.

92. On the imposition of uniform duties of customs, trade, commerce, and intercourse among the States, whether by means of internal carriage or ocean navigation, shall be absolutely free.

But notwithstanding anything in this Constitution, goods imported before the imposition of uniform duties of customs into any State, or into any Colony which, whilst the goods remain therein, becomes a State, shall, on thence passing into another State within two years after the imposition of such duties, be liable to any duty chargeable on the importation of such goods into the Commonwealth, less any duty paid in respect of the goods on their importation.

93. During the first five years after the imposition of uniform duties of customs, and thereafter until the Parliament otherwise provides—

- (i) The duties of customs chargeable on goods imported into a State and afterwards passing into another State for consumption, and the duties of excise paid on goods produced or manufactured in a State and afterwards passing into another State for consumption, shall be taken to have been collected not in the former but in the latter State:
- (ii) Subject to the last sub-section, the Commonwealth shall credit revenue, debit expenditure, and pay balances to the several States as prescribed for the period preceding the imposition of uniform duties of customs.

94. After five years from the imposition of uniform duties of customs, the Parliament may provide, on such basis as it deems fair, for the monthly payment to the several States of all surplus revenue of the Commonwealth.

95. Notwithstanding anything in this Constitution, the Parliament of the State of Western Australia, if that State be an Original State, may, during the first five years after the imposition of uniform duties of customs, impose duties of customs on goods passing into that State and not originally imported from beyond the limits of the Commonwealth: and such duties shall be collected by the Commonwealth.

But any duty so imposed on any goods shall not exceed during the first of such years the duty chargeable on the goods under the law of Western Australia in force at the imposition of uniform duties, and shall not exceed during the second, third, fourth, and fifth of such years respectively, four-fifths, three-fifths, two-fifths, and one-fifth of such latter duty, and all duties imposed under this section shall cease at the expiration of the fifth year after the imposition of uniform duties.

If at any time during the five years the duty on any goods under this section is higher than the duty imposed by the Commonwealth on the importation of the like goods, then such higher duty shall be collected on the goods when imported into Western Australia from beyond the limits of the Commonwealth.

96. During a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provides, the Parliament may grant financial assistance to any State on such terms and conditions as the Parliament thinks fit.

97. Until the Parliament otherwise provides, the laws in force in any Colony which has become or becomes a State with respect to the receipt of revenue and the expenditure of money on account of the Government of the Colony, and the review and audit of such receipt and expenditure, shall apply to the receipt of revenue and the expenditure of money on account of the Commonwealth in the State in the same manner as if the Commonwealth, or the Government or an officer of the Commonwealth, were mentioned whenever the Colony, or the Government or an officer of the Colony, is mentioned.

98. The power of the Parliament to make laws with respect to trade and commerce extends to navigation and shipping, and to railways the property of any State.

99. The Commonwealth shall not, by any law or regulation of trade, commerce, or revenue, give preference to one State or any part thereof over another State or any part thereof.

100. The Commonwealth shall not, by any law or regulation of trade or commerce, abridge the right of a State or of the residents therein to the reasonable use of the waters of rivers for conservation or irrigation.

101. There shall be an Inter-State Commission, with such powers of adjudication and administration as the Parliament deems necessary for the execution and maintenance, within the Commonwealth, of the provisions of this Constitution relating to trade and commerce, and of all laws made thereunder.

102. The Parliament may by any law with respect to trade or commerce forbid, as to railways, any preference or discrimination by any State, or by any authority constituted under a State, if such preference or discrimination is undue and unreasonable, or unjust to any State; due regard being had to the financial responsibilities incurred by any State in connexion with the construction and maintenance of its railways. But

no preference or discrimination shall, within the meaning of this section, be taken to be undue and unreasonable, or unjust to any State, unless so adjudged by the Inter-State Commission.

103. The members of the Inter-State Commission—

(i) Shall be appointed by the Governor-General in Council:

(ii) Shall hold office for seven years, but may be removed within that time by the Governor-General in Council, on an address from both Houses of the Parliament in the same session praying for such removal on the ground of proved misbehaviour or incapacity:

(iii) Shall receive such remuneration as the Parliament may fix; but such remuneration shall not be diminished during their continuance in office.

104. Nothing in this Constitution shall render unlawful any rate for the carriage of goods upon a railway, the property of a State, if the rate is deemed by the Inter-State Commission to be necessary for the development of the territory of the State, and if the rate applies equally to goods within the State and to goods passing into the State from other States.

105. The Parliament may take over from the States their public debts [as existing at the establishment of the Commonwealth],* or a proportion thereof according to the respective numbers of their people as shown by the latest statistics of the Commonwealth, and may convert, renew, or consolidate such debts, or any part thereof; and the State shall indemnify the Commonwealth in respect of the debts taken over, and thereafter the interest payable in respect of the debts shall be deducted and retained from the portions of the surplus revenue of the Commonwealth payable to the several States, or if such surplus is insufficient, or if there is no surplus, then the deficiency or the whole amount shall be paid by the several States.

105A.† (i) *The Commonwealth may make agreements with the States with respect to the public debts of the States, including—*

(a) the taking over of such debts by the Commonwealth;

(b) the management of such debts;

(c) the payment of interest and the provision and management of sinking funds in respect of such debts;

(d) the consolidation, renewal, conversion, and redemption of such debts;

(e) the indemnification of the Commonwealth by the States in respect of debts taken over by the Commonwealth; and

(f) the borrowing of money by the States or by the Commonwealth, or by the Commonwealth for the States.

(ii) *The Parliament may make laws for validating any such agreement made before the commencement of this section.*

(iii) *The Parliament may make laws for the carrying out by the parties thereto of any such agreement.*

(iv) *Any such agreement may be varied or rescinded by the parties thereto.*

(v) *Every such agreement and any such variation thereof shall be binding upon the Commonwealth and the States parties thereto notwithstanding anything contained in this Constitution or the Constitution of the several States or in any law of the Parliament of the Commonwealth or of any State.*

(vi) *The powers conferred by this section shall not be construed as being limited in any way by the provisions of section one hundred and five of this Constitution.*

CHAPTER V.—THE STATES.

106. The Constitution of each State of the Commonwealth shall, subject to this Constitution, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be, until altered in accordance with the Constitution of the State.

---

* Under Section 2 of the Constitution Alteration (State Debts) 1909, the words in square brackets are omitted.

† Under Section 2 of the Constitution Alteration (State Debts) 1928, the Constitution was amended by the insertion of this section.

107. Every power of the Parliament of a Colony which has become or becomes a State, shall, unless it is by this Constitution exclusively vested in the Parliament of the Commonwealth or withdrawn from the Parliament of the State, continue as at the establishment of the Commonwealth, or as at the admission or establishment of the State, as the case may be.

108. Every law in force in a Colony which has become or becomes a State, and relating to any matter within the powers of the Parliament of the Commonwealth, shall, subject to this Constitution, continue in force in the State; and, until provision is made in that behalf by the Parliament of the Commonwealth, the Parliament of the State shall have such powers of alteration and of repeal in respect of any such law as the Parliament of the Colony had until the Colony became a State.

109. When a law of a State is inconsistent with a law of the Commonwealth, the latter shall prevail, and the former shall, to the extent of the inconsistency, be invalid.

110. The provisions of this Constitution relating to the Governor of a State extend and apply to the Governor for the time being of the State, or other chief executive officer or administrator of the government of the State.

111. The Parliament of a State may surrender any part of the State to the Commonwealth; and upon such surrender, and the acceptance thereof by the Commonwealth, such part of the State shall become subject to the exclusive jurisdiction of the Commonwealth.

112. After uniform duties of customs have been imposed, a State may levy on imports or exports, or on goods passing into or out of the State, such charges as may be necessary for executing the inspection laws of the State; but the net produce of all charges so levied shall be for the use of the Commonwealth; and any such inspection laws may be annulled by the Parliament of the Commonwealth.

113. All fermented, distilled, or other intoxicating liquids passing into any State or remaining therein for use, consumption, sale, or storage, shall be subject to the laws of the State as if such liquids had been produced in the State.

114. A State shall not, without the consent of the Parliament of the Commonwealth, raise or maintain any naval or military force, or impose any tax on property of any kind belonging to the Commonwealth, nor shall the Commonwealth impose any tax on property of any kind belonging to a State.

115. A State shall not coin money, nor make anything but gold and silver coin a legal tender in payment of debts.

116. The Commonwealth shall not make any law for establishing any religion, or for imposing any religious observance, or for prohibiting the free exercise of any religion, and no religious test shall be required as a qualification for any office or public trust under the Commonwealth.

117. A subject of the Queen, resident in any State, shall not be subject in any other State to any disability or discrimination which would not be equally applicable to him if he were a subject of the Queen resident in such other State.

118. Full faith and credit shall be given, throughout the Commonwealth, to the laws, the public Acts and records, and the judicial proceedings of every State.

119. The Commonwealth shall protect every State against invasion and, on the application of the Executive Government of the State, against domestic violence.

120. Every State shall make provision for the detention in its prisons of persons accused or convicted of offences against the laws of the Commonwealth, and for the punishment of persons convicted of such offences, and the Parliament of the Commonwealth may make laws to give effect to this provision.

CHAPTER VI.—NEW STATES.

121. The Parliament may admit to the Commonwealth or establish new States, and may upon such admission or establishment make or impose such terms and conditions, including the extent of representation in either House of the Parliament, as it thinks fit.

122. The Parliament may make laws for the government of any territory surrendered by any State to and accepted by the Commonwealth, or of any territory placed by the Queen under the authority of and accepted by the Commonwealth, or otherwise acquired by the Commonwealth, and may allow the representation of such territory in either House of the Parliament to the extent and on the terms which it thinks fit.

123. The Parliament of the Commonwealth may, with the consent of the Parliament of a State, and the approval of the majority of the electors of the State voting upon the question, increase, diminish, or otherwise alter the limits of the State, upon such terms and conditions as may be agreed on, and may, with the like consent, make provision respecting the effect and operation of any increase or diminution or alteration of territory in relation to any State affected.

124. A new State may be formed by separation of territory from a State, but only with the consent of the Parliament thereof, and a new State may be formed by the union of two or more States or parts of States, but only with the consent of the Parliaments of the States affected.

CHAPTER VII.—MISCELLANEOUS.

125. The seat of Government of the Commonwealth shall be determined by the Parliament, and shall be within territory which shall have been granted to or acquired by the Commonwealth, and shall be vested in and belong to the Commonwealth, and shall be in the State of New South Wales, and be distant not less than one hundred miles from Sydney.

Such territory shall contain an area of not less than one hundred square miles, and such portion thereof as shall consist of Crown lands shall be granted to the Commonwealth without any payment therefor.

The Parliament shall sit at Melbourne until it meet at the seat of Government.

126. The Queen may authorize the Governor-General to appoint any person, or any persons jointly or severally, to be his deputy or deputies within any part of the Commonwealth, and in that capacity to exercise during the pleasure of the Governor-General such powers and functions of the Governor-General as he thinks fit to assign to such deputy or deputies, subject to any limitations expressed or directions given by the Queen; but the appointment of such deputy or deputies shall not affect the exercise by the Governor-General himself of any power or function.

127. In reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, aboriginal natives shall not be counted.

CHAPTER VIII.—ALTERATION OF THE CONSTITUTION.

128. This Constitution shall not be altered except in the following manner:—

The proposed law for the alteration thereof must be passed by an absolute majority of each House of the Parliament, and not less than two nor more than six months after its passage through both Houses the proposed law shall be submitted in each State to the electors qualified to vote for the election of members of the House of Representatives.

But if either House passes any such proposed law by an absolute majority, and the other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, and if after an interval of three months the first-mentioned House in the same or the next session again passes the proposed law by an absolute majority with or without any amendment which has been made or agreed to by the other House, and such other House rejects or fails to pass it or passes it with any amendment to which the first-mentioned House will not agree, the Governor-General may submit the proposed law as last proposed by the first-mentioned House, and either with or without any amendments subsequently agreed to by both Houses, to the electors in each State qualified to vote for the election of the House of Representatives.

When a proposed law is submitted to the electors the vote shall be taken in such manner as the Parliament prescribes. But until the qualification of electors of members of the House of Representatives becomes uniform throughout the Commonwealth, only one-half the electors voting for and against the proposed law shall be counted in any State in which adult suffrage prevails.

And if in a majority of the States a majority of the electors voting approve the proposed law, and if a majority of all the electors voting also approve the proposed law, it shall be presented to the Governor-General for the Queen's assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing, or otherwise altering the limits of the State, or in any manner affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

SCHEDULE.

OATH.

I, *A.B.*, do swear that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law. SO HELP ME GOD!

AFFIRMATION.

I, *A.B.*, do solemnly and sincerely affirm and declare that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, Her heirs and successors according to law.

(NOTE.—*The name of the King or Queen of the United Kingdom of Great Britain and Ireland for the time being is to be substituted from time to time.*)

3. The Royal Proclamation.—The preceding Act received the Royal assent on the 9th July, 1900. This made it lawful to declare that the people of Australia should be united in a Federal Commonwealth. This proclamation, made on the 17th September, 1900, constituted the Commonwealth as from the 1st January, 1901; it reads as follows :—

BY THE QUEEN.

A PROCLAMATION.

(Signed) VICTORIA R.

WHEREAS by an Act of Parliament passed in the Sixty-third and Sixty-fourth Years of Our Reign, intituled "An Act to constitute the Commonwealth of *Australia*," it is enacted that it shall be lawful for the Queen, with the advice of the Privy Council, to declare by Proclamation, that, on and after a day therein appointed, not being later than One year after the passing of this Act, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, and *Tasmania*, and also, if Her Majesty is satisfied that the people of *Western Australia* have agreed thereto, of *Western Australia*, shall be united in a Federal Commonwealth under the name of the Commonwealth of Australia.

And whereas We are satisfied that the people of *Western Australia* have agreed thereto accordingly.

We therefore, by and with the advice of Our Privy Council, have thought fit to issue this Our Royal Proclamation, and We do hereby declare that on and after the First day of *January* One thousand nine hundred and one, the people of *New South Wales*, *Victoria*, *South Australia*, *Queensland*, *Tasmania*, and *Western Australia* shall be united in a Federal Commonwealth under the name of the Commonwealth of *Australia*.

Given at Our Court at *Balmoral* this Seventeenth day of *September*, in the Year of Our Lord One thousand nine hundred, and in the Sixty-fourth Year of Our Reign.

GOD SAVE THE QUEEN.

CHAPTER II.

PHYSIOGRAPHY.

§ 1. General Description of Australia.

1. **Geographical Position.**—(i) *General.* The Australian Commonwealth, which includes the island continent of Australia proper and the island of Tasmania, is situated in the Southern Hemisphere, and comprises in all an area of about 2,974,581 square miles, the mainland alone containing about 2,948,366 square miles. Bounded on the west and east by the Indian and Pacific Oceans respectively, it lies between longitudes 113° 0′ E. and 153° 39′ E., while its northern and southern limits are the parallels of latitude 10° 41′ S. and 39° 8′ S., or, including Tasmania, 43° 39′ S. On its north are the Timor and Arafura Seas and Torres Strait—on its south the Southern Ocean and Bass Strait. The extreme points are "Steep Point" on the west, "Cape Byron" on the east, "Cape York" on the north, "Wilson's Promontory" on the south, or, if Tasmania be included, "South-East Cape."

(ii) *Tropical and Temperate Regions.* Of the total area of Australia nearly 40 per cent. lies within the tropics. Assuming, as is usual, that the latitude of the Tropic of Capricorn is 23° 30′ S., the areas within the tropical and temperate zones are approximately as follows :—

AUSTRALIA : AREAS OF TROPICAL AND TEMPERATE REGIONS.

Area.	N.S.W. (a)	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	N. Terr.	Total.
Within Tropical Zone sq. miles	..	..	359,000	..	364,000	..	426,320	1,149,320
Within Temperate Zone sq. miles	310,372	87,884	311,500	380,070	611,920	26,215	97,300	1,825,261
Total Area sq. miles	310,372	87,884	670,500	380,070	975,920	26,215	523,620	2,974,581
Ratio of Tropical par whole State	..	..	0.535	..	0.373	..	0.814	0.386
Ratio of Temperate part to whole State	1	1	0.465	1	0.627	1	0.186	0.614

(a Includes Australian Capital Territory.

Thus, of the whole of Australia, the tropical part is roughly about five-thirteenths, (0.386) or, of the three territories with areas within the tropical zone, about one-half (0.530).

2. **Area of Australia compared with Areas of other Countries.**—The area of Australia is almost as great as that of the United States of America, four-fifths of that of Canada, more than one-fifth of the area of the British Commonwealth, nearly three-fourths of the whole area of Europe, and about 25 times as large as Great Britain and

Ireland. The area of Australia and of certain other countries are shown in the following table :—

AREA OF AUSTRALIA AND OF OTHER COUNTRIES, *circa* 1949.

('000 sq. miles.)

Country.	Area.

Other	41
Total	3,304
British Commonwealth	13,258

(*a*) Excludes U.S.S.R., shown below. (*b*) Includes Dutch New Guinea.

The areas shown in the table are obtained from the *Demographic Yearbook*, 1949–50 published by the United Nations and the countries have been arranged in accordance with the continental groups used therein.

3. **Areas of Political Subdivisions.**—As already stated, Australia consists of six States and the Northern, and Australian Capital, Territories. The areas of these, and their proportions of the total of Australia, are shown in the following table :—

AUSTRALIA : AREA OF STATES AND TERRITORIES.

State or Territory.	Area.	Proportion of Total.
	Sq. miles.	%
New South Wales	309,433	10.40
Victoria	87,884	2.96
Queensland	670,500	22.54
South Australia	380,070	12.78
Western Australia	975,920	32.81
Tasmania	26,215	0.88
Northern Territory	523,620	17.60
Australian Capital Territory ..	939	0.03
Total	2,974,581	100.00

4. **Coastal Configuration**—(i) *General.* There are no striking features in the configuration of the coast ; the most remarkable indentations are the Gulf of Carpentaria on the north and the Great Australian Bight on the south. The Cape York Peninsula on the extreme north is the only other remarkable feature in the outline. In Official Year Book No. 1 an enumeration is given of the features of the coast-line of Australia (*see* pp. 60–68).

(ii) *Coast-line.* The lengths of coast-line, excluding minor indentations, of each State and of the whole continent, and the area per mile of coast-line, are shown in the following table :—

AUSTRALIA : COAST-LINE AND AREA PER MILE THEREOF.

State.	Coast-line.	Area per Mile of Coast-line.
	Miles.	Sq. miles.
New South Wales(*a*)	700	443
Victoria	680	129
Queensland ..	3,000	223
South Australia ..	1,540	247
Western Australia	4,350	224
Northern Territory	1,040	503
Continent (*b*) ..	11,310	261
Tasmania ..	900	29

(*a*) Includes Australian Capital Territory. (*b*) Area 2,948,366 square miles.

For the entire Commonwealth of Australia there is a coast-line of 12,210 miles with an average of 244 square miles for one mile of coast-line. According to Strelbitski, Europe has only 75 square miles of area to each mile of coast-line, and, according to more recent figures, England and Wales have only one-third of this, 25 square miles.

5. **Geographical Features of Australia.**—In separate issues of earlier Official Year Books fairly complete information has been given concerning some special geographical element. The nature of this information and its position in the various issues can be readily ascertained on reference to the special index following the index to maps and graphs at the end of this issue.

6. **Fauna, Flora, Geology and Seismology of Australia.**—Special articles dealing with these features have appeared in previous issues of the Official Year Book, but limits of space naturally preclude their repetition in each volume. As pointed out in par. 5, however, the nature and position of these articles can be readily ascertained from the special index.

§ 2. Climate and Meteorology of Australia.*

1. **Introductory.**—Previous issues of the Official Year Book, notably No. 3, pp. 79 and 80, and No. 4, pp. 84 and 87, contained outlines of the history of Australian meteorology and the creation and organization of the Commonwealth Bureau of Meteorology. Official Year Book No. 38, pp. 30–32, contained paragraphs devoted to (i) Organization of the Meteorological Service; (ii) Meteorological Publications; (iii) Equipment; and (iv) Meteorological Divisions.

By reason of its insular geographical position and the absence of striking physical features, whether in marine gulfs or in important mountains, Australia is, on the whole, less subject to extremes of weather than are regions of similar area in other parts of the globe, and latitude for latitude Australia is, on the whole, more temperate.

The average elevation of the surface of the land is low, probably close to 900 feet above the sea. The altitudes range up to a little over 7,300 feet, hence its climate embraces a great many features, from the characteristically tropical to what is essentially alpine, a fact indicated in some measure by the name Australian Alps given to the southern portion of the Great Dividing Range.

On the coast, the rainfall is often abundant and the atmosphere moist, but in some portions of the interior is very limited, and the atmosphere dry. The distribution of forest, therefore, with its climatic influence, is very uneven. In the interior, in places, there are fine belts of trees, but there are large areas also which are treeless, and here the air is hot and parching in summer. Again, on the coast, even so far south as latitude 35°, the vegetation is tropical in its luxuriance, and to some extent also in character. Climatologically, therefore, Australia may be said to present a great variety of features.

2. **Temperature.**—(i) *Effective Temperature.* When a meteorologist speaks of temperature he means the temperature of the air indicated by a thermometer sheltered from precipitation, from direct rays of the sun and from radiation of heat from the ground and neighbouring objects, yet freely exposed to the circulation of the air. In other words, he means temperature measured under conditions standardized as near as possible in a Stevenson Screen, which is the standard housing for meteorological thermometers.

This shade temperature as measured by a "dry bulb" thermometer shows only the actual temperature experienced by dry inorganic substances, not the *sensible* temperatures felt by organic bodies. In the case of human beings, sensible temperature is affected by the rate of conduction of heat to or from the body by moving air and also by the rate of cooling due to evaporation from the skin and respiratory passages. The wind and humidity therefore determine the sensible temperature.

The humidity (relative humidity) is determined from the readings of the dry and wet bulb thermometers. Of late years, however, with increasing interest in human comfort in tropical climates, another term, *effective* temperature, has come into use. It may be defined as "the temperature of a still, saturated atmosphere which would on the average produce the same feeling of warmth or cold as the atmosphere in question".†

Later investigations have established "comfort zones"‡ bounded by limits of effective temperature within which people will feel comfortable. American research workers have determined the following figures :—§

COMFORT ZONES : EFFECTIVE TEMPERATURES.

Season.	No subjects feel comfortable below—	Fifty per cent. of subjects feel comfortable between—	No subjects feel comfortable above—
Winter	60° F.	63° and 71° F.	74° F.
Summer	64° F.	66° and 75° F.	79° F.

---

* Prepared from data supplied by the Acting Director, Commonwealth Meteorological Bureau.

‡ Yaglou, C. P. (1926) J. Industr. Hyg.

§ Yaglou, C. P. (1927) Ibid.

Isotherms of effective temperature (not corrected for altitude) have been determined for Australia.[*] A map showing effective temperature for Australia for January (9 a.m.) will be found on page 33.

It will be seen that the 80° F. isotherm is confined to a very narrow tract of country on the north-west coast of Western Australia. The 75° F. isotherm extends broadly from Onslow on the north-west coast of Western Australia to Daly Waters to Camooweal to Moreton in Cape York Peninsula following in a general way the coastline of Northern Australia but from 100 to 300 miles inland.

Queensland investigators[†] in recent years have divided some towns of Queensland into three classes on the basis of deviation from comfort :—

Class 1 (Sub-tropics).—Quite suitable for Caucasian habitation—Rockhampton, Bundaberg, Brisbane, Longreach, Charleville.

Class 2 (Marginal tropics).—Suitable for Caucasian habitation, but requires adaptation in summer—Mackay, Townsville.

Class 3 (Tropics).—(*a*) Permissible for Caucasian habitation but requires selection and marked adaptation—Cardwell, Cairns, Cloncurry. (*b*) Not suitable for continuous Caucasian habitation—Cape York, Burketown.

These results of recent years bear out investigations made previously in Australia[‡] in which the atmospheric vapour pressure was used as a measure of comfort, its value for this purpose being that it has equal effect in both indoor and outdoor climates. The limits of comfort range from .2 to .5 inch of vapour pressure. After drawing isopleths for effective temperature (not corrected for altitude), mean vapour pressure reduced to a logarithmic scale, and mean wet bulb, it is found that there is close agreement in defining zones of relative discomfort.

(ii) *Seasons.* The Australian seasons are :—Summer, December to February ; autumn, March to May ; winter, June to August ; spring, September to November. In most parts of Australia, January is the hottest month, but in Tasmania and southern Victoria, February is the hottest ; in the tropical north, probably because the cooling " monsoon " rains occur in late summer, December is the hottest month, and at Darwin, November.

On a rainfall basis, in the tropical north the year is divisible into " wet " and " dry " seasons, but on the basis of temperature and physical comfort the " dry " season can be further sub-divided into two parts—" cool dry " and " warm dusty ". [§]

(*a*) " *Cool dry* " *Season.* From May to August. The average maximum temperature ranges from 80° to 85° F., the relative humidity is low and in inland areas cold nights are experienced when the temperature drops to 40° F. The skies generally are cloudless, but in about one year in three during June or July one to two inches of rain fall.

(*b*) " *Warm dusty* " *Season.* From the end of August temperatures rise and reach a maximum in October or the beginning of November. Temperatures of over 120° F. have been recorded.

(*c*) " *Wet* " *Season.* After the first of the heavy storms, the maximum temperatures fall but still remain high with high relative humidity. At Wyndham during January, 1944 the minimum temperature did not drop below 75° F. for fourteen consecutive days. A maximum of over 100° F. was recorded on each rainless day.

In Central as in Northern Australia during the hottest months, the average temperatures range from 80° to 85° F., whereas in Southern Australia they vary from 65° to 70°.

Throughout Australia the coldest month is July, when only a very narrow strip of the northern sea-board has an average temperature as high as 75°. Over the southern half of the continent, July temperatures range from 55° to 45° at elevations below 1,500 feet and fall as low as 35° on the Australian Alps. Here the temperature seldom, if ever, reaches 100° even in the hottest of seasons. Hotham Heights (6,100 feet above Mean Sea Level) recorded the highest maximum of 82.0° on 19th January, 1935. In winter, readings slightly below zero are occasionally recorded on the extreme heights.

Tasmania as a whole enjoys a moderate and equable range of temperature throughout the year, although occasionally hot winds may cause the temperature to rise to 100° in the eastern part of the State.

(iii) *Comparisons with other Countries.* In respect of Australian temperatures generally, it may be pointed out that the mean annual isotherm for 70° F. extends in South America and South Africa as far south as latitude 33°, while in Australia it reaches only as far south as latitude 30°, thus showing that, on the whole, Australia has, latitude for latitude, a more temperate climate than other places in the southern Hemisphere.

The comparison is even more favourable when the Northern Hemisphere is included, for in the United States of America the 70° isotherm extends in several of the western States as far north as latitude 41°. In Europe, the same isotherm reaches almost to the southern shores of Spain, passing afterwards, however, along the northern shores of Africa till it reaches the Red Sea, when it bends northward along the eastern shore of the Mediterranean till it reaches Syria. In Asia, nearly the whole of the land area south of latitude 40° N. has a higher temperature than 70°.

The extreme range of temperature is less than 100° over practically the whole of Australia, that figure being only slightly exceeded at a very few places; it is mostly 70° to 90° over inland areas, and somewhat less on the coast. In parts of Asia and North America, the extreme range exceeds 130° and 150° in some localities.

Along the northern shores of Australia the temperatures are very equable. At Darwin, for example, the difference in the means for the hottest and coldest month is only 8.4°, and the extreme readings for the year, or the highest maximum on record and the lowest minimum, show a difference of under 50°.

The highest temperature recorded in Australia was 127.5° F. at Cloncurry on 16th January, 1889. The world's highest (136° F.) was recorded at Azizia (Tripoli) on 13th August, 1922. The lowest temperature ever recorded in Australia was —8° F. at Charlotte Pass on 14th June, 1945, and again on 22nd July, 1947, as contrasted with the world's lowest recorded temperature of —90° F. at Verkhoyansk (Siberia) on 5th and 7th February, 1892.

A comparison of the mean temperatures and the range from the extreme maximum to the extreme minimum temperatures (in whole degrees) of the capital cities of Australia with those of the main cities of some other countries is shown in tabular form in Official Year Book No. 38, p. 42.

(iv) *Hottest and Coldest Parts.* A comparison of the temperatures recorded at coast and inland stations shows that, in Australia, as in other continents, the range increases, within certain limits, with increasing distance from the coast. This is clearly illustrated by the map of extreme temperature range (page 33).

In the interior of Australia, and during exceptionally dry summers, the temperature occasionally reaches or exceeds 120° in the shade. The hottest area of the continent is situated in the northern part of Western Australia about the Marble Bar and Nullagine gold-fields, where the maximum shade temperature during the summer sometimes exceeds 100° continuously for days and weeks. The longest recorded period was 160 days from 31st October, 1923 to 7th April, 1924.

EXPLANATION

The sides of the octagons face towards the cardinal and semi-cardinal points. Projecting from each side are twelve columns representing the twelve months of the year, and the lengths of the columns are proportional to the percentage frequencies of the winds from the given direction in the successive months, working round clockwise from January to December. The scale is shown above, and the outer octagons have been drawn, separated from the inner octagons by a distance representing 12½%. The tops of the columns would all be on these outer octagons if winds from the eight directions were equally frequent and there were no calms. The percentage frequency of calms in the 12 months is shown by figures within the octagons. Small dashes within the inner octagons indicate months when the percentage of winds from that direction is practically zero.

(vi) *Frosts.** The Observer's Handbook of the Meteorological Office, London, gives the following definition :—" Injury to the tissues of growing plants is not caused until the temperature has fallen considerably below the freezing point of water (32° F.) and a 'ground frost' is regarded as having occurred when the thermometer on the grass has fallen to 30.4° F. or below ".

In Australia this definition is adopted for stations equipped with terrestrial minimum thermometers. However, these are few in number, so although many rainfall observers record " hoar frost " when seen, for statistical purposes a screen temperature of 36° F. is taken as indicating light frosts at ground level. For heavy frosts a screen temperature of 32° F. is taken.

In America a " killing " frost is defined as a frost " that is generally destructive of vegetation ". A " black frost " is the phenomenon arising out of a combination of low temperature and low humidity causing rupturing of plant cells by expansion, when freezing takes place, of the water which they contain, though frost crystals are not formed on the ground.

The parts of Australia most subject to low temperature are the eastern highlands from about Omeo in Victoria northward to Cambooya and Bybera in Queensland. Most stations in this region experience more than ten nights per month with readings of 32° F. or under for three to five months of the year. In Tasmania, districts on the Central Plateau are subject to such conditions for three to six months of the year. Minimum temperatures of 32° F. are comparatively infrequent in Western Australia except in parts of the south and south-west. In South Australia the Yongala district is much more subject to such temperatures than other parts of the State. Much of the south-east of Queensland has a higher frequency of such readings than South Australia. Generally speaking, the frequency is controlled mainly by altitude, latitude and, to a lesser degree, by proximity to the sea.

Frosts may occur within a few miles of the coastline over the whole continent, except in the Northern Territory and a considerable area of Northern Queensland. Regions subject to frost in all months of the year comprise portions of the tablelands of New South Wales, the Eastern Highlands and parts of the Central Divide and Western district in Victoria, practically the whole of Tasmania and a small area in the south-west of Western Australia.

---

* Foley, J. C. Frost in the Australian Region (Bull. 32, 1945).

A map showing the average annual number of frost-free days (i.e. days on which the temperature does not fall below 36° F.) appears on page 35.

Over most of the interior of the continent and on the Highlands in Queensland as far north as the Atherton Plateau frosts appear in April and end in September, but they are infrequent in these months. Minimum temperatures of 32° F. are experienced in most of the sub-tropical interior in June and July.

3. **Humidity.**—After temperature, humidity is the most important element of climate, particularly as regards its effects on human comfort, rainfall supply, and conservation and related problems.

In this publication the humidity of the air has been expressed by the relative humidity, which is the quotient of the vapour pressure divided by the saturation vapour pressure and multiplied by one hundred. The mean 9 a.m. relative humidity, as well as its highest and lowest recorded mean values at 9 a.m., are shown in the tables of climatological data for the capital cities (par. 13). The mean monthly vapour pressure has also been added to these tables.

The annual curve of vapour pressure derived from the normal monthly values for this element is comparable with the maximum and minimum temperature curves, but the relative humidities consisting as they do of the extremes for each month do not show the normal annual fluctuation which would be approximately midway between the extremes.

The order of stations in descending values of 9 a.m. vapour pressure is Darwin, Brisbane, Sydney, Perth, Melbourne, Adelaide, Canberra, Hobart and Alice Springs, while the relative humidity diminishes in the order, Sydney, Canberra, Melbourne, Darwin, Hobart, Brisbane, Perth, Adelaide and Alice Springs.

Further reference to humidity will be found in the section on effective temperature (page 30).

4. **Evaporation.**—(i) *General.* The rate and quantity of evaporation in any territory is influenced by the prevailing temperature, and by atmospheric humidity, pressure and wind movement. In Australia the question is, perhaps, of more than ordinary importance, since in its drier regions water has often to be conserved in "tanks" and dams. The magnitude of the economic loss by evaporation will be appreciated from the map reproduced herein (*see* page 36) which shows that the yearly amount varies from about 20 inches over Western Tasmania to more than 100 inches over the central and north-western parts of Australia. Over an area of 70 per cent. of the continent, comprising most inland districts and extending to the coast in the North-West and Eucla divisions of Western Australia, during no month of the year does the rainfall exceed the evaporation. The central and north-western portions of the continent, comprising 46 per cent. of the total land mass, experience evaporation more than twice as great as their rainfall; it is noteworthy that the vegetation over most of this region is characterised by acacia, semi-desert, shrub steppe and porcupine grass. Since the loss by evaporation depends largely on the exposed area, tanks and dams so designed that the surface shall be a minimum are advantageous. Further, the more they are protected from the direct rays of the sun and from winds by means of suitable tree planting, the less will be the loss by evaporation. These matters are naturally of more than ordinary concern in the drier districts of Australia.

(ii) *Comments on Map of Average Annual Evaporation.* The map of average annual evaporation in Australia (*see* page 36) has been compiled on the basis of records obtained from a number of evaporimeters supplemented by estimates derived from records of saturation deficit by applying the Waite Institute factor of 263.* Some modification of the latter values was found to be necessary in comparison with recordings of evaporimeters.

The standard evaporation tank used in Australia is cylindrical in form and is 36 inches in diameter and 36 inches deep. It is surrounded by a 6-inch water jacket and the whole is sunk into the ground so that the water surface is approximately at ground level.

---

* Prescott, J. A. "Atmospheric Saturation Deficit in Australia" (Trans. Royal Society, S.A. Vol. LV., 1931).

Saturation deficit is obtained from readings of dry and wet bulb thermometers exposed in a standard Stevenson thermometer shelter. Saturation deficit is the difference between the vapour pressure indicated by the dry and wet bulb readings, and the saturation vapour pressure corresponding to the dry bulb temperature.

The Waite formula, e = 263 s.d., is not an exact relationship, but it takes account of one of the major factors in evaporation, i.e., the difference between saturation vapour pressures at the mean dew point and at the mean air temperature. Errors in the formula are found to be fairly consistent in considerable areas of Australia and corrections have been applied accordingly. No evaporation records are available north of latitude 20°, and corrections have been extrapolated for these areas. The evaporation stations on which estimates for the tropics have been based are Alice Springs (N.T.) and Winton (Q'land), and to a lesser degree Blackall (Q'land) and Marble Bar (W.A.).

The map thus presents an estimate of evaporation for which allowance should be made for a certain margin of error (perhaps 10 per cent. or so) on the conservative side. In the absence of definite information, such a map should serve a useful purpose as a basis for many climatic studies.

For graphs and tables of mean monthly evaporation and rainfall at certain selected stations *see* Official Year Book No. 37, pp. 34–35.

5. **Rainfall.**—(i) *General.* The rainfall of any region is determined mainly by the direction and route of the prevailing winds, by the varying temperatures of the earth's surface over which they blow, and by its physiographical features.

Australia lies within the zones of the south-east trades and "prevailing" westerly winds. The southern limit of the south-east trade strikes the eastern shores at about 30° south latitude, and, with very few exceptions, the heaviest rains of the Australian continent are precipitated along the Pacific slopes to the north of that latitude, the varying quantities being more or less regulated by the differences in elevation of the shores and of the chain of mountains from the New South Wales northern border to Thursday Island, upon which the rain-laden winds blow. The converse effect is exemplified on the north-west coast of Western Australia, where the prevailing winds, blowing from the interior of the continent instead of from the ocean, result in the lightest coastal rain in Australia.

The westerly winds, which skirt the southern shores, are responsible for the reliable, generally light to moderate rains enjoyed by the south-western portion of Western Australia, the agricultural areas of South Australia, a great part of Victoria, and the whole of Tasmania.

(ii) *Distribution of Rainfall.* The average annual rainfall map of Australia (page 37) shows that the heaviest yearly falls occur on the north coast of Queensland (up to more than 160 inches) and in Western Tasmania (up to 140 inches), while from 50 to over 60 inches are received on parts of the eastern seaboard from Jervis Bay (New South Wales) to the northern part of Cape York Peninsula, also around Darwin (Northern Territory), on the West Kimberley coast, near Cape Leeuwin (Western Australia), about the Australian Alps in eastern Victoria and New South Wales, and on the north-eastern highlands in Tasmania. A great part of the interior of the continent, stretching from the far west of New South Wales and the south-west of Queensland to the vicinity of Shark Bay in Western Australia, has a very low average rainfall of less than 10 inches a year. Between these two regions of heavy and very low rainfall are the extensive areas which experience useful to good rains, and in the southern and eastern parts of which are found the best country and most of the population and primary production.

(iii) *Factors Determining Occurrence, Intensity and Seasonal Distribution of Rainfall.* Reference has already been made to the frequent rains occurring in the north-eastern coastal districts of Queensland with the prevailing south-east trade winds and to similar rains in the west of Tasmania with the prevailing westerly winds. Other rains in Australia are associated mainly with tropical and southern depressions.

The former chiefly affect the northern, eastern, and to some extent the central parts of the continent and operate in an irregular manner during the warmer half of the year, but principally from December to March. They vary considerably in activity and scope from year to year, occasionally developing into severe storms off the east and north-west coasts. Tropical rainstorms sometimes cover an extensive area, half of the continent on occasions receiving moderate to very heavy falls during a period of a few days. Rain is also experienced, with some regularity, with thunderstorms in tropical areas, especially near the coast. All these tropical rains, however, favour mostly the northern and eastern parts of the area referred to ; the other parts further inland receive lighter, less frequent and less reliable rainfall. With the exception of districts near the east coast, where some rain falls in all seasons, the tropical parts of the continent receive useful rains only on rare occasions from May to September.

The southern depressions are most active in the winter—June to August—and early spring months. The rains associated with them are fairly reliable and frequent over Southern Australia and Tasmania, and provide during that period the principal factor in the successful growing of wheat. These depressions also operate with varying activity during the remainder of the year, but the accompanying rains are usually lighter. The southern rains favour chiefly the south-west of Western Australia, the agricultural districts of South Australia, Victoria, Tasmania, and the southern parts of New South Wales. They sometimes extend into the drier regions of the interior, but only infrequently and irregularly.

The map showing mean monthly distribution of rainfall over Australia (page 38) gives in graphic form information on the amount and occurrence of rain.

(iv) *Wettest and Driest Regions.* The wettest known part of Australia is on the north-east coast of Queensland, between Port Douglas and Cardwell, where Deeral on the north coast-line has an average annual rainfall of 175.96 inches and Tully on the Tully River 187.19 inches. In addition, three stations situated on, or adjacent to, the Johnstone and Russell Rivers have an average annual rainfall of between 144 and 169 inches. The maximum and minimum annual amounts there are :—Deeral, 287.18 in 1945 and 99.60 inches in 1947, or a range of 187.58 inches ; Tully, 310.92 in 1950 and 104.98 inches in 1943, or a range of 205.94 inches ; Goondi, 241.53 in 1894 and 67.88 inches in 1915, or a range of 173.65 inches ; Innisfail, 232.06 in 1950 and 69.87 inches in 1902, or a range of 162.19 inches ; Harvey Creek, 254.77 in 1921 and 80.47 inches in 1902, or a range of 174.30 inches.

On five occasions more than 200 inches have been recorded at Goondi, the last of these being in 1950, when 204.97 inches were registered. The records at this station cover a period of 64 years.

In twenty-four years of record Tully has exceeded 200 inches on ten occasions, whilst in a record of 28 complete years Harvey Creek has four times exceeded this figure.

In Tasmania the wettest part is in the West Coast region, the average annual rainfall at Lake Margaret being 145.53 inches, with a maximum of 177.30 inches in 1948.

The driest known part of the continent is in an area of approximately 180,000 square miles surrounding Lake Eyre in South Australia, where the annual average is between 4 and 6 inches and where the fall rarely exceeds 10 inches for 12 months.

Records of stations have at times been interrupted, but of the 23 stations in this region which have an annual average of less than 5 inches, six have complete records extending from 30 to 55 years. Of these Mulka has the lowest average of 4.13 inches (33 years), followed by Troudaninna with an average of 4.15 inches in 42 years. Troudaninna in the period 1893 to 1936 had only one year in which the total exceeded 9 inches (11.07 inches in 1894). There have been protracted periods when the average has even been less than 3 inches. From 1895 to 1903 Troudaninna received the following annual totals :—2.78, 0.99, 5.71, 3.04, 3.18, 2.83, 1.80, 1.11, 4.87, an average of 2.91 inches. From 1918 to 1929 the average was only 2.65 inches, and in this period from December, 1924 to November, 1929 the average was only 1.70 inches.

Mulka since 1918 has only once exceeded 10 inches for the annual total (11.72 inches in 1920), and in 33 years on 15 occasions the annual total has been less than 3 inches. In one particular period from October, 1926 to September, 1930, the average was only 1.26 inches (505 points in 48 months). However, at Kanowana, an even lower four-year average of 1.12 inches was recorded between 1896 and 1899 with yearly totals of 43, 225, 87 and 94 points. An even smaller total than 43 points was recorded at Mungeranie in 1889 when only 39 points was recorded on 5 days.

The average number of rain days per month in this region is only 1–2 and the annual number ranges between 10 and 20. Oodnadatta (standard 30 years' average rainfall equal to 4.44 inches) has an average of 20 days of rain per year while Cordillo Downs in the extreme north-east corner of the State of South Australia receives 5.16 inches on 12 days per year, averaging about one day of rain each month in the thirty years' period 1911–1940.

No part of the earth, so far as is known, is absolutely rainless, and although at Arica, in northern Chile, the rainfall over a period of 15 years was nil, a further two years in which there were three measurable showers made the "average" for 17 years 0.02 inches.

(v) *Quantities and Distribution of Rainfall.* The general distribution is best seen from the rainfall map (page 37) which shows the areas subject to average annual rainfalls lying between certain limits. The proportions of the total area of each State and of Australia as a whole enjoying varying quantities of rainfall determined from the latest available information are shown in the following table :—

AVERAGE ANNUAL RAINFALL DISTRIBUTION.

(Per Cent.)

Average Annual Rainfall.	N.S.W. (*a*)	Victoria.	Queensland.	South Australia	Western Australia.	Tasmania. (*b*)	Northern Territory	Total.
Under 10 inches ..	19.7	Nil	13.0	82.8	58.0	Nil	24.7	37.6
10—15 " ..	23.5	22.4	14.4	9.4	22.4	Nil	32.4	19.9
15—20 " ..	17.5	15.2	19.7	4.5	6.8	0.7	9.7	10.9

Total ..	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

(*a*) Includes Australian Capital Territory. (*b*) Over an area of 2,777 square miles no records are available.

Referring first to the capital cities, the records of which are given in the next table, it will be seen that Sydney, with an average rainfall of 46.86 inches, occupies the chief place: Brisbane, Perth, Melbourne, Hobart, Canberra and Adelaide follow in that order, Adelaide with 21.03 inches being the driest. The extreme range from the wettest to the driest year is greatest at Brisbane (72.09 inches) and least at Adelaide (19.46 inches).

In order to show how the rainfall is distributed throughout the year in various parts of the continent, average figures for the various climatological districts have been selected. (*See* map on p. 38). The figures for Northern Rivers (District 14), show that nearly the whole of the rainfall occurs there in the summer months, while little or none falls in the middle of the year. The figures for the Central Coast, south-west of Western Australia (District 9), are the reverse, for while the summer months are dry, the winter months are very wet. In the districts containing Melbourne and Hobart the rain is fairly well distributed throughout the twelve months, with a maximum in October for both districts. In Queensland, the heaviest rains fall in the summer months, but good averages are also maintained during the other seasons in eastern parts.

On the coast of New South Wales, the first half of the year is the wettest, with heaviest falls in the autumn; the averages during the last six months are fair, and moderately uniform. Generally it may be said that approximately one-third of the area of the continent, principally in the eastern and northern parts, enjoys an annual average rainfall of from 20 to 50 inches or more, the remaining two-thirds averaging from 5 to 20 inches.

(vi) *Tables of Rainfall.* The table of rainfall for a fairly long period of years for each of the various Australian capitals affords information as to the variability of the fall in successive years, and the list of the more remarkable falls furnishes information as to what may be expected on particular occasions.

7. **Snowfall.**—Light snow has been known to fall occasionally as far north as latitude 31° S., and from the western to the eastern shores of the continent. During exceptional seasons, it has fallen simultaneously over two-thirds of New South Wales, and has extended at times along the whole of the Great Dividing Range, from its southern extremity in Victoria as far north as Toowoomba in Queensland. During the winter, for several months, snow covers the ground to a great extent on the Australian Alps, where also the temperature falls below zero Fahrenheit during the night. In the ravines around Mt. Kosciusko and similar localities the snow never entirely disappears after a severe winter.

8. **Hail.**—Hail falls most frequently along the southern shores of the continent in the winter, and over eastern Australia during the summer months. The size of the hailstones generally increases with distance from the coast. A summer rarely passes without some station experiencing a fall of stones exceeding in size an ordinary hen-egg, and many riddled sheets of light-gauge galvanized iron bear evidence of the weight and penetrating power of the stones.

The hailstones occur most frequently when the barometric readings indicate a flat and unstable condition of pressure. Tornadoes or tornadic tendencies are almost invariably accompanied by hail, and on the east coast the clouds from which the stones fall are frequently of a remarkable sepia-coloured tint.

9. **Barometric Pressures.**—The mean annual barometric pressure (corrected to sea level and standard gravity) in Australia varies from 29.80 inches on the north coast to 29.92 inches over the central and 30.03 inches in the southern parts of the continent. In January, the mean pressure ranges from 29.70 inches in the northern and central areas to 29.95 inches in the southern. The July mean pressure ranges from 29.90 inches at Darwin to 30.12 inches at Alice Springs. Barometer readings corrected to mean sea level and standard gravity have, under anticyclonic conditions, ranged as high as 30.935 inches (at Hobart on 13th July, 1846) and have fallen as low as 27.55 inches. This lowest record was registered at Mackay during a tropical hurricane on 21st January, 1918. An almost equally abnormal reading of 27.88 inches was recorded at Innisfail during a similar storm on 10th March, 1918. For graphs of Mean Barometric Pressure at Capital Cities *see* Official Year Book No. 37, p. 35.

10. **Wind.**—(i) *Trade Winds.* The two distinctive wind currents in Australia are, as previously stated, the south-east trade and the "prevailing" westerly winds. As the belt of the earth's atmosphere in which they blow apparently follows the sun's ecliptic path north and south of the equator, so the area of the continent affected by these winds varies at different seasons of the year. During the summer months the anticyclonic belt travels in high latitudes, thereby bringing the south-east trade winds as far south as 30° south latitude. The "prevailing" westerly winds retreat a considerable distance to the south of Australia, and are less in evidence in the hot months. When the sun passes to the north of the equator, the south-east trade winds follow it, and only operate to the north of the tropics for the greater part of the winter. The westerly winds come into lower latitudes during the same period of the year. They sweep across the southern areas of the continent from Cape Leeuwin to Cape Howe, and during some seasons are remarkably persistent and strong, and occasionally penetrate to almost tropical latitudes.

(ii) *North-west Monsoon.* As the belt of south-east trade winds retreats southward during the summer, it is replaced in the north and north-west of Australia first by a sequence of light variable winds and then by the north-west monsoon. In Australia, the north-west monsoon has not the persistence nor regularity of the Indian south-west monsoon but is sufficiently characteristic for the summer in the north of Australia to be called the "North-west Season". In central and eastern Queensland, the north-west monsoon in the summer has comparatively little effect and the trade winds, albeit weakened, are still dominant winds. With the migration of the sun northward in the autumn, the north-west monsoon is itself replaced first by light variable winds and then by the trade winds.

Further particulars of Australian wind conditions and meteorology will be found in Official Year Book No. 38, pp. 58–61.

(iii) *Cyclones and Storms.* The "elements" in Australia are ordinarily peaceful, and while destructive cyclones have visited various parts, more especially coastal areas, such visitations are rare, and may be properly described as erratic.

During the winter months, the southern shores of the continent are subject to deep depressions of the southern low-pressure belt. They are felt most severely over the south-western parts of Western Australia, to the south-east of South Australia, in Bass Strait, including the coast-line of Victoria, and on the west coast of Tasmania. Apparently the more violent wind pressures from these disturbances are experienced in their northern half, or in that part of them which has a north-westerly to a south-westerly circulation.

The north-east coast of Queensland is occasionally visited by hurricanes from the north-east tropics. During the first four months of the year, these hurricanes appear to have their origin in the neighbourhood of the South Pacific Islands, their path being a parabolic curve first to the south-west and finally towards the south-east.

Very severe cyclones, locally known as "willy willies," are peculiar to the north-west coast of Western Australia from the months of November to April, inclusive. They usually originate over the ocean to the north or north-west of Australia, and travel in a south-westerly direction with continually increasing force, displaying their greatest energy near Cossack and Onslow, between latitudes 20° and 22° South. The winds in these storms, like those from the north-east tropics, are very violent and destructive. The greatest velocities are usually to be found in the south-eastern quadrant of the cyclones, with north-east to east winds. After leaving the north-west coast, these storms either travel southwards, following the coast-line, or cross the continent to the Great Australian Bight. When they take the latter course, their track is marked by torrential rains, as much as 29.41 inches, for example, being recorded in 24 hours at Whim Creek from one such occurrence. Falls of 10 inches and over have frequently been recorded in the northern interior of Western Australia from similar storms.

Some further notes on severe cyclones and on "southerly bursters", a characteristic feature of the eastern part of Australia, appear in previous issues of the Official Year Book (*see* No. 6, pp. 84–86), and a special article dealing with "Australian Hurricanes and Related Storms" appears in Official Year Book No. 16, pp. 80–84.

Depressions vary considerably in their isobaric forms, intensity and other characteristics. Some bring rain in variable quantities, some heat and others mainly wind. A common type in southern Australia is the "Λ" shaped trough with an abrupt "backing" of the wind or "line squall" as it passes. The cold front is most frequently found through the centre of the "trough" because it is along this line, and extending into the upper levels of the atmosphere that the demarcation of different air masses is so well defined. The best rains occur in inland Australia when extensive masses of warm moist tropical air move into the interior and are forced to rise by convergence of flow or by impact with a cold air stream.

The speed of low pressure systems is very variable, but in general in southern latitudes the movement is of the order of 500 to 700 miles per day.

11. **Influences affecting Australian Climate.**—(i) *General.* Australian history does not cover a sufficient period, nor is the country sufficiently occupied, to ascertain whether or not the advance of settlement has materially affected the climate as a whole. Local changes have, however, taken place, a fact which suggests that settlement and the treatment of the land have a distinct effect on local conditions. For example, low-lying lands on the north coast of New South Wales, which originally were seldom subject to frosts, have, with the denudation of the surrounding hills from forests, experienced annual visitations, the probable explanation being that through the absence of trees the cold air of the highlands now flows unchecked and untempered down the sides of the hills to the valleys and lower lands.

(ii) *Influence of Forest on Climate.* As already indicated, forests doubtless exercise a great influence on local climate, and hence, to the extent that forestal undertakings will allow, the weather can be controlled by human agency. The direct action of forests is an equalizing one; thus, especially in equatorial regions, and during the warmest portion of the year, they considerably reduce the mean temperature of the air. They also reduce the diurnal extremes of shade temperatures by altering the extent of radiating surface by evaporation, and by checking the movement of air, and while decreasing evaporation from the ground, they increase the relative humidity. Vegetation greatly diminishes the rate of flow-off of rain and the washing away of surface soil, and when a region is protected by trees a steadier water supply is ensured, and the rainfall is better conserved. In regions of snowfall, the supply of water to rivers is similarly regulated, and without this and the sheltering influence of ravines and "gullies," watercourses supplied mainly by melting snow would be subject to alternative periods of flooding and dryness. This is borne out in the case of the inland rivers, the River Murray, for example, which has never been known to become dry, deriving its steadiness of flow mainly through the causes indicated.

(iii) *Direct Influence of Forests on Rainfall.* Whether forests have a direct influence on rainfall is a debatable question, some authorities alleging that precipitation is undoubtedly induced by forests, while others take the opposite view.

Sufficient evidence exists, however, to prove that, even if the rainfall has not increased, the beneficial climatic effect of forest lands more than warrants their protection and extension. Rapid rate of evaporation, induced by both hot and cold winds, injures crops and makes life uncomfortable on the plains, and, while it may be doubted that the forest aids in increasing precipitation, it must be admitted that it does check winds and the rapid evaporation due to them. Trees as wind-breaks have been successfully planted in central parts of the United States of America, and there is no reason why similar experiments should not be successful in many parts of the treeless interior of Australia. The belts should be planted at right angles to the direction of the prevailing parching winds, and if not more than half a mile apart will afford shelter to the enclosed areas.

12. **Rainfall and Temperatures, Various Cities.**—The Official Year Book No. 34, p. 28, shows rainfall and temperature for various important cities throughout the world, and for the Australian capitals.

13. **Climatological Tables.**—The averages and extremes for a number of climatological elements, which have been determined from long series of observations at the Australian capitals up to and including the year 1950, are given on pp. 58–64.

NOTE.—The following points apply throughout:—

(i) Where records are available, mean or average values have been calculated on a standard period of 30 years from 1911 to 1940.

(ii) Extreme values have been extracted from all available years of actual record, but the number of years quoted does not include intervening periods when observations were temporarily discontinued.

§ 3. Standard Times in Australia.

Prior to 1895 the official time adopted in the several colonies was for most purposes the mean solar time of the capital city of each.

In November, 1892, an intercolonial conference of surveyors was held in Melbourne to consider, among other things, the advantages of introducing the system of standard time. In this system it was proposed to make the initial meridian that of Greenwich and to change local standard time by whole hours according to the longitude east or west of that of Greenwich. Thus for every difference of 15° in longitude a change of one hour would be required. The minutes and seconds would then be identical everywhere.

To give effect to this proposal it was suggested that Australia should be divided into three zones, the standard times for which should be respectively the mean solar times of the meridians of 120°, 135° and 150° E. longitude, thus giving standard times 8, 9 and 10 hours respectively ahead of Greenwich time. It was proposed that the 120° zone should comprise Western Australia, that the 135° zone should comprise South Australia and the Northern Territory, and that the 150° zone should comprise Queensland, New South Wales, Victoria and Tasmania.

The matter was also considered by several intercolonial postal conferences, and eventually in 1894 and 1895 legislation was enacted by each of the colonies in accord with the recommendations of the Surveyors' Conference of 1892.

In 1898 the South Australian legislature amended its earlier provision, and adopted the mean solar time of the meridian 142° 30′ E. longitude as the standard time for that colony, thus reducing the difference between the standard time of Adelaide and that of the capitals of the eastern colonies from an hour to half-an-hour. Particulars concerning these enactments are as follows :—

STANDARD TIMES IN AUSTRALIA.

State.	Date when Act came into Operation.	Meridian Selected.	Time Ahead of Greenwich.
			Hours.
New South Wales ..	1st February, 1895 ..	150° E.	10
Victoria	1st February, 1895 ..	150° E.	10
Queensland	1st January, 1895 ..	150° E.	10
South Australia ..	1st February, 1895 ..	135° E.	9
South Australia ..	1st May, 1899	142° 30′ E.	9½
Western Australia ..	1st December, 1895 ..	120° E.	8
Tasmania	1st September, 1895 ..	150° E.	10

The standard time in the Australian Capital Territory is the same as in New South Wales, and in the Northern Territory the same as in South Australia.

Consequent upon the opening of the Trans-Australian Railway an arrangement was made by which the change of time between South Australia and Western Australia (namely, 1½ hours) is divided into two changes of 45 minutes each. Going east from Kalgoorlie the first change is made at Rawlinna, 235.18 miles out, where the time is put forward by 45 minutes. The second change of the same amount is made at Tarcoola, 794.05 miles out. Thenceforward South Australian standard time is kept. The Commonwealth Observatory at Mount Stromlo, Canberra, and the State Observatories at Sydney and Perth derive time by astronomical observations.

Time signals are originated by these Observatories and by the Postmaster-General's Research Laboratory, Melbourne. The latter participates with the Commonwealth Observatory in the Commonwealth Time Service.

CHAPTER III.

GENERAL GOVERNMENT.

§ 1. Scheme of Parliamentary Government.

1. **General.**—The legislative power of the Commonwealth is vested in the Parliament of the Commonwealth, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State there is a State Governor, who is the representative of the Sovereign for the State, and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office, and by the instructions which inform him in detail of the manner in which his duties are to be fulfilled. The Legislature in each State was bi-cameral till 1922, in which year the Queensland Parliament became uni-cameral. In the bi-cameral States it consists of (*a*) a Legislative Council and (*b*) a Legislative Assembly, or House of Assembly. In Queensland the Legislative Assembly constitutes the legislature. In the Commonwealth Parliament the Upper House is known as the Senate, and in the State Parliaments as the Legislative Council. The Lower House in the bi-cameral Parliaments is known as follows :—In the Commonwealth Parliament as the House of Representatives, in the State Parliaments of New South Wales, Victoria and Western Australia as the Legislative Assembly, and in the State Parliaments of South Australia and Tasmania as the House of Assembly. The legislative powers of these Parliaments are delimited by the Commonwealth and the State Constitutions. The Assembly (Queensland as pointed out is uni-cameral) which is the larger House, is always elective, the franchise extending to adult British subjects with certain residential qualifications. The Council in each of the States other than New South Wales is elected by the people of that State, the constituencies being differently arranged and in general, some property or special qualification for the electorate being required. In Victoria, however, under the Legislative Council Reform Act passed in October, 1950, adult suffrage was adopted for Legislative Council elections. In the case of New South Wales, the Council is elected by the members of each House of Parliament at a simultaneous sitting. In the Federal Parliament the qualifications for the franchise are identical for both Houses.

2. **Powers and Functions of the Governor-General and of the State Governors.**—A detailed statement of the powers and functions of the Governor-General and of the State Governors appears in preceding issues of the Official Year Book (*see* No. 18, pp. 78–80). For the names of the Governors-General since the inception of the Commonwealth and of the present State Governors, *see* § 4. following.

3. **The Cabinet and Executive Government.**—(i) *General.* Both in the Commonwealth and in the States, executive government is based on the system which was evolved in Britain in the 18th century, and which is generally known as "Cabinet" or "responsible" government. Its essence is that the head of the State (His Majesty the King, and his representative, the Governor-General or Governor) should perform Governmental acts on the advice of his Ministers; that he should choose his principal

Ministers of State from members of Parliament belonging to the party, or coalition of parties, commanding a majority in the popular House; that the Ministry so chosen should be collectively responsible to that House for the government of the country; and that the Ministry should resign if it ceases to command a majority there.

The Cabinet system operates by means, chiefly, of constitutional conventions, customs or understandings, and of institutions that do not form part of the legal structure of the government at all. The constitutions of the Commonwealth and the States make fuller legal provision for the Cabinet system than the British Constitution does—for example, by requiring that Ministers shall be, or within a prescribed period become, members of the Legislature. In general, however, the legal structure of the executive government remains the same as it was before the establishment of the Cabinet system.

Formally, the executive power is vested in the Commonwealth in the Governor-General, and in the States in the Governor. In each case he is advised by an Executive Council, which, however, meets only for certain formal purposes, as explained below. The whole policy of a Ministry is, in practice, determined by the Ministers of State, meeting, without the Governor-General or Governor, under the chairmanship of the Prime Minister or Premier. This group of Ministers is known as the Cabinet.

(ii) *The Cabinet.* This body does not form part of the legal mechanism of government. Its meetings are private and deliberative. The actual Ministers of the day alone are present, no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. In Australia, all Ministers are members of the Cabinet. As Ministers are the leaders of the party or parties commanding a majority in the popular House, the Cabinet substantially controls, in ordinary circumstances, not only the general legislative programme of Parliament, but the whole course of Parliamentary proceedings. In effect, though not in form, the Cabinet, by reason of the fact that all Ministers are members of the Executive Council, is also the dominant element in the executive government of the country. Even in summoning, proroguing or dissolving Parliament, the Governor-General or Governor is usually guided by the advice tendered him by the Cabinet, through the Prime Minister or Premier, though legally the discretion is vested in the Governor-General or Governor himself.

(iii) *The Executive Council.* This body is presided over by the Governor-General or Governor, the members thereof holding office during his pleasure. All Ministers of State are *ex officio* members of the Executive Council. In the Commonwealth, and also in the States of Victoria and Tasmania, Ministers remain members of the Executive Council on leaving office, but are not summoned to attend its meetings; for it is an essential feature of the Cabinet system that attendance should be limited to the Ministers of the day. The meetings of the Executive Council are formal and official in character, and a record of proceedings is kept by the Secretary or Clerk. At Executive Council meetings, the decisions of the Cabinet are (where necessary) given legal form; appointments made; resignations accepted; proclamations issued, and regulations and the like approved.

(iv) *The Appointment of Ministers.* Legally, Ministers hold office during the pleasure of the Governor-General or Governor. In practice, however, the discretion of the King's representative in the choice of Ministers is limited by the conventions on which the Cabinet system rests. Australian practice follows, broadly, that of the United Kingdom. When a Ministry resigns, the Crown's custom is to send for the leader of the party which commands, or is likely to be able to command, a majority in the popular House, and to commission him, as Prime Minister or Premier, to "form a Ministry"—that is, to nominate other persons to be appointed as Ministers of State and to serve as his colleagues in the Cabinet.

The customary procedure in connexion with the resignation or acceptance of office by a Ministry is described fully in previous issues of the Official Year Book (*see* No. 6, p. 942). It may be added, however, that subsequent legislation has, in most of the States, obviated the necessity of responsible Ministers vacating their seats in Parliament on appointment to office.

(v) *Ministers in Upper and Lower Houses.* The following table shows the number of Ministers with seats in the Upper or Lower Houses of each Parliament in July, 1951 :—

AUSTRALIAN PARLIAMENTS : MINISTERS IN UPPER OR LOWER HOUSES, JULY, 1951.

Ministers with Seats in—	C'wealth.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
The Upper House ..	5	2	4	(*a*)	2	2	..	15
The Lower House ..	15	14	9	11	4	8	9	70
Total ..	20	16	13	11	6	10	9	85

(*a*) Abolished in 1922.

For the names of the present occupants of ministerial office in each of the Parliaments of Australia, and also for particulars of earlier Commonwealth ministries, *see* § 4. of this chapter.

4. **Number and Salary of Members of the Legislatures.**—The following table shows the number and annual salary of members in each of the legislative chambers in July, 1951 :—

AUSTRALIAN PARLIAMENTS : MEMBERS AND ANNUAL SALARIES, JULY, 1951.

Members in—	C'wealth.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Total.
NUMBER OF MEMBERS.								
Upper House ..	60	60	34	(*b*)	20	30	19	223
Lower House ..	123	94	65	75	39	50	30	476
Total ..	183	154	99	75	59	80	49	699
ANNUAL SALARY. (£.)								
Upper House ..	1,500	300	(*a*)1,050	(*b*)	(*d*) 900–975	(*e*)1,000	(*f*)800–1,050	..
Lower House ..	1,500	1,375	(*a*)1,050	(*c*)1,375	(*d*) 900–975	(*e*)1,000	(*f*) 850–1,050	..

(*a*) Increased from £750 (Upper House) as from December, 1950 and £650 (Lower House) as from July, 1950. Plus £100 for urban and country electorates (i.e., excluding Metropolitan Electoral Districts). Subject to automatic adjustment in accordance with variations in the cost of living. (*b*) Abolished in 1922. (*c*) Increased from £1,050 as from December, 1950. (*d*) According to distance of electorate from Adelaide. (*e*) Increased from £960 plus £50 in the case of a country member as from September, 1950. Subject to adjustment in accordance with variations of the State basic wage. Plus £50 where any part of electorate is more than 50 miles from Perth. (*f*) According to area of electorate and distance from the Capital.

The use of the expressions " Upper House " and " Lower House " in the statement above, though not justified constitutionally, is convenient, inasmuch as the legislative chambers are known by different names in the Commonwealth and in some of the States.

5. **Enactments of the Parliament.**—In the Commonwealth all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution. In the States laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council (except in Queensland) and Legislative Assembly or House of Assembly. The Governor-General or the State Governor acts on behalf of, and in the name of, the Sovereign, giving the Royal Assent

to or vetoing Bills passed by the Legislatures, or reserving them for the special consideration of the Sovereign. In the States the Councils and Assemblies are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States, in all cases whatsoever. Subject to certain limitations, they may alter, repeal, or vary their Constitutions. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is, to the extent of the inconsistency, invalid.

§ 2. Parliaments and Elections.

1. **Commonwealth.**—(i) *Qualifications for Membership and for Franchise—Commonwealth Parliament.* Qualifications necessary for membership of either House of the Commonwealth Parliament are possessed by any British subject, twenty-one years of age or over, who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth. Qualifications for Commonwealth franchise are possessed by any British subject, not under twenty-one years of age, who has lived in Australia for six months continuously. Enrolment and voting are compulsory. A British subject member of the Defence Force of the Commonwealth on active service is entitled to vote at Commonwealth elections whether enrolled or not, and if he is serving or has served outside Australia, irrespective of age.

Disqualification of persons otherwise eligible as members of either Commonwealth House is mainly on the grounds of membership of the other House, allegiance to a foreign power, being attainted of treason, being convicted and under sentence for any offence punishable by imprisonment for one year or longer, being an undischarged bankrupt or insolvent, holding office of profit under the Crown with certain exceptions, or having pecuniary interest in any agreement with the public service of the Commonwealth except as a member of an incorporated company of more than 25 persons. Excluded from the franchise are persons of unsound mind, attainted of treason, or convicted and under sentence for any offence punishable by imprisonment for one year or longer. In the main, these or similar grounds for disqualification apply also to State Parliament membership and franchise. In some States judges and ministers of religion are included amongst those specifically disqualified from membership, and in two States certain aboriginal natives are excluded from the franchise.

(ii) *The Commonwealth Government.* From the establishment of the Commonwealth until 1949 the Senate consisted of 36 members, six being returned by each of the original federating States. The Constitution empowers Parliament to increase or decrease the size of the Parliament and, as the population of the Commonwealth had more than doubled since its inception, the Parliament enacted legislation in 1948 enlarging both Houses of Parliament and providing a representation ratio nearer to the proportion which existed at Federation. Thus the Representation Act 1948 provides that there shall be ten Senators from each State instead of six, increasing the total to 60 Senators. To effect this transition in the Senate, seven Senators were elected from each State at the elections of 1949, four taking office immediately the Senate sat after the election, the remaining three commencing their term on the usual date—1st July, 1950. Members of this Chamber are normally elected for the term of six years, but half the members retire at the end of every third year, although they are eligible for re-election. Accordingly, at each future periodical election of Senators, five Senators will normally be elected in each State, making 30 to be elected at each such election.

In accordance with the Constitution, the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate. Correspondingly, in terms of the Constitution and the Representation Act 1905–38, from the date of the 1949 elections the number of members in the House of Representatives was increased from 74 to 121 (excluding the members for the internal Territories). As the States are represented in the House of Representatives on a population basis, the numbers were increased as follows:—New South Wales—from 28 to 47; Victoria—20 to 33; Queensland—10 to 18; South Australia—6 to 10; Western Australia—5 to 8; Tasmania—5, no increase: total—74 to 121. The increase in the number of members of Parliament necessitated a redistribution of seats and a redetermination of electoral boundaries. This was carried out by the Distribution Commissioners in each State on a quota basis, but taking into account community or diversity of interest, means of communication, physical features, existing boundaries of divisions and sub-divisions, and State electoral boundaries.

Since the general elections of 1922 the Northern Territory has been represented by one member in the House of Representatives. The Australian Capital Territory Representation Act 1948 gave similar representation to the Australian Capital Territory as from the elections of 1949. The members for the Territories may join in the debates but are not entitled to vote, except on a motion for the disallowance of any ordinance of the Territory or on any amendment to such motion.

The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. In elections for Senators, the whole State constitutes the electorate. For the purposes of elections for the House of Representatives, the State is divided into single electorates corresponding in number with the number of members to which the State is entitled. Further information regarding the Senate and the House of Representatives is given in earlier issues of the Official Year Book.

(iii) *Commonwealth Elections.* There have been nineteen complete Parliaments since the inauguration of Federation. The fifth Parliament, which was opened on 9th July, 1913, was dissolved on 30th July, 1914 in somewhat unusual circumstances, when, for the first time in the history of the Commonwealth, a deadlock occurred between the Senate and the House of Representatives, and, in accordance with Section 57 of the Constitution which provides for such an eventuality, both Houses were dissolved by the Governor-General. Until 1927 the Parliament met at Melbourne; it now meets at Canberra, the first meeting at Parliament House, Canberra, being opened by H.M. the King, then Duke of York, on 9th May, 1927. The eighteenth Parliament opened on 6th November, 1946, and was dissolved on 31st October, 1949. The following are particulars of the succeeding election:—

COMMONWEALTH ELECTION, 10th DECEMBER, 1949.

State, etc.	Electors Enrolled.(a)			Electors who Voted.(a)			Percentage of Electors who Voted.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.
N.S. Wales ..	938,953	977,793	1,916,746	911,466	937,106	1,848,572	97.07	95.84	96.44
Victoria ..	662,535	707,286	1,369,821	640,057	673,737	1,313,794	96.61	95.26	95.91

Total ..	2,417,397	2,496,257	4,913,654	2,331,249	2,383,111	4,714,360	96.44	95.47	95.94

(a) All electorates contested, and, except for the Territories, numbers identical for Senate and House of Representatives.

There were 505,275 informal votes (11 per cent.) cast for the Senate election, and 93,604 (2 per cent.) for the House of Representatives election.

The nineteenth Parliament opened on 22nd February, 1950, but on 19th March, 1951, in its first session, a double dissolution was proclaimed for the second time since the inception of the Commonwealth. The Governor-General granted the Prime Minister's request for the dissolution on the ground that the Senate, by referring the Commonwealth Bank Bill 1950 (No. 2) to a Select Committee (after amending an identical Bill more than three months earlier in a manner unacceptable to the House of Representatives) had

" failed to pass it ", thereby providing conditions enabling Section 57 of the Constitution to operate for the purpose of overcoming the deadlock between the two Houses. Particulars of the ensuing election are as follows :—

COMMONWEALTH ELECTION, 28th APRIL, 1951.(a)

(a) Figures in parentheses for the States of Queensland, South Australia and Western Australia refer to contested electorates only, in each of these States one electorate not having been contested. For the Territories, which do not possess a vote for the Senate, the figures refer to the House of Representatives election only. In other States, numbers were identical for Senate and House of Representatives. For the totals, the figures in parentheses represent the total electors enrolled for, and the total electors who voted in, the House of Representatives election, excluding non-contested electorates.

There were 339,678 informal votes (7 per cent.) cast for the Senate election and 88,671 (2 per cent.) for the House of Representatives election.

The first session of the twentieth Parliament commenced on 12th June, 1951.

The system of voting for the House of Representatives is preferential, and for the Senate, since the passing of the Commonwealth Electoral Act 1948, proportional representation (*see* par. iv below). Previously it also had been preferential.

For the first time two women were elected to the Commonwealth Parliament in 1943, one to the Senate and the other to the House of Representatives.

(iv) *Proportional Representation in Senate Elections.* The Commonwealth Electoral Act 1948, introduced with the Representation Act 1948 to enlarge the Commonwealth Parliament (*see* above), changed the system of scrutiny and counting of votes in Senate elections from preferential to that of proportional representation. Under the new system each candidate, in order to become elected, must obtain a specified " quota " of first preference votes, any votes in excess of this " quota " being transferred to continuing candidates in proportion to the voters' preferences. For a description of the method of obtaining the " quota " and of the procedure of transferring " surplus " votes, *see* Official Year Book No. 38, pp. 82–3.

(v) *Commonwealth Referenda.* According to Section 128 of the Constitution, any proposed law for the alteration of the Constitution must, in addition to being passed by an absolute majority of each House of Parliament, be submitted to a referendum of the electors in each State, and must further be approved by a majority of the States and of the electors who voted, before it can be presented for Royal Assent. So far 23 proposals have been submitted to referenda and the consent of the electors has been received in four cases only, the first in relation to the election of Senators in 1906, the second and third in respect of State Debts—one in 1910 and the other in 1928—and the fourth in respect of Social Services in 1946. Details of the various referenda and the voting thereon were given in previous issues of the Official Year Book (*see* No. 18, p. 87, No. 31, p. 67, No. 35, p. 60, No. 36, p. 61, No. 37, pp. 64–5 and No. 38, p. 84.)

For details of the voting in the referendum held on 22nd September, 1951 to determine whether the Constitution should be amended so as to grant the Commonwealth Government powers to deal with Communists in Australia, *see* Appendix to this volume.

(vi) *Broadcast of Parliamentary Proceedings.* The proceedings of both Houses of the Commonwealth Parliament are regularly broadcast at certain specified times by the national broadcasting system. For some particulars of the origin of this practice *see* Official Year Book No. 37, p. 65.

2. **State Elections.**—(i) *Latest in each State.* (*a*) *Upper Houses.* The following table shows particulars of the voting at the most recent elections for the Upper Houses or Legislative Councils in the States of Victoria, South Australia and Western Australia. In New South Wales the electorate for the Legislative Council comprises the members of both Houses, in Queensland there has been no Legislative Council since 1922, and in Tasmania three members of the Council are elected annually (but four in each sixth year) and the Council cannot be dissolved as a whole.

STATE UPPER HOUSE ELECTIONS.

(ii) *Elections in Earlier Years.* Official Year Book No. 38 and earlier issues contain particulars of the voting at elections for both Upper and Lower State Houses in years prior to those shown above, and some general information is given in the following paragraphs.

3. **The Parliament of New South Wales.**—The Parliament of New South Wales consists of two Chambers, the Legislative Assembly and the Legislative Council. By legislation assented to in July, 1949, the Assembly was enlarged from 90 to 94 members,

elected in single-seat electoral districts, who hold their seats during the existence of the Parliament to which they are elected. The duration of Parliament is limited to three years and by legislation enacted in 1950 cannot be extended beyond that period except with the approval of electors by referendum. Until 1934 the Council was a nominee Chamber, consisting of a variable number of members appointed for life without remuneration, but as from 23rd April, 1934 it was reconstituted and became a House of 60 members to serve without remuneration for a term of twelve years, with one-quarter of the members retiring every third year. As from 1st September, 1948, however, members of the Council have been paid an allowance of £300 per annum. The electorate comprises members of both Chambers, who vote as a single electoral body at simultaneous sittings of both Chambers.

Any person who is an elector entitled to vote at a Legislative Assembly election, or a person entitled to become such elector, and who has been for at least three years resident in Australia, and who is a natural-born or naturalized subject of the King, is capable of being elected to the Legislative Council. For the Council franchise an elector must be, for the time being, a Member of the Legislative Council or a Member of the Legislative Assembly. Every person qualified to vote at a Legislative Assembly election for any electoral district in New South Wales is qualified to be elected as a Member for that or any other district. Every person not under twenty-one years of age, who is a natural-born or naturalized subject of the King, and who has lived in Australia for at least six months continuously, and in New South Wales for at least three months, and in any subdivision for at least one month immediately preceding the date of claim for enrolment, is entitled to enrolment as an elector for the Legislative Assembly. Persons are disqualified either as members or voters for reasons generally the same as those outlined on page 69.

Since the introduction of responsible government in New South Wales there have been 35 complete Parliaments, the first of which opened on 22nd May, 1856, and was dissolved on 19th December, 1857, while the thirty-fifth was dissolved on 22nd May, 1950. The thirty-sixth Parliament opened on 12th July, 1950.

The elections of 1920, 1922 and 1925 were contested on the principle of proportional representation, but a reversion to the system of single seats and preferential voting was made at the later appeals to the people. The principle of one elector one vote was adopted in 1894, and that of compulsory enrolment in 1921. Compulsory voting was introduced at the 1930 election. The franchise was extended to women (Women's Franchise Act) in 1902, and was exercised by them for the first time in 1904.

4. **The Parliament of Victoria.**—Both of the Victorian legislative Chambers are elective bodies, but there is a considerable difference in the number of members of each House, and until the passing of the Legislative Council Reform Act 1950, in the qualifications necessary for members and electors. The number of members in the Upper House is 34, and in the Lower House, 65. In the Legislative Council the tenure of the seat is for six years, but one member for each of the seventeen provinces retires every third year. Members of the Legislative Assembly are elected for the duration of Parliament, which is limited to three years.

Prior to the passing of the Act just referred to, which operated from November, 1951, there were property qualifications required for membership of, and franchise for, the Legislative Council. As alternatives to the property qualifications for the Council franchise, certain professional and academic qualifications were also allowed. As amended, however, the qualifications for membership of the Council are possessed by any adult natural-born subject of the King, or by any adult alien naturalized for five years and resident in Victoria for two years. Entitlement for enrolment as an elector is extended to every adult natural-born or naturalized subject who has resided in Australia for at least six months continuously and in Victoria for at least three months and in any subdivision for at least one month immediately preceding the date of claim for enrolment. These qualifications for membership and electors apply also in respect of the Legislative Assembly. Reasons for disqualification follow the general pattern for Australia (*see* page 69).

Since the introduction of responsible government in Victoria there have been 37 complete Parliaments, the first of which opened on 21st November, 1856, and closed on 9th August, 1859, while the thirty-seventh was dissolved on 13th April, 1950. The thirty-eighth Parliament was opened on 20th June, 1950.

Single voting is observed in elections held for either House, plurality of voting having been abolished for the Legislative Assembly in 1899 and for the Legislative Council in 1937. A preferential system of voting (*see* Official Year Book No. 6, p. 1182) was adopted for the first time in Victoria at the election held in November, 1911. Compulsory voting was first observed at the 1927 elections for the Legislative Assembly, and at the 1937 elections for the Legislative Council. The franchise was extended to women by the Adult Suffrage Act 1908, while voting at elections was made compulsory for the Legislative Assembly in 1926 and for the Legislative Council in 1935.

5. **The Parliament of Queensland.**—As stated previously, the Legislative Council in Queensland was abolished in 1922, the date of Royal Assent to the Act being 23rd March, 1922. The Legislative Assembly is composed of 75 members, each elected for a period of three years and each representing an electoral district.

Any person qualified to be enrolled for any electoral district is qualified for election to the Legislative Assembly. Any person of the age of twenty-one years, who is a natural-born or naturalized British subject with continuous residence within Australia for six months, in Queensland for three months, and in an electoral district for one month prior to making a claim for enrolment, is qualified to enrol as an elector. The classes of persons not qualified to be elected are similar to those for other Australian Parliaments (*see* page 69), but, in addition to the usual classes of persons disqualified as electors, aboriginal natives of Australia or of certain other countries, and certain half-castes, are also excluded from the franchise.

Under the Electoral Districts Act of 1949 the number of members and the number of electorates were increased from 62 to 75, and the increase became effective from the beginning of the thirty-second Parliament, elected in 1950. The Act divided the State into four zones, as follows :—Zone 1, the " Metropolitan Zone ", divided into 24 electoral districts returning 24 members ; Zone 2, the " South-Eastern Zone ", 28 districts and members ; Zone 3, the " Northern Zone ", thirteen districts and members ; Zone 4, the " Western Zone ", ten districts and members. A commission of three appointed by the Governor-in-Council completely distributed the prescribed zones into the number of electoral districts. District quotas were obtained by dividing the total number of electors living in a zone and enrolled on 31st December, 1948 by the number of electoral districts prescribed for that zone. In distributing the zones the Commissioners considered community or diversity of interest, means of communication, physical features, boundaries of Petty Sessions Districts and of areas of Local Authorities. The Act empowers the Governor-in-Council to appoint three electoral commissioners to carry out any redistribution made necessary by future changes in the number of electors.

Since the establishment of responsible government in Queensland there have been 31 complete Parliaments, the last of which was dissolved on 27th March, 1950. Opinions differ regarding the opening date of the first Queensland Parliament. According to the Votes and Proceedings of the Legislative Assembly, the House met for the first time on 22nd May, 1860, when the members were sworn and the Speaker elected. The Governor, however, was unable to be present on that date, but he duly attended on 29th May, 1860, and delivered the Opening Address. The thirty-second Parliament was opened on 1st August, 1950.

At the elections held in May, 1915, the principle of compulsory voting was introduced for the first time in Australia. The election of 1907 was the first State election in Queensland at which women voted, the right being conferred under the Elections Acts

Amendment Act 1905. In 1942 the system of preferential voting was abolished and that of election of the candidate obtaining the highest number of votes in the electorate now operates.

6. **The Parliament of South Australia.**—In this State there is a Legislative Council composed of twenty members and a House of Assembly with 39 members, both Chambers being elective. For the Legislative Council the State is divided into five districts each returning four members two of whom retire alternately, the term of office being six years. Thirty-nine districts return one member each to the House of Assembly; prior to 1938 there were 46 members representing nineteen districts. The duration of the House of Assembly is three years.

Any person who is at least thirty years of age, is a British subject or legally made a denizen of the State and who has resided in the State for at least three years is qualified for membership in the Legislative Council. Qualifications for the Council franchise are that a person is at least twenty-one years of age, a British subject, an inhabitant of the State with residence for at least six months prior to the registration of the electoral claim, and that he or she has had certain war service, or possesses property qualifications relating to ownership, leaseholding, or inhabitant occupancy. Any person qualified and entitled to be registered as an elector for the House of Assembly is qualified and entitled for election as a member of that House. Qualifications for enrolment as an elector for the House of Assembly are that a person is at least twenty-one years of age, is a British subject, and has lived continuously in Australia for at least six months, in the State for three months and in an Assembly subdivision for one month immediately preceding the date of claim for enrolment. Provisions in the Constitution for disqualification from membership or from the franchise in respect of either House follow the usual pattern for Australia (*see* page 69).

Since the inauguration of responsible government in South Australia there have been 32 complete Parliaments, the first of which was opened on 22nd April, 1857. The thirty-second Parliament was opened on 26th June, 1947, and expired on 28th February, 1950. The thirty-third Parliament was opened on 28th June, 1950. The duration of the twenty-eighth Parliament was extended from three to five years by the provisions of the Constitution (Quinquennial Parliament) Act 1933, but this Act was repealed by the Constitution Act Amendment Act (No. 2) 1939, and the three-year term was reverted to.

South Australia was the first of the States to grant women's suffrage (under the Constitution Amendment Act 1894), the franchise being exercised by women for the first time at the Legislative Assembly election on 25th April, 1896. Compulsory voting for the House of Assembly, provided for by the Electoral Act Amendment Act 1942, was first observed at the 1944 election. A system of preferential voting is in operation.

7. **The Parliament of Western Australia.**—In this State both Chambers are elective. For the Legislative Council there are 30 members, each of the ten provinces returning three members, one of whom retires biennially. At each biennial election the member elected holds office for a term of six years, and automatically retires at the end of that period. The Legislative Assembly is composed of 50 members, one member being returned by each electoral district. Members of the Legislative Assembly are elected for three years.

Since the establishment of responsible government in Western Australia there have been nineteen complete Parliaments, the first of which was opened on 30th December, 1890. The nineteenth Parliament was opened on 31st July, 1947, and expired on 31st January, 1950. The twentieth Parliament was opened on 27th July, 1950. The preferential system of voting in use in Western Australia is described in Official Year Book No. 6, p. 1184.

Qualifications required for membership of the Legislative Council are the age of 30 years, residence in Western Australia for two years, being a natural-born British subject, or naturalized for five years prior to election and resident in the State for that period, and freedom from legal incapacity. Qualifications required for Council franchise are the age of twenty-one years, residence in Western Australia for six months, being a natural-born British subject or naturalized for twelve months, freedom from legal incapacity, and certain property qualifications relating to freehold, leasehold, or householder occupancy. Qualifications required for membership of the Legislative Assembly are the age of twenty-one years, residence in Western Australia for twelve months, being a natural-born British subject, or naturalized for five years and resident in the State for two years prior to election, and freedom from legal incapacity. Qualifications required for the franchise are the age of twenty-one years, residence in Western Australia for six months and in an electoral district continuously for three months, and being a natural-born or naturalized British subject. Persons may be disqualified as members or voters for reasons similar to those for other Australian Parliaments (*see* page 69) but, in addition, certain aboriginal natives of Australia and of other countries, or half-bloods, are excluded from the franchise.

Women's suffrage was granted by the Electoral Act of 1899. The first woman member to be elected to an Australian Parliament was returned at the 1921 election in this State. Voting for the Legislative Assembly was made compulsory in December, 1936, the first elections for which the provision was in force being those held on 18th March, 1939.

8. **The Parliament of Tasmania.**—In Tasmania there are two legislative Chambers—the Legislative Council and the House of Assembly, both bodies being elective. In accordance with the Constitution Act 1946, the Council now consists of nineteen members, elected for six years and returned from nineteen divisions. Three members retire annually (except in the 1953 elections and in each sixth successive year thereafter, when four retire) and the Council cannot be dissolved as a whole. Prior to the 1946 Act there were eighteen members elected from fifteen divisions, of which Hobart returned three members and Launceston two. There are five House of Assembly divisions, corresponding to the Commonwealth electoral divisions, each returning six members elected under a system of proportional representation which first came into force at the 1909 elections (*see* Official Year Book No. 6, p. 1185). The life of the Assembly was extended from three to five years by the Constitution Act 1936.

Persons qualified for election to the Legislative Council must be 25 years of age and qualified to vote as Council electors, have been resident in Tasmania for a period of five years at any one time, or at least two years immediately preceding the election, and be natural-born subjects of the King or naturalized for at least five years. Electors for the Council must be twenty-one years of age, natural-born or naturalized subjects and resident in Tasmania for a period of twelve months, with certain freehold or occupancy property qualifications or with certain academic, professional, defence force, or war service qualifications. For the House of Assembly members must be twenty-one years of age, have been resident in Tasmania for a period of five years at any one time or for a period of two years immediately preceding the election, and be natural-born subjects of the King or naturalized for a period of five years. Electors must be twenty-one years of age, natural-born or naturalized subjects and resident in Tasmania for a period of six months continuously. Reasons for disqualification of members or voters are similar to those for other Australian Parliaments (*see* page 69).

The first Tasmanian Parliament opened on 2nd December, 1856, and closed on 8th May, 1861. There have been 29 complete Parliaments since the inauguration of responsible government. The thirtieth Parliament was opened on 7th June, 1950.

The suffrage was granted to women under the Constitution Amendment Act 1903 and compulsory voting for both Houses came into force on the passing of the Electoral Act in 1928. The system of voting is proportional representation by single transferable vote.

§ 3. Superannuation Funds of the Parliaments of the Commonwealth and of the Australian States.

1. **General.**—In Official Year Book No. 38 there is a conspectus of Superannuation Funds of the Parliaments of the Commonwealth and of the five States (New South Wales, Victoria, Queensland, South Australia and Western Australia) in which such schemes operate (*see* pp. 91–9). This conspectus summarized the main features of each fund as at 30th June, 1949. Although the schemes are still essentially as described in the conspectus, there have subsequently been several changes, and the more important of these up to mid-1951 are referred to below.

New South Wales. Increase of payment to the widow of a member or of a former member entitled to or in receipt of a pension—from £3 per week to £4 per week.

Provision for payment of contributions by a former member while a member of another Australian Parliament, or while holding office of profit under the Crown, in order to be entitled to receive a pension on ceasing to be a member or to hold office. If entitled to a pension under another Parliamentary scheme, contributions are refunded without interest.

Western Australia. Extension of refund of contributions with interest to a person who resigns before, or ceases to be a member on, the expiration of his term, without producing reasons acceptable to the Trustees.

2. **Finances.**—The following tables show the financial operations of each Parliamentary superannuation fund during the years 1948–49 and 1949–50. The former year was the year of commencement for funds other than those of New South Wales and Victoria, which began in 1946.

§ 4. Administration and Legislation.

1. **The Commonwealth Parliaments.**—The first Parliament of the Commonwealth was convened by proclamation dated 29th April, 1901, by his Excellency the Marquis of Linlithgow, then Earl of Hopetoun, Governor-General. It was opened on 9th May, 1901, by H.R.H. the Duke of Cornwall and York, who had been sent to Australia for that purpose by His Majesty the King. The Rt. Hon. Sir Edmund Barton, G.C.M.G., K.C., was Prime Minister.

The following table shows the number and duration of Parliaments since Federation :—

COMMONWEALTH PARLIAMENTS.

Number of Parliament.	Date of Opening.	Date of Dissolution.
First	9th May, 1901	23rd November, 1903
Second	2nd March, 1904	5th November, 1906

(xxix) MENZIES MINISTRY, 19th December, 1949 to 11th May, 1951.
(xxx) MENZIES MINISTRY, 11th May, 1951.

(*b*) *Names of Successive Holders of Office, 9th February*, 1923 *to* 31*st July*, 1951. In earlier issues of the Official Year Book (*see* No. 21, 1928 and previous issues) there appeared the names of each Ministry up to the Bruce-Page Ministry (9th February, 1923 to 22nd October, 1929), together with the names of the successive holders of portfolios therein, but in subsequent issues the names of the Ministers at one point of time only have been given, and continuity in the names of the holders of office has not been maintained. The following list, commencing with the Bruce-Page Ministry, covers the period between the date on which it assumed power, 9th February, 1923, and 31st July, 1951, and shows the names of all persons who have held office in each Ministry during that period.

MINISTRIES.

THE HON. C. H. HAND
(Minister for Forests and Minister controlling the Tourist and Immigration Department).

THE HON. C. A. BRAMICH
(Minister for Housing).

THE HON. R. J. D. TURNBULL
(Minister for Health).

---

* In August, 1951, The Rt. Hon. Sir Ronald Hibbert Cross, Bt., assumed the administration of the Government of Tasmania as Governor.

4. **The Course of Legislation.**—The actual legislation by the Commonwealth Parliament up to the end of 1950 is indicated in alphabetical order in Vol. XLVIII. "The Acts of the Parliament of the Commonwealth of Australia passed during the year 1950, in the First Session of the Nineteenth Parliament of the Commonwealth, with Tables, Appendix and Index." A "Chronological Table of Acts passed from 1901 to 1950, showing how they are affected by subsequent legislation or lapse of time" is also given, and, further, "A Table of Commonwealth Legislation passed from 1901 to 1950 in relation to the several provisions of the Constitution", is furnished. Reference should be made to these for complete information.

5. **Legislation during 1949 and 1950.**—The following paragraphs present a selection from the legislative enactments of the Commonwealth and State Parliaments during the years 1949 and 1950. The acts included have been selected as the more important new measures and amending measures enacted during these years. The selection is somewhat arbitrary, however, because of the task of determining, in view of the limitations on space that might reasonably be allotted, the relative importance of the more than 900 acts passed during the period. Certain principles regulating the choice of acts have nevertheless been generally observed. Ordinary appropriation and loan acts are excluded, as are also acts relating to less important changes in existing forms of taxation, in superannuation and pension schemes, and in workers' compensation. Acts providing for minor amendments to existing statutes and continuance acts are similarly excluded.

The total enactments of the Commonwealth and State Parliaments for a number of years at fairly even intervals since 1901 show a steady increase during this century. About 270 acts were passed in 1901, 320 in 1914, 410 in 1927, 430 in 1939 and 460 in 1950. The acts of the Commonwealth Parliament during these years numbered 17, 36, 38, 87 and 80 respectively. During 1948, 530 acts were passed (Commonwealth, 93) and in 1949, 450 (Commonwealth, 87).

Commonwealth—1949.—*Christmas Island Agreement.* Authorizes the execution of an agreement between Australia and New Zealand to set up a commission to work the phosphate deposits on Christmas Island.

Coal Industry (Tasmania). Provides for means, in conjunction with the Government of Tasmania, to assist in meeting the need for coal throughout Australia and for the regulation and improvement of the coal industry in Tasmania.

Coal Excise. Relates to the imposition of an excise on coal for the purpose of financing the Coal Mining Industry Long Service Leave Fund—*see* States Grants (Coal Mining Industry Long Service Leave) Act below.

Commonwealth Conciliation and Arbitration. An amending Act making provision for the prevention of irregularities in the elections for offices in organizations registered under the Act, and vesting in the Commonwealth Court of Conciliation and Arbitration additional powers for the prevention of these irregularities.

Defence. An amending Act, it provides, *inter alia*, for the establishment of the Permanent Military Forces into Active Forces and Reserve Forces, and constitutes the Reserve Citizen Military Forces and the Australian Cadet Corps.

Genocide Convention. Approves the ratification by Australia of the Convention on the Prevention and Punishment of the Crime of Genocide.

International Wheat Agreement. Approves the acceptance by Australia of the International Wheat Agreement, and repeals the International Wheat Agreement Act 1948.

Liquid Fuel (Defence Stocks). Provides, in the interests of Defence, for the maintenance of stocks of liquid fuel within Australia.

Liquid Fuel (Rationing). To ensure, so far as Commonwealth legislative power permits, a just and orderly sharing of liquid fuel while it is in short supply. (In June, 1949, the Full High Court had declared invalid the National Security (Liquid Fuel) Regulations. *See also* State Acts.)

National Emergency (Coal Strike). Prohibits, during the period of national emergency caused by the general strike in the coal-mining industry, the contribution, receipt or use of funds by organizations registered under the Commonwealth Conciliation and Arbitration Act for the purpose of assisting or encouraging the continuance of the strike.

Papua and New Guinea. Approves the placing of the Territory of New Guinea under the International Trusteeship System, and provides for the government of the Territory of Papua and the Territory of New Guinea.

Railway Standardization (South Australia) Agreement. Authorizes the execution of an agreement between the Commonwealth and South Australia for the standardization of railways in South Australia and the Northern Territory.

Science and Industry Research. Repeals the Acts establishing the Commonwealth Council for Scientific and Industrial Research and constitutes the Commonwealth Scientific and Industrial Research Organization.

Shipping. Creates the Australian Shipping Board with power to establish, maintain and operate interstate, territorial and oversea shipping services.

Snowy Mountains Hydro-electric Power. Creates the Snowy Mountains Hydro-electric Authority to generate electricity in the Snowy Mountains and to supply it to the Commonwealth for defence purposes and for consumption in the Australian Capital Territory.

States Grants (Coal Mining Industry Long Service Leave). Provides for financial assistance to the States in respect of the cost of long service leave granted to coal mining employees. (*See also* State Acts.)

States Grants (Encouragement of Meat Production). Provides, in order to develop meat production, for financial assistance to Queensland and Western Australia for the construction and improvement of roads and other facilities for the movement of live-stock.

Stevedoring Industry. Provides for the prevention or settlement of industrial disputes, and regulates matters connected with stevedoring operations; repeals the Act establishing the Stevedoring Industry Commission; establishes the Australian Stevedoring Industry Board.

War-time Refugees Removal. Provides for the removal from Australia of certain aliens who entered during the 1939–45 War.

Whaling Industry. Provides for the establishment of an Australian Whaling Commission to carry on whaling activities.

1950.—*Australian Soldiers' Repatriation.* Amends the Principal Act, *inter alia* extending the application of its provisions to members of the forces engaged in the Korean and Malayan operations.

Brachina to Leigh Creek North Coalfield Railway. Authorizes the execution of an agreement with South Australia for the construction by the Commonwealth of a standard gauge railway between Brachina and Leigh Creek North Coalfield, in order to transport coal for a regional power station at Port Augusta with maximum efficiency and economy in railway operation.

Commonwealth Aid Roads. Provides for financial assistance to the States for road works and works connected with transport for a period of five years from 1st July, 1950.

Communist Party Dissolution. Provides for the dissolution of the Australian Communist Party and of other Communist organizations; disqualifies Communists from holding certain offices. (Declared invalid by High Court in March, 1951.)

Defence Forces Retirement Benefits. Amends the Principal Act, *inter alia* extending its application to members of the Nursing Services.

Flax Canvas Bounty. Provides for the payment of a bounty on the production of flax canvas.

Loan (International Bank for Reconstruction and Development). Authorizes the raising of a $100,000,000 loan from the International Bank for Reconstruction and Development, to be applied to the costs of goods for certain developmental works.

Social Services Consolidation. An amending Act extending child endowment at the rate of 5s. per week to the first or only child in each family.

States Grants (Imported Houses). Provides for financial assistance to the States for the importation of houses into Australia.

States Grants (Milk for School Children). Provides for financial assistance to the States in the provision by the States of milk for school children.

Statute Law Revision. Revises the Statute Law of the Commonwealth.

Wool (Reserve Prices) Fund. Establishes a fund for the purposes of a scheme of reserve prices for wool. (Scheme subsequently rejected at a referendum of woolgrowers.)

Wool Sales Deduction. Acts providing for the payment to the Commonwealth of a proportion of the value of wool sold or exported on and after 26th August, 1950.

New South Wales—1949.—*Bush Fires.* A consolidating law in relation to the prevention, control and suppression of bush fires and other fires in areas not within fire districts under the Fire Brigades Act; it establishes a Bush Fire Fighting Fund comprised of contributions by the State Treasury, Councils in affected areas, and insurance companies.

Conservation Authority of New South Wales. Provides for a Conservation Authority of New South Wales to plan and control water, timber and soil conservation; to co-ordinate the activities of the Water Conservation and Irrigation Commission, the Forestry Commission of New South Wales and the Soil Conservation Service; changes the constitution of those Commissions and provides for a Commissioner of the Soil Conservation Service.

District Courts (Amendment). Re-defines and extends the jurisdiction of District Courts, confers an equitable jurisdiction upon them, enables judges to order consolidation to trials, requires judges to meet at least six-monthly to review, and make recommendations in regard to, the working of the Courts, and empowers them to make rules of Court. Questions of fact in undefended matrimonial cases are made triable in District Courts in certain cases.

Emergency Powers. Makes provision for the protection of the community in the event of interruption or dislocation of the supply or provision of essential services or commodities.

Farm Colony Type Mental Hospital Construction. Sanctions and provides for the construction of a mental hospital of the farm colony type; estimated cost, £2,000,000.

Lake Illawarra and Cowra Power Stations (Construction). Authorizes the construction of electricity generation stations at Lake Illawarra and Cowra; estimated cost £10,000,000 and £250,000, respectively.

Landlord and Tenant (Amendment). Provides for the determination of rent and the appointment of Fair Rent Boards; repeals the Act of 1948.

Liquid Fuel. Makes provision for the preservation and continuance in operation of Commonwealth Regulations relating to the rationing and distribution of liquid fuel. (*See also* Acts of the Commonwealth and of other States.)

Menindee Water Conservation. Authorizes works to create water storages totalling 2,015,000 acre feet in the Darling River and Lakes Bijijie, Tandure, Pamamaroo, Menindee and Cawndilla; estimated cost, £2,300,000.

Mental Institutions Benefits Agreement. Ratifies the Commonwealth–State agreement relating to the provision by the Commonwealth of financial assistance for persons in mental institutions, provided no means test is imposed nor fees charged. (Corresponding Commonwealth Act was assented to in December, 1948. *See also* Acts of other States.)

Parliamentary Electorates and Elections (*Amendment*). Increases the number of members of the Legislative Assembly from 90 to 94, provides for the distribution of electoral districts by the Electoral Commissioner, amends the conditions of postal voting and provides for voting by invalids, etc., before an electoral visitor.

River Murray Waters (*Amendment*). Ratifies an agreement amending earlier intergovernmental agreements regarding the economical use of the waters of the Murray River and its tributaries, etc. (Corresponding Commonwealth and South Australian Acts were assented to in 1948. For Victorian Act *see* below.)

Survey Co-ordination. Provides for the co-ordination of surveys and for a central plans office to record surveys, plans, etc., of all public authorities.

Technical Education and New South Wales University of Technology. Provides for a separate Department of Technical Education, for the establishment and incorporation of the New South Wales University of Technology, for the constitution of a Technical Education Advisory Council and of a Council of the University, and for the administration of technical education generally.

Tuberculosis. Authorizes the execution by the State of arrangements with the Commonwealth under which the Commonwealth reimburses the State for certain expenditure in a campaign to reduce the incidence, and to provide adequate facilities for diagnosis, treatment and control of tuberculosis. (Corresponding Commonwealth Act was assented to in November, 1948. *See also* Acts of other States.)

Western Lands (*Amendment*). Provides for the withdrawal of further areas from Western Land leases and makes certain provisions affecting land administration in the Western Division, including the imposition of conditions in the interests of soil conservation.

1950.—*Clarence Harbour Works.* Sanctions the construction of works for Clarence Harbour; estimated cost, £3,000,000.

Constitution Amendment (*Legislative Assembly*). Provides that the duration of any Legislative Assembly shall not be extended beyond three years without approval of the electors on a referendum.

Crimes (*Amendment*). Provides for the constitution of a Parole Board to consider cases of prisoners and recommend whether the prisoner should be granted a licence to be at large.

Electricity Commission. To constitute the Electricity Commission of New South Wales and empower it to co-ordinate and control public electricity works and development, to take over electricity undertakings of public authorities, acquire certain private undertakings, and to exercise powers over supply and control of electricity in emergencies.

Glen Innes to Inverell Railway. Authorizes the construction of a railway from Glen Innes to Inverell (50 miles); estimated cost, £3,000,000.

Hume Dam Hydro-Electric Development (*Construction*). Sanctions the construction of a 75 k.w. hydro-electric power station at Hume Dam, substations and transmission lines; estimated cost, £3,100,000.

Hunter Valley Conservation Trust. To constitute the Hunter Valley Conservation Trust and empower the Trust to take measures in mitigation of floods, and to conserve the natural resources of the Hunter Valley.

Industrial Arbitration (*Basic Wage*) *Amendment.* Requires the Industrial Commission to apply basic wage decisions of the Commonwealth Court of Conciliation and Arbitration in State Awards, etc.

Meat Industry (*Amendment*). To constitute the Metropolitan Meat Industry Board, replacing the Metropolitan Meat Industry Commissioner and the Metropolitan Meat Industry Advisory Council.

Transport and Highways. Provides for the integration of public and private rail, road, air, sea and inland water-way transport, the constitution of the New South Wales Transport and Highways Commission and the appointment of a Director of Transport and Highways; brings the Commissioners for Railways, for Road Transport and Tramways and for Main Roads, and the Maritime Services Board, under the control of the Commission.

Warkworth Flood Mitigation and Water Conservation. Sanctions construction of an earth dam on Wollombi Brook and related works, to store about 400,000 acre feet of water for mitigation of floods and conservation of water; estimated cost, £2,500,000.

War Service Land Settlement and Closer Settlement Validation. Validates certain resumptions for war service land settlement and certain other matters; vests certain lands in the Crown for the purposes of the Closer Settlement Acts; amends certain Acts and repeals the War Service Land Settlement Agreement Act 1945.

Victoria—1949.—*Agricultural Education.* Consolidates and amends the law relating to agricultural education; provides for the appropriation of money to the University of Melbourne for the purposes of agricultural education and research.

Crimes. Amends the law relating to crimes and criminal offenders; *inter alia* abolishes the death penalty in all cases except treason and murder.

Health (*Tuberculosis Arrangement*). Ratifies an arrangement with the Commonwealth to participate in a scheme to reduce the incidence of tuberculosis. (Corresponding Commonwealth Act was assented to in November, 1948. *See also* Acts of other States.)

Latrobe Valley Development Loan and Application Act. Authorizes, in connexion with the development of the Latrobe Valley, the raising and application of money for approved works, for compensation for land purchased or prejudicially affected, and for land acquired for the development of brown coal resources.

Liquid Fuel. Provides for the equitable distribution of supplies of liquid fuel available in Victoria. (*See also* Acts of the Commonwealth and of other States.)

Mental Institution Benefits. Authorizes and approves the execution of an agreement with the Commonwealth whereby the latter provides financial assistance for persons in mental institutions. (Corresponding Commonwealth Act was assented to in December, 1948. *See also* Acts of other States.)

Milk Pasteurization. Provides for the sale or delivery of none but pasteurized milk in prescribed districts, after days to be proclaimed.

Mothercraft Nurses. Provides for the registration of mothercraft nurses.

River Murray Waters. Ratifies and approves an agreement for the further variation of an agreement regarding the use of the waters of the River Murray and its tributaries. (Corresponding Commonwealth and South Australian Acts were assented to in 1948. For New South Wales Act *see* above.)

Royal Commission (*Communist Party*). Authorizes the appointment of a Royal Commission to investigate the origins, aims, objects, funds and activities in Victoria of the Communist Party.

Rural Finance Corporation. Provides for the establishment of a Rural Finance Corporation to encourage and assist country settlement and development, to stimulate country production, and to improve and develop country industries through loans at the lowest possible rates of interest.

Town and Country Planning (*Metropolitan Area*). Nominates the Melbourne and Metropolitan Board of Works to prepare and submit within the next three years a planning scheme for the whole of the metropolitan area.

1950.—*Coal Mining Industry* (*Long Service Leave*). Establishes a fund to be applied to the reimbursement of employers for amounts paid by them to employees in the coal mining industry in respect of long service leave due under certain awards. (*See* Commonwealth Act—States Grants (Coal Mining Industry Long Service Leave) *also* Acts of other States.)

Gas and Fuel Corporation. Ratifies an agreement between the State of Victoria and The Metropolitan Gas Company and The Brighton Gas Company Limited, and establishes the Gas and Fuel Corporation of Victoria.

Legislative Council Reform. Introduces adult suffrage at Legislative Council elections and adult qualifications for membership of the Council, amends the law relative to elections for the Council, and re-defines electoral boundaries.

Mental Hygiene Authority. Constitutes the Mental Hygiene Authority in order to provide for the general improvement in matters affecting the treatment, and measures for the prevention, of mental defects, disorders and diseases.

Ministers of the Crown and Parliamentary Salaries. Increases the number of salaried Ministers of the Crown, and the salaries of members of the Legislative Council; provides for the automatic adjustment of the salaries of members of both Houses in accordance with variations in the cost of living.

Nurses and Midwives. Amends the Nurses Acts and Midwives Acts, and provides for the registration of mental nurses.

Shrine of Remembrance Site. Amends the original Act to authorize the erection of a Memorial to commemorate the sacrifice and fortitude of those who served in the 1939–45 War.

Queensland—1949.—*Abattoirs Acts Amendment.* Provides for the establishment of public abattoirs in the larger towns of the State.

Burdekin River Development. Constitutes a Burdekin River Development Authority, and authorizes the construction of dams on the Burdekin River and the utilization of those dams and the waters of the Burdekin River for water conservation, flood mitigation, irrigation, water supply, and the development of hydro-electric power.

Electoral Districts. Divides the State into 75 electoral districts in four zones—Metropolitan (24), South-Eastern (28), North Queensland (13), and Western Queensland (10), with varying quotas of electors.

Liquid Fuel. Makes provision for the preservation and continuance in operation of Commonwealth Regulations relating to the rationing and distribution of liquid fuel. (*See also* Acts of the Commonwealth and of other States.)

Maintenance. Consolidates and amends the law relating to the maintenance of deserted wives and children.

Mental Institution Benefits Agreement. Authorizes the execution of an agreement with the Commonwealth on the provision of financial assistance by the Commonwealth for persons in mental institutions. (Corresponding Commonwealth Act was assented to December, 1948. *See also* Acts of other States.)

Roofing Tiles. Affords protection to home-builders in the quality of the cement or terra-cotta tiles they use, and lays down standards for tiles.

Sewerage, Water Supply, and Gasfitting. Provides a uniform set of water supply and sewerage by-laws, and for the preparation of standard gas-fitting by-laws. Sets up a Board to carry out the functions of examination and licensing of plumbers, gasfitters and drainers.

State Housing Acts, etc., Amendment. Increases advances for building homes and fixes minimum deposit at 15 per cent. of purchase money; encourages prospective home buyers, by periodic payments, to save sufficient money to pay the required deposit; establishes a free insurance scheme to enable the dependants of a bread-winner to acquire possession of the property should the breadwinner die.

Timber Users' Protection. Prevents the use of untreated borer-susceptible timbers in house building or furniture manufacturing.

Traffic. Consolidates traffic laws and brings them up-to-date; provides for drastic treatment and penalties for drunken drivers.

Tuberculosis Agreement. Lays down that the State and Commonwealth Governments shall work together in providing facilities for the treatment of tuberculosis, and makes statutory provision for financial and administrative arrangements and plan of control. (Corresponding Commonwealth Act was assented to in November, 1948. *See also* Acts of other States.).

1950.—*City of Brisbane Acts Amendment.* Divides the City of Brisbane into 24 electoral wards with boundaries corresponding to State electoral boundaries, thus constituting a Council of 24 with a Mayor, instead of 20 and a Mayor.

Commissions of Inquiry. Replaces Official Inquiries Evidence Acts 1910 to 1929; sets out the powers of Commissions of Inquiry and the Commissions; empowers the Chairman to punish contempt; applies provisions of the Criminal Code relating to perjury, etc., to Royal Commissions.

Constitution Acts Amendment. Increases Ministerial and Parliamentary salaries.

Poultry Industry Act Amendment. Enables those engaged in the poultry industry to have representation on the Poultry Advisory Board; establishes a Poultry Industry Fund and empowers the Government to issue precepts on Egg Marketing Boards, and the Poultry Advisory Board to recommend amounts of precepts.

Tully Falls Hydro-Electric Project. Provides for the construction and operation of a major hydro-electric project, which will include works for the storage of the waters of the Tully catchment so as to secure both a reserve water supply during dry seasons and a regulated flow for hydro-generation purposes.

State Housing Acts Amendment. Provides for further increases in advances for home-building (*see* 1949); raises the rate of advance up to 18s. in the £1 on the security offered; reduces deposit on purchase of homes from Housing Commission; authorizes advances to industry for purpose of providing housing for employees.

War Service Land Settlement Validation. Validates certain resumptions for war service land settlement and certain other matters; vests certain lands in the Crown for the purposes of closer settlement; amends certain Acts; repeals The War Service Land Settlement Agreement Act of 1945.

South Australia—1949.—*Advances for Homes Act Amendment.* Extends the maximum amount which may be advanced by the State Bank of South Australia for the purchase of, or discharge of a mortgage on, a dwelling-house.

Building Materials. Repeals the existing Acts dealing with the control of building materials and enacts other provisions to continue in force until 31st December, 1950; defines essential building materials and restricts their use; empowers the Treasurer to provide temporary housing accommodation for persons in need of housing.

Health and Medical Services. Provides for the establishment of an Advisory Council on Health and Medical Services and for the appointment of a Director-General of Public Health and a Director of Tuberculosis.

Highways Act Amendment. In order to define future road widening, empowers the Commissioner of Highways, where satisfied that a main road should be widened, to prepare a plan showing the old and proposed new boundaries of the road and the existing improvements between.

Homes Act Amendment. Increases the maximum amount which the Treasurer will guarantee as a loan for the purpose of acquiring a dwelling-house.

Honey Marketing. Provides for the establishment of The South Australian Honey Board and requires all producers of honey to deliver the honey produced by them to the Board.

Industrial Code Amendment. Provides, in respect of adult male employees, for the automatic variation of awards and orders of the State Industrial Court and State Industrial Boards in accordance with the amount of the automatic increase or decrease in the Commonwealth basic wage.

Land Settlement (Development Leases). Empowers the Governor to grant to the Australian Mutual Provident Society, and any other persons approved by the Minister, a development lease of Crown lands for the purpose of ultimate sale in blocks to selected persons.

Landlord and Tenant (Control of Rents) Act Amendment. Amends and extends the principal Act; includes a new Part relating to protected persons; also a new Part dealing with the control of rents of hotel premises; constitutes a board to determine rents.

Liquid Fuel. Provides for the State to make regulations in respect of the distribution, sale, supply and use of liquid fuel. (*See also* Acts of the Commonwealth and of other States.)

Railways Standardization Agreement. Validates the agreement made on 29th October, 1949 between the Commonwealth and South Australia regarding the standardization of railways in South Australia and the Northern Territory. (For corresponding Commonwealth Act *see* above).

Tuberculosis (Commonwealth Arrangement). Authorizes the Government to enter into an agreement with the Commonwealth for the conduct of a campaign against tuberculosis. (Corresponding Commonwealth Act was assented to in November, 1948. *See also* Acts of other States.)

Uranium Mining. Empowers the Minister of Mines to open and work mines for the mining of uranium, to treat uranium ore and to enter into all incidental transactions.

1950.—*Apprentices.* Repeals and amends earlier Acts to make provision for the technical education and the supervision of the training of apprentices; provides that apprentices in any prescribed trade must attend certain periods at a technical school or class, or take a correspondence class, and that employers must grant the necessary leave.

Brachina to Leigh Creek North Coalfield Railway Agreement. Authorizes the execution of an agreement with the Commonwealth for the construction of a railway between Brachina and Leigh Creek North Coalfield. (*See* Commonwealth Act above.)

Building Materials Act Amendment. Increases the area of a dwelling-house permissible under the Act to a maximum of 12½ squares and the total cost to £1,900.

Electricity Supplies (Country Areas). Provides for grants up to an aggregate of £1,000,000 to the Electricity Trust of South Australia to defray expenditure incurred in generating and distributing electricity to consumers in sparsely settled areas.

Forestry. Creates The Forestry Board and makes further and better provision for the creation and management of State Forests, including planting, and the milling and disposal of timber.

Friendly Societies Act Amendment. Amends the objects for which societies may raise funds; provides for the reprinting of laws and rules of societies with amendments; amends the Act relating to the appropriation and transfer of surplus funds.

Gas Act Amendment. Reduces the average calorific value of gas to be supplied; reduces the standard rate of dividend and amends the provision for the fixing of the price of gas.

Industrial Code Amendment. Makes provision for females similar to that made for males in the Industrial Code Amendment Act 1949 (*see* above).

Land Agents Act Amendment. Provides for the appointment of The Land Agents Board and for inquiries by the Board into misconduct; amends the provisions of the Act relating to land agents' bonds and trust accounts.

Landlord and Tenant (Control of Rents) Act Amendment. Amends the grounds for giving notice to quit and the matters to be considered by the Court.

Lottery and Gaming Act Amendment. Provides for a tax upon winning bets and for the application of the tax.

Western Australia—1949.—*Acts Amendment (Increase in Number of Judges of the Supreme Court).* Amends certain Acts so as to provide for an increase in the number of Judges of the Supreme Court from three to four.

Adoption of Children Act Amendment. Provides, *inter alia*, for the re-registration of the birth of an adopted child in accordance with the name of the child after adoption and the names and residence of its adopting parents.

Increase of Rent (War Restrictions) Act Amendment. Modifies the laws relating to the recovery of premises from protected persons; prohibits in certain cases the eviction of dependants of members of the Forces.

Liquid Fuel (Emergency Provisions). Provides for the assumption by the State of the power to regulate in respect of liquid fuel. (*See also* Acts of Commonwealth and of other States.)

Marketing of Apples and Pears. Provides for the constitution of the Western Australian Apple and Pear Marketing Board with powers to market or assist in the marketing of apples and pears acquired under the Act.

Mental Institution Benefits (*Commonwealth and State Agreement*). Authorizes the State to carry out an agreement with the Commonwealth regarding mental institution benefits. (Corresponding Commonwealth Act was assented to in December, 1948. *See also* Acts of other States.)

Tuberculosis (*Commonwealth and State Arrangement*). Authorizes the State to carry out an arrangement with the Commonwealth respecting a campaign to reduce the incidence of tuberculosis in Australia. (Corresponding Commonwealth Act was assented to in November, 1948. *See also* Acts of other States.)

1950.—*Acts Amendment* (*Allowances and Salaries Adjustment*). *Inter alia*, increases the salaries of members of both Houses of Parliament and the allowances of the holders of certain Parliamentary offices; provides for their adjustment in accordance with variations in the State basic wage.

Acts Amendment (*Increase in Number of Ministers of the Crown*). Amends certain Acts to provide for an increase from eight to ten in the number of Ministers of the Crown and for a corresponding increase in Ministerial Salaries. (In effect, the Act elevates the two Honorary Ministers to the position of full-time Ministers).

Agriculture Protection Board. Provides for the constitution of The Agriculture Protection Board of Western Australia and for the co-ordination of the administration of certain Acts relating to the control, prevention and eradication of noxious weeds and vermin.

Bush Fires. Amends the Principal Act to enable the application of stricter preventive measures and better control of bush fires.

Coal Mining Industry Long Service Leave. Constitutes a fund to compensate employers in the coal mining industry for amounts paid by them to employees in respect of long service leave accrued under certain awards. (*See* Commonwealth Act—States Grants (Coal Mining Industry Long Service Leave), *also* Acts of other States.)

Fauna Protection. Repeals the Game Act; provides for the conservation and protection of fauna; constitutes The Fauna Protection Advisory Committee of Western Australia.

Health Act Amendment. Amends the Principal Act, *inter alia* providing for the compulsory X-ray examination for tuberculosis of persons over the age of fourteen years.

Increase of Rent (*War Restrictions*) *Act Amendment* (*No.* 2). Amends the Principal Act; inserts new sections relating to the recovery of possession of premises in certain circumstances by the lessor; permits increases above the standard rent up to a maximum of 20 per cent. for dwellings and 30 per cent. for other premises.

Industrial Arbitration Act Amendment (*No.* 2). Amends Part VII. of the Industrial Arbitration Act relating to the declaration of the basic wage by the Court of Arbitration; empowers the Court to have regard for the economic capacity of industry as well as workers' "needs".

Noxious Weeds. Provides for the control, prevention and eradication of noxious weeds.

Vermin. Amends the law relating to the control, prevention and eradication of vermin.

Tasmania—1949.—*Agricultural Bank* (*Administration*). An amending Act providing for the appointment of a Director of Housing and a Director of Land Settlement, and for their inclusion in the Board of Management of the Agricultural Bank of Tasmania.

Government Printing Office. Enables the printing office and associated business conducted by the Government Printing Department to be carried on and accounted for as a business undertaking.

Landlord and Tenant. Repeals certain war-time and provisional post-war Acts; provides for the control of rents of certain premises and for regulating the recovery of possession of certain premises.

Mental Institution Benefits (*Agreement*). Authorizes the execution of an agreement with the Commonwealth relating to mental institution benefits. (Corresponding Commonwealth Act was assented to in December, 1948. *See also* Acts of other States.)

National Theatre and Fine Arts Society. Provides for the encouragement of the fine arts, the establishment of a national theatre and the preservation of the Theatre Royal in Hobart.

North Esk Regional Water Supply. Authorizes and provides for the construction, management and operation of a water supply for portions of the municipalities of Evandale, George Town, Lilydale, Saint Leonards and Westbury.

Public Authorities' Land Acquisition. Makes better provision for the acquisition of land required by public and local authorities than that provided under the Land Clauses Act 1857.

Tasmanian Auxiliary Nursing Service. Establishes a Tasmanian Auxiliary Nursing Service consisting of persons registered under the Act; qualifications for registration are a minimum age of seventeen years, completion of the first year's training required for general nurses, passing the prescribed examination and sound health and good character.

Transport (No. 2). An amending Act; relates to the powers of the Transport Commission regarding the initiation and carrying on of new road transport services; constitutes a tribunal to hear appeals from decisions of the Commissioner regarding licences; provides for a General Manager of Railways.

Tuberculosis Act. Provides for the compulsory radiological examination of the lungs of persons over fourteen years of age, for the examination of persons suffering or suspected to be suffering from tuberculosis, and for the prevention of the spread of tuberculosis.

1950.—*Builders' Loans.* Authorizes the making of loans to builders under contract to the State to defray the costs of building materials, equipment, etc., and for payment of wages, the sums to be borrowed for these purposes not to exceed £10,000 in all.

Coal Mining Industry Long Service Leave. Constitutes a Coal Mining Industry Long Service Leave Trust Fund; provides for payments to employers in the coal mining industry of amounts paid by them to employees in respect of long service leave accrued under certain awards. (*See* Commonwealth Act—States Grants (Coal Mining Industry Long Service Leave) *also* Acts of other States.)

Grain Reserve. Provides for the establishment of the Tasmanian Grain Elevators organization for the purposes of acquiring and storing grain for sale in time of scarcity.

Landlord and Tenant (No. 3). Amends the Principal Act; provides for increases of fixed rent in certain cases, the determination of rents by the Controller of his own motion, the determination of the fair rent of prescribed premises which are sub-let, etc.

Land Valuation. Consolidates and amends the law relating to the valuation of land.

Rural Fires. Makes provision for the prevention and control of rural fires; constitutes a Rural Fires Board; repeals certain Acts relating to bush fires.

State Employees (Long-Service Leave). Amends the law relating to the granting of long-service leave, and for the payment of certain allowances, to employees of the State; repeals the State Employees (Long-Service Leave) Act 1947.

Stock Medicines, Fertilizers and Pesticides. Consolidates and amends the law relating to the regulation and control of the sale of stock medicines, fertilizers and pesticides.

Straits Islands Abattoirs. Makes provision for the establishment, operation and maintenance, on King Island and Flinders Island, of abattoirs and saleyards and premises for the treatment and storage of meat.

Tuberculosis (Campaign Arrangements). Gives effect to certain arrangements with the Commonwealth for a campaign against tuberculosis; amends the Tuberculosis Act 1949. (Corresponding Commonwealth Act was assented to in November, 1948. *See also* Acts of other States.)

Vermin Destruction. Makes better provision for the destruction of rabbits and other vermin; repeals the Rabbits Destruction Act 1889; amends the Local Government Act 1906.

War Service Land Settlement. Provides for the settlement on the land of persons returned from war service; validates certain acquisitions of land and other transactions; repeals the Commonwealth and State War Service Land Settlement Agreement Act 1945 and amending Acts.

§ 5. Commonwealth Government Departments.

Official Year Book No. 37 contains, on pp. 76–86, a list of the Commonwealth Government Departments as at 31st March, 1947, showing details of the matters dealt with by each Department, and the Acts administered by the Minister of each Department.

Since that date there have been several important changes in Departmental structure. In April, 1948, resulting from the redistribution of functions of the Department of Munitions and the Department of Supply and Shipping, the Department of Supply and Development and the Department of Shipping and Fuel were created. The functions of the Department of Munitions (including Aircraft Production) and the supply function of the Department of Supply and Shipping were merged in the reconstituted Department of Supply and Development, and the Department of Shipping and Fuel was formed out of the remaining functions of the Department of Supply and Shipping.

Early in 1950 further departmental changes in structure resulted in the abolition of five Departments and the creation of three new Departments. The Departments abolished were Information, Post-war Reconstruction, Shipping and Fuel, Supply and Development, and Transport. Those created were :—Fuel, Shipping and Transport (to consolidate the functions of the Department of Transport and the Department of Shipping and Fuel) ; Supply (a change in name only from the previous Supply and Development) ; National Development (a new Department to carry out the Government's policy for national development). These structural changes involved the transfer between Departments of certain functions. The more important of these were the transfer of the residual functions of the abolished Department of Information to the Department of the Interior, except for short-wave radio services which were transferred to the Australian Broadcasting Commission, and radio monitoring, transferred to the Department of External Affairs ; the distribution of functions of the former Department of Post-war Reconstruction to the Department of the Interior (War Service Land Settlement Division), to the Prime Minister's (Office of Education and Division of Economic Policy), to Repatriation (Re-establishment Division), to Social Services (Rehabilitation Branch), and to National Development (Division of Industrial Development and Regional Planning Division) ; and the transfer of the functions of the former Department of Shipping and Fuel and the Department of Transport to the Department of Fuel, Shipping and Transport, except for the Stevedoring Industry Board and the Maritime Industry Commission which were transferred to the Department of Labour and National Service. Other changes were the transfers of the Australian Capital Territory Police from the Attorney-General's Department to the Department of the Interior, the Canberra Town Planning Section from Works and Housing to the Interior, the control of the Commonwealth Railways from the Interior to Fuel, Shipping and Transport, the Bureau of Mineral Resources from Supply and Development to National Development, the Housing Division from Works and Housing to National Development, inspection and research under the Commonwealth Conciliation and Arbitration Act from the Attorney-General's to Labour and National Service, long-service leave in the coal-mining industry from the Treasury to Labour and National Service, and the Army Inspection Staff and the Development and Proving Establishment from the Army to Supply.

In May, 1951 the Department of Defence Production was created, and the munitions function of the Department of Supply was transferred to it. The fuel function of the Department of Fuel, Shipping and Transport was transferred to National Development, and shipbuilding was transferred from Supply to the re-named Shipping and Transport. The Department of External Territories, now entitled the Department of Territories, acquired from the Interior the administration of the Northern Territory and of Ashmore and Cartier Islands. Earlier in the year (January) the War Service Homes Division was transferred from the Department of Works and Housing to the Department of Social Services.

Apart from the structural changes and transfers of functions described above, there are several Departments, which, in the interval between 1947 and 1951, have developed to cope with changing circumstances affecting the particular Department. The Department of Immigration and the Department of Social Services are two whose organizations were thus altered.

For a list of the present Departments and the names of their Ministers *see* page 88.

§ 6. Cost of Parliamentary Government.

The following statement shows the cost of parliamentary government in the Commonwealth and in each State, as well as the cost per head of population, for the year ended 30th June, 1950. In order to avoid incorrect conclusions as to the cost of the Governor-General's or Governor's establishment, it may be pointed out that a very large part of the expenditure (with the exception of the item "Governor's salary") under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interest, and carried out at the request of the Government.

COST OF PARLIAMENTARY GOVERNMENT, 1949–50.

(£.)

Particulars.	C'wlth.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Total.

CHAPTER IV.

LAND TENURE AND SETTLEMENT.

§ 1. Introduction.

1. **General.**—For descriptions of the land tenure systems of the several States and the internal territories *see* Official Year Book No. 4 (pp. 235–333) and subsequent issues, in particular No. 22 (pp. 133–195). A conspectus of land legislation in force has appeared in issues up to and including No. 38. The present issue contains statistics of the areas held, etc., under the various tenures, of war service land settlement, advances to settlers, etc.

2. **State, etc. Land Legislation.**—The land legislation in force in the several States may be classified broadly under five major types of land enactments, i.e., Crown Lands Acts, Closer Settlement Acts, Mining Acts, Returned Service Personnel Settlement Acts, and Advances to Settlers Acts ; but in one or two States certain land legislation is not classified within these broad groupings, e.g., in Queensland Resumption Acts relating to alienated land, and in South Australia the Eyre Peninsula Land Purchase and the Agricultural Graduates Settlement Acts. Within the groupings there is, of course, a wide variety of individual acts, even for a particular State (*see* Official Year Book No. 38, pp. 111–113, and earlier issues.

In the Northern Territory of Australia the legislation relating to Crown Lands is embodied in the Crown Lands Ordinance 1931–1950, the Darwin Town Area Leases Ordinance 1947, the Darwin Short Term Leases Ordinance 1946 and the Church Lands Ordinance 1947 ; that relating to mining in the Mining Ordinance 1939–1947, the Mining (Royalty Suspension) Ordinance 1943, the Gold Dredging Act 1899 of South Australia, the Mineral Oil and Coal Ordinance 1922–1923, the Mining Development Ordinance 1939–1940, and the Mines Regulation Ordinance 1939 ; and that relating to advances to settlers in the Encouragement of Primary Production Ordinance 1938.

In the Australian Capital Territory the Ordinances relating to Crown lands are the Leases Ordinance 1918–1937, the City Area Leases Ordinance 1936–1947, the Church Lands Leases Ordinance 1924–1932, and the Leases (Special Purposes) Ordinance 1925–1943.

3. **Administration and Classification of Crown Lands.**—In each of the States there is a Lands Department under the direction of a Minister who is charged generally with the administration of the Acts relating to the alienation, occupation and management of Crown lands. The administrative functions of most of the Lands Departments are to some extent decentralized by the division of the States into what are usually termed Land Districts, in each of which there is a Lands Office, which deals with applications for selections and other matters generally appertaining to the administration of the Acts within the particular district. In some of the States there is a local Land Board or a Commissioner for each district or group of districts. In the Northern Territory the Administrator, under the control of the Minister for the Interior, is charged with the general administration of the Lands Ordinance and of Crown lands in the Northern Territory. In the Australian Capital Territory the administration of the Leases Ordinances is in the hands of the Department of the Interior.

Crown lands are generally classified according to their situation, the suitability of the soil for particular purposes, and the prevailing climatic and other conditions. The modes of tenure under the Acts, therefore, as well as the amount of purchase-money or rent, and the conditions as to improvements and residence, vary considerably. The administration of special Acts relating to Crown lands is in some cases in the hands of a Board under the general supervision of the Minister.

In each of the States there is also a Mines Department which is empowered under the several Acts relating to mining to grant leases and licences of Crown lands for mining and allied purposes. In the Northern Territory there are several ordinances relative to mining.

4. **Classification of Tenures.**—As with land legislation, land tenures may be classified under broad headings; these indicate the nature of the tenure and comprise :—Free Grants and Reservations, Unconditional Purchases of Freehold, Conditional Purchases of Freehold, Leases and Licences under Land Acts, Closer Settlement, Leases and Licences under Mining Acts, and Settlement of Returned Service Personnel. For details of the various particular forms of land tenure within these seven groups *see* Official Year Book No. 38, pp. 114–116, and earlier issues.

In the Northern Territory, leases are granted in perpetuity, except for pastoral, miscellaneous, short term and Darwin Town Area leases which are restricted to periods of not more than 42, 21, 5 and 99 years respectively. The Crown Lands Ordinance provides also for the grant in fee simple of town lands and agricultural lands, and for the issue of grazing, occupation and miscellaneous licences. The mining leases and holdings are, generally speaking, similar to those of the States. In the Australian Capital Territory leases only are issued.

The following sections contain figures showing the extent of the different tenures in the several States and Territories, together with some general descriptive matter

§ 2. Free Grants and Reservations.

1. **New South Wales.**—(i) *Free Grants.* Crown lands may, by notification in the *Gazette*, be dedicated for public purposes and be granted therefor in fee simple. Such lands may be placed under the care and management of trustees, not less than three or more than seven in number, appointed by the Minister.

(ii) *Reservations.* Temporary reservations of Crown lands from sale or lease may be made by the Minister.

(iii) *Areas Granted and Reserved.* During 1948–49 and 1949–50, 1,666 and 4,148 acres respectively were permanently reserved or dedicated for miscellaneous recreation reserves and similar purposes in 74 and 75 localities respectively. The areas reserved at 30th June, 1949 and 1950, respectively, were as follows :—For travelling stock, 5,337,180 and 5,342,180 acres; pending classification and survey, 4,349,398 and 4,260,592 acres; forest reserves, 2,083,595 and 2,315,542 acres; water and camping reserves, 829,961 and 829,181 acres; mining reserves, 1,220,876 and 1,218,314 acres; for recreation and parks, 422,175 and 424,746 acres; other reserves, 4,042,277 and 4,194,608 acres; totals, 18,285,462 and 18,585,163 acres.

2. **Victoria.**—(i) *Free Grants.* The Governor may grant, convey or otherwise dispose of Crown lands for public purposes.

(ii) *Reservations.* The Governor may temporarily or permanently reserve from sale, lease or licence any Crown lands required for public purposes.

(iii) *Areas Granted and Reserved.* During 1949 and 1950, 165 and 10 acres respectively were granted without purchase. The areas both temporarily and permanently reserved at the end of 1949 and 1950, respectively, were as follows :—For roads, 1,794,218 acres each year; water reserves, 318,608 and 318,631 acres; for agricultural colleges, etc., 8,434 acres each year; forest and timber reserves, 5,119,593 and 5,139,794 acres; reserves in the mallee, 410,000 acres each year; other reserves, 548,795 and 553,259 acres; totals, 8,299,648 and 8,224,336 acres.

3. **Queensland.**—(i) *Free Grants.* The Governor may grant in trust any Crown land which is or may be required for public purposes. Under the Irrigation Act, land to be used for the purpose of any undertaking under that Act may be vested in fee simple in the Irrigation Commission.

(ii) *Reservations.* The Governor may reserve from sale or lease, either temporarily or permanently, any Crown land which is or may be required for public purposes. Reserved lands may be placed under the control of trustees who are empowered to lease them with the approval of the Minister for not more than 21 years.

Under the State Forests and National Parks Acts, the Governor may permanently reserve any Crown lands and declare them to be a State Forest or a National Park.

(iii) *Areas Granted and Reserved.* During 1949 and 1950 respectively the areas granted in fee simple without payment were nil, the area set apart as reserves 241,407 and 2,368,498 acres, and reserves cancelled 158,312 and 988,019 acres. The areas reserved, including roads, at the end of 1949 and 1950, respectively, were as follows:—Timber reserves, 3,123,760 and 3,079,344 acres; for State forests and national parks, 4,819,363 and 4,967,171 acres; aboriginal reserves, 6,525,659 and 7,805,659 acres; for streets, surveyed roads and stock routes, 3,497,591 and 3,544,865 acres; general reserves, 5,651,007 and 5,648,094 acres; totals, 23,617,380 and 25,045,133 acres.

4. **South Australia.**—(i) *Free Grants.* The Governor may dedicate Crown lands for any public purpose and grant the fee simple of such lands, with the exception of foreshores and land for quays, wharves or landing-places, which are inalienable in fee-simple from the Crown.

(ii) *Reservations.* The Governor may reserve Crown lands for the use and benefit of aborigines, military defence, forest reserves, railway stations, park lands or any other purpose that he may think fit.

(iii) *Areas Granted and Reserved.* During 1948–49 and 1949–50 respectively, free grants were issued for areas of 398 and 69 acres, and reserves comprising 1,767 and 966,043 acres were proclaimed. At 30th June, 1949 and 1950, the total area of surveyed roads, railways and other reserves was 20,274,340 and 21,240,383 acres respectively, including 17,321,600 acres in 1949 and 18,272,000 in 1950 set apart as aboriginal reserves.

5. **Western Australia.**—(i) *Free Grants.* The Governor may dispose of, in such manner as for the public interest may seem best, any lands vested in the Crown for public purposes, and may grant the fee simple of any reserve to secure the use thereof for the purpose for which such reserve was made.

(ii) *Reservations.* The Governor may reserve any lands vested in the Crown for public purposes. Areas not immediately required may be leased by the Governor for periods up to 10 years. Reserves may be placed under the control of a local authority or trustees, with power to lease them for a period not exceeding 21 years, or may be leased for 99 years. Temporary reserves may also be proclaimed.

(iii) *Areas Granted or Reserved.* During the years ended 30th June, 1949 and 1950 approximately 14,254 and 1,363,740 acres respectively were reserved for various purposes. At 30th June, 1950 (figures at 30th June, 1949, in parentheses), the total area reserved was 51,808,817 (50,427,599) acres, comprising State forests, 3,410,406 (3,402,963) acres, timber reserves 1,799,658 (1,789,623) acres and other reserves 46,598,753 (45,235,013) acres.

6. **Tasmania.**—(i) *Free Grants.* No mention is made in the Crown Lands Act respecting free grants of land, and it is expressly stated that no lands may be disposed of as sites for religious purposes except by way of sale under the Act. Under the Returned Soldiers' Settlement Act 1916, returned soldiers who applied prior to 31st March, 1922 were eligible to receive free grants of Crown land not exceeding £100 each in value, but these grants were conditional on the land being adequately improved.

(ii) *Reservations.* The Governor in Council may except from sale or lease, and reserve to His Majesty any Crown land for public purposes, and vest for such term as he thinks fit any land so reserved in any person or corporate body. Any breach or non-fulfilment of the conditions upon which such land is reserved renders it liable to forfeiture. A school allotment, not exceeding 5 acres in area, may also be reserved.

(iii) *Areas Granted or Reserved.* The total area reserved at 30th June, 1950 was 4,016,430 acres, excluding 21,769 acres of land occupied by Commonwealth and State Departments.

7. **Northern Territory.**—(i) *Reservations.* The Governor-General may resume for public purposes any Crown lands not subject to any right of, or contract for, purchase, and may reserve, for the purpose for which they are resumed, the whole or any portion of the lands so resumed.

(ii) *Areas Reserved.* The total area of reserves at 30th June, 1949 and 1950 respectively was 71,020 and 71,023 square miles, comprising aboriginal native, 69,015 square miles at each date ; and other reserves, 2,005 and 2,008 square miles.

8. **Summary.**—The following table shows the total areas reserved in each State, and the grand totals, for the years 1946 to 1950 :—

AREAS RESERVED.

('000 Acres.)

Year.	N.S.W. (*a*)	Victoria. (*b*)	Q'land. (*b*)	S. Aust. (*a*)	W. Aust. (*a*)	Tasmania. (*b*)	Nor. Terr. (*a*)	Total.
1946 ..	17,872	8,171	22,460	20,256	54,816	2,889	44,374	170,838
1947 ..	18,022	8,179	23,017	20,263	50,329	2,938	44,374	167,122
1948 ..	18,023	8,179	23,516	20,273	50,410	3,969	45,452	169.822
1949 ..	18,285	8,300	23,617	20,274	50,428	(*c*)4,016	45,453	170,373
1950 ..	18,585	8,224	25,045	21,240	51,809	(*a*)4,016	45,455	174,374

(*a*) At 30th June. (*b*) At 31st December. (*c*) At 30th June, 1950.

§ 3. Unconditional Purchases of Freehold.

1. **New South Wales.**—(i) *Auction Purchases.* Crown lands, not exceeding in the aggregate 200,000 acres in any one year, may be sold by public auction in areas not exceeding half-an-acre for town lands, 20 acres for suburban lands, and 640 acres for country lands, at the minimum upset price of £8, £2 10s., and 15s. per acre respectively. At least 10 per cent. of the purchase-money must be paid at the time of sale, and the balance within three months, or the Minister may allow the payment of such balance to be deferred for a period not exceeding ten years, 4 per cent. interest being charged. Town blocks in irrigation areas may also be sold by auction.

(ii) *After-Auction Purchases.* In certain cases, land offered at auction and not sold may be purchased at the upset price. A deposit in accordance with the terms and conditions under which the land was previously offered must be lodged, and, if the application be approved by the Minister, the balance of purchase money is payable as required by the specified terms and conditions.

(iii) *Special Purchases.* Under certain circumstances, land may be sold in fee simple, the purchaser paying the cost of survey and of reports thereon, in addition to the purchase-money. The minimum upset price per acre is the same as in the case of land sold by auction. Areas not exceeding 5 acres in extent may be sold to recognized religious bodies and public authorities at prices determined by the local land board.

(iv) *Improvement Purchases.* The owner of improvements in land, in authorized occupation by residence under any Mining or Western Lands Act of land within a gold-field or mineral field, may purchase such land without competition at a price determined by the local Land Board, but at not less than £8 per acre for town lands or £2 10s. per acre for other lands. The area must not exceed ¼ acre within a town or village, or 2 acres elsewhere, and no person may purchase more than one such area within 3 miles of a similar prior purchase by him.

(v) *Areas Sold.* During the year ended 30th June, 1950 (figures for year ended 30th June, 1949 in parentheses) the total area sold was 168 (221) acres, of which 3 (1) acres were sold by auction and 32 (51) acres as after-auction purchases, while 35 (32) acres were sold as improvement purchases and 97 (137) acres as special purchases. The amount realized for the sale of the whole area was £19,444 (£10,147).

2. **Victoria.**—(i) *General.* Lands, not exceeding 100,000 acres in any one year, specially classed for sale by auction, may be sold by auction in fee simple at an upset price not less than £1 per acre. The purchaser must pay the survey fee at the time of the sale, together with a deposit of 12½ per cent. of the whole price ; the residue is payable in equal half-yearly instalments with interest. Any unsold land in a city, town or borough area, areas specially classed for sale, isolated pieces of land not exceeding 150 acres in area, and sites for churches or charitable purposes, if not more than 3 acres in extent, may be sold by auction on the same terms. Swamp or reclaimed lands may also be sold by auction, subject to the condition that the owner keeps open all drains, etc., thereon.

(ii) *Areas sold at Auction and by Special Sales.* During 1949 and 1950 totals of 1,233 and 1,278 acres respectively were disposed of under this tenure, 889 and 1,091 acres being country lands and 344 and 187 acres town and suburban lands.

3. **Queensland.**—(i) *General.* From 1917 to 1929 the law precluded land being made available for any class of selection which gave the selector the right to acquire the freehold title. Amending legislation giving power to make land available under freehold tenures was passed in 1929 but this provision was repealed by the Act of 1932.

(ii) *Areas Sold, etc.* During 1947 unconditional selections made freehold totalled 125 acres. No unconditional selections have since (to 1950) been made freehold.

4. **South Australia.**—(i) *Sales by Auction.* The following lands may be sold by auction for cash :—(*a*) special blocks ; (*b*) Crown lands which have been offered for lease and not taken up within two years ; (*c*) town lands ; and (*d*) suburban lands which the Governor excepts from the operations of the Land Board. A purchaser must pay 20 per cent. of the purchase money in cash, and the balance within one month or within such extended time as the Commissioner of Crown Lands may allow. Town lands may be sold subject to the condition that they cannot be transferred or mortgaged within six years without the consent of the Commissioner. If the Commissioner of Crown Lands so determines, town lands may also be offered at auction on terms that the buyer may at his option purchase the lands for cash or on agreement for sale and purchase.

(ii) *Areas Sold, etc.* During the years ended 30th June, 1949 and 1950 the area of town lands and special blocks sold by auction was 18 and 47 acres respectively. In addition, 49,289 and 79,455 acres respectively were sold at fixed prices, and purchases of 75,263 and 100,051 acres respectively on credit were completed, making a total of 124,552 and 179,553 acres respectively.

5. **Western Australia.**—(i) *Sales by Auction.* Town, suburban and village lands must be sold by auction after being surveyed into lots and notified in the *Gazette.* Ten per cent. of the purchase-money must be paid in cash together with the value of any improvements, and the balance in four equal quarterly instalments. Suburban land must be fenced within two years, and no Crown grant may be issued until the land is fenced.

(ii) *Areas Sold.* During the years ended 30th June, 1949 and 1950 the area of town and suburban allotments sold by auction was 1,230 and 994 acres in 562 and 512 allotments respectively.

6. **Tasmania.**—(i) *Sales by Auction.* Town lands may be sold by auction.

(ii) *After-auction Sales.* Town lands, not within 5 miles of any city, which, after having been offered at auction, have not been sold, may be sold at the upset prices by private contract.

(iii) *Sales of Land in Mining Towns.* Any person being the holder of a residence licence or business licence who shall be in lawful occupation of any residence area or business area, and who shall be the owner of buildings and permanent improvements upon such land of a value equal to or greater than the upset price of such area, shall be entitled to purchase such area at the upset price at any time prior to the day on which such area is to be offered for sale as advertised. The upset price for such area shall not be less than £10, excluding the value of improvements, cost of survey, and of grant deed. The area which may be so purchased may, with the consent of the Commissioner, exceed one-quarter of an acre, but shall not in any case exceed one-half of an acre.

§ 4. Conditional Purchases of Freehold.

1. **General.**—The various methods of obtaining Crown lands by conditional purchase in the several States are given in some detail in preceding issues of the Official Year Book (*see* No. 22, pp. 141–9).

2. **New South Wales.**—At 30th June, 1949 and 1950 the total number of incomplete conditional purchases in existence was 39,350 and 39,094 respectively, covering an area of 12,758,159 and 12,599,238 acres respectively. During 1948–49 and 1949–50, respectively, 28 and 46 applications were received for conditional purchases; 15 and 20 were confirmed with areas of 2,095 and 2,760 acres respectively; deeds were issued during the year for 340,300 and 382,544 acres; at the end of the year deeds had been issued for 32,571,448 and 32,954,036 acres. These figures exclude conversions from other tenures—1948–49, 426 comprising 60,882 acres; 1949–50, 758 comprising 149,647 acres.

3. **Victoria.**—Excluding selections in the Mallee country, the total area purchased conditionally in 1949 and 1950 was 6,133 and 11,457 acres respectively, all with residence. The number of selectors was 34 and 60 respectively. There were no selections in the Mallee in 1949 and 1950.

In addition, final payments were made during 1949 and 1950 on conditional purchases comprising 45 and 100 acres of Mallee lands.

4. **Queensland.**—The following selections were made freehold during 1949 and 1950, respectively:—Agricultural farms 57,437 and 78,709 acres; prickly pear selections 213,322 and 271,555 acres; and prickly pear development selections 3,261 and 7,945 acres.

5. **South Australia.**—The land allotted under agreements to purchase during 1948–49 was 8,529 acres, comprising Eyre Peninsula railway lands 3,289 acres, closer settlement lands 2,911 acres, soldiers' acquired lands 150 acres, surplus lands 167 acres, Eyre Peninsula Land Purchase Act 4 acres and other Crown lands 2,006 acres. During 1949–50 6,873 acres were allotted under agreements to purchase, comprising Eyre Peninsula railway lands 30 acres, Murray Lands railway lands 4 acres, Pinaroo railway lands 82 acres, closer settlement lands 5,475 acres, homestead re-purchased lands 17 acres, surplus lands 58 acres, agricultural graduates lands 238 acres and other Crown lands 969 acres.

6. **Western Australia.**—During the year ended 30th June, 1950 (figures for the year ended 30th June, 1949 in parentheses) the number of holdings conditionally alienated was 841 (716), the total area involved being 822,467 (796,941) acres, comprising conditional purchases by deferred payments with residence 809,134 (786,604) acres and free homestead farms 13,333 (10,337) acres. Under the heading "deferred payments with residence" are included conditional purchases of grazing lands.

In addition, Crown grants were issued during 1949–50 (1948–49 in parentheses) for the following selections, the prescribed conditions having been complied with:—Free homestead farms 18,714 (33,342) acres and conditional purchases 237,000 (340,671) acres.

7. **Tasmania.**—During 1949–50 (figures for 1948–49 in parentheses) Crown grants were issued for 21,828 (19,149) acres. The total area sold conditionally was 3,378 (2,058) acres, comprising selections for purchase 2,909 (1,929) acres, and town and suburban allotments 469 (129) acres. The numbers of applications received and confirmed were 41 (34) and 273 (123) respectively.

§ 5. Leases and Licences under Land Acts.

1. **General.**—Information regarding the methods of obtaining leases and licences of Crown lands in the several States and Territories is given in preceding issues of the Official Year Book (*see* No. 22, pp. 149–63).

2. **New South Wales.**—The following table shows the areas held under various descriptions of leases and licences under the control of the Department of Lands, the Water Conservation and Irrigation Commission and the Western Lands Commission at the end of 1948–49 and 1949–50 :—

AREAS OCCUPIED UNDER LEASE OR LICENCE AT 30th JUNE : NEW SOUTH WALES.(a)

(Acres.)

Particulars.	1949.	1950.
Areas taken up under Crown Lands or Closer Settlement Acts.		
Occupation licences—ordinary	504,572	507,928
Occupation licences—preferential	232,384	224,469
Conditional leases	11,799,970	11,690,931
Conditional purchase leases	155,248	151,341
Settlement leases	2,765,654	2,758,641
Improvement leases	54,022	51,784
Annual leases	445,844	465,897
Scrub leases	41,856	39,336
Snow leases	665,421	634,581
Special leases	960,562	975,953
Inferior lands leases	19,733	19,733
Residential leases (on gold and mineral fields)	5,361	5,405
Church and school lands	6	3
Permissive occupancies (ordinary)	2,124,057	2,082,514
,, ,, (Closer Settlement Acts)	39,661	33,434
Prickly pear leases	147,568	147,507
Crown leases	7,256,608	7,223,374
Homestead farms	4,792,043	4,834,582
Homestead selections and grants	1,659,432	1,652,343
Closer settlement leases (Closer Settlement Acts)	1,232,844	1,639,480
Settlement purchase leases (Closer Settlement Acts)	1,010,745	1,029,508
Suburban holdings	52,932	52,618
Week-end leases	178	153
Group purchase leases (Closer Settlement Acts)	219,305	223,377
Leases of town lands	54	54
Returned soldiers' special holdings	13,887	13,858
Irrigation areas	227,866	220,766
Leases, Licences and Permissive Occupancies under Western Lands Act.		
Conditional leases	93,823	93,823
Perpetual leases	55,044,814	55,607,887
Other long-term leases	19,222,559	18,849,429
Permissive occupancies	2,812,963	2,316,605
Leases being issued—occupation licences	162,199	154,427
Preferential occupation licences	260,575	423,225
Total	114,024,746	114,124,966

(a) Excludes mining leases and permits; forest leases and occupation permits; and leases outside irrigation areas, controlled by the Water Conservation and Irrigation Commission—52,856 acres in 1949 and 91,188 acres in 1950.

3. **Victoria.**—The area of Crown lands occupied under leases and licences in each of the years 1949 and 1950 is shown in the following table :—

AREAS OCCUPIED UNDER LEASE OR LICENCE : VICTORIA.

(Acres.)

Particulars.	1949.	1950.
Grazing licences—Other than Mallee	5,618,336	5,587,461
Mallee lands	3,133,904	2,967,949
Auriferous lands (licences)	15,890	15,890
Perpetual leases—Other than Mallee	16,807	17,819
Mallee lands	61,043	61,043
Swamp lands (leases)	4,020	4,020
Agricultural college lands	45,586	53,957
Total	8,895,586	8,708,139

4. **Queensland.**—The total area occupied under lease or licence, excluding mining leases, at the end of 1949 and 1950 was as follows :—

AREAS OCCUPIED UNDER LEASE OR LICENCE AT 31st DECEMBER : QUEENSLAND.

(Acres.)

Particulars.	1949.	1950.
Pastoral leases	243,243,880	242,637,520
Occupation licences	18,531,360	20,257,200
Grazing selections and settlement farm leases	84,705,009	85,662,684
Special purpose leases—Crown land	497,786	520,738
Reserves	991,964	1,062,509
Perpetual lease selections and perpetual lease prickly pear selections	6,474,827	6,549,519
Auction perpetual leases, etc.	31,737	(a) 513,514
Forest grazing leases (of reserves)	1,792,360	1,736,580
Total	356,268,923	358,940,264

(a) Includes 481,157 acres held by Queensland-British Food Corporation, as perpetual country leases.

5. **South Australia.**—The total area including repurchased lands held under lease or licence, except mining lease and licence, at 30th June, 1949 and 1950, respectively, was 137,432,250 acres and 137,418,839 acres, of which pastoral leases, 115,629,814 acres in 1949 and 115,672,014 acres in 1950, constituted the major proportion.

6. **Western Australia.**—At 30th June, 1949 the total area held under lease or licence issued by the Lands Department amounted to 220,283,036 acres, of which 217,353,521 acres were under pastoral lease. Corresponding figures for 1950 were 222,489,077 acres and 219,200,060 acres.

7. **Tasmania.**—Crown lands leased at 31st December, 1948 for other than mining purposes amounted to 2,684,579 acres, of which 2,026,455 acres were leased for pastoral purposes. Corresponding figures as at 30th June, 1950 were 2,798,599 acres and 2,157,348 acres.

8. **Northern Territory.**—At 30th June, 1949 the total area held under lease, licence and permit was 158,437,388 acres, of which pastoral leases accounted for 114,370,560 acres and other leases, licences and mission stations 44,066,828 acres. At 30th June, 1950 the total area under lease, etc., was 162,560,640 acres, of which pastoral leases accounted for 122,815,360 acres and other leases, licences and mission stations 39,745,280 acres.

9. **Australian Capital Territory.**—The number of leases granted under the City Area Leases Ordinance 1936–1947 to 30th June, 1949 and 1950 (excluding leases surrendered and determined) was 799 and 918 respectively. The total area held under grazing, etc., lease and licence (including Jervis Bay area) amounted to 303,289 acres in 1949 and 330,657 acres in 1950.

Seventeen leases have been granted under the Church Lands and Special Purposes Ordinances for church and scholastic purposes. In addition, a lease in perpetuity has been granted under the Church of England Land Ordinance 1926 for church purposes.

10. **Summary.**—The following table shows particulars of the land held in each State under lease or licence for purposes other than mining and forestry, the total leased or licensed land in the Territories, and the grand totals, for the years 1946 to 1950:—

AREAS OCCUPIED UNDER LEASE OR LICENCE OTHER THAN MINING AND FORESTRY.

('000 Acres.)

Year.	N.S.W. (*a*)	Victoria. (*b*)	Q'land. (*b*)	S. Aust. (*a*)	W. Aust. (*a*)	Tas. (*b*)	N.T. (*a*) (*c*)	A.C.T. (*b*) (*c*) (*d*)	Total.

(*a*) At 30th June. (*b*) At 31st December. (*c*) Leases and licences for all purposes. (*d*) Includes Jervis Bay area. (*e*) At 30th June, 1950.

§ 6. Leases and Licences under Mining Acts.

1. **General.**—Information regarding the various forms of leases and licences under Mining Acts in the several States and the Northern Territory is given in preceding issues of the Official Year Book (*see* No. 22, pp. 170–7).

2. **New South Wales.**—The following table shows particulars of operations on Crown lands for the years 1948–49 and 1949–50:—

AREAS TAKEN UP UNDER MINING ACTS: NEW SOUTH WALES.

(Acres.)

Particulars.	1948–49.		1949–50.	
	Areas Taken up during Year.	Total Areas Occupied at End of Year.	Areas Taken up during Year.	Total Areas Occupied at End of Year.
Gold-mining	1,345	5,057	1,114	4,762
Mining for other minerals ..	47,877	175,686	13,514	174,074
Authorities to prospect ..	1,257,393	5,485,486	1,074,176	268,690
Other purposes	1,130	8,220	256	8,252
Total	1,307,745	5,674,449	1,089,060	455,778

3. **Victoria.**—The following table shows particulars of the number of leases and licences granted during 1949 and 1950, and the area under occupation for mining purposes at the end of each year :—

AREAS TAKEN UP UNDER MINING ACTS : VICTORIA.

Particulars.	1949.		1950.	
	Leases and Licences Granted.	Total Areas Occupied at End of Year.	Leases and Licences Granted.	Total Areas Occupied at End of Year.
	No.	Acres.	No.	Acres.
Gold-mining leases	60	20,612	61	20,426
Petroleum prospecting licences ..	3	1,134,582	..	1,056,739
Coal leases	91	(a)13,377	78	(a)12,910
Other leases and licences ..		5,002		5,562
Total	154	1,173,573	139	1,095,637

(a) Includes State Coal Mine area 7,575 acres and State Electricity Commission area 2,800 acres.

The area covered by licences, etc., issued in 1949 was 329,936 acres, and in 1950 3,951 acres. The reduction was due to the fact that no new petroleum prospecting licences were applied for. The rent, fees, etc., were £8,810 and £7,315 in 1949 and 1950 respectively.

4. **Queensland.**—During 1949 and 1950, the number of miners' rights issued was 2,840 and 2,813 respectively, and of business licences 3 each year. The following table shows particulars of the areas of lands taken up under lease or licence and the total areas occupied for 1949 and 1950. In addition, an area estimated at 25,000 acres was held under miners' rights and dredging claims.

AREAS TAKEN UP UNDER MINING ACTS : QUEENSLAND.

(Acres.)

Particulars.	1949.		1950.	
	Areas Taken up during Year.	Total Areas Occupied at End of Year.	Areas Taken up during Year.	Total Areas Occupied at End of Year.
Gold-mining	451	3,585	466	3,588
Mining for other minerals	3,878	30,658	11,625	46,871
Miners' homestead leases	984	421,269	1,752	422,109
Petroleum-prospecting permits ..	8,500	482,740	320,000	794,240
Coal prospecting areas	2,154	4,074	204	204
Total	15,967	942,326	334,047	1,267,012

The area of land held under lease only at 31st December, 1949 and 1950 was 455,512 and 472,568 acres respectively.

5. **South Australia.**—The following table shows particulars of operations for 1948–49 and 1949–50 :—

AREAS TAKEN UP UNDER MINING ACTS : SOUTH AUSTRALIA.

(Acres.)

Particulars.	1948-49.		1949-50.	
	Areas Taken up during Year.	Total Areas Occupied at End of Year.	Areas Taken up during Year.	Total Areas Occupied at End of Year.
Gold-mining leases	471	1,308	10	920
Mineral and miscellaneous leases ..	594	70,334	3,036	72,820
Claims	4,450	12,456	1,705	11,031
Occupation licences..	1	32	..	32
Oil licences	..	35,968,000	640,000	36,576,000
Special mining leases	12,480	16,320	7,923	11,763
Total	17,996	36,068,450	652,674	36,672,566

6. **Western Australia.**—The following table shows particulars of operations for 1949 and 1950. The figures exclude holdings under miners' rights and mineral oil licences. Of the areas shown as taken up in 1950 (1949 in parentheses), the area under lease was 5,456 (3,610) acres for gold-mining, 6,869 (4,873) for mining for other minerals, 168 (473) for miners' homesteads, and 319 (54) for miscellaneous—a total of 12,812 (9,010) acres. The balance was taken up under licences.

AREAS TAKEN UP UNDER MINING ACTS : WESTERN AUSTRALIA.

(Acres.)

Particulars.	1949.		1950.	
	Areas Taken up during Year.	Total Areas Occupied at End of Year.	Areas Taken up during Year.	Total Areas Occupied at End of Year.

(a) Year ended 30th June. (b) Excludes lands held under miners' rights only. (c) Excludes holdings under miners' rights and mineral oil licences. (d) Excludes Northern Territory.

§ 7. Closer Settlement.

1. **General.**—Particulars regarding the methods of acquisition and disposal of land for closer settlement in the several States are given in preceding issues of the Official Year Book (*see* No. 22, pp. 163–9) and considerable detail of the results of the operations of the several schemes has appeared in subsequent issues. In more recent years, however, the amalgamation, in some States, of closer settlement records with those of other authorities has made it impossible to obtain up-to-date figures for those States and for Australia as a whole, although aggregations of State totals as at the latest dates available have been published as rough approximations intended to convey some idea of the extent of the schemes throughout Australia. Particulars in this issue are restricted to a summary only of the position in each State at the latest dates available.

2. **New South Wales.**—Since the inception of closer settlement in 1905 to 30th June, 1950, 2,176 estates totalling 5,824,779 acres have been purchased by the Crown at a cost of £23,779,076 for purposes of closer settlement of civilians and returned service personnel. Particulars of the total areas acquired to 30th June, 1949 and 1950, respectively, are as follows :—Estates purchased, 2,083 and 2,176; farms allotted, 10,323 and 10,493; area, 5,576,318 and 5,824,779 acres; purchase price, £22,504,636 and £23,779,076.

Closer settlement is now being effected entirely under perpetual leasehold tenure (closer settlement leases).

3. **Victoria.**—The Closer Settlement Commission was abolished as from 31st December, 1938, and land settlement was placed under the control of the Department of Lands and Survey. On 31st March, 1939 all Closer Settlement and Discharged Soldiers' accounts were amalgamated, the settlers' accounts adjusted and the new debt made payable over an extended period. Particulars of the operations under the provisions of the Closer Settlement Acts to 30th June, 1938, the latest date for which separate details are available, show that 1,402,568 acres were acquired at a cost, including the value of Crown lands taken over, of £10,244,023, and that 8,722 allotments were made, farm allotments comprising 1,102,676 acres, workmen's homes allotments 790 acres, agricultural labourers' allotments 3,484 acres and town allotments 86,599 acres. The figures for area and cost of land acquired for closer settlement purposes include, in addition to 133,128 acres purchased for £1,246,722 and transferred subsequently to discharged soldiers, a total area of 512,757 acres costing £4,125,822 which was purchased originally for the settlement of discharged soldiers.

4. **Queensland.**—Separate records relating to the closer settlement of re-purchased land are no longer kept by the Land Administration Board, and the operations under this heading are now included with "Leases and Licences under Land Acts." The total area acquired to 31st December, 1934 was 970,778 acres, costing £2,292,881. At the same date the area allotted amounted to 915,690 acres distributed over 3,048 selections consisting of 2,155 agricultural farms, 257 unconditional selections, 544 perpetual lease selections, 9 prickly pear selections, 6 perpetual lease prickly pear selections and 77 settlement farm leases. An area of 13,038 acres was sold by auction.

5. **South Australia.**—The total area re-purchased for closer settlement at 30th June, 1950 was 931,274 acres at a cost of £2,843,060. Included in these figures are 51,872 acres purchased for £185,285 and afterwards set apart for returned service personnel, 3,214 acres reserved for forest and waterworks purposes, the purchase-money being £16,185, and also 26,563 acres of swamp and other lands, which were purchased for £111,580, in connexion with reclamation of swamp-lands on the River Murray. Of the total area, 825,690 acres in 1949 and 832,001 in 1950 were allotted to 2,830 persons.

6. **Western Australia.**—The total area acquired for closer settlement up to 30th June, 1950 was 2,052,784 acres, costing £4,010,503. Of this area, 20,972 acres have been set aside for roads, reserves, etc., leaving a balance of 2,031,812 acres available for selection. Particulars of operations under the Act for the year ended 30th June, 1950 (figures for year ended 30th June, 1949 in parentheses) are as follows:—Area selected during the year 382,278 (129,283) acres; number of farms, etc., allotted to date 2,010 (1,856); total area occupied to date 1,388,796 (996,518) acres; balance available for selection 643,016 (868,205) acres.

7. **Tasmania.**—Up to 30th June, 1950, 38 areas had been opened up for closer settlement, the total purchase-money paid by the Government being £370,785 and the total area acquired amounting to 104,289 acres, including 12,149 acres of Crown lands. The number of farms occupied at 30th June, 1949 and 1950 was 161 and 150 respectively.

§ 8. Settlement of Returned Soldiers and Sailors: 1914-18 War.

1. **General.**—Information regarding the methods adopted in each State following the commencement of the 1914–18 War for providing land for the settlement of returned soldiers and sailors, together with the conditions under which such land could be acquired,

is given in earlier issues of the Official Year Book (*see* No. 13, pp. 1010–23, and No. 18, pp. 187–9). Later modifications were made with a view to simplifying procedure and liberalizing the conditions under which holdings may be acquired.

Information on soldier settlement in this section suffers from the same defect, i.e. amalgamation of records, as does that on closer settlement in the foregoing section. Consequently, particulars of the position of soldier settlement in each State at the latest available dates only are given in the following paragraphs, and no aggregations for Australia are shown.

2. **New South Wales.**—At 30th June, 1950 (figures at 30th June, 1949 in parentheses) farms had been allotted to 9,908 (9,891) returned soldiers of the 1914–18 War. These farms included 4,009 provided from 1,710,272 acres of land acquired at a cost of £8,113,056. Five thousand six hundred and sixty-two (5,515) soldiers have either transferred or abandoned their farms, leaving 4,246 (4,376) in occupation of 5,253,251 (5,570,581) acres. Of this area 4,053,275 (4,332,702) acres were Crown lands, including 2,015,725 (2,092,130) acres in Western Division taken up under the Western Lands Act, 1,140,761 (1,175,695) acres acquired lands and 59,215 (62,184) acres within Irrigation Areas. These totals exclude 703 (703) discharged soldiers who purchased privately-owned land with their own capital and were granted advances for the purchase of stock and plant or for effecting improvements.

3. **Victoria.**—At 30th June, 1938 the area acquired or set apart for soldier settlement in respect of the 1914–18 War was 2,482,286 acres consisting of 1,763,241 acres of private land purchased at a cost of £13,301,206, plus 133,128 acres costing £1,240,722 taken from Closer Settlement, and 585,917 acres of Crown lands valued at £447,022. Subsequently 512,757 acres valued at £4,125,822 were transferred to Closer Settlement. Up to 30th June, 1938 the number of settlers to whom farms, etc., had been allotted was 12,126, and the number of farms, etc., allotted was 9,784 (including 955 farms originally purchased for closer settlement purposes) containing 2,365,518 acres. In addition, 802 share farmers and holders of leasing agreements and private land had received assistance. The number of farms, etc., occupied at 30th June, 1938 was 8,426 (including 1,001 originally purchased for closer settlement) containing 1,734,379 acres. Later particulars cannot be given, as separate details are not available.

4. **Queensland.**—At 30th June, 1929 the area acquired or set apart for soldier settlement (1914–18 War) was 577,033 acres, of which 41,101 acres comprised private land, purchased at a cost of £270,480. The number of farms occupied was 1,148, containing 440,092 acres. Some of these selections were acquired under the ordinary provisions of the Land Act, and do not include areas specially set apart for soldiers.

As special records are not now kept respecting the areas held by discharged soldier settlers, later information cannot be given.

5. **South Australia.**—At 30th June, 1950 the area of land acquired or set apart for soldier settlement (1914–18 War) was 1,336,012 acres, of which 1,202,053 acres comprised private land purchased at a cost of £3,803,572. These figures exclude mortgages discharged, £494,770, on 360,403 acres representing 300 farms, etc., and 314 settlers. The number of soldiers to whom assistance had been granted under the Discharged Soldiers' Settlement Acts up to 30th June, 1950 was 4,165, and the area of farms, etc. (including mortgages discharged) on which assistance had been granted was 2,746,744 acres. At 30th June, 1950 (1949) farms, etc., occupied numbered 1,093 (1,195) containing 701,350 (784,971) acres.

6. **Western Australia.**—At 30th June, 1947 the area of private land acquired for soldier settlement (1914–18 War) was 345,110 acres purchased at a cost of £605,076. To that date, assistance had been given to 5,213 returned soldiers, and the number of farms, etc., occupied was 1,145. No further land has been purchased for returned soldiers of the 1914–18 War.

Owing to the amalgamation of records in the Rural and Industries Bank, information regarding assistance to returned soldiers is no longer available, but at 30th June, 1944, the area of land acquired or set apart for soldier settlement was 14,287,643 acres.

7. **Tasmania.**—At 30th June, 1950 (figures at 30th June, 1949 in parentheses) the area acquired or set apart for soldier settlement (1914–18 War) was 367,137 (365,849) acres, of which 280,278 (278,990) acres comprised private land purchased at a cost of £2,114,134 (£2,111,042). Up to 30th June, 1950 (figures to 30th June, 1949 in parentheses) the number of settlers to whom farms, etc., had been allotted was 2,389 (2,385) and the number of farms, etc., allotted was 2,213 (2,209) containing 347,993 (345,207) acres. The number of farms, etc., occupied at 30th June, 1950 was 655 containing 112,675 acres compared with 741 containing 127,246 acres at 30th June, 1949.

8. **Losses on Soldier Settlements.**—For information regarding the financing arrangements for soldier settlement after the 1914–18 War, and the losses which occurred in connexion with it, *see* earlier issues of the Official Year Book, in particular, No. 28, pp. 131–2.

§ 9. Settlement of Returned Service Personnel : 1939-45 War.

1. **War Service Land Settlement Scheme.**—(i) *General.* The War Service Land Settlement Agreements Act 1945 authorized the execution by or on behalf of the Commonwealth of agreements between the Commonwealth and the States for proposals to settle discharged members of the Forces and other eligible persons on land in the States. The proposals were subsequently ratified by the States, and the agreements were signed in November, 1945.

Under the agreements with New South Wales, Victoria and Queensland, the State provides the capital for the purpose of acquiring, developing, and improving land for settlement, and for advances to settlers, bears the cost of State administration, and shares equally with the Commonwealth in certain other costs. Under the agreements with South Australia, Western Australia and Tasmania, the State administers the scheme on behalf of the Commonwealth, which makes the major financial contribution and accepts responsibility for policy decisions and exercises general supervision over the scheme (*see* also § 10. Advances to Settlers).

It was agreed that certain principles should be observed in putting settlers on holdings, the more important being that settlement should only be undertaken where economic prospects for production were reasonably sound, that applicants must be considered satisfactory for settlement under the scheme, and that holdings should be large enough for settlers to operate efficiently and earn a reasonable labour income. In general, holdings must be allotted on perpetual leasehold tenure.

The method of operation is for the State to select land suitable for settlement and to submit it, with detailed information about the property, to the Commonwealth for approval. When this has been obtained, the State proceeds with the sub-division of the property, the selection of settlers, and the improvement of holdings to the stage where they can be brought into production by the settler within reasonable time.

For more detailed information about the agreements and the methods of operation and administration of the Scheme *see* Official Year Book No. 37, pp. 113–8.

(ii) *Summary of Operations to 31st December, 1950.* The tables hereunder show the operations of the War Service Land Settlement Scheme in each State up to 31st December, 1950.

WAR SERVICE LAND SETTLEMENT (1939–45 WAR): SUMMARY TO 31st DECEMBER, 1950.

(iii) *Expenditure.* The following table shows a dissection of the Commonwealth expenditure on War Service Land Settlement to 31st December, 1950 :—

WAR SERVICE LAND SETTLEMENT (1939–45 WAR) : COMMONWEALTH EXPENDITURE TO 31st DECEMBER, 1950.

(£.)

Advances to States.	N.S.W.	Vic.	Qld.	S. Aust.	W. Aust.	Tas.	Total.
For acquisition of land ..	..	..	..	1,512,855	2,979,066	581,750	5,073,671
For development and improvement of land ..	..	..	..	3,191,819	2,462,346	981,768	6,635,933
Commonwealth contributions to excess cost over valuation	..	..	11,438	..	110,250	..	121,688
To provide credit facilities to settlers	..	..	..	384,922	2,338,728	128,601	2,852,251
For remission of settlers' rent and interest ..	82,753	1,847	6,096	7,837	78,335	..	176,868
For payment of living allowances to settlers ..	399.677	245,000	71,000	40,991	130,680	9,881	897,229
For operation and maintenance of irrigation projects	..	..	..	48,100	2,894	..	50,994
Loss on advances ..	..	14	..	..	..	..	14
Total	482,430	246,861	88,534	5,186,524	8,102,299	1,702,000	15,808,648

Repayments of expenditure to 31st December, 1950 on the acquisition, development and improvement of land amounted to £185.429, and on the provision of credit facilities to settlers to £1,482,311, so that the total expenditure was reduced by £1,667,740 to £14,140,908. In addition, miscellaneous receipts in South Australia and Western Australia to 31st December, 1950 amounted to £161,581.

2. **Loans and Allowances (Agricultural Occupations) Scheme.**—(i) *General.* Full details of the measures taken to provide for the re-establishment of ex-servicemen in rural occupations are contained in Official Year Book No. 37, pp. 117–8.

(ii) *Loans* (*Agricultural Occupations*). The following table shows particulars for each State and certain Territories to 31st December, 1950 :—

LOANS (AGRICULTURAL OCCUPATIONS) : SUMMARY TO 31st DECEMBER, 1950.

(a) After deduction of loans declined after approval—£1,127,979. (b) Includes advances from principal repaid by borrowers.

These loans are made to eligible ex-servicemen for the purchase of land, effecting improvements on land, the acquisition of tools of trade, live-stock, plant or equipment, the establishment of a co-operative business with other persons, reduction or discharge of a mortgage, bill of sale, etc.

(iii) *Allowances (Agricultural Occupations).* The following table shows details for each State and New Guinea to 31st December, 1950 :—

ALLOWANCES (AGRICULTURAL OCCUPATIONS) : SUMMARY TO 31st DECEMBER, 1950.

State.	Applications.			Advanced by Commonwealth Treasury to Bank.	Allowances Paid.
	Received.	Approved.	Rejected, Withdrawn or Not Yet Approved.		
				£	£
New South Wales ..	3,997	3,554	443	560,000	556,252
Victoria	3,040	2,285	755	295,000	288,955
Queensland.. ..	2,865	2,414	451	434,000	427,876
South Australia (*a*) ..	2,167	1,666	501	297,000	292,429
Western Australia ..	2,927	2,526	401	449,500	446,244
Tasmania	602	494	108	94,000	97,123
New Guinea ..	3	2	1	592	550
Total ..	15,601	12,941	2,660	2,130,092	2,109,429

(*a*) Includes allowances paid to four ex-servicemen in Northern Territory.

These allowances are payable only in respect of the period during which the income derived from the occupation by the ex-serviceman concerned is considered inadequate.

3. **War Service Land Settlement Division—Total Expenditure.**—The following table shows details, by States and Territories, of the total expenditure of the War Service Land Settlement Division for the years 1945–46 to 1950–51, and the aggregate to 30th June, 1951. The aggregate, £28,858,070, includes—War Service land settlement, £18,538,288; agricultural loans, £6,200,144; agricultural allowances, £2,198,551; administrative expenses, £595,345; rural training, £1,325,742.

COMMONWEALTH WAR SERVICE LAND SETTLEMENT DIVISION : EXPENDITURE.

(£.)

1950–51 ..	287,491	145,773	109,691	1,743,583	2,844.116	830,343	4,295	389	5,965,681
Total to 30th June, 1951	4,388,881	2,145,733	1,326,082	7,041,713	11,335.489	2,604,877	10,748	4,547	28,858,070

After deducting repayments of expenditure to 30th June, 1951 which amounted to £2,343,066 and miscellaneous receipts (£1,084,996), the net expenditure to 30th June, 1951 was £25,430,008.

§ 10. Advances to Settlers.

1. **General.**—A detailed statement regarding the terms and conditions governing advances to settlers in the several States and the Northern Territory appears in preceding issues of the Official Year Book (*see* No. 22, pp. 179–186).

The summaries of loans and advances in the following paragraphs are compiled from returns supplied by the various government lending agencies in the several States. They include the transactions in lands acquired under closer and soldier settlement schemes, but exclude the balances owing on former Crown lands sold on the conditional purchase, etc., system.

The amounts outstanding do not represent the actual differences between the total advances and settlers' repayments, for considerable remissions of indebtedness have been made in all States as a result of reappraisements of land values and the writing down of debts. In general, they include both principal and interest outstanding.

A summary for Western Australia is not included, as practically the only Governmental funds being made available are Commonwealth (*see* § 9 above).

In New South Wales and Victoria expenditure on the acquisition, development and improvement of land for war service land settlement is provided for by the States, and particulars thereof are included in the respective summaries. In Queensland no money is paid for the value of the land acquired, most land being occupied on lease from the Government, but advances in respect of improvements are included. In the other States, this expenditure is provided for by the Commonwealth and particulars are included in § 9 above. Loans (Agricultural Occupations) under the Commonwealth Re-establishment and Employment Act 1945, although made from finance provided by the Commonwealth, are included in the summaries following.

2. New South Wales.—The following table shows particulars respecting advances, etc., under State Authorities to 30th June, 1950 :—

Total	534,472	698,067	26,663.620	5,915	5,652,175

6. **Western Australia.**—The operations prior to 1945 covered in this section related to moneys made available through, or by, the old Agricultural Bank and other Government Departments for the purpose of agricultural development. On 1st October, 1945, however, the Agricultural Bank was reconstituted as the Rural and Industries Bank of Western Australia, and was given authority to operate similarly to the associated banks. Certain securities in the books of the old bank were taken over by the general banking division of the new bank, and the clients concerned then operated with privileges and obligations similar to those provided by other banking institutions. The majority of the remaining securities, also, were eventually transferred.

At present, very limited funds are being made available by the State Government for advances for agricultural development, the bulk of the moneys for this purpose being provided by the Commonwealth Government under the War Service Land Settlement and Commonwealth Re-establishment and Employment Acts. Particulars of this expenditure are shown in § 9 above.

7. **Tasmania.**—The following table shows particulars of advances under State Authorities to 30th June, 1950. Although not regarded as outstanding advances by the Department of Agriculture the figures in connexion with closer and soldier land settlement have been included in the table for comparative purposes ; the areas so purchased have been leased on 99-year terms having an option of purchase which the leaseholder may exercise at any time.

(a) Excludes £14,346 forfeited properties. (b) Excludes £200,593 advances capitalized, £79,114 advances written off to bad debts, and £40,789 written off to revaluation. (c) Not regarded as outstanding advances by the Department. (d) Number of leaseholders, including those to whom advances have been made.

8. **Northern Territory.**—During the financial year 1948–49 two advances totalling £976 were made and in 1949–50 one advance for £300 was made. The total amount advanced to 30th June, 1950, was approximately £26,970. At 30th June, 1950 the balance outstanding from 10 settlers, including interest, was £1,051.

9. **Summary of Advances.**—The following table is a summary for each State (except Western Australia) and the Northern Territory to the 30th June, 1950. The particulars, so far as they are available, represent the total sums advanced to settlers, including amounts spent by the various Governments in the purchase and improvement of estates disposed of by closer and soldier land settlement, while the amounts outstanding reveal the present indebtedness of settlers to the Governments, including arrears of principal and interest but excluding amounts written off debts and adjustments for land revaluations. Particulars of Loans (Agricultural Occupations) under the Commonwealth Re-establishment and Employment Act 1945 provided from Commonwealth funds are included for each State.

(a) Includes expenditure on acquisition, development and improvement of land for war service land settlement (*see* p. 124). (b) Incomplete. (c) Number of accounts.

§ 11. Alienation and Occupation of Crown Lands.

1. **General.**—The figures shown in the previous parts of this chapter show separately the areas alienated, in process of alienation, or occupied under various tenures. The following tables set out the position in regard to the tenure of land in each State, in the Northern Territory, and in the Australian Capital Territory during the latest year for which information is available—1950 in all cases. A summary for each State and Territory and for Australia as a whole is also supplied. Particulars for each year from 1930 to 1949 appear in *Primary Industries Bulletin* No. 44, page 7. The area occupied includes roads, permanent reserves, forests, etc. In some cases, lands which are permanently reserved from alienation are occupied under leases and licences, and have been included therein. Lands occupied under leases or licences for pastoral purposes are frequently held on short tenures only, and could thus be made available for settlement practically whenever required.

2. **New South Wales.**—The total area of New South Wales is 198,037,120 acres, of which 25.8 per cent. had been alienated at 30th June, 1950, 7.4 per cent. was in process of alienation, 58.8 per cent. was held under leases and licences; and the remaining 8.0 per cent. was unoccupied or held by the Crown.

The following table shows particulars as at 30th June, 1950 :—

ALIENATION AND OCCUPATION OF CROWN LANDS : NEW SOUTH WALES, 30th JUNE, 1950.

(Acres.)

Particulars.	Area.	Particulars.	Area.
1. *Alienated.*		3. *Held under Leases and Licences.*	
Granted and sold prior to 1862 ..	7,146,579	Homestead selections and grants ..	1,652,343
Sold by auction and other sales, 1862 to date	15,316,955	Alienable leases, long-term and perpetual	26,847,939
Conditionally sold, 1862 to date	32,954,036	Long-term leases with limited right of alienation	1,333,544
Granted under Volunteer Land Regulations, 1867 to date ..	172,198	Other long-term leases	77,349,681
Granted for public and religious purposes	265,873	Short-term leases and temporary tenures	7,032,647
		Forest leases	2,127,599
	55,855,641	Mining and auriferous leases (a) (b)	197,804
Less lands resumed or reverted to Crown	4,804,307	Total	116,541,557
Total	51,051,334		
2. *In Process of Alienation.*		4. *Unoccupied*—Particulars of Lord Howe Island not being available, the area, 3,220 acres, is included under unoccupied (Approximate)	15,779,581
Conditional purchases	12,599,238		
Closer settlement purchases ..	1,699,190		
Soldiers' group purchases ..	170,953		
Other forms of sale	195,267		
Total	14,664,648	5. *Total Area of State*	198,037,120

(a) At 31st December, 1949. (b) Excludes lands held by virtue of miners' rights and business licences; also lease areas applied for, and in occupation, under the Mining Act 1906, but not yet confirmed.

3. **Victoria.**—The total area of Victoria is 56,245,760 acres, of which 53.4 per cent. had been alienated up to the end of 1950; 4.9 per cent. was in process of alienation under deferred payments and closer settlement schemes; 17.4 per cent. was occupied under leases and licences; and 24.3 per cent. was unoccupied or held by the Crown.

The following table shows the distribution :—

ALIENATION AND OCCUPATION OF CROWN LANDS : VICTORIA, 31st DECEMBER, 1950.

(Acres.)

Particulars.	Area.	Particulars.	Area.
1. *Alienated*	30,004,888	3. *Leases and Licences held—*	
		Under Lands Department—	
		Perpetual Leases ..	78,862
		Agricultural College Leases	53,957
		Other Leases and Licences	19,910
2. *In Process of Alienation—*		Temporary (Yearly) Grazing Licences	8,555,410
Exclusive of Mallee and Closer Settlement Lands	337,505	Under Mines Department(*a*) ..	1,095,637
Mallee Lands (exclusive of Closer Settlement Lands) ..	1,888,881	Total	9,803,776
Closer Settlement Lands ..	532,964		
Village Settlement	33	4. *Occupied by the Crown or Unoccupied*	13,677,713
Total	2,759,383	5. *Total Area of State*	56,245,760

(*a*) Includes State Coal Mine area, 7,575 acres and State Electricity Commission area, 2,800 acres.

4. **Queensland.**—The total area of this State is 429,120,000 acres, of which, on 31st December, 1950, 5.5 per cent. was alienated ; 1.0 per cent. was in process of alienation ; and 83.7 per cent. was occupied under leases and licences. The remainder, 9.8 per cent., was either unoccupied or held as reserves or for roads.

The distribution is shown in the following table :—

ALIENATION AND OCCUPATION OF CROWN LANDS : QUEENSLAND, 31st DECEMBER, 1950.

(Acres.)

Particulars.	Area.	Particulars.	Area.
1. *Alienated—*		3. *Occupied under Leases and Licences—*	
By Purchase	23,391,178	Pastoral Leases	242,637,520
Without Payment	92,116	Occupation Licences ..	20,257,200
		Grazing Selections and Settlement Farm Leases ..	85,662,684
		Leases—Special Purposes ..	*a* 1,583,247
		Mining Leases	481,105
		Perpetual Leases Selections and Perpetual Lease Prickly Pear Selections	6,549,519
		Auction Perpetual Leases, etc.	(*b*) 513,514
		Forest Grazing Leases (of Reserves)	1,736,580
		Total	359,421,369
Total	23,483,294	4. *Reserves (net, not leased), Surveyed Roads and Surveyed Stock Routes*	22,246,044
		5. *Unoccupied*	19,699,040
2. *In Process of Alienation* ..	4,270,253	6. *Total Area of State*	429,120,000

(*a*) Special leases of Crown Land, 520,738 acres ; special leases of reserves, 1,062,500 acres.
(*b*) Includes 481,157 acres over which perpetual country leases were granted to Queensland-British Food Corporation.

5. **South Australia.**—The area of South Australia is 243,244,800 acres and at 30th June, 1950, 5.6 per cent. was alienated ; 0.3 per cent. in process of alienation ; 71.3 per cent. occupied under leases and licences ; and 22.8 per cent. occupied by the Crown or unoccupied.

The following table shows the distribution :—

ALIENATION AND OCCUPATION OF CROWN LANDS : SOUTH AUSTRALIA, 30th JUNE, 1950.

(Acres.)

Particulars.	Area.	Particulars.	Area.
1. *Alienated*—		3. *Held under Lease and Licence*—	
Sold	13,554,544	Perpetual Leases, including Irrigation Leases	18,440,496
Granted for Public Purposes	135,363	Pastoral Leases	115,672,014
		Other Leases and Licences	2,677,817
		Mining Leases and Licences	36,672,566
Total	13,689,907	Total	173,462,893
		4. *Area Unoccupied* (*a*)	55,509,385
2. *In Process of Alienation*	582,615	5. *Total Area of State*	243,244,800

(*a*) Includes surveyed roads, railways and other reserves, salt water lakes, lagoons, and fresh water lakes.

6. Western Australia.—The total area of Western Australia is 624,588,800 acres, of which, at 30th June, 1950, 3.4 per cent. was alienated ; 1.8 per cent. was in process of alienation ; and 36.2 per cent. was occupied under leases and licences issued either by the Lands, Mines or Forests Departments. The balance of 58.6 per cent. was unoccupied.

The following table shows the distribution :—

ALIENATION AND OCCUPATION OF CROWN LANDS : WESTERN AUSTRALIA, 30th JUNE, 1950.

(Acres.)

Particulars.	Area.	Particulars.	Area.
1. *Alienated*	21,263,085	3. *Leases and Licences in Force*—	
		(i) Issued by Lands Department—	
2. *In Process of Alienation*—		Pastoral Leases	219,200,060
Midland Railway Concessions	54,800	Special Leases	2,191,236
Free Homestead Farms	433,645	Leases of Reserves	569,204
Conditional Purchases	6,506,783	Residential Lots	4,776
Selections under the Agricultural Lands Purchase Act	439,340	Perpetual Leases	523,801
Grazing Leases	4,075,719	(ii) Issued by Mines Department—	
Town and Suburban Lots	3,291	Gold-mining Leases	26,447
Crown Grants of Reserves	953	Mineral Leases	41,212
		Miners' Homestead Leases	30,209
		(iii) Issued by Forests Department—	
		Timber Permits	3,418,217
		Total	226,005,162
		4. *Area Unoccupied* (*a*)	365,806,022
Total	11,514,531	5. *Total Area of State*	624,588,800

(*a*) Includes reservations for roads and various public purposes, 51,808,817 acres.

7. **Tasmania.**—The total area of Tasmania is 16,778,000 acres, of which, at 30th June, 1950, 36.6 per cent. had been alienated; 2.2 per cent. was in process of alienation; 16.9 per cent. was occupied under leases and licences for either pastoral, agricultural, timber, or mining purposes, or for closer or soldier settlement; while the remainder (44.3 per cent.) was unoccupied or reserved by the Crown.

The following table shows the distribution :—

ALIENATION AND OCCUPATION OF CROWN LANDS : TASMANIA, 30th JUNE, 1950.

(Acres.)

Particulars.	Area.
1. *Alienated*	6,143,313
2. *In Process of Alienation* ..	365,096
3. *Leases and Licences*—	
(i) Issued by Lands Department—	
Islands	167,783
Ordinary Leased Land ..	1,989,565
Land Leased for Timber	448,128
Closer Settlement ..	43,813
Soldier Settlement ..	134,296
Short-Term Leases ..	15,014
(ii) Issued by Mines Department	(a) 30,462
Total	2,829,061
4. *Area Occupied by the Crown or Unoccupied* (b)	7,440,530
5. *Total Area of State*	16,778,000

(a) At 31st December, 1950. (b) Includes reservations for roads and various other public purposes, 4,016,430 acres, and lands occupied by Commonwealth or State Departments, 21,769 acres.

8. **Northern Territory.**—The area of the Northern Territory is 335,116,800 acres, of which, at 30th June, 1950, only 0.1 per cent. was alienated; 48.5 per cent. was held under leases and licences; 13.6 per cent. was reserved for aboriginal, defence and public requirements; and the remaining 37.8 per cent. was unoccupied and unreserved.

The following shows the mode of occupancy of areas at 30th June, 1950 :—

ALIENATION AND OCCUPATION OF CROWN LANDS : NORTHERN TERRITORY, 30th JUNE, 1950.

(Acres.)

Particulars.	Area.
1. *Alienated*	455,040
2. *Leased*—	
Pastoral leases	122,815,360
Other leases, licences and mission stations	39,745,280
Total	162,560,640
3. *Reserved*—	
Aboriginal, defence and public requirements ..	45,454,720
4. *Unoccupied and Unreserved*	126,646,400
5. *Total Area*	335,116,800

9. **Australian Capital Territory.**—Alienated land of the Territory (excluding the Jervis Bay area) at the end of 1950 comprised 10.9 per cent. of the total area, land in process of alienation 7.0 per cent., land held under lease and licence 54.5 per cent., land otherwise occupied, including city tenures 11.4 per cent. and unoccupied 16.2 per cent.

The following table shows particulars of land areas in the Australian Capital Territory (excluding the Jervis Bay area) at the end of 1950:—

ALIENATION AND OCCUPATION OF CROWN LANDS: AUSTRALIAN CAPITAL TERRITORY (a), 31st DECEMBER, 1950.

(Acres.)

Particulars.	Area.
1. *Alienated*	63,635
2. *In Process of Alienation*	41,053
3. *Leased, etc.*—	
Grazing, agriculture, etc., leases	310,695
Grazing licences	7,174
Total	317,869
4. *Otherwise Occupied* (b)	66,115
5. *Unoccupied*	94,128
6. *Total Area* (a)	582,800

(a) Excludes the Jervis Bay area of 18,000 acres—12,788 acres leased and 5,212 acres otherwise occupied—making a grand total of 600,800 acres. (b) Includes city area tenures.

10. **Summary.**—The following table provides a summary for each State and Territory, and for Australia as a whole, of the alienation and occupation of Crown lands for 1949 and 1950:—

ALIENATION AND OCCUPATION OF CROWN LANDS.

State or Territory.	Private Lands.				Crown Lands.				Total Area.

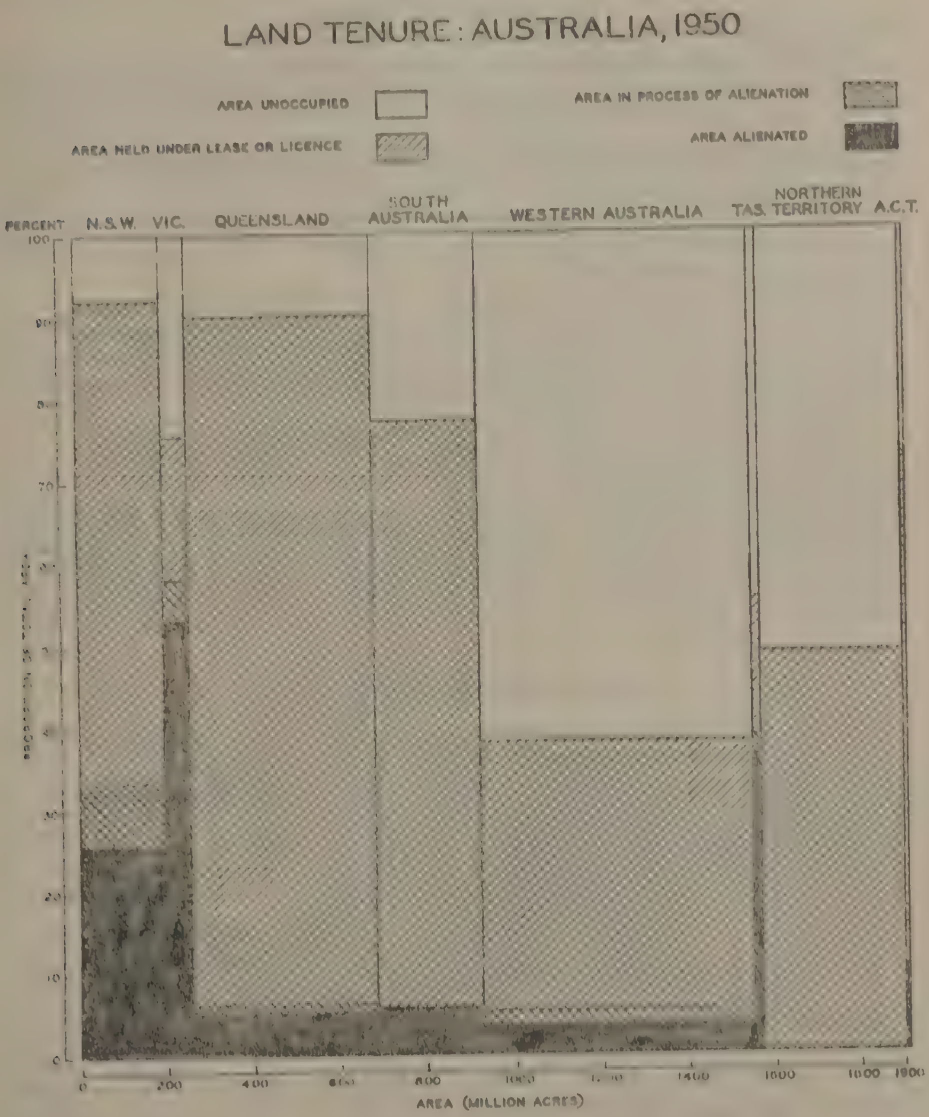
(a) At 30th June. (b) At 31st December.

11. **Diagram showing Condition of Public Estate.**—The following diagram shows the condition of the public estate during the year 1950. The square itself represents the total area of Australia, while the relative areas of individual States are shown by the vertical rectangles. The areas alienated from the State; those in process of alienation under various systems of deferred payments; and the areas held under leases or licences are indicated by the differently shaded areas as described in the reference given above the diagram, and the areas unoccupied are left unshaded.



LAND TENURE: AUSTRALIA, 1950

CHAPTER V.

TRANSPORT AND COMMUNICATION.

A. SHIPPING.

§ 1. System of Record.

In the system of recording statistics of oversea shipping, Australia is considered as a unit, and, therefore, only one entry and one clearance is counted for each voyage, without regard to the number of States visited (*see* also Section 5 following, paragraph 1.)

On the arrival at, or departure from, a port in Australia, whether from or for an oversea country or from another port in Australia, the master or agent must "enter" the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship, passengers and cargo. At the end of each month the information so obtained is forwarded to this Bureau. This arrangement has been in operation since 1st July, 1924.

The volume of the vessel, as distinct from the cargo it carries, is recorded in net tons, i.e., the gross tonnage or internal cubical capacity less certain deductions on account of crew spaces, engine room, water ballast and other spaces not used for passengers or cargo. It is thus a rough measure of the capacity of the vessel for cargo or passengers. The unit of measurement is a ton of 100 cubic feet.

Cargo is recorded in tons weight or in tons measurement (40 cubic feet).

From 1st July, 1914 the Trade and Shipping of Australia have been recorded for the fiscal years ending 30th June.

Particulars of vessels exclusively engaged in transporting troops and war materials during the 1939–45 War years are excluded from the following tables of "oversea" and "interstate" shipping movement which, therefore, relate primarily to vessels engaged in normal trade (i.e., carrying part or full cargo for civil purposes), and are strictly comparable with pre-war figures.

§ 2. Oversea Shipping.

1. Total Movement.—The following table shows the number of entrances of oversea steam and motor vessels and sailing vessels (including those with auxiliary power) into Australian ports, and the aggregate net tonnage, during each of the years 1938–39 and 1941–42 to 1949–50:—

OVERSEA SHIPPING: ENTRANCES OF VESSELS DIRECT, AUSTRALIA.

Year.	Steam and Motor.		Sailing.		Total.	
	Number.	Net Tons ('000).	Number.	Net Tons ('000).	Number.	Net Tons. ('000).
1938–39	1,725	6,684	151	27	1,876	6,711
1941–42	1,248	5,166	28	8	1,276	5,174
1942–43	943	3,820	13	4	956	3,824
1943–44	1,085	4,482	9	2	1,094	4,484
1944–45	1,051	4,480	8	4	1,059	4,484
1945–46	1,140	5,260	6	3	1,146	5,263
1946–47	1,187	5,183	15	3	1,202	5,186
1947–48	1,448	6,075	22	8	1,470	6,083
1948–49	1,696	7,475	10	1	1,706	7,476
1949–50	1,931	8,715	11	1	1,942	8,716

The average tonnage per vessel entered has risen from 3,577 tons per vessel in 1938–39 to 4,488 tons in 1949–50.

Particulars of the total oversea movement of shipping for each year from 1822 to 1920–21 will be found in Official Year Book No. 15, p. 507, for each year from 1921–22 to 1930–31 in Official Year Book No. 25, p. 189, and for each of the years 1931–32 to 1937–38 in Official Year Book No. 34, p. 81.

2. **Total Oversea Shipping, States.**—The following table shows, for each State, the number of entrances and clearances of vessels direct from and to oversea countries, and the aggregate net tonnage, during the years 1948–49 and 1949–50 :—

OVERSEA SHIPPING : ENTRANCES AND CLEARANCES OF VESSELS, DIRECT, STATES.

State or Territory.	1948–49.				1949–50.			
	Entrances.		Clearances.		Entrances.		Clearances.

3. **Shipping Communication with various Countries.**—Records of the number and tonnage of vessels arriving from and departing to particular countries, as they are invariably made, may be misleading for the reason that the tonnage of a vessel can be recorded against one country only, notwithstanding that the same vessel on the same voyage may carry cargo or passengers to or from Australia from or to several countries. For instance, a mail steamer on a voyage from the United Kingdom to Australia, through the Suez Canal, may call at Marseilles, Genoa, Port Said, Aden and Colombo, yet can be credited only to the United Kingdom, the country where the voyage commenced, to the exclusion of all of the others from the records. Also a number of vessels touch at New Zealand ports on their voyages to and from the United States of America and Canada, but their tonnages are not included in the records of Australian shipping trade with New Zealand. Similarly, the record of shipping engaged in trade between Australia and the United Kingdom via South African ports does not show tonnage to and from South Africa, the whole of it being included in the figures for United Kingdom. In view of this defect, statistics relating to the direction of the shipping to and from Australia are restricted to the following tables in which countries situated on the main trade

routes are grouped together. This grouping into larger geographical divisions to some extent avoids the limitations referred to, except, as already pointed out, in the case of Africa and New Zealand.

OVERSEA SHIPPING : COUNTRY GROUPS FROM WHICH ENTERED OR TO WHICH CLEARED, AUSTRALIA.

(*a*) *See* explanation above.

4. **Nationality of Oversea Shipping.**—Due to war conditions, the proportion of shipping of British nationality progressively declined from 72.82 per cent. in 1938–39 to 43.40 per cent. in 1943–44. On the other hand, the proportion of United States of America shipping visiting Australia during the same period advanced from 2.61 per cent. in 1938–39 to 33.07 per cent. in 1943–44. Thereafter the trend was reversed, and in 1949–50 the proportion of British shipping entered was 69.54 per cent. and of American 5.35 per cent.

Particulars of the nationality of oversea shipping which entered Australia during the five years ended 30th June, 1950 and the year 1938–39 are given in the following table :—

OVERSEA SHIPPING : ENTRANCES ACCORDING TO NATIONALITY OF VESSELS, AUSTRALIA.

The Australian tonnage which entered Australia from overseas during the year 1949–50 represented 2.87 per cent. of the total tonnage entered and was confined mainly to the New Zealand and Pacific Island trade.

The proportion of oversea shipping tonnage which entered Australia in cargo ranged, in the years shown, between about 80 per cent. and 90 per cent., the lowest percentage being 79.37 in 1947-48 and the highest 91.46 in 1949-50. The proportion of shipping which cleared in cargo, however, has declined from 87.64 per cent. in 1938-39 to 71.68 per cent. in 1949-50, the trend over the period being generally downward.

§ 3. Shipping at Principal Ports.

1. **Total Shipping, Australia.**—The following table shows the total volume of shipping—oversea, interstate and coastwise—which entered the principal ports of Australia during the years 1946-47 to 1949-50 compared with 1938-39. Warships are excluded from the table.

§ 4. Vessels Built and Registered.

1. **Vessels Built.**—The following table shows the number and tonnage of vessels built in Australia during each of the calendar years 1938 and 1946 to 1950, so far as such information can be ascertained from the Shipping Registers of the various States. The Merchant Shipping Act, under which vessels are registered in Australia, does not, however, make it compulsory to register vessels under 15 tons burden if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be, and frequently are, registered at the request of the owners.

3. **World Shipping Tonnage.**—Previous issues of the Official Year Book have contained tables, compiled from *Lloyd's Register of Shipping*, showing the number and gross tonnages of steam, motor and sailing vessels owned by the various maritime countries of the world. The tables are not repeated in this issue, but the following information is derived from the same source. At 1st July, 1950, the total steamers, motor ships and sailing vessels of 100 gross tons and upwards throughout the world amounted to 31,732 with a gross tonnage of 85,302,000. Of these totals, steamers numbered 19,254 for 63,543,000 gross tons, motorships, 11,598 for 21,040,000 gross tons and sailing vessels and barges 880 for 719,000 gross tons. In addition, there were 2,158 oil tankers of 1,000 gross tons and upwards with a gross tonnage of 16,866,000. Australian steamers, motorships and sailing vessels, 355 for 541,000 gross tons, constituted 1.12 per cent. and 0.63 per cent. respectively of the total numbers and tonnage. There were no Australian oil tankers of 1,000 gross tons and upwards registered.

§ 5. Interstate Shipping.

1. **System of Record.**—*Interstate Shipping* comprises two elements: (*a*) Vessels engaged solely in interstate trade: and (*b*) Vessels trading between Australia and oversea countries and in the course of their voyage proceeding from one State to another. (It should be mentioned that these vessels, except under special circumstances, do not engage in interstate carrying.) No complexity enters into the record of those in category (*a*), but with regard to the method of recording the movements of the oversea vessels (*b*) some explanation is necessary. Each State desires that its shipping statistics (which are prepared in this Bureau) should show in full its shipping communication with oversea countries, but at the same time it is necessary to avoid any duplication in the statistics for Australia as a whole. In order to meet these dual requirements, a vessel arriving in any State from an oversea country—say United Kingdom—*via* another State, is recorded in the second State as from United Kingdom *via States*, thus distinguishing the movement from a *direct* oversea entry. Continuing the voyage, the vessel is again recorded for the statistics of the third State as from United Kingdom *via* other States. On an inward voyage the *clearance* from the first State to the second State is a *clearance* interstate, and is included with interstate tonnage in conformity with the pre-federation practice of the States, and to preserve the continuity of State statistics. Thus, movements of ships which are, from the standpoint of Australia as a whole, purely coastal movement, must for the individual States be recorded as "Oversea *via* other States" or "Interstate" according to the direction of the movement. The significance of the record of these movements will be more clearly seen from the following tabular presentation of the inward and outward voyages to and from Australia of a mail steamer which, it is presumed, reaches Fremantle (Western Australia) and then proceeds to the terminal port of the voyage—Sydney (New South Wales)—*via* South Australia and Victoria. From the terminal port the vessel will commence the outward voyage, and retrace its inward track.

ITINERARY OF AN OVERSEA VESSEL ON AUSTRALIAN COAST.

Particulars.	Recorded as—		
	For the State and for Australia.	For the States.	
Inward Voyage—			
Enters Fremantle from United Kingdom	Oversea direct		
Clears Fremantle for Adelaide	..	Interstate direct	
Enters Adelaide from United Kingdom *via* Fremantle	..	..	Oversea *via* States
Clears Adelaide for Melbourne	..	Interstate direct	
Enters Melbourne from United Kingdom *via* Adelaide	..	..	Oversea *via* States
Clears Melbourne for Sydney	..	Interstate direct	
Enters Sydney from United Kingdom *via* Melbourne	..	..	Oversea *via* States
Outward Voyage—			
Clears Sydney for United Kingdom *via* Melbourne	..	..	Oversea *via* States
Enters Melbourne from Sydney	..	Interstate direct

Enters Adelaide from Melbourne	..	Interstate direct	
Clears Adelaide for United Kingdom *via* Fremantle	..	..	Oversea *via* States
Enters Fremantle from Adelaide	..	Interstate direct	
Clears Fremantle for United Kingdom	Oversea direct		

From the method outlined above, the requirements for Australia and for the individual States are ascertained as follows. (*a*) The aggregate of all ships recorded for each State as "Oversea *direct*" gives the oversea shipping for Australia as a whole (*b*) the aggregate for all ships recorded in any State as "Oversea *direct*" plus those recorded as "Oversea *via States*" gives the total *oversea shipping* for that State; and (*c*) the aggregate for all ships recorded as "Oversea *via States*" may also be used, together with those recorded as "Interstate *direct*," to furnish figures showing the total interstate *movement* of shipping.

It should be remembered, however, that all oversea vessels do not follow the same itinerary as the vessel in the table above.

2. **Interstate Movement.**—(i) *Interstate direct.* The following table shows the number of entrances and the tonnage of vessels recorded into each State from any other State (including *oversea* vessels on interstate direct voyages) during each of the years 1945–46 to 1949–50 compared with the year 1938–39. The shipping of the Murray River, between the States of New South Wales, Victoria and South Australia, is excluded :—

INTERSTATE MOVEMENT OF SHIPPING : ENTRANCES OF VESSELS INTERSTATE DIRECT.

State or Territory.	1938–39.	1945–46.	1946–47.	1947–48.	1948–49.	1949–50.
			NUMBER.			
New South Wales	2,183	1,112	1,136	1,133	1,227	1,176
Victoria	2,243	1,104	1,209	1,224	1,288	1,329

South Australia	1,036	482	647	678	756	710
Western Australia ..	382	221	256	326	465	420
Tasmania	1,301	695	706	717	711	765
Northern Territory ..	39	6	14	16	15	27
Total	7,823	3,923	4,308	4,400	4,822	4,806
			NET TONS ('000).			
New South Wales	6,205	2,439	3,041	2,977	3,636	3,570
Victoria	4,751	1,815	2,568	2,690	3,067	3,245
Queensland	1,730	587	728	587	927	987
South Australia	3,322	1,247	1,871	1,963	2,578	2,687
Western Australia.. ..	2,019	1,045	1,165	1,395	2,164	2,167
Tasmania	1,770	674	739	772	668	746
Northern Territory ..	103	20	28	25	26	36
Total	19,900	7,827	10,140	10,409	13,066	13,438

From 1938–39 the total net tonnage of interstate shipping declined steadily each year up to 1942–43, when it represented only 38 per cent. of the total for the pre-war year. It remained practically unchanged during the next three years, but increased by over 29 per cent. in 1946–47. There was little change in 1947–48, the tonnage for that year being about 52 per cent. of the 1938–39 total. By 1949–50 the total had risen to 68 per cent. of the 1938–39 total.

(ii) *Oversea via States.* To ascertain the aggregate movement of shipping between the States, including the total interstate movements of oversea vessels, the figures in the following table which show the number of entrances and clearances of vessels to and from oversea countries via other Australian States and the aggregate tonnage, must be added to those in the preceding table :—

INTERSTATE MOVEMENT OF SHIPPING : ENTRANCES AND CLEARANCES OF VESSELS OVERSEA VIA OTHER AUSTRALIAN STATES.

State or Territory.	Entrances.		Clearances.		Total.	
	Number.	Net Tons ('000).	Number.	Net Tons ('000).	Number.	Net Tons ('000).

Oversea vessels moving interstate are with few exceptions not engaged in the active interstate trade of Australia, but are merely proceeding to the several States in continuation of their oversea voyages.

(iii) *Total, Australia.* The following table shows the total interstate movement of shipping, including oversea vessels travelling oversea via States and interstate direct, for each of the years 1938–39 and 1945–46 to 1949–50 :—

INTERSTATE MOVEMENT OF SHIPPING : TOTAL, AUSTRALIA.

Year.	Entrances.		Clearances.	
	Number.	Net Tons ('000).	Number.	Net Tons ('000).
1938–39	9,603	29,977	9,669	30,000

(*a*) Excluding purely day passenger accommodation. (*b*) Includes vessels under the control of the Australian Shipping Board.

§ 6. Shipping Cargo.

1. **Oversea and Interstate Cargo.**—(i) *Australia.* The table hereunder shows the aggregate tonnage of oversea cargo discharged and shipped and the tonnage of interstate cargo shipped in Australian ports for the years 1945–46 to 1949–50 compared with the year 1938–39. Cargo which was stated in cubic feet has been converted to tons measurement on the basis of 40 cubic feet to the ton.

SHIPPING CARGO MOVEMENT : AUSTRALIA.

(*a*) Includes Netherlands East Indies.

Owing to war conditions the percentage of cargo carried in British vessels decreased from 72.43 in 1938–39 to 41.37 in 1943–44, but increased to 77.51 in 1946–47. It has since declined, reaching 70.08 in 1949–50.

§ 7. Control of Shipping.

1. **War-time Control.**—An account of the action taken by the Commonwealth Government to control and regulate shipping throughout Australian waters during the 1939–45 War is given in Official Year Book No. 36, pp. 121–130.

2. **Post-war Control and Developments.**—On 1st January, 1946, the Shipping Co-ordination Regulations were substantially amended to provide for a consolidation, within an Australian Shipping Board, of the war-time shipping authorities, notably the Shipping Control Board, Commonwealth Government Ships Chartering Committee, Central Cargo Control Committee and the Salvage Board. In consequence, a contraction of war emergency shipping administration was effected, with a tapering off of war-time powers and controls being achieved. The Allied Consultative Shipping Council, the

British-American-Australian Shipping Sub-Committee, and the Port Equipment and Development Committee lapsed towards the end of 1945. The Allied Materials Handling Standing Committee continued, however, developing into the Commonwealth Handling Equipment Pool.

In March, 1947, legislation established a permanent Stevedoring Industry Commission to continue in peace-time the functions performed during the war by the Commission established under National Security legislation. In June, 1949, legislation was enacted to abolish the Stevedoring Industry Commission on which employers and employees were represented, and established in its place a Stevedoring Industry Board of three members, which attends to administrative matters formerly under the control of the Commission, such as the operation of labour bureaux at ports, payment of attendance money and provision of amenities, etc. The industrial functions which previously came within the province of the Commission are being dealt with by a single Judge of the Commonwealth Court of Conciliation and Arbitration.

The Maritime Industry Commission established during the war years under National Security legislation continues to function and consideration is being given to its establishment on a permanent basis.

As the immediate post-war years were marked by a continued shortage of coastal shipping, it was necessary not only to continue requisitioning of merchant shipping up to 18th August, 1947, but to supplement Australian coastal shipping with as many as 26 oversea chartered vessels obtained through the British Ministry of Transport. During these two post-war years, however, the majority of vessels operating under Defence Services Control were returned after refitting for commercial employment, and on 18th August, 1947, all requisitioned vessels, with a few exceptions, had been returned to shipowners.

In March, 1949, the Commonwealth Parliament passed the Shipping Act 1949 which was designed to establish the Australian Shipping Board on a permanent basis, to license shipbuilding, and to operate a Commonwealth Shipping Line on the Australian coast and later in oversea trades. The Act has not been proclaimed. In the meantime, the Commonwealth-owned vessels are being operated by the Australian Shipping Board under war-time regulations continued by the Defence (Transitional Provisions) Regulations.

As at 1st November, 1951, the Australian Shipping Board operated 35 vessels totalling 148,980 gross tons of which seven vessels totalling 47,030 gross tons were operated on time charter from private owners. The Government-owned tonnage, totalling 108,485 gross tons (of which four vessels totalling approximately 6,500 gross tons were on charter to other companies), comprised thirteen " A " or " River " class vessels of an average of 5,197 gross tons, two " B " class vessels of an average of 3,952 gross tons, nine " D " class vessels of an average of 2,334 gross tons, five " E " class vessels of an average of 584 gross tons plus three other vessels—*Nyora* of 1,209 gross tons, *Ransdorp* of 469 gross tons and *Tyalla* (formerly *Kefalonia*) of 7,327 gross tons. The *Tyalla* is still registered in the United Kingdom.

In the international sphere, ratification is still being awaited from 21 ship-owning nations of a Convention establishing an Inter-Governmental Maritime Consultative Organization within the framework of United Nations. The major objectives of this Organization are to provide machinery for co-operation among Governments with shipping engaged in international trade, and to encourage the removal by Governments of discriminatory action and unnecessary restrictions regarding such shipping.

This Organization is designed to replace the United Maritime Consultative Council which was established on a tentative basis after the expiry of the war-time United Maritime Authority and Combined Adjustment Board.

§ 8. Miscellaneous.

1. **Lighthouses.**—A list of the principal lighthouses on the coast of Australia, giving details of the location, number, colour, character, period, candle-power and visibility of each light so far as particulars were available was published in *Transport and Communication Bulletin* No. 14.

2. **Distances by Sea.**—The distances by sea between the ports of the capital cities of Australia and the most important ports in other countries which trade with Australia are shown in *Transport and Communication Bulletin* No. 41.

3. **Shipping Freight Rates.**—The *Quarterly Summary of Australian Statistics* shows a list of the ruling freight rates for general merchandise in respect of both oversea and interstate shipments. At 31st December, 1950, the rate for general merchandise from Australia to United Kingdom and Continent was 135s. od. per ton weight or measurement while the rates for wheat (bagged) and wool (greasy) were respectively 97s. 6d. per ton weight and 2.238d. less 7 per cent. per lb. These rates, which are expressed in sterling, are subject to an adjustment of 25½ per cent. when freight is prepaid in Australia.

4. **Depth of Water at Main Ports.**—A table, compiled from information supplied by the Director of Navigation, showing the depth of water available and tides at principal ports of Australia at 1st January, 1950, is included in *Transport and Communication Bulletin* No. 41.

5. **Shipping Casualties.**—Courts of Marine Inquiry are constituted by a Magistrate assisted by skilled assessors, and, when necessary, are held at the principal port in each State and at Launceston (Tasmania). Such courts have power to deal with the certificates of officers who are found at fault. Particulars of shipping casualties reported on or near the coast during the years 1946 to 1950 are shown in the table below. This information also was furnished by the Director of Navigation :—

TOTAL SHIPPING CASUALTIES AND LOSSES : AUSTRALIA.

Year.	Total Losses of Vessels.			Total Casualties to Vessels.		
	Number.	Net Tons.	Lives Lost.	Number.	Net Tons.	Lives Lost.
1946 ..	..	..	..	173	394,582	..
1947 ..	2	396	..	151	442,685	10
1948 ..	1	113	..	206	652,047	..
1949 ..	3	3,705	12	155	435,935	12
1950 ..	4	9,735	20	191	611,084	22

6. **Commonwealth Navigation and Shipping Legislation.**—An account in some detail of the Commonwealth navigation and shipping legislation is contained in Official Year Book No. 17 (pp. 1053–5). Later issues contained information on amendments relating to permits to engage in the coasting trade for ships other than those licensed for that trade, to the provision for the carriage of wireless equipment, and to the giving of effect to the provisions of certain maritime conferences, notably those dealing with the safety of life at sea and load lines.

7. **Ports and Harbours.**—A report in two volumes on "Transport in Australia," with special reference to Ports and Harbours facilities, was submitted to the Commonwealth Government by Sir George Buchanan and published as two Parliamentary Papers (No. 86 printed 14th March, 1927, and No. 108 printed 9th May, 1927.)

B. RAILWAYS.

§ 1. General.

1. **Introduction.**—The policy of Government ownership and control of railways has been adopted in each State and at 30th June, 1950 only 647 route-miles of the 27,626 open for general traffic in Australia were privately owned, while 24,778 route-miles were owned by the State Governments and 2,201 route-miles by the Commonwealth Government. In the following tables details of the four lines owned by the Commonwealth are grouped and shown with the totals for the various State-owned systems. Separate particulars for each Commonwealth line are shown in *Transport and Communication Bulletin* No. 41, issued by this Bureau, and also in Official Year Book No. 31, p. 125, et seq.

2. **Railway Communication in Australia.**—An account of the progress of railway construction in Australia since the opening of the first line in 1854 will be found in Official Year Book No. 6, p. 681. Further information regarding railway communication in Australia is given in Official Year Book No. 22, pp. 259–61.

3. **Standardization of Railway Gauges.**—A summary of the report and recommendations relating to the standardization of Australia's railway gauges on the basis of a 4 ft. 8½ in. gauge, made in March, 1945 at the request of the Commonwealth Government by Sir Harold Clapp, Director-General of Land Transport, Commonwealth Department

of Transport, is contained in Official Year Book No. 37, together with an outline of the agreement between the Commonwealth Government and the States of New South Wales, Victoria and South Australia regarding the standardization of railway gauges in their respective States (Chapter V.—Transport and Communication, pp. 146–9). The agreement, which was signed in 1946, was ratified by the Governments of the Commonwealth, of Victoria and of South Australia, but not by the New South Wales Government. After some time had elapsed and New South Wales had failed to ratify the agreement, the Commonwealth Government decided to enter into a separate agreement with South Australia, and the necessary legislation was enacted in 1949 by each Government concerned. Action was also taken to invite the Victorian Government to discuss the subject of a separate agreement, but to date there has been no legislative action. The Commonwealth–South Australia Agreement provides for the same standardization work to be carried out in South Australia as would have been carried out had New South Wales ratified the original Commonwealth—Three States Agreement, and that over a period of years the Commonwealth should contribute 70 per cent. and South Australia be responsible for the remaining 30 per cent. of the estimated cost of £24,000,000.

4. **Government Railways. Lines under Construction and Lines Authorized, 1948–49 and 1949–50.**—(i) *Lines under Construction.* In spite of the great extensions of State railways since 1875 and also the construction of various railways by the Commonwealth Government, there are still, in some States, immense areas of country which are as yet practically undeveloped, and in which little in the nature of permanent settlement has been accomplished. The general policy of the States was to extend the existing lines inland in the form of light railways as settlement increased, and while it is true that lines which were not likely to be commercially successful in the immediate future have been constructed from time to time for the purpose of encouraging settlement, the general principle that the railways should be self-supporting was kept in view.

(*a*) *New South Wales.* Construction work proceeded during 1948–49 and 1949–50 on the Sandy Hollow to Maryvale line (approximately 147 miles). In April, 1950, work on this line was temporarily suspended and the employees, as well as plant and portable buildings, were transferred to work on other lines. Work had not been resumed by the end of the year. Further progress was made during 1948–49 and 1949–50 with the connecting link between St. James and Wynyard stations of the underground railway of Sydney. Surveys and boring operations were continued during 1948–49 and 1949–50 in connexion with the eastern and southern suburban electric railways, but boring operations were suspended on the south-eastern suburbs railway. Trial surveys were completed during 1948–49 on the proposed Inverell-Iluka railway line. On 3rd April, 1950 an Act authorizing the construction of a railway line from Glen Innes to Inverell was assented to by the Governor. The permanent survey of the line has been started from both terminal stations. A trial survey was made and estimates were prepared during 1949 for the proposed Thirlmere to Burragorang railway line. During 1949–50 the survey was commenced and completed for ten miles of the total length of approximately thirteen miles.

(*b*) *Other.* At 30th June, 1950 no construction work on new lines was in progress in Victoria, Queensland, Western Australia, Tasmania, nor for the Commonwealth Government. In South Australia construction of the Kowulka branch railway (5 miles) was authorized in 1948; it was under construction during 1948–49 and completed in 1949–50.

(ii) *Lines Authorized for Construction.* In the States of New South Wales, Victoria, Queensland, South Australia and Western Australia at the 30th June, 1950 there were certain lines authorized for construction but not commenced. These lines were authorized many years ago, some as early as 1910 and none later than 1933. Particulars may be found in Official Year Book No. 36, p. 133. There have been no later authorizations.

5. **Grafton-South Brisbane (Uniform Gauge) Line.**—For particulars of the construction of the Grafton–South Brisbane (Uniform Gauge) Line completed in 1930, which constituted the first step towards uniform gauge railway communication between the capitals of the mainland States, *see* Official Year Book No. 31, p. 122 and later issues.

6. **Mileage Open for Traffic, all Lines.**—(i) *General.* Almost all the railways open for general traffic in Australia are owned and controlled by the State or Commonwealth Governments. Private lines have been laid down for the purpose of opening up forest lands, mining districts or sugar areas. These lines are not generally used for the

conveyance of passengers or the public conveyance of goods, and it should be understood that the private lines included in the tables below form only a small part of all private railways in Australia.

The following table shows the route-mileage of Commonwealth, State and private lines open for general traffic in each State at different periods since the inauguration of railways in Australia in 1854 up to the year 1949–50 :—

(a) Incomplete. Full particulars not available for all items. (b) Excludes amounts paid for Commissioner's salary (£3,000), Government contributions under the Superannuation Act (£27,979) and proportion of salaries of Auditor-General's staff (£1,600). (c) Excludes construction staff. (d) Employees at 31st December, 1950. (e) See § 2. para. 1 below.

Details shown above relating to capital cost do not include particulars of amounts totalling about £61.5 million written off during the period 1st July, 1927 to 1st July, 1937.

§ 2. Government Railways.

1. **Summary, 1949–50.**—The following table shows particulars of the mileage open, the capital cost, passengers and goods carried, and train miles run, for Government railways in Australia during 1949–50. The cost of construction, etc. shown for Australia (£374,184,000) does not represent the total expenditure on construction and equipment, as legislation was introduced in Victoria, Queensland, South Australia and Tasmania for the purpose of reducing the capital indebtedness of the railways. For this and other reasons the composition of this figure differs as between States and the matter is being reviewed for purposes of attaining a greater degree of uniformity. Figures relating to capital cost do not include charges for works in the course of construction, surveys, and discounts and flotation charges on loans allocated to the railways.

GOVERNMENT RAILWAYS : SUMMARY, 1949–50.

System.	Mileage Open.(a)		Total Cost of Construction and Equipment. (a)	Passengers Carried.	Goods and Live-stock Carried.	Train Miles Run.
	Route.	Track.				
	Miles.	Miles.	£'000.	'000.	'000 tons.	'000.
New South Wales	6,113	8,390	181,724	258,183	16,997	41,369
Victoria ..	4,687	6,071	58,801	182,101	9,125	17,550
Queensland ..	6,560	7,474	43,892	32,366	6,943	17,674
South Australia ..	2,553	3,150	33,267	17,385	3,692	6,356

Australia ..	26,979	32,863	(b)374,184	504,648	40,919	93,432

(a) At 30th June, 1950. (b) Includes Commonwealth proportion Grafton–South Brisbane Line, £2,446,972.

The reductions made in the capital indebtedness referred to above were :—Victoria, £25,684,423 ; Queensland, £28,000,000 ; South Australia, £3,088,986 ; and Tasmania, £4,738,000. After adding these figures to the capital costs of the respective States and adjusting the route-mileage and capital cost for New South Wales and Queensland to exclude portions of the Grafton South Brisbane Line, the cost per route-mile open in each State and for the Commonwealth railways is as follows :—New South Wales, £30,040 ; Victoria, £18,025 ; Queensland, £10,995 ; South Australia, £14,241 ; Western Australia, £7,414 ; Tasmania, £13,271 ; Commonwealth, £8,092 ; and for all Government railways in Australia, £10,101. The lowest average cost is in Western Australia, and the highest is in New South Wales. Very few engineering difficulties were encountered in Western Australia, and the fact that contractors were permitted to carry traffic during the term of their contract considerably reduced expenditure. The cost per head of population on the adjusted basis above for each State and for Australia are as follows :—New South Wales, £56.34 ; Victoria, £38.35 ; Queensland, £60.73 ; South Australia, £51.92 ; Western Australia, £56.50 ; Tasmania, £29.12 ; all Government railways in Australia, £53.23.

2. **Expenditure on Construction and Equipment from Revenue and from Loans.**—The following table shows particulars of the expenditure on construction and equipment from revenue and from loans :—

GOVERNMENT RAILWAYS : CAPITAL EXPENDITURE FROM REVENUE AND FROM LOANS.

(£'000.)

System.	Expenditure from Revenue to 30th June, 1950.	Net Loan Expenditure.			
		1938–39.	1948–49.	1949–50.	Total to 30th June, 1950.

Australia ..	12,270	3,337	12,171	18,488	(e) 438,636

(a) From proceeds of sale of State lands, Consolidated Revenue Fund, National Recovery Loan, etc. (b) Gross loan expenditure. (c) Includes expenditure on railways provided in Unemployment Relief work programmes. (d) Includes losses funded. (e) Includes £2,444,621 Commonwealth loan expenditure on Grafton–South Brisbane Line.

3. **Gross Revenue.**—(i) *General.* The gross revenue, the revenue per average mile worked and the revenue per train-mile run during the years 1945–46 to 1949–50 in comparison with 1938–39 are shown in the following table. In 1949–50 the gross revenue excludes Government grants of £3,000,000 to New South Wales for losses due to the coal strike in July–August, 1949 ; £1,683,697 to Victoria to limit interest payments to one per cent. on loan liability; and £600,000, £1,600,000 and £800,000 to South Australia for losses due to the coal strike, contribution to increased working costs, and contribution to debt charges respectively.

(*a*) Includes £800,000 per annum contribution from consolidated revenue towards losses on working of country developmental lines. (*b*) Includes the following recoups by the Treasury—1938–39, £10,000 guarantee in respect of losses on certain lines ; and in 1945–46, 1946–47, 1947–48, 1948–49 and 1949–50, £147,500, £49,500, £18,100, £15,000 and £12,000 respectively, being recoups of losses resulting from reduction in suburban fares, etc., and Defence Force fare concessions.

(ii) *Coaching, Goods and Miscellaneous Receipts.* (*a*) *Totals.* The gross revenue is composed of (*a*) receipts from coaching traffic, including the carriage of mails, horses, parcels, etc., by passenger trains ; (*b*) receipts from the carriage of goods and live stock ; and (*c*) rents and miscellaneous items. The following table shows the gross revenue for 1938–39 and 1945–46 to 1949–50 classified according to the three chief sources of receipts. Some Government grants have been excluded from miscellaneous receipts for 1949–50. The amounts of these grants are shown in the preceding paragraph. The total of the three items specified has already been stated above.

4. **Working Expenses.**—(i) *General.* In order to make an adequate comparison of the working expenses, allowance should be made for the variation of gauges and of physical and traffic conditions, not only on the different systems of the State and Commonwealth railways, but also on different portions of the same systems. When traffic is light, the proportion of working expenses to revenue is naturally greater than when traffic is heavy; and this is especially true in Australia, where ton-mile rates are in many cases based on a tapering principle—i.e., a lower rate per ton-mile is charged upon merchandise from remote interior districts—and where on many of the lines there is but little back loading.

Working expenses, wherever represented in division B. Railways of this chapter, excludes interest, sinking fund, exchange and certain other payments (*see* paras. 6 and 7 following).

During the war years large amounts were set aside by the Railways as reserves, mainly to provide for depreciation and accrued leave, to be expended as circumstances permit. Particulars of these amounts, which were included in Working Expenses and which in the year 1942–43 aggregated nearly £10,000,000 and over the whole period about £30,000,000, are given in previous issues of the Year Book.

The following table shows the total working expenses, the proportion thereof to gross revenue, and the expenditure per average mile worked and per train-mile run for the years 1945–46 to 1949–50 in comparison with 1938–39 :—

In the graphs accompanying this Chapter the gross and net revenue and working expenses are shown from 1870 to 1950.

6. **Interest.**—The interest payments on expenditure from loans for the construction and equipment of the Government railways in Australia during the years 1938–39 and 1945–46 to 1949–50 were as follows :—

GOVERNMENT RAILWAYS : INTEREST PAYMENTS ON RAILWAY LOAN EXPENDITURE.

(£'000.)

Year.	N.S.W.	Victoria. (*a*)	Q'land. (*a*)	S. Aust. (*a*)	W. Aust.	Tasmania. (*a*)	C'wealth.	Australia. (*b*)
1938–39 ..	5,360	1,860	1,642	1,075	1,001	80	395	11,540
1945–46 ..	5,240	1,902	1,480	1,054	1,040	97	341	11,265
1946–47 ..	5,126	1,840	1,440	1,013	1,033	100	338	10,972
1947–48 ..	5,145	1,862	1,431	1,001	1,046	112	317	10,996
1948–49 ..	5,038	1,881	1,419	1,006	1,063	113	310	10,913
1949–50 ..	5,350	1,935	1,453	1,023	1,093	121	298	11,355

(*a*) Capital indebtedness reduced by legislation in these four States. *See* para. 1, *ante*. (*b*) Includes Commonwealth share of interest, Uniform Gauge Railway (1949–50, £82,375).

The interest payable on the cost of construction and equipment as shown in the table in para. 1, *ante*, after the expenditure from Consolidated Revenue (£12,270,000 to June, 1950) for that purpose had been deducted, was at the rate of 3.1 per cent. in 1949–50.

Exchange on interest payments abroad and certain other charges are not included in the table above. These items are not charged against the railways in Queensland and Western Australia and have been excluded for the purposes of comparison. In the remaining States the amounts paid on account of exchange were :—in 1948–49—New South Wales, £548,000 ; Victoria, £153,321 ; South Australia, £87,192 ; and Tasmania, £7,831 ; and in 1949–50—New South Wales, £603,000 ; Victoria, £157,444 ; South Australia, £81,646 ; and Tasmania, £5,804.

7. **Profit or Loss.**—The following table shows, for the years 1938–39 and 1945–46 to 1949–50, the actual profit or loss after deducting working expenses and interest, but excluding exchange, from the gross revenue :—

GOVERNMENT RAILWAYS : PROFIT OR LOSS AFTER PAYMENT OF WORKING EXPENSES AND INTEREST.

(£'000.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth. (*a*)	Australia.
1938–39 ..	43	− 636	− 37	− 886	− 313	− 272	− 490	−2,718
1945–46 ..	1,939	242	11	− 1,291	− 960	− 378	− 277	− 825

1949–50 ..	−3,709	−1,551	−1,322	− 2,951	− 2,188	− 800	− 401	−13,005

(*a*) *See* § 1., para. 9, note (*b*) *ante*.

8. **Traffic.**—(i) *General.* Reference has already been made to the difference in the traffic conditions on many of the lines. These conditions differ not only in the several State and Commonwealth systems, but also on different lines in the same system, and apply to both passenger and goods traffic. By far the greater part of the population of Australia is confined to a fringe of country near the coast, more especially in the eastern

and southern districts. A large proportion of the railway traffic between the chief centres of population is therefore carried over lines in the neighbourhood of the coast, and is thus, in some cases, open to seaborne competition. In recent years competition from road and air transport has become an important factor.

The following table shows particulars for the years 1945–46 to 1949–50 in comparison with 1938–39 :—

GOVERNMENT RAILWAYS : TRAFFIC.

(a) In Victoria and Queensland railway construction work is not under the control of the Railway Commissioners.

§ 3. Private Railways.

1. **General.**—The bulk of the private railways in Australia has been laid down for the purpose of hauling timber, firewood, sugar-cane, coal and other minerals, and it is not generally used for the conveyance of passengers or for public goods traffic. In many cases the lines are practically unballasted and easily removable.

The railways referred to in this section include only lines open to the public for general passenger and goods traffic. Complete particulars of lines used for special purposes only are not available.

2. **Lines Open for General Traffic, 1949–50.**—The following statement is a summary of the operations of private railways open for general traffic during 1949–50 :—

PRIVATE RAILWAYS : SUMMARY OF OPERATIONS, 1949–50.

State.	Route-Miles Open.	Capital Cost.	Gross Revenue.	Working Expenses.	Train-Miles Run.	Passenger-Journeys.	Goods, etc., Carried.	Employees.

(a) Not available.

The table above refers only to private railways open to the public for general passenger and goods traffic. Particulars of the railways included are not complete in many instances and the totals must therefore be regarded as approximate only. In New South Wales and Queensland several lines, although owned by private companies, are operated by the Government Railway Departments, and Government rolling stock is used thereon, while some of the companies are not able to supply particulars of the capital cost, revenue and working expenses of the lines which they operate. In some cases the figures relating to tonnage of goods, etc., include particulars of coal, ores, timber, sugar-cane, etc., carried for private purposes, as details relating to goods carried for the general public are not recorded separately.

C. TRAMWAYS.

1. Systems in Operation.—(i) *General.* Tramway systems are in operation in all the capital cities and in a number of the larger towns of Australia.

Since 1st April, 1947, when the last private company system to operate (the Kalgoorlie-Boulder electric tramway system in Western Australia) was taken over by the Eastern Goldfields Transport Board, all systems have been operated by governmental or municipal authorities. From 1941–42 all systems have been electric.

In many parts of Australia private lines used for special purposes in connexion with the timber, mining, sugar, or other industries are often called tramways, but they are more properly railways (*see* above), and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

In recent years there has been considerable replacement of tramway services by omnibus services, one of the more recent of importance affecting the Newcastle system in New South Wales where the change was made on 11th June, 1950. Information on omnibus services is contained in division D. of this chapter.

(ii) *Total Mileage Open and Classification of Lines.* The following tables show for each State the total mileage of tramway lines open for general passenger traffic at 30th June, 1950, classified (*a*) according to the controlling authority; (*b*) according to gauge :—

ELECTRIC TRAMWAYS : ROUTE-MILEAGE OPEN AT 30th JUNE, 1950.

D. MOTOR OMNIBUS SERVICES.

1. **General.**—Motor omnibus services have been in operation for some years in the capital cities and some of the larger towns of the States of Australia, and in the Australian Capital Territory.

Governmental and municipal authorities operate certain services and the others are run by private operators; in the States the former are run in conjunction with the existing electric tramway systems.

2. **Government and Municipal Services.**—(i) *Summary of Operations*, 1949–50. The following table is a summary of the operations during the year ended 30th June, 1950 of omnibus systems controlled by governmental and municipal authorities.

MOTOR OMNIBUS SERVICES : GOVERNMENT AND MUNICIPAL, 1949–50.

Particulars.		N.S.W.	Vic.	Qld.	S.A.	W.A.	Tas.	A.C.T.	Australia.
Length of route ..	miles	434	67	337	22	1,795	542	11	3,208

(a) *See* relevant notes to table above. (b) Excludes Hobart Municipal Council Service.

3. **Private Services.**—(i) *General.* Particulars of motor omnibus services under the control of private operators are recorded in the States of New South Wales, Victoria, South Australia and Western Australia only.

In New South Wales, particulars are compiled for the Metropolitan and Newcastle Transport Districts only, and in Victoria for the Metropolitan district only, but in South Australia and in Western Australia all operators throughout the State are represented.

(ii) *Summary of Operations.* The operations of motor omnibus services under the control of private operators in these States during the five years ended June, 1950 are shown in the following table.

MOTOR OMNIBUS SERVICES: PRIVATE.

Year.	Number of Buses.	Capital Cost. (£'000.)	Gross Revenue. (£'000.)	Bus-mileage Run. ('000 miles.)	Passenger-Journeys. ('000.)	Persons Employed.

(*a*) Metropolitan and Newcastle Transport Districts only. (*b*) Metropolitan area only. (*c*) Year ended 31st December. (*d*) Not available.

E. FERRY (PASSENGER) SERVICES.

1. **General.**—Ferry services to transport passengers are operated in Sydney and Newcastle, New South Wales, on the Swan River at Perth in Western Australia, and on the Derwent River at Hobart and in Devonport, Tasmania. Control is exercised both by Governmental authorities and by private operators. In Victoria and Queensland the services operated are not extensive, and there are no ferry services in South Australia.

2. **Summary of Operations.**—The following statement is a summary of the operations of ferry passenger services in New South Wales, Western Australia and Tasmania during the years 1945–46 to 1949–50 compared with the year 1938–39. Particulars of passengers carried on vehicular ferries are not included.

1949–50	7	1,570	980	19,782	30

(a) Includes administrative staff. (b) Particulars are not available for earlier years.

F. MOTOR VEHICLES.

1. **Motor Industry.**—Chapter XXIV.—Manufacturing Industry of this Year Book contains summarized information on the motor industry of Australia and includes therein some data on the imports of motor bodies and chassis. Chapter XII.—Trade contains further data on imports, including those of petroleum products.

2. **Registration.**—The arrangements for the registration of motor vehicles and the licensing of drivers and riders thereof are not uniform throughout Australia. Methods of registration, licence fees payable, etc., in each State are referred to in Official Year Book No. 16, pp. 337–40, and later issues.

3. **Taxi-cabs and Other Hire Vehicles.**—In all the capital cities of the States and in many of the provincial centres taxi-cabs and other vehicles ply for hire under licence granted either by the Commissioner of Police or the local government authority concerned. As most of these vehicles are independently controlled by individuals or small companies, it has not been possible to obtain complete data in respect of their operations.

4. **Motor Omnibuses.**—In both urban and provincial centres motor omnibus traffic has assumed considerable proportions during recent years and in some States the railway and tramway systems run motor services complementary to their main services. There has been a considerable replacement also, during the last few years, of existing tramway services by trolley-bus and motor-bus services. (*See* Divisions C. and D. of this Chapter).

5. **Motor Vehicles on the Register, etc.**—(i) *Year* 1949–50. Particulars of the registration of motor vehicles, licences issued and revenue received for 1949–50 are contained in the following table. A graph showing motor vehicle registrations since the year 1920 may be found on p. 172.

MOTOR VEHICLES : REGISTRATIONS AND REVENUE, 1949–50.

(iv) *Revenue per Motor Vehicle.* The following table shows the average revenue per vehicle (excluding motor cycles) received in respect of registration and motor tax in the several States for the year 1938–39 and for each year from 1945–46 to 1949–50. In some States the revenue from motor tax on cycles is not separately recorded. In these cases an amount based on the flat rate provided for cycles in the registration acts has been deducted from the total revenue received, and the average amounts shown must therefore be regarded as approximate only. Registration fees and motor taxes were reduced, during the year 1941–42, in the States of New South Wales, Victoria and Western Australia. In South Australia the reduction was made in the last half of 1940–41 and in Queensland and in the Australian Capital Territory in July, 1942. The reduction was generally 25 per cent., except in the case of New South Wales, where it was 20 per cent. and in the Australian Capital Territory where fees were reduced by 15 per cent. For the State of Western Australia the reduction in registration fees ceased to operate with the commencement of the 1947–48 registration year, and for South Australia in August, 1948. The reduction ceased to operate for New South Wales in December, 1949, for Victoria in February, 1950, for Queensland in August, 1950, and for the Australian Capital Territory in December, 1950. In Tasmania the increase of motor registration fees is at present (June, 1951) under discussion.

AVERAGE REVENUE PER VEHICLE FROM REGISTRATION FEES AND MOTOR TAX (EXCLUDING MOTOR CYCLES).

Total	86,404	12,762	45,774	85,822	125,375	199,740

(a) Excludes Northern Territory. (b) Includes vehicles registered as primary producers' vehicles, Victoria.

7. **World Motor Vehicle Statistics, 1951.**—In previous issues of the Year Book tables have been included to show particulars of motor vehicle registrations throughout the world. This information has been derived from the results of the World Motor Census, conducted by the *American Automobile* magazine. Detailed information is not repeated in this issue, but the following particulars from the same source show that there were 68,695,200 motor cars, trucks and buses registered in various countries of the world at 1st January, 1951. This is an increase of 10.0 per cent. on the figure for the previous year, 62,463,794, and is the highest figure attained to that date. Of these vehicles, 48,057,945, or 70.0 per cent. of the world total, were in the United States of America and Australian registrations amounted to 2.0 per cent.

8. **Survey of Motor Vehicles, 1947–48.**—A survey of motor vehicles on the roads (excluding motor cycles) during 1947–48 was carried out by the Commonwealth Statistician in collaboration with the Government Statisticians and Road Transport authorities in each State. The survey covered such items as make, year of model, type of vehicle, horse-power and carrying capacity, etc., normally shown on motor registration forms, and also supplementary particulars such as those regarding purpose (private or business) obtained either as special addenda to the registration form of 1947–48 or on special forms collected with registration papers.

Results were published in a series of bulletins dealing with each State separately and with the Commonwealth as a whole, and summarized particulars were included in *Transport and Communication Bulletin* No. 40—1948–49 published by this Bureau. It is therefore not intended to repeat the information in the Year Book, but the brief mention of some of the general results may be of interest.

The survey covered about 990,000 motor vehicles throughout Australia, and of these about one-third were employed for private use and the remainder for business or part business use. There were 607,000 cars recorded (61 per cent.), 165,000 utilities (17 per cent.), 24,000 panel vans (2 per cent.), 154,000 trucks, lorries, etc. (16 per cent.) and 40,000 other and "not stated" vehicles (4 per cent.). Of vehicles whose year of model was stated, 28 per cent. were 1929, or earlier models, 44 per cent. were 1935 or earlier, and 80 per cent. were 1940 or earlier. Motor cars comprised 338,000 sedans (60 per cent. of all the cars whose type of body was stated), 25,000 coupés and coupé-sedans (4 per cent.), 45,000 roadsters (8 per cent.), 155,000 tourers (28 per cent.), and 44,000 cars whose type of body was not stated. Similar surveys, but of modified scope, have been carried out for later periods in respect of *new* vehicles only.

The results have been published by this Bureau in mimeograph form and in *Transport and Communication Bulletin* No. 41—1949–50.

G. TRAFFIC ACCIDENTS.

1. **General.**—Previously it has not been possible to make proper comparisons between States of the number of accidents recorded, because of the differences in legislation regarding the reporting of accidents and the degree to which the legislation could be enforced. However, arrangements were made, in co-operation with the Australian Road Safety Council and the various police and transport authorities concerned, to obtain the numbers of road traffic accidents on a comparable basis from all States in respect of the year ended 30th June, 1950. This has been achieved by restricting the statistics so as to relate only to those accidents which result in death or bodily injury to any person, or in damage in excess of £10 to property. It should be noted, however, that the comparability of the statistics between States even on this basis still depends on the degree to which accidents so defined are in fact recorded by the police. Except in the case of Western Australia, where statistics shown relate to all accidents which occurred in the metropolitan area and to those which involved fatal or "near-fatal" injury only in the remainder of the State, it is considered that there is little difference in recording of accidents as between States for 1949–50.

For further particulars of traffic accidents *see Transport and Communication Bulletin* No. 41, 1949–50.

2. **Total Accidents Reported, 1949–50.**—(i) *Summary.* The following table shows, for each State and the Australian Capital Territory during the year 1949–50, the total accidents reported to the police, the number of accidents involving casualties, and the number of persons killed or injured—totals and per 1,000 of population and per 100 motor vehicles registered.

ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES: ACCIDENTS RECORDED AND CASUALTIES, 1949–50.

State or Territory.	Total Accidents Reported. (*a*)	Accidents Involving Casualties.	Persons Killed.			Persons Injured.(*b*)		
			Number.	Per 1,000 of Mean Population.	Per 100 Motor Vehicles Registered.	Number.	Per 1,000 of Mean Population.	Per 100 Motor Vehicles Registered.
N.S.W. ..	16,189	8,549	561	0.18	0.12	10,405	3.28	2.18
Victoria ..	13,289	8,618	501	0.23	0.13	10,538	4.86	2.64
Queensland ..	7,275	3,958	202	0.17	0.09	4,771	4.10	2.24
South Australia	5,050	2,154	170	0.25	0.11	2,514	3.66	1.66
W. Australia(*c*)	2,720	1,612	142	0.26	0.14	1,929	3.53	1.87
Tasmania ..	2,200	969	64	0.23	0.15	1,154	4.16	2.70
Aust. Cap. Terr.	236	105	3	0.13	0.07	136	6.02	3.12
Total, 1949–50	46,959	25,965	1,643	0.20	0.12	31,447	3.91	2.26
Total, 1948–49	(*d*)	(*e*) 21,035	1,424	0.18	0.12	(*f*) 25,310	(*f*) 3.25	(*f*) 2.07

(*a*) Total accidents causing death or injury to persons or damage exceeding £10 to property. (*b*) Persons injured to an extent requiring surgical or medical treatment. (*c*) Includes for the Metropolitan Area all accidents causing death or injury to persons or damage exceeding £10 to property, and, for the remainder of the State, only those accidents causing fatal or "near-fatal" injuries. (*d*) Comparable figure not available. (*e*) Accidents involving persons killed, and persons injured to an extent requiring surgical or medical treatment, except in Western Australia where only persons injured and detained in hospital are included. (*f*) As defined in note (*e*).

(ii) *Riders, Drivers, Pedestrians, etc., Killed or Injured.* The following table shows the number of persons killed and the number injured during 1949–50 in each State and the Australian Capital Territory, classified into riders, drivers, pedestrians, etc.

ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES : RIDERS, DRIVERS, PEDESTRIANS, ETC., KILLED OR INJURED, 1949–50.

Riders, Drivers, Pedestrians, etc.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.
PERSONS KILLED.

40 " " 50 ..	1,095	1,255	435	224	198	80	7	3,294
50 " " 60 ..	868	886	366	198	106	63	6	2,493
60 and over	989	967	412	179	158	76	8	2,789
Not Stated	368	18	64	81	121	145	8	805
Total	10,405	10,538	4,771	2,514	1,929	1,154	136	31,447

(*a*) Includes all persons injured (i.e. requiring surgical or medical treatment) in the Metropolitan area but only those suffering " near-fatal " injuries in the remainder of the State.

(iv) *Accidents Recorded and Casualties, classified according to Type of Vehicle, Road User, etc., Involved.* The following table shows, for Australia during 1949–50, the number of accidents in which each of several classes of vehicles, road users, etc., were involved. The accidents involving casualties and persons killed and injured are similarly classified.

ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES : ACCIDENTS RECORDED AND CASUALTIES, CLASSIFIED ACCORDING TO TYPE OF VEHICLE, ROAD USER, ETC., INVOLVED, AUSTRALIA, 1949–50.(*a*)

Particulars.	Motor Vehicle.	Motor Cycle.	Pedal Cycle.	Tram.	Animal and Animal-drawn Vehicle.	Pedestrian.	Other Vehicle.
Total Accidents Reported(*b*) ..	40,702	9,064	4,466	1,447	1,686	6,693	997
Accidents Involving Casualties ..	20,209	7,640	4,350	617	727	6,668	560
Persons Killed ..	1,259	505	157	39	42	470	64
Persons Injured(*c*) ..	24,884	8,870	4,566	756	820	6,801	583

(*a*) It should be noted that, as accidents and casualties classified according to one type of road user, etc., may also be classified according to another, these totals cannot be added across to obtain grand totals. The table excludes 81 accidents reported for which no cause was stated, of which 66 involved casualties—4 persons killed and 68 persons injured. (*b*) Total accidents causing death or injury to persons or damage exceeding £10 to property. (*c*) Persons injured to an extent requiring surgical or medical treatment.

It will be seen, therefore, that motor vehicles were involved in 40,702 accidents, of which 20,209 involved casualties which numbered 1,259 persons killed and 24,884 persons injured. The 40,702 accidents in which motor vehicles were involved comprised 15,952 collisions with other motor vehicles, 4,895 with motor-cycles, 2,997 with pedal cycles, 973 with trams, 1,110 with animals and animal-drawn vehicles, 5,207 with pedestrians, 4,065 with fixed objects, 235 with vehicles other than those mentioned, 4,637 instances of overturning or leaving the roadway, and 631 accidents to passengers only. The particulars of accidents in which motor-cycles, pedal cycles, etc., were involved with motor vehicles are also included under their respective headings in the table above. Consequently, since the figures in each column refer to the *total* accidents in which the particular type of vehicle, etc., was involved, any aggregation across would result, through duplication, in considerable overstatement of the actual totals.

3. **Persons Killed or Injured in Traffic Accidents, 1938–39 and 1945–46 to 1949–50.**—The following table shows the numbers of persons killed or injured in traffic accidents in each State and the Australian Capital Territory during the years 1938–39 and 1945–46 to 1949–50 :—

ACCIDENTS (KNOWN TO THE POLICE) WHICH OCCURRED IN PUBLIC THOROUGHFARES : PERSONS KILLED OR INJURED.

Year.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.	
								No.	Per 100 Motor Vehicles Registered.
				PERSONS KILLED.					
1938–39 ..	552	418	173	118	126	43	3	1,433	0.16
1945–46 ..	483	336	169	97	127	58	..	1,270	0.14
1946–47 ..	508	386	188	101	101	61	1	1,346	0.13

1948–49 ..	9,253	8,225	4,017	(*a*)2,025	747	952	91	25,310	2.07
1949–50 ..	10,405	10,538	4,771	(*a*)2,514	(*a*)1,929	1,154	136	31,447	2.26

(*a*) Persons injured to an extent requiring surgical or medical treatment. (*b*) Figures shown for years prior to 1948–49 include all persons injured whether surgical or medical treatment was required or not. Figures for 1948–49 and subsequent years relate to persons requiring surgical or medical treatment. (*c*) Figures shown for years prior to 1949–50 include persons injured and detained in hospital only. Figures for 1949–50 relate to persons requiring surgical or medical treatment. Includes all persons injured (i.e. requiring surgical or medical treatment) in the metropolitan area but only those suffering "near-fatal" injuries in the remainder of the State.

H. AVIATION.

1. **Historical.**—A short review of the progress of civil aviation in Australia up to the date of foundation of a Civil Aviation Administration appears in Official Year Book No. 16, pp. 334–5.

2. **Foundation and Administration of Civil Aviation.**—A brief account of the foundation and objects of this Administration will be found in Official Year Book No. 19, p. 299. Official Year Book No. 38 and earlier issues contain information on the control of civil aviation by the Board (1936) and later (1939) by the Department of that name. The Acts defining the broad principles of operation of the administration of civil aviation and the Regulations amplifying them, and the principal functions of the administration are also described.

A recent change in the administration of the Department is its regional organization based on State boundaries, except that one region embraces Victoria and Tasmania. The regions are :—New South Wales, with regional office at Mascot ; Victoria-Tasmania, based on Melbourne ; Western Australia, office at Perth ; Queensland, office at Brisbane ; South Australia, office at Mile End ; Northern Territory, office at Darwin ; Papua-New Guinea, with regional office at Port Moresby.

The work of the Department is divided into two main sections, Administrative and Technical. The three Administrative Divisions under the control of an Assistant Director-General (Administrative) are :—(i) The Division of Air Transport and External Relations whose functions relate to the promotion and economic supervision of air transport ; (ii) the Division of Administration and Personnel which is concerned with the co-ordination of all departmental personnel requirements and associated matters ; and (iii) the Division of Finance and Stores which administers the financial aspects and the stores organization of the Department. The three Technical Divisions administered by the Assistant Director-General (Technical) are :—(i) The Division of Air Navigation which attends to the preparation, amendment and enforcement of all rules and regulations, etc., pertaining to air navigation, particularly from the aspect of safety ; (ii) the Division of Airways whose functions cover the planning, specification, construction, maintenance and operation of all airway operational navigational elements, excluding such elements as come within the normal scope of architectural and civil engineering ; and (iii) the Division of Airports which is concerned with airport planning and design, specification of airport works projects, maintenance of airports, seadromes and buildings and other projects of a dominantly civil engineering or architectural character.

The Accident Investigation Branch is an independent section of Head Office, concerned mainly with major accidents. The Chief Inspector of Accidents Investigation and his team of experts are directly responsible to the Director-General.

Full details of the functions of the three Administrative Divisions and the three Technical Divisions may be found in Official Year Book No. 38.

3. **International Activity.**—(i) *International Organizations.* A full report of the formation of the International Civil Aviation Organization, the Commonwealth Air Transport Council and the South Pacific Air Transport Council appears in Official Year Book No. 37 and particulars of subsequent activity in the international field were included in issue No. 38. Further ratifications of the Chicago Convention raised the membership of the International Civil Aviation Organization to 57 States as at 30th June, 1950. In accordance with the ICAO policy of broadening Council representation by enabling the views of non-Council member States to be presented, Australia and New Zealand agreed that the representative of Australia on the Council will keep the New Zealand authorities informed on all matters before the Council or Committees under its control which are of particular interest to New Zealand, and will also on request present any views which the New Zealand Government would wish to have submitted. The Second Annual Assembly in June, 1948 resolved that the Council should establish the Air Navigation Commission as provided for in the Convention to replace the Air Navigation Committee which had functioned since the interim period. Contracting States were invited to submit nominations to this Commission. The Convention provides for a Commission of twelve members. As nominations were received from nine Contracting

States only, the Commission has been established with this limited membership. Australia did not nominate, as a suitable officer could not be spared from the heavy work programme of the Department of Civil Aviation.

The Air Transport Committee has been established with a full membership of twelve members nominated by the Council from among its members.

Australia was represented at the following meetings convened by ICAO :—

Communications, 3rd Session, Montreal; Operations, 3rd Session, Montreal; Airworthiness, 3rd Session, Montreal; Notams Special Meeting, Montreal; Legal Committee, 3rd Session, Lisbon and 4th Session, Montreal; North Pacific Regional Air Navigation Meeting, Seattle; South-East Asia Regional Air Navigation Meeting, New Delhi; African-Indian Ocean Regional Air Navigation Meeting, London; Divisional meetings of the Air Navigation Commission, Legal, 5th Session, Taormina and 6th Session, Montreal; South-East Asia Frequency Assignment Planning Committee, New Delhi and I.T.U., 2nd Aeronautical Radio Conference, Geneva.

Australia was represented as an observer by the Civil Air Attaché, Washington, at the International Telecommunications Union Frequency Conference for Region II., held at Washington.

The third Annual Assembly of ICAO was held in Montreal with 36 Contracting States and observers from the United Nations present. The work of the Assembly was limited to administrative and finance matters. Australia was represented. At the fourth Assembly, 42 States were present.

The third Meeting of the South Pacific Air Transport Council was held in Wellington in December, 1948 and was attended by all partner Governments. It was the first meeting attended by Canada as a full member. The fourth Meeting was held in Melbourne during May, 1950.

(ii) *International Air Services.* Events which have transpired in connexion with international air services since the developments referred to in the previous issue of the Year Book are outlined in the following paragraphs. Special committees were formed to deal solely with matters concerned with the domestic administration of British Commonwealth Pacific Airlines Limited, and Tasman Empire Airways Limited

A delegation visited Karachi in June, 1949 to complete an Air Transport Agreement with Pakistan, authorizing the continuance of Qantas Empire Airways operations on the Australia-United Kingdom service through Pakistan, with the right to pick up and set down commercial traffic at Karachi.

The Australia-India Air Transport Agreement was signed at New Delhi in July, 1949. This followed negotiations originally begun in September, 1948.

The Australia-Ceylon Agreement was signed at Canberra in January, 1950.

The Governments of Australia, New Zealand and the United Kingdom approved the text of an agreement known as " The Inter-Governmental Agreement for the Continued Operation of the Regular Services between Australia and New Zealand by Tasman Empire Airways Ltd."

The frequency of the Constellation service to United Kingdom was increased during the years 1948–49 and 1949–50 to eight per fortnight in each direction, the Hythe service was reduced to once weekly and then discontinued, and the Lancastrian cargo service to the United Kingdom was increased to two trips per week.

Restrictions on dollar expenditure affected the volume of traffic on the services between Australia and North America. During the years 1948–49 and 1949–50 Pan-American Airways adjusted their fares and diverted some traffic to the Pacific route.

The Australian Government purchased DC6 aircraft for use by B.C.P.A. and these were used on the service between Australia and America from March, 1949. At the same time, the frequency was increased to twice weekly. One trip each fortnight terminated at San Francisco, others terminating at Vancouver.

Canadian Pacific Airlines flew a survey trip over the route from Vancouver to Sydney.

During June, 1949, Qantas Empire Airways Ltd. inaugurated a fortnightly Australia–Hong Kong service based on Sydney and operating via Darwin and Labuan (British North Borneo).

During November, 1948, Qantas Empire Airways operated a survey flight from Sydney to Johannesburg and return, the route being Perth, the Cocos Islands and Mauritius. This was the first flight ever made by a land plane between Australia and South Africa via the Indian Ocean.

A survey flight with a DC3 aircraft was also made by Qantas Empire Airways between Australia and Portuguese Timor.

4. **Regular Air Services within Australia.**—During May, 1949, approval was given for an increase of approximately 15 per cent. in fares on the main trunk services. Rationing of aviation spirit was continued during the year 1948–49. With the major airlines the effect of the scheme adopted was to impose a cut of 5 per cent. on their fuel requirements as at 1st July, 1948. In January, 1950, rationing of aviation fuel ceased.

5. **Air Ambulance Services.**—A brief statement of the foundation and objects of the Air Ambulance Services will be found in Official Year Book No. 32, pp. 145 and 146.

During the years 1948–49 and 1949–50 the Air Ambulance and Flying Doctor Services continued to provide medical aid for the outback regions of Australia. As from July, 1949 the Western Australian Section arranged for the operations of the Meekatharra Flying Ambulance Scheme to be incorporated in its activities. The Commonwealth Department of Health operates the Northern Territory Aerial Medical Service with two DH84 aircraft based at Darwin, and the Bush Church Aid Society for Australia and Tasmania, supported by funds from the Church of England, maintains one DH84 aircraft based at Ceduna, and one DH83 at Wudinna, South Australia.

6. **Training of Air Pilots.**—A brief statement of the pre-war policy of the Commonwealth Government regarding assistance to Aero Clubs was given in Official Year Book No. 32, p. 146.

Payment to the Clubs, under a revised scheme for financial assistance from February, 1947 to June, 1951 has been made as follows :—(i) a maintenance grant (for each aircraft hour flown) at the following rates per hour subject to certain limitations—(*a*) at home base, £1 10s., (*b*) away from home base, £2 ; (ii) an issue bonus (for each pupil trained "ab initio" to "A" Licence standard)—(*a*) at home base, £75, (*b*) away from home base, £90 ; (iii) a renewal bonus (for each licence renewed on club aircraft)—(*a*) at home base, £10, (*b*) away from home base, £12 10s. In addition, the Commonwealth has accepted a contingent liability to contribute at the rate of 10s. per flying hour towards each club's replacement reserve. This amount is intended to supplement the club's reserve for the purchase of aircraft and spares specifically approved by the Department of Civil Aviation.

During the year 1949–50 (1948–49) 157 (123) issue bonuses and 560 (400) renewal bonuses were earned. Hours flown by subsidized Aero Clubs totalled 34,212 (27,300), and a total subsidy of £77,134 (£44,460) was earned by the nine clubs.

7. **Gliding Clubs.**—The gliding clubs in Australia took steps to form a controlling body known as the Gliding Federation of Australia. For each of the years 1948–49 and 1949–50 a total subsidy of £1,000 was distributed among the controlling gliding authorities in each State.

8. **Airways Engineering.**—During the years 1948–49 and 1949–50 the Airways Communications System throughout Australia has been improved and developed. This work has included the fixed, or point-to-point communication service, and the service between the ground and aircraft.

A start has been made with the V.H.F. communication service and installations were completed at Williamtown and Guildford.

The comprehensive installation programme on the 30 new 112-megacycle V.A.R. radio ranges mentioned in the previous issue was set in operation.

New 75-megacycle marker beacon equipment was installed at points along airways, and also localizers and instrument landing systems were planned to enable pilots to check their positions accurately. An approach control radar system, which operates on a frequency of 3,000 megacycles, has been installed at Essendon.

The Department of Civil Aviation has undertaken installation of a chain of fifteen radar stations throughout Australia for radar tracking of balloons, wind finding purposes and for detecting radio-sonde balloon flights.

The lighting of airways and airports has been closely studied during the years 1948–49 and 1949–50 by the Departmental Lighting Committee consisting of representatives of the Department of Civil Aviation and two members from the Airline Pilots' Association.

9. **Air Traffic Control.**—The introduction into regular airline service of the high speed Convair and DC6 type aircraft increased the amount and complexity of air traffic control work during the years 1948–49 and 1949–50, and increased traffic commitments caused the re-organization of control services at Mascot, Essendon and Eagle Farm. The new system of control is being extended to all aerodromes at which air traffic control is situated.

To provide visual representation of traffic operating under Area Control, a semi-automatic Altitude Assignment Board was developed. Designs for a standard control tower were also drawn up and the new Flight Progress Board equipment planned.

10. **Meteorological Aids to Civil Aviation.**—Professional meteorological officers of the Department of the Interior are on duty at 36 of Australia's 59 aeradio stations. At the remainder, communications personnel make local weather observations, and take barometer and thermometer readings for transmission to Area Meteorological Offices.

11. **Construction and Development of Airports.**—The scarcity of suitable material, labour and plant have slowed the rate of airport construction throughout Australia. Effort was concentrated mainly on the provision of buildings, housing, safety equipment, and facilities were provided where the need was greatest.

Kingsford-Smith Airport.—Work was well under way on Australia's largest and most important airport. Specially constructed suction dredges were used to pump sand from the floor of Botany Bay to fill the old course of Cook's River, a start was made on the main runway and houses were demolished to make way for it. A hydrographic survey of Botany Bay was made to determine where the water airport should be. Temporary international terminal buildings were also commenced.

Essendon Airport.—The only additional airport works completed during the years 1948–49 and 1949–50 were the re-sealing of the main runways. Plans were begun for the construction of airline unit buildings and a new power house constructed.

Moorabbin Airport.—Work continued on this secondary landing ground which accommodates all non-radio equipment aircraft and so relieves the hazard created at Essendon.

Adelaide Airport.—Construction work has been progressing slowly. Over a million cubic yards of sand have been placed. Excavation of a channel for the diversion of two creeks crossing the area is well in hand.

Hobart Airport.—To replace the Cambridge Airport, which does not meet international standards and cannot be improved, plans have been developed for the construction of a Class " D " ICAO airport for Hobart at Llanherne.

12. **Aircraft Parts and Materials.**—The number of firms and organizations approved by the Department of Civil Aviation to trade in the aircraft industry now totals 349, and extensions of approval have been granted to 186 firms to cover the extensive increase in their operations.

13. **Aircraft Maintenance Certificates of Repair.**—Aircraft maintenance repair and overhaul is carried out under the supervision of a works inspection section or licensed ground engineer in workshops approved by the Department of Civil Aviation. Workshops are authorized to issue certificates of repair which serve as evidence to the licensed ground engineer responsible for the fitment of the part that the work so covered has been done in an authorized workshop by competent tradesmen and has been subjected to proper inspection. Such specialized work as the overhaul of instruments, electrical equipment, aeronautical pumps and carburettors is carried out by these approved workshops.

14. **Test and Examination of Aircraft Parts and Materials.**—A number of laboratories is approved by the Department of Civil Aviation and authorized to issue laboratory reports covering the physical test, chemical analysis, radiological and metallurgical examination of materials and parts used in connexion with the civil aircraft industry.

15. **Statistical Summaries.**—(i) *Registrations, Licences, Accidents, etc.* The following table provides a summary of the civil aviation registrations and licences in force in Australia at 30th June of each of the years 1939 and 1946 to 1950, and also of the numbers of persons killed and injured in civil flying accidents during the years 1938–39 and 1945–46 to 1949–50.

CIVIL AVIATION: REGISTRATIONS, LICENCES, ACCIDENTS, ETC., AUSTRALIA.

Particulars.		1939.	1946.	1947.	1948.	1949.	1950.

(a) Not available. (b) Net weight.

NOTE.—Figures, shown for 1939 and 1946 include Oversea Services of Qantas Empire Airways Ltd. but exclude operations of aircraft chartered for defence purposes. Figures for 1939 relate to subsidized services only.

(iii) *Operations of Australian and International Oversea Services.* The following table furnishes a summary of Australian and other oversea services operating between Australia and oversea countries, including Pacific islands, during the years 1938–39 and 1945–46 to 1949–50. Particulars are not available in respect of certain services and the figures shown are therefore incomplete. For details of the individual services and routes *see Transport and Communication Bulletin* No. 41, 1949–50.

CIVIL AVIATION : OPERATIONS OF OVERSEA SERVICES. (a)

(a) Incomplete. (b) Not available.

16. **New Guinea Activities.**—(i) *General.* Issues up to and including No. 34, 1941 show particulars of the development of civil aviation in New Guinea and of the companies operating at the outbreak of war with Japan, while subsequent issues carry the accompanying statistical summary of operations up to the end of September, 1941. Similar statistics of post-war operations, however, are not at present available.

(ii) *Territory of New Guinea.* During 1949–50 there were 75 aerodromes throughout the Territory including a number of small airstrips opened in the Central Highlands and Sepik Districts. At 30th June, 1950 the whole of the Central Highlands District and the interior of the Sepik, Madang and Morobe Districts were supplied entirely by air transport. Air mail services operated between Sydney and Lae with an extension to Rabaul via Finschhafen. Feeder services are provided by the Territories Administration from Lae to Bulolo, Kavieng, Madang, Manus, Torokina (Bougainville) and Wau.

(iii) *Territory of Papua.* In May, 1949 a regular fortnightly service was commenced between Port Moresby and Daru using Catalina flying boats, with a service to Rabaul and Buin each alternate week. A regular weekly service has been established between Port Moresby and Samarai with extensions to Losuia (Trobriand Islands) and Deboyne Lagoon (Misima).

During 1950 Qantas Empire Airways Ltd. inaugurated a weekly service between Port Moresby and Kokoda and Popondetta (8 miles from Higaturu). Increased traffic enabled a service to be maintained twice a week.

There are 22 serviceable aerodromes maintained in the Territory. Some are suitable for large aircraft but the majority are suitable for light aircraft only, while others are only small emergency landing fields. Major aerodromes are maintained by the Commonwealth Department of Civil Aviation.

Besides the regular passenger and airmail services maintained by Qantas Empire Airways Ltd. charter services by a private operator using small aircraft are available from Port Moresby to Abau, Tapini, Bereina and other small airstrips.

I. POSTS, TELEGRAPHS, TELEPHONES AND WIRELESS.

NOTE.—In all the tables in this Division returns for the Australian Capital Territory are included with those for New South Wales, while the South Australian returns include particulars for the Northern Territory.

§ 1. General.

1. **The Commonwealth Postal Department.**—Under the provisions of the Commonwealth Post and Telegraph Act 1901, the Commonwealth Postal Department was placed under the control of the Postmaster-General, being a responsible Minister. The Director-General of Posts and Telegraphs controls the Department under the Postmaster-General, whilst the principal officer in each State is the Deputy-Director of Posts and Telegraphs.

2. **Postal Facilities.**—(i) *Relation to Area and Population.* The following statement shows the number of post offices, the area in square miles and the number of inhabitants to each post office (including non-official offices) in each State and in Australia at 30th June, 1950. In order to judge clearly the relative postal facilities provided in each State, the area of country to each office as well as the number of inhabitants per office should be taken into account.

POSTAL FACILITIES: RELATION TO AREA AND POPULATION, AT 30th JUNE, 1950.

State.	N.S.W.	Vic.	Q'land.	S.A.	W.A.	Tas.	Aust.
Number of post offices (*a*) ..	2,538	2,455	1,285	869	637	520	8,304
Number of square miles of territory to each office in State	122	36	522	1,040	1,532	50	358
Number of inhabitants to each office	1,279	897	921	823	876	537	986
Number of inhabitants per 100 square miles	1,046	2,506	177	79	57	1,066	275

(*a*) Includes "official," "semi-official," and "non-official" offices.

The foregoing table does not include "telephone" offices at which there is no postal business.

(ii) *Number of Offices.* The following table shows the number of post offices (exclusive of telephone offices) in each State for the years 1920, 1930, 1940 and 1950.

NUMBER OF POST OFFICES AT 30th JUNE.

State.	1920.		1930.		1940.		1950.	
	Official and Semi-Official	Non-Official.	Official and Semi-Official.	Non-Official.	Official and Semi-Official.	Non-Official.	Official and Semi-Official.	Non-Official.

(*a*) Prior to 15th March, 1949, the operations of the Australian Broadcasting Commission were financed by apportionment of the fees collected from the issue of broadcast listeners' licences, part being paid to the Commission, the remainder being retained by the Postmaster-General's Department for technical services provided and particulars thereof were included in the Department's accounts. Since that date the Commission's operations have been financed through Consolidated Revenue Fund. *See also* § 6, par. 4 (i) (*b*) following.

Compared with the corresponding figures for the previous year an increase of 15.1 per cent. is shown in the gross revenue earned for the year 1949–50. Increases in the several branches were as follows :—Postal 9.6 per cent., Telephone 27.3 per cent., and Telegraph 25.6 per cent.

The gross revenue in 1949–50 was 121.0 per cent. higher than in the last complete pre-war year, 1938–39, the corresponding percentage increases for the several branches being as follows :—Postal, 107.8, Telegraph 173.8, and Telephone 138.4.

4. **Expenditure, Postmaster-General's Department.**—(i) *Distribution*, 1949–50. The following table shows, as far as possible, the distribution of expenditure (actual payments) on various items in each State during the year ended 30th June, 1950, as shown by records kept for Treasury purposes. The table must not be regarded as a statement of the working expenses of the Department, since items relating to new works, interest, etc., are included therein.

POSTMASTER-GENERAL'S DEPARTMENT: DISTRIBUTION OF EXPENDITURE, 1949–50.

(£'000.)

(a) Expenditure on air-mail services, etc. (b) Includes £3,000,000 working advance for payment to credit of Post Office Stores and Transport Trust Account. (c) Includes expenditure from loan. (d) Particulars of apportionment to States not available. Includes superannuation contributions, £641,546; sinking fund payments, £2,048,014; interest on loans, £864,268; exchange, £417,201; and Advances—Overseas Telecommunications, £224,837; Public Works Staff, Salaries and General Expenses, £121,000; and Transferred Officers Pensions and Allowances, £3,691. (e) Includes expenditure not apportioned to States.

A similar table for the year 1948–49 is contained in the *Transport and Communication Bulletin* No. 40, p. 70.

(ii) *Total* 1938–39 *and* 1945–46 *to* 1949–50. Actual payments made for each of the years 1938–39 and 1945–46 to 1949–50, respectively, were:—£18,874,000, £29,010,000, £32,724,000, £40,391,000, £53,544,000, and £64,304,000.

The total expenditure increased by 20.1 per cent. during 1949–50 and was 240.7 per cent. higher in 1949–50 than in 1938–39.

5. **Profit or Loss, Postmaster-General's Department.**—(i) *States*, 1949–50. The foregoing statements of gross revenue and expenditure represent actual collections and payments made and cannot be taken to represent the actual results of the working of the Department for the year. The net results for each branch in the several States, after providing for working expenses (including superannuation, pensions and depreciation) and interest charges including exchange, were as follows:—

POSTMASTER-GENERAL'S DEPARTMENT: PROFIT OR LOSS, 1949–50.

(£'000.)

Branch.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.

(*a*) *See* Note (*a*) page 191.

NOTE.—Minus sign (—) indicates loss.

6. **Fixed Assets.**—(i) *Details,* 1949–50. The following statement shows particulars of the fixed assets of the Postmaster-General's Department from 1st July, 1949 to 30th June, 1950 :—

POSTMASTER-GENERAL'S DEPARTMENT : FIXED ASSETS.

(£'000.)

Particulars.	Net Value, 1st July, 1949.	Capital Expenditure, 1949–50.	Gross Value, 30th June, 1950.	Less Depreciation, etc., 1949–50. (*a*)	Net Value, 30th June, 1950.
Telephone service plant (excluding trunk lines)	76,052	14,872	90,924	1,063	89,861
Joint trunk and telegraph plant (aerial wires, conduits, and cables)	18,896	1,537	20,433	143	20,290
Telegraph service plant ..	1,188	132	1,320	16	1,304
Postal service plant	681	52	733	..	733
Sites, buildings, furniture and office equipment	15,495	2,495	17,990	238	17,752
Miscellaneous plant	3,636	1,652	5,288	295	4,993
Total	115,948	20,740	136,688	1,755	134,933

(*a*) Includes dismantled assets, depreciation written off, and assets transferred.

(ii) *Net Value,* 1938–39 *and* 1945–46 *to* 1949–50. The net value of the fixed assets of the Postmaster-General's Department at 30th June, 1939 and 1946 to 1950, respectively, was :—£65,135,000, £88,540,000, £94,986,000, £104,281,000, £115,956,000 and £134,933,000.

At 30th June, 1950 the net value of fixed assets was 107.2 per cent. greater than at 30th June, 1939.

§ 2. Posts.

1. **Postal Matter Dealt With.**—(i) *Australia.* The following table is a summary of the postal matter dealt with in Australia during the five years 1945–46 to 1949–50 in comparison with 1938–39. Although mail matter posted in Australia for delivery therein is necessarily handled at least twice, only the number dispatched is included in the following table, which consequently shows the number of distinct articles handled :—

POSTAL MATTER DEALT WITH : AUSTRALIA.

Comparable figures of the number of articles dealt with during 1948–49 may be found in the *Transport and Communication Bulletin* No. 40, pp. 71–74.

2. **Cash on Delivery Parcels Post.**—(i) *General.* The Postal Department undertakes, upon prepayment of a prescribed commission, to deliver registered articles sent by parcel post within Australia, or between Lord Howe Island, Norfolk Island, Nauru, the Territory of Papua-New Guinea, or Fiji and Australia, to recover from the addressee on delivery a sum of money specified by the sender, and to remit the sum to the sender. The object

of the system is to meet the requirements of persons who wish to pay at the time of receipt for articles sent to them, also to meet the requirements of traders and others who do not wish their goods to be delivered except on payment.

(ii) *Summary of Business.* The next statement shows particulars regarding the cash on delivery parcels posted in each State for the years 1945–46 to 1949–50 in comparison with 1938–39 :—

1949–50	88,941	15,880	51,309	16,067	15,896	388	188,481

3. **Total Cost of Carriage of Mails.**—During 1948–49 and 1949–50 the total amounts paid for the carriage of mails, as disclosed by the Profit and Loss Account of the Postal Branch, were as follows (1948–49 in parentheses): Inland mails—Road £1,291,684 (£1,145,092), Railway £753,363 (£621,718), Air £756,369 (£615,250); Coastwise mails—£20,029 (£16,473); Oversea mails—Sea £677,561 (£658,550), Air £1,025,714 (£740,103); Grand Total—£4,524,720 (£3,797,186).

4. **Transactions of the Dead Letter Offices.**—During the year 1949–50 there were, in the several States of Australia, 1,576,280 letters, post cards and lettercards returned to writers or delivered, 191,414 destroyed in accordance with the Act, and 109,867 returned to other States or countries as unclaimed—a total of 1,877,561. Corresponding particulars for packets and circulars were—414,997, 198,795, 22,594 and 636,386. There were 2,513,947 articles handled in all, and money and valuables amounting to £403,748 were included.

5. **Money Orders and Postal Notes.**—(i) *General.* The issue of money orders and postal notes is regulated by Sections 74–79 of the Post and Telegraph Act 1901. The maximum amount for which a single money order payable within Australia may be

obtained is £40, but additional orders will be issued upon request when larger amounts are to be remitted. The maximum amount permitted to be sent to any person in the sterling area is £8 per month but varying conditions apply for remittance to countries outside the sterling area. A postal note, which is payable only within Australia and in Papua, cannot be issued for a larger sum than twenty shillings.

(ii) *States*, 1949–50. Particulars regarding the business transactions in each State for 1949–50 are shown hereunder :—

MONEY ORDERS AND POSTAL NOTES : TRANSACTIONS, 1949–50.

(iv) *Classification of Money Orders Issued and Paid.* Of the total money orders issued in Australia during 1949–50, 4,472,968 valued at £36,582,128 were payable in Australia, 10,699 (£27,671) in New Zealand, 72,974 (£255,267) in the United Kingdom and 30,069 (£148,493) in other countries. Of the total money orders paid in Australia during 1949–50, 4,479,473 (£36,772,695) were issued in Australia, 25,387 (£72,841) in New Zealand, 85,411 (£410,798) in the United Kingdom and 35,426 (£246,771) in other countries.

Money orders payable or issued in foreign countries, which have been sent from or to Australia through the General Post Office in London, are included in those payable or issued in the United Kingdom.

(v) *Postal Notes Paid.* The following table shows the number and value of postal notes paid in each State during 1949–50. Particulars regarding the number and value of postal notes issued and paid in each of the last five years have been given in the previous table.

§ 3. Telegraphs.

1. **General.**—A review of the development of telegraph services in Australia up to 1921 appears in Official Year Book No. 15, p. 625, and subsequent developments of importance have been dealt with in later issues. During the past few years substantial improvements in both the speed and grade of telegraph service throughout Australia have been effected, the entire system being subjected to intensive reorganization. The external circulation system of the Australian telegraph service has been considerably modified, and direct communication has been established between cities and towns which formerly were served through intermediate repeating centres.

Telephone subscribers may telephone telegrams for onward transmission, or have messages telephoned to them. The fee for the service is small, and the system means, in effect, that the telegraph system is brought into the home of every telephone subscriber. The number of telegrams lodged by telephone during the year ended 30th June, 1950 was 8,867,476 or 25 per cent. of the total lodgments.

A radiogram service is provided to certain isolated places throughout Australia and a number of privately operated wireless transceiver stations have been established at various centres throughout the Commonwealth, enabling telegrams to be exchanged with departmental telegraph offices. Stations sponsored by the Flying Doctor Service of Australia can communicate by wireless with base stations.

The picturegram service between Melbourne and Sydney, which was established in 1929, but which was suspended during 1942, was restored and extended to Brisbane and Adelaide in 1949 and to Perth in 1950. The equipment installed at these points also permits the direct transmission and reception of overseas phototelegrams. Portable picture-transmitting apparatus has been provided for use at country centres in New South Wales and Victoria and was first used for the opening of the 19th Federal Parliament at Canberra on 21st February, 1950.

Teleprinter services (i.e. typewriting over electrical circuits), affording the great advantage of direct and instantaneous communication between points within the same building or separated by distances up to thousands of miles, and printergram services, connecting any business premises with the local telegraph office for the transmission and reception of telegrams, are available.

2. **Telegraph and Telephone Mileages.**—The following table shows, for the year ended June, 1950, the combined single wire mileage for both telegraph and telephone purposes in each State. The lengths of conduits and pole routes are also shown.

TELEGRAPHS AND TELEPHONES : MILEAGES, 1949–50.

(*a*) At 30th June.

A comparable table for the year 1948–49 may be found in the *Transport and Communication Bulletin* No. 40, p. 78.

(ii) *Australia.* The numbers of telegraph offices, and of telegrams dispatched to destinations within Australia and to adjacent islands and to ships at sea, for each of the years 1938–39 and 1945–46 to 1949–50 respectively, were :—Telegraph offices—9,389, 9,426, 9,458, 9,599, 9,701 and 9,863 ; Telegrams dispatched—17,252,000, 35,971,000 33,729,000, 34,692,000, 35,647,000 and 35,486,000.

The volume of telegraph business has increased by over 105 per cent. since the year 1938–39.

§ 4. Oversea Cable and Radio Communication.

1. **First Cable Communication with the Old World.**—In earlier issues of the Official Year Book will be found a detailed account of the connexion of Australia with the Old World by means of submarine cables. (*See* No. 6, p. 770.)

2. **General Cable Service.**—Descriptions of the various cable services between Australia and other countries are given in Official Year Book No. 22, pp. 335–6.

3. **Merging of Cable and Wireless Interests.**—Following upon the recommendations of the Imperial Wireless and Cable Conference in London in 1928 which examined the situation that had arisen as the result of the competition of the beam wireless with the cable services, the Imperial and International Communications Limited (since renamed Cable and Wireless Ltd.) was formed and took over the operations of the Pacific Cable Board and the control of the Eastern Extension Cable Company and the Marconi Wireless Company. For further developments, leading eventually to the establishment of the Overseas Telecommunications Commission, *see* Official Year Book No. 37, pp. 220–4.

4. **Oversea Cable and Radio Traffic.**—(i) *States.* The number of telegrams received from and dispatched overseas in each State during 1949–50 is shown hereunder :—

INTERNATIONAL TELEGRAMS, 1949–50.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia.
Number received ..	577,691	449,812	53,750	63,241	71,339	17,269	1,233,102
,, dispatched	598,207	424,978	62,099	69,521	68,915	18,656	1,242,376
Total ..	1,175,898	874,790	115,849	132,762	140,254	35,925	2,475,478

(ii) *Australia.* (*a*) *Number of Telegrams.* The following table shows the number of international telegrams received from and dispatched overseas during the years 1938–39 and 1945–46 to 1949–50 :—

INTERNATIONAL TELEGRAMS : AUSTRALIA.

(*a*) Includes code telegrams.

Words transmitted to " Other places " included 2,842,420 to the United States of America and 6,115,580 to New Zealand and the Pacific Islands. Words received from " Other places " included 2,468,118 from the United States of America and 5,094,818 from New Zealand and the Pacific Islands.

§ 5. Telephones.

1. **General.**—Particulars of the total mileage of lines used exclusively for telephone purposes are not available, but are combined with all other line mileage. A table showing the total single wire mileage used for telephone trunk and/or telegraph purposes is shown in § 3 on page 199.

During 1949–50 the total number of telephones added to the post office system was 81,850, compared with 64,980 in 1948–49. With an average at 1st January, 1950 of 132 telephones per 1,000 of population, Australia continues to hold a high place amongst the countries of the world in respect of telephone density, and ranked seventh in a number of countries (more than 60) listed as at that date by the American Telephone and Telegraph Company (*see* para. 7 following).

Seventy-two carrier wave telephone systems were installed during 1949–50 (94 during 1948–49) on trunk line routes serving capital cities and important provincial centres. The number of carrier systems now in service totals 499, representing a channel mileage of 289,897.

Twenty-three automatic exchanges were established during the year (20 during 1948–49) and at 30th June, 1950 there were 174 automatic exchanges in the metropolitan area and 242 in the country districts, to which 685,315 telephones were connected, representing 62 per cent. of the total number in use in Australia.

2. **Summary for States.**—Particulars relating to the telephone service in each State for the years ended 30th June, 1949 and 1950 compared with 1939 will be found in the following table :—

TELEPHONE SERVICES : SUMMARY.

(Number.)

Particulars.	Year (30th June).	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	Aust.
Exchanges ..	1939	2,010	1,680	1,053	579	653	358	6,333
	1949	2,085	1,688	1,143	621	679	368	6,584
	1950	2,138	1,714	1,182	629	687	370	6,720

	1950	305,485	244,858	106,246	69,907	43,130	23,451	793,077
Instruments connected	1939	257,246	208,230	82,226	60,451	35,830	18,013	661,996
	1949	397,919	324,919	133,134	88,554	55,067	28,541	1,028,134
	1950	428,546	348,505	144,427	96,560	60,709	31,237	1,109,984
(i) Subscribers' instruments	1939	250,511	203,668	79,293	58,512	34,380	17,098	643,462
	1949	388,391	317,501	128,794	85,909	53,144	27,386	1,001,125
	1950	418,423	340,524	139,793	93,653	58,596	30,004	1,080,993
(ii) Public telephones	1939	4,223	2,573	1,775	1,017	926	562	11,076
	1949	5,384	3,357	2,169	1,271	805	604	13,590
	1950	5,576	3,607	2,275	1,366	883	631	14,338
(iii) Other local instruments	1939	2,512	1,989	1,158	922	524	353	7,458
	1949	4,144	4,061	2,171	1,374	1,118	551	13,419
	1950	4,547	4,374	2,359	1,541	1,230	602	14,653
Instruments per 100 of population	1939	9.32	11.09	8.08	10.03	7.62	7.59	9.50
	1949	12.70	15.19	11.57	12.89	10.34	10.60	12.99
	1950	13.20	15.82	12.20	13.49	10.88	11.18	13.56

Of the total telephones (1,109,984) in service on 30th June, 1950, 409,563 or 36.9 per cent. were connected to exchanges situated beyond the limits of the metropolitan telephone networks.

3. **Subscribers' Lines and Calling-rates.**—The next table shows the number of subscribers' lines and the daily calling-rates at central, suburban and country telephone exchanges in the several States for 1949–50 :—

TELEPHONES : SUBSCRIBERS' LINES AND DAILY CALLING-RATE, 1949–50.

State.	Central Exchanges.		Suburban Exchanges.		Country Exchanges.	
	Subscribers' Lines Connected.	Average Outward Calls Daily per line.	Subscribers' Lines Connected.	Average Outward Calls Daily per line.	Subscribers' Lines Connected.	Average Outward Calls Daily per line.
New South Wales ..	27,207	11.08	155,855	4.11	102,762	2.27
Victoria	18,477	11.36	134,227	3.64	80,780	1.68
Queensland.. ..	9,042	10.93	38,705	3.90	49,794	2.31
South Australia ..	5,802	10.18	34,999	2.56	26,801	1.33
Western Australia ..	8,051	8.40	16,952	3.65	14,191	1.70
Tasmania	4,840	5.09	3,415	2.74	13,489	2.07

Similar information for the year 1948–49 may be found in the *Transport and Communication Bulletin* No. 40, p. 82.

A comparison of the average daily calling-rates for each class of exchange shows that Victoria registered the greatest number of calls per line at central exchanges, New South Wales at suburban exchanges and Queensland at country exchanges.

4. **Effective Paid Local Calls.**—The numbers of effective paid local calls from subscribers and public telephones in the various States during the years ended 30th June, 1949 and 1950 appear hereunder :—

TELEPHONES : NUMBER OF EFFECTIVE PAID LOCAL CALLS.
('000.)

State.	Subscribers' Calls.		Calls from Public Telephones.		Total Calls.	
	1948–49.	1949–50.	1948–49.	1949–50.	1948–49.	1949–50.
New South Wales ..	339,259	341,967	44,092	42,464	383,351	384,431
Victoria	242,780	241,313	22,941	23,223	265,721	264,536
Queensland	96,356	97,360	10,190	8,884	106,546	106,244
South Australia ..	60,101	57,994	7,843	7,448	67,944	65,442
Western Australia ..	43,163	44,721	3,834	3,601	46,997	48,322
Tasmania	18,709	18,021	1,883	1,534	20,592	19,555
Australia ..	800,368	801,376	90,783	87,154	891,151	888,530

In 1938–39 subscribers' calls numbered 551,511,000, calls from public telephones 44,683,000, and total local calls 596,194,000.

5. **Trunk Line Calls and Revenue.**—In the next table the number of telephone trunk line calls recorded, the amount of revenue received, and the average revenue per call are shown for each of the States for the years 1948–49 and 1949–50 compared with 1938–39.

TELEPHONES : TRUNK LINE CALLS AND REVENUE.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Australia.
Total Calls—	'000.	'000.	'000.	'000.	'000.	'000.	'000.

1949–50 ..	2,328,509	1,668,877	1,209,202	710,753	375,893	252,011	6,545,245
Average Revenue per call—	d.	d.	d.	d.	d.	d.	d.
1938–39 ..	12.32	11.34	13.56	11.34	13.09	9.98	12.12
1948–49 ..	17.61	14.85	18.83	18.07	17.54	12.92	16.86
1949–50 ..	23.66	20.59	25.42	25.36	24.36	18.40	23.03

The number of trunk line calls during 1949–50 increased by more than 3 million, or 5 per cent., compared with the figures for the previous year, whilst the average revenue per call increased by 36.6 per cent.

6. **Revenue from Telephones.**—Particulars regarding the revenue from telephone services are included in tables in § 1.

7. **World Telephone Statistics, 1950.**—Information derived, in the main, from statistics compiled by the American Telephone and Telegraph Company shows that at 1st January, 1950 there were more than 70,000,000 telephones in use throughout the world. The United States of America, with almost 41,000,000, possessed by far the greatest proportion of these (58 per cent.). In density also the United States came first, with 27 instruments per 100 of population. Australia with 13.2 came seventh, following Sweden (23), Canada (20), Switzerland (18), New Zealand (18), and Denmark (16). By June, 1950 the density of telephones in Australia had risen to 13.6 per 100 persons and by June, 1951 to 14.3.

§ 6. Radio Telegraphy and Telephony.

1. **General.**—A statement in regard to the initial steps taken to establish radio telegraphy in Australia appears in Official Year Book No. 18, p. 343.

2. **Radio-communication Stations Authorized.**—(i) *States and Territories, 30th June, 1950.* The following table shows particulars of the different classes of radio-communication stations authorized at 30th June, 1950 in each State and Territory of the Commonwealth. Figures relate to radio-communication (radio telegraph and radio telephone) stations only; particulars of broadcasting stations and of broadcast listeners are shown in par. 3 following.

RADIO-COMMUNICATION STATIONS AUTHORIZED, 30th JUNE, 1950.

See notes to previous table.

3. **Broadcast Licences Issued.**—(i) *States and Territories, 30th June,* 1950. The following table shows the number of broadcast licences issued in each State and Territory of the Commonwealth at 30th June, 1950.

BROADCAST LICENCES ISSUED, 30th JUNE, 1950.

State or Territory in which Issued.	Broadcasting.		Broadcast Listeners'.		Experi-mental.
	National Stations.	Commercial Stations.	One Receiver.	More than one Receiver.	
New South Wales	(*a*) 12	35	678,399	64,632	978
Victoria..	(*a*) 7	19	505,078	52,478	910
Queensland(*b*)	(*a*) 13	20	260,033	14,246	333
South Australia	3	8	194,113	32,610	301
Western Australia ..	(*a*) 7	11	133,199	16,129	185
Tasmania	3	8	64,369	7,917	97
Northern Territory ..	2	..	1,148	40	9
Australian Capital Territory	1	1	4,872	365	13
Total	48	102	1,841,211	188,417	2,826

(*a*) Includes Short Wave Stations: New South Wales 1; Victoria 3; Queensland 2 and Papua 1; Western Australia 2. (*b*) Includes Papua.

Of broadcast listeners' licences in respect of one receiver, 1,031,750 or 56.04 per cent. were held by persons situated in metropolitan areas and 809,461 or 43.96 per cent. by persons in country areas.

(ii) *Broadcast Listeners' Licences, 30th June, 1925 to 1950.* The following table shows the number of broadcast listeners' licences issued at 30th June, 1925, 1930, 1935, 1939, 1940 and 1945 to 1950 :—

BROADCAST LISTENERS' LICENCES ISSUED.

At 30th June—	N.S.W. (a)	Victoria.	Q'land. (b)	S. Aust. (c)	W. Aust.	Tasmania.	Australia. (b)
1925 ..	33,719	19,243	1,061	3,118	3,417	501	61,059
1930 ..	114,080	136,887	23,263	25,671	5,715	6,032	311,648
1935 ..	278,098	234,556	67,309	79,305	41,176	20,088	720,532
1939 ..	433,029	327,579	133,217	117,307	70,262	39,392	1,120,786
1940 ..	458,155	348,158	151,110	124,891	87,764	42,182	1,212,260
1945(d) ..	570,312	412,317	184,341	160,210	102,065	50,557	1,479,802
1946 ..	575,864	415,785	191,186	164,724	106,529	51,992	1,506,080
1947 ..	679,505	499,944	228,066	180,909	121,149	61,674	1,771,247
1948 ..	699,259	505,106	239,342	197,326	128,703	63,080	1,832,816
1949 ..	706,452	531,722	261,054	212,416	139,290	68,088	1,919,022
1950 ..	748,268	557,556	274,279	227,911	149,328	72,286	2,029,628

(a) Includes Australian Capital Territory. (b) Includes Papua. (c) Includes Northern Territory. (d) Commencing in July, 1942, licences for receivers in excess of one are included.

4. Broadcasting.—(i) *The National Broadcasting Service.* (a) *Transmitting Stations.* The technical services for the National Broadcasting System are provided by the Postmaster-General's Department, and the programmes by the Australian Broadcasting Commission (*see* Chapter XXIX.—Miscellaneous).

At the 30th June, 1950, the National Broadcasting System of Australia comprised 48 transmitting stations as follows :—

Medium-wave Stations—

2FC and 2BL Sydney, 2NC Newcastle, 2NA Newcastle, 2CO Corowa, 2NR Lawrence, 2CR Cumnock, 2CY Canberra, 2LG Lithgow, 2NB Broken Hill, 2NU Manilla, 2TR Taree, 3LO and 3AR Melbourne, 3GI Longford, 3WV Dooen, 4QG and 4QR Brisbane, 4AT Atherton, 4QB Pialba, 4QL Longreach, 4QN Clevedon, 4RK Rockhampton, 4QS Dalby, 4QY Cairns, 5CL and 5AN Adelaide, 5CK Crystal Brook, 5DR Darwin, 5AL Alice Springs, 6WF and 6WN Perth, 6WA Minding, 6GF Kalgoorlie, 6GN Geraldton, 7ZL and 7ZR Hobart, 7NT Kelso, 9PA Port Moresby, Papua.

Short-wave Stations—

VLI Sydney, New South Wales, VLG, VLH and VLR Lyndhurst, Victoria, VLQ and VLM Brisbane, Queensland, VLW and VLX Perth, Western Australia, VLT Port Moresby, Papua.

With the exception of the short-wave stations, all transmitters operate in the medium frequency broadcast band 540 to 1,600 kilocycles per second. From the short-wave stations, using frequencies within the band 3 to 30 megacycles per second, service is given to listeners in sparsely populated parts of Australia such as the north-west of Western Australia, Northern Territory, and Northern and Central Queensland.

In addition to the short-wave stations under the National Broadcasting System there are also three short-wave stations at Shepparton, Victoria (VLA, VLB, VLC) for overseas services only.

Programmes for country regional stations are normally relayed from the central studio of the nearest capital city, high quality programme transmission lines being used for the purpose. A number of programme channels is utilized to link national broadcasting stations in the capital cities of Australia, and frequently this system is extended to connect both the national and commercial broadcasting stations.

(*b*) *Broadcast Listeners' Licences.**—(1) The general position regarding the fees payable for broadcast listeners' licences is as follows :—(*a*) For a single receiver possessed by a person, Zone 1, £1 ; Zone 2, 14s. ; (*b*) for receivers in excess of one possessed by a person, Zone 1, 10s., Zone 2, 7s.

(2) Free licences are granted to blind persons and to schools. Invalid and age pensioners who live alone or with another such pensioner are required to pay only half the ordinary fees, i.e. :—(*a*) For a single receiver, Zone 1, 10s ; Zone 2, 7s. ; (*b*) for receivers in excess of one, Zone 1, 5s. ; Zone 2, 3s. 6d.

Zone 1 is the area within 250 miles of a National Broadcasting Station. Zone 2 is the remainder of the Commonwealth.

Under the Australian Broadcasting Act 1942–1946 the Australian Broadcasting Commission received the following amounts (in parentheses) out of the fee for each broadcast listener's licence :—20s. (11s.), 14s. (11s.), 10s. (5s. 6d.), 7s. (5s. 6d.), 5s. (3s.), 3s. 6d. (3s.). This procedure was repealed, however, by an amendment to the Australian Broadcasting Act, assented to on the 6th December, 1948, whereby the Commission prepares estimates of its receipts and expenditure for each financial year and submits these estimates to the Minister. Appropriations are made by Parliament for the purposes of the Commission and these, together with all other moneys received by the Commission, are paid into an account in the Commonwealth Bank of Australia. From this account all costs, charges, expenses, etc., incurred by the Commission in the exercise of its powers and functions under the Act are defrayed. For particulars of the financial operations of the Commission *see* Chapter XVII.—Public Finance of this Year Book.

(ii) *Commercial Broadcasting Stations.* The services of other broadcasting stations are conducted by private enterprise under licence from the Postmaster-General. Licences are granted on conditions which ensure satisfactory alternative programmes for listeners. The fee for a broadcasting station licence is £25 per annum, plus one-half of one per cent. of the gross earnings from the operations of a station which has made a profit in the year preceding. The maximum initial period of a licence is three years, and it is renewed for a period of one year at the discretion of the Postmaster-General. Licensees of these stations rely for their income on revenue received from the broadcasting of advertisements and other publicity. The number of these stations in operation at 30th June, 1950, was 102 and there are other stations in prospect.

(iii) *Radio Inductive Interference.* The Postmaster-General's Department takes active measures to suppress, so far as possible, interference with broadcast reception resulting from the radiations of energy from electrical machinery and appliances. During the year 1949–50, 7,743 instances of interfering noises were eliminated with the co-operation of the owners of the offending equipment (8,293 in 1948–49).

(iv) *Prosecutions under the Wireless Telegraphy Act.* During the year 1949–50, 2,766 persons were convicted for using unlicensed broadcast receiving equipment (2,184 in 1948–49). The total fines and costs amounted to £7,359 (£4,716 in 1948–49).

5. **Oversea Communication by Wireless.**—(i) *General.* For particulars of the inception of the beam radio service in 1927 and of the events leading up to the constitution of the Oversea Telecommunications Commission in 1946 *see* Official Year Book No. 37 and earlier issues.

(ii) *International Traffic.* Particulars of the international telegraphic traffic by radio are not available separately, but are included with the particulars of the oversea traffic by cable. The combined particulars are shown on pp. 200–1 of this issue.

(iii) *Coast Stations.* There are 23 wireless stations established at points around the Australian coast and 6 about the coast of Papua and New Guinea. During 1949–50 these stations handled 424,312 messages (345,233 paying, 9,693 service and 69,386 weather) with a total of 7,000,058 paying words. Corresponding figures for 1948–49 were 409,474 messages (310,199 paying, 30,696 service and 68,579 weather) with 6,205,886 paying words. For further information *see Transport and Communication Bulletin* No. 41, 1949–50 issued by this Bureau.

---

* For particulars of the increases in fees as from 1st January, 1952 *see* Appendix to this volume.

CHAPTER VI.

EDUCATION.

§ 1. General.

1. **Evolution of Educational Systems of the States.**—As the first settlement in Australia was in New South Wales, it was but natural that Australian education should have had its beginning in that State, and consequently the mother State has played a leading part in the evolution of educational method and system in Australia. Detailed particulars may be obtained from the various reports of the State Education Departments. The subject is dealt with in some detail in the first two issues of the Official Year Book, which also contain a more or less detailed account of the origin and earlier development of the educational systems of the other States.

2. **Later Development in State Educational Systems.**—Issues of the Official Year Book up to No. 22 contain an outline of later developments of the educational systems of the various States. The educational systems of the States may now be considered as more or less homogeneous entities, the various stages succeeding one another by logical gradation from kindergarten to university.

3. **School Age.**—The statutory school age for children in each State, set out briefly, is as follows :—New South Wales, 6 to 15 years ; Victoria, 6 to 14 years ; Queensland, 6 to 14 years ; South Australia, 6 to 14 years ; Western Australia, 6 to 14 years ; and Tasmania, 6 to 16 years. Legislation was passed in 1943 in Victoria and Western Australia increasing the school leaving age to 15 years, and in 1946 in South Australia enabling the Governor-in-Council to raise the leaving age by proclamation to an age not exceeding 15 years, but none of these provisions had been proclaimed at the end of December, 1951.

It is provided in some States that where a child is living outside stated distances from a State school, the age at which the child must commence school is increased. Provision is also made that a scholar having attained a certain standard of education may leave school before reaching the statutory leaving age.

At the 1936 Conference of Directors of Education a resolution was passed urging the necessity of raising the compulsory school leaving age to 15 years. This resolution was submitted to a conference in Sydney of Ministers of Education who agreed to recommend to their respective Governments legislation to implement the proposal by the year 1940, but owing to war conditions its operation was postponed.

4. **Australian Council for Educational Research.**—This Council was constituted on 10th February, 1930, as the result of an endowment from the Carnegie Corporation of New York. The endowment terminated in December, 1942, by which time the total value in Australian currency of the annual payments had amounted to £120,000. The Council now receives grants from the Commonwealth Government and the six State Governments amounting to £10,000 a year.

The Council consists of nine members of whom six are elected by State Institutes for Educational Research established in each of the Australian States. Operations are conducted through a Director assisted by a professional and clerical staff of about twenty persons. The functions of the Council are to conduct surveys and inquiries in the educational field, to make grants to approved investigators, to act as a centre of information on educational developments both within Australia and overseas, to provide services of a technical character such as those connected with the assessment of knowledge and aptitude, and to provide training for research workers. In general, through the publication of reports and in other ways, the Council aims at improving the standards of education and at stimulating thought about educational problems. Over 100 reports have been published. These include a series of general Reviews of Education in Australia of which three numbers have so far appeared, the latest covering the years 1940–1948. The Council also issues a series of information bulletins.

The Council is autonomous, but maintains close contact with State educational authorities, with the Commonwealth Office of Education, with the Universities and with other educational bodies. Its present investigations include a comparative survey of the courses of study and examinations for children between ten and thirteen years, made at the request of the State Education Departments, and a study of the prediction of success of University students.

During the 1939–45 War the Council was called upon for advice and service by a number of Commonwealth departments. The Council acts as the chief centre in Australia for the preparation and distribution of standardized tests of general intelligence, special aptitude, and educational attainment. It has set up a Test Division to deal with this aspect of the work.

The head-quarters of the Council are at 147 Collins-street, Melbourne, C.1, Victoria.

§ 2. Census Records.

Persons Receiving Instruction.—The Census and Statistics Act 1905–1938 specified "Education" as a subject for inquiry at a Census, but did not indicate the nature or range of the information to be furnished. The Census and Statistics Act 1946, however, provided for the omission of this subject. At earlier Censuses an inquiry regarding the degree of education was restricted to a question as to ability to read and write, but under the system of compulsory education the number of persons in Australia who reach maturity without being able to read and write is very small, and this question was omitted at the 1933 Census. The only question asked concerned those receiving instruction at the time of the 1933 Census and related to the nature of the school they were attending. Details for the Censuses of 1911, 1921 and 1933 may be found on page 227 and the religions of scholars on page 228 of Official Year Book No. 37.

§ 3. State Schools.

1. **General.**—The State schools, or, as they are sometimes termed, the "public" schools, of Australia comprise all schools directly under State control, in contradistinction to the so-called "private" schools, the bulk of which, though privately managed, nevertheless cater for all classes of the community. Separate information regarding technical education is given in § 9, but the junior technical schools are included hereunder. The returns include figures relating to correspondence schools as well as subsidized schools, but evening schools and continuation classes, where such are in existence, are not included, but are dealt with separately in par. 3 (v) following.

2. **Returns for Year 1949.**—(i) *General.* The following table shows for 1949 the number of State Schools, together with the teachers employed, teachers in training and the number of individual children enrolled :—

STATE SCHOOLS, 1949.

State or Territory.	Schools open at end of year.	Teachers Employed (excluding Teachers in Training).	Teachers in Training.	Net Enrolment.
New South Wales(*a*)	2,603	12,563	2,450	394,301
Victoria	2,145	8,899	1,252	232,048
Queensland	1,556	5,533	810	154,919
South Australia	728	3,285	425	82,920
Western Australia	522	2,365	404	(*b*) 65,676
Tasmania	315	1,409	242	39,632
Northern Territory(*c*)	5	36	..	1,136
Australia—1949	7,874	34,090	5,583	970,632
1948	7,971	33,287	5,194	928,067

(*a*) Includes Australian Capital Territory. (*b*) Average weekly enrolment. (*c*) Year ended 30th June, 1950.

(ii) *Average Enrolment and Attendance.* The methods of calculating enrolment are not identical throughout the States. The unit in South Australia is the daily enrolment, while New South Wales, Victoria, Western Australia and Tasmania employ the weekly enrolment. In Queensland no average enrolment is compiled, and the mean of the four quarterly gross enrolments is the only figure available.

As with enrolments, there is not complete uniformity in arriving at the average attendance, but most of the States aggregate the attendances for the year and divide by the number of school sessions. New South Wales and Western Australia, however, employ averages of term averages. The matter of securing uniformity in these respects has been under consideration for some time, and the Australian Council for Educational Research, already referred to in § 1, par. 4, is devoting attention to the question of securing greater uniformity in methods of collection and presentation of educational data generally. This matter was discussed at a meeting of Directors of Education at a conference held in Sydney in July, 1947. The average enrolment and attendance in each State during 1949 are shown below :—

STATE SCHOOLS : AVERAGE ENROLMENT AND ATTENDANCE, 1949.

State or Territory.	Average Weekly Enrolment.	Average Daily Attendance.	Ratio of Attendance to Enrolment.
			%
New South Wales	362,258	319,646	88.24
Victoria	218,308	195,453	89.53
Queensland	153,550	128,717	83.83
South Australia	78,982	71,996	91.15
Western Australia	65,676	60,504	92.12
Tasmania	37,346	33,465	89.61
Northern Territory(a)	1,136	1,019	89.70
Australia—1949	917,256	810,800	88.39
1948	869,861	770,554	88.58

(a) Year ended 30th June, 1950.

The ratio of attendance to enrolment is lowest in Queensland, but this figure is not comparable with those of the other States, as no average enrolment is available for Queensland.

Extraordinary epidemics apart, it would appear from the steadiness of the returns in recent years that the ratio of attendance to enrolment is approaching its maximum under present conditions in Australia. Recurring epidemics of contagious diseases, minor illnesses, bad weather and long distances are all serious factors which affect the full attendance of pupils at school.

The average attendance at the State Schools in Australia is shown below for the year 1891 and at varying intervals to 1949 :—

STATE SCHOOLS : AVERAGE ATTENDANCE, AUSTRALIA.

Year.	Total Population. (a)	Average Attendance.	Year.	Total Population. (a)	Average Attendance.
	'000			'000	
1891	3,421	350,773	1941	7,144	732,116
1901	3,825	450,246	1945	7,430	726,440
1911	4,574	463,799	1946	7,518	731,058
1921	5,511	666,498	1947	7,639	754,799
1931	6,553	817,262	1948	7,795	770,554
1933	6,657	805,334	1949	8,051	810,800
1939	7,005	744,095			

(a) At 31st December.

It is possible, for some Census years, to relate with reasonable accuracy the average attendance of scholars at State Schools to the number of children who are approximately of school age. For this purpose the ages 5 to 15 years, both included, have been taken and the average attendance per thousand children was :—1891, 455 ; 1901, 464 ; 1911, 477 ; 1921, 544 ; and 1933, 585. Although other factors might have affected the results in a minor degree it would appear that considerable improvement has taken place in school attendance.

(iii) *Schools in the Northern Territory.* During 1949–50 five public schools were in operation, the number of pupils enrolled being 1,130, with an average daily attendance of 1,019. By arrangement between the Commonwealth and the South Australian Governments, the South Australian Education Department undertook the work of education in the Northern Territory from 1st January, 1945. The Commonwealth Government provides the schools and furniture, while the South Australian Education Department provides the teachers and determines the curricula for the various types of schools.

For further particulars of education facilities in the Northern Territory *see* Chapter X.—The Territories of Australia, Northern Territory, § 10.

(iv) *Schools in the Australian Capital Territory.* During 1949 ten State Schools were in operation in the Australian Capital Territory ; individual pupils enrolled numbered 2,235 ; and average attendance was 2,020. By arrangement with the Commonwealth Government these schools are conducted by the New South Wales Education Department in the same way as the ordinary State Schools, the Department being recouped for expenditure. The cost of the teaching staff in 1949–50 was £60,000, while the cost of general maintenance items for the year amounted to £34,423. Ample provision has been made for both primary and secondary education, and this will be increased to meet requirements. The figures quoted exclude enrolment, etc., at the Canberra Technical College and the Evening Continuation School. A reference to the Canberra University College will be found in § 6, par. 10. For further particulars of education facilities in the Australian Capital Territory *see* Chapter X.—The Territories of Australia, Australian Capital Territory, par. 10.

3. Distribution of Educational Facilities.—(i) *In Sparsely-settled Districts.*

(*a*) *General.* The methods adopted in the various States to carry the benefits of education into the remotest and most sparsely-settled areas are set out in some detail in previous issues of the Official Year Book (*see* No. 22, pp. 430–1).

(*b*) *Correspondence Teaching.* Teaching by correspondence has been adopted to meet the needs of children out of reach of the ordinary means of education, including those prevented from attending school through physical ailment. Approximately 14,600 children received instruction in this way during 1949, the respective numbers in each State being : New South Wales, 5,419 ; Victoria, 1,193 ; Queensland, 4,884 ; South Australia, 1,141 ; Western Australia, 1,646 ; and Tasmania, 298.

(ii) *Centralization of Schools.* The question of centralization of schools adopted so successfully in America and Canada has received considerable attention in Australia. It is recognized that a single adequately staffed and well equipped central institution can give more efficient teaching than a number of small scattered schools in the hands of less highly trained teachers, and the small schools in some districts were therefore closed and the children conveyed to the central institution. The principle was first adopted in New South Wales in 1904, and in 1949 a sum of £153,389 was expended in boarding allowances and conveyance to central schools. Cost of conveyance to State Schools in Victoria during 1949–50 amounted to £440,186. In Queensland during 1949–50 the cost of transport by rail, road and boat, amounted to £74,301. In South Australia the sum of £132,375 was disbursed in travelling expenses of school children in 1949, while £282,800 was spent in Western Australia during 1949–50, £108,885 in Tasmania in 1949 and £15,898 in the Australian Capital Territory in 1949–50.

(iii) *Area Schools.* A new feature in education is the "Area School" established since 1936 in rural districts in Tasmania. These schools cater for certain groups of children brought from surrounding districts by buses and give instruction with a distinct rural inclination. In 1949 there were 22 area schools in operation having an average weekly enrolment of 6,172 scholars with an average daily attendance of 5,396.

(iv) *Education of Backward and Defective Children.* This subject was referred to at some length in preceding issues of the Official Year Book (*see* No. 22, pp. 431–2).

(v) *Evening Schools.* Evening Continuation Schools have been in existence for many years in some of the States, but their progress has been uncertain. The aim of these schools is to provide a means of furthering the education of those who have left school at the termination of the primary course. Practical and cultural subjects are combined in the curriculum to be of assistance to those attending, in their occupations and their civic life. In New South Wales the 30 Evening Colleges had an average weekly enrolment in 1949 of 7,870, excluding classes for migrants. The colleges are divided into three groups, junior technical, domestic science, and commercial.

(vi) *Higher State Schools.* In all the States higher schools have been established which provide advanced courses of instruction for pupils who have completed the primary grades. Reference to the development of these schools will be found in preceding Official Year Books (*see* No. 22, pp. 433–4).

(vii) *Agricultural Training in State Schools.* Extended reference to the methods adopted in the teaching of agriculture in State Schools was incorporated in preceding Official Year Books (*see* No. 22, pp. 434–7).

(viii) *Medical and Dental Inspection of School Children.* This subject is dealt with in detail in Chapter VIII.—Public Health and Related Institutions.

(ix) *Broadcasts to Schools.* It is estimated that about 60 per cent. of all schools in Australia are registered listeners to the Australian Broadcasting Commission's school broadcasts. School broadcasting is recognized by the educational authorities, public and private, as an integral part of Australian school education. Free radio licences were granted to all schools under the Broadcasting Act 1948. The broadcasts, which are designed to supplement the work of the classroom teacher, are programmed throughout Australia on week-days at times decided upon after consultation with the State Education Departments. There are special broadcast sessions for the benefit of correspondence pupils in the outback areas throughout Australia.

School broadcasts cover a wide range of subjects, for all school grades, including English Literature, Music, Art, History, Geography, Social Studies, Current Affairs, Nature Study, Science, Health and Hygiene, and French.

The broadcasts vary in length from 15 to 30 minutes, amounting to a total of about one hour on each school day, and extending through the greater part of the school year.

Audio-visual education, a method combining the radio and film as teaching aids, has been extensively developed in Victoria, where nearly half of the registered listening schools are also equipped with film-strip projectors. Radio-film broadcasts have also been used in experimental stages in Western Australia, South Australia and Tasmania.

The Kindergarten of the Air, primarily designed for the benefit of children unable to attend kindergarten schools, is broadcast on week-days throughout the year, and relayed over all regional and short-wave stations; it is also broadcast from Port Moresby and over W.L.K.S., the station of the Army of Occupation in Japan. A weekly excerpt is broadcast by Radio Australia.

During UNESCO week school sessions are broadcast both on National relay and in State programmes.

In collaboration with the Commonwealth Office of Education, a series of two weekly broadcasts has been arranged to help foreign migrants with their English. The scripts for the series, which is called "English for New Australians", are written by experts appointed by the Commonwealth Office of Education, and produced by the Australian Broadcasting Commission. These sessions are broadcast throughout Australia.

4. **Training Colleges.**—The development of the training systems of the various States is referred to at some length in earlier issues of the Official Year Book (*see* No. 22, pp. 437–9).

5. **Expenditure.**—(i) *Maintenance — All Schools.* The net expenditure on maintenance in all grades of schools, excepting senior technical, and in Victoria and (until 1946) Tasmania junior technical, schools, and the cost per head of average attendance for 1939 and the five years ended 1949 are shown in the following table. The figures do not include expenditure on buildings, which is shown separately in a subsequent table. In all expenditure tables the figures for Victoria, Queensland and Western Australia relate to the financial year ended six months later than the calendar year.

STATE SCHOOLS : NET EXPENDITURE ON MAINTENANCE.

Year.	N.S.W. (*a*)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Terr.	Total.

(*a*) Gross figures, receipts not being available. (*b*) Includes junior technical schools. *See* above.

(ii) *Maintenance—Secondary Schools.* The figures shown in the preceding table refer to expenditure on maintenance of all State primary and secondary schools, excluding senior technical colleges. It has been the practice of the State Education Departments to give separate information in regard to the cost of secondary education. The difficulty of making any satisfactory allocation of the kind, however, will be understood when it is realized that both elementary and higher education are in some instances given in the same school and by the same teacher. Unfortunately, too, the term "secondary" has not the same meaning in all States. It might be mentioned here that similar difficulties arise in connexion with the apportionment amongst the various branches of expenditure on administration, inspection and the training of teachers. The figures quoted in regard to cost hereunder have been mainly extracted from the Reports of the State Education Departments, and are subject to those qualifications.

STATE SECONDARY SCHOOLS : EXPENDITURE ON MAINTENANCE.

State.	1948.			1949.		
	Cost.	Cost per Head of Population.		Cost.	Cost Per Head of Population.	
	£	s.	d.	£	s.	d.
New South Wales	2,447,484	16	2	2,714,690	17	6
Victoria	1,250,968	11	10	1,529,059	14	1
Queensland	293,610	5	2	333,839	5	9
South Australia	464,180	14	1	488,036	14	6
Western Australia	384,574	14	9	404,602	14	10
Tasmania (*a*)	185,096	14	0	185,510	13	7

(*a*) Includes high and junior technical schools.

The figures in all cases exclude the cost of buildings. In Queensland, the figure quoted excludes the cost of the Agricultural High School and College, which amounted in 1948-49 to £79,968 and in 1949-50 to £98,604. For Western Australia the total for 1948-49 includes £95,717 and for 1949-50, £83,775 on account of "post primary" education.

(iii) *Buildings.* Expenditure on State School buildings, excluding senior technical colleges, for the years 1939 and 1945 to 1949 was as follows :—

STATE SCHOOLS : EXPENDITURE ON BUILDINGS.

(Including Loan Fund Expenditure.)

(£.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Terr.	Total.
1939	411,720	206,481	174,725	85,539	56,994	60,011	539	996,009
1945	425,397	256,048	114,069	165,642	99,489	70,288	2,303	1,133,236
1946	569,660	376,557	149,354	152,205	137,835	116,215	2,318	1,504,144
1947	747,294	540,036	275,153	231,967	203,926	92,462	2,261	2,093,099
1948	1,069,789	1,017,227	306,776	261,683	303,213	185,286	1,790	3,145,764
1949	1,277,015	2,015,972	442,753	355,494	454,207	288,057	12,522	4,846,020

The totals for the various States in 1949 include the following amounts expended from loan and other funds; figures for 1948 are shown in brackets—New South Wales, £685,436 (£477,869); Victoria, £1,886,822 (£858,856); Queensland, £313,392 (£203,787); South Australia, £236,169 (£167,218); Western Australia, £309,082 (£198,518); and Tasmania, £225,239 (£134,344).

(iv) *Total.* The net total cost of education in State Schools, including buildings, during the years 1939 and 1945 to 1949 was as follows :—

STATE SCHOOLS : NET TOTAL COST.

(£.)

Year.	N.S.W. (a)	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Terr.	Total.
1939	5,010,096	2,873,575	1,656,124	939,576	787,494	380,627	7,341	11,654,833
1945	5,811,809	3,521,249	2,170,478	1,266,111	1,016,812	562,394	7,488	14,356,341
1946	6,732,128	4,296,310	2,416,132	1,385,905	1,220,405	670,383	12,480	16,739,743
1947	8,289,917	5,073,401	2,740,374	1,765,437	1,639,811	b 780,617	17,425	20,306,982
1948	9,135,115	6,243,610	3,205,609	1,965,272	1,791,406	b 995,628	27,370	23,364,010
1949	10,703,894	8,318,568	3,828,027	2,308,615	2,255,466	1,216,348 (b)	47,844	28,678,762

(a) Gross figures, receipts not being available. (b) Includes junior technical schools. *See* below.

The figures in this and the preceding tables refer to all grades of State Schools, with the exception of senior technical, and in Victoria and (until 1946) Tasmania junior technical, schools. Including buildings, the net cost per scholar in average attendance for the whole of the State schools in Australia amounted in 1948 to £30 6s. 5d., and in 1949 to £35 7s. 5d. as compared with £4 9s. 3d. in 1901.

6. **School Banking.**—Particulars of School Savings Banks are included in Chapter XVI.—Private Finance.

§ 4. Private Schools.*

1. **Returns for 1949.**—The following table shows the number of private schools together with the teachers engaged therein, and the enrolment and average attendance in 1949 :—

PRIVATE SCHOOLS, 1949.

State or Territory.	Schools.	Teachers.	Enrolment.	Average Attendance.
New South Wales(a)	716	5,638	118,560	106,672
Victoria	472	3,015	86,096	(b) 77,486
Queensland	250	1,783	41,106	37,177
South Australia	146	920	18,426	16,424
Western Australia	198	798	20,280	18,988
Tasmania	59	360	8,497	7,121
Northern Territory(c)	2	12	341	296
Total—1949	1,843	12,526	293,306	264,164
1948	1,835	12,408	281,354	251,092

(a) Includes Australian Capital Territory. (b) Estimated. (c) Year ended 30th June, 1950.

---

* Private schools include all schools not wholly under State control. The term "private," though popularly applied, is, of course, a misnomer.

The Roman Catholic schools comprise the largest group of private schools in Australia. On the basis of the figures available, approximately 222,000 children, or 76 per cent. of the total in private schools, are educated in Roman Catholic schools.

The figures for Queensland include the returns from Grammar schools, of which there are eight—five for boys and three for girls, with an enrolment of 966 boys and 645 girls. These schools are governed by boards of trustees, partly nominated by the Government, and partly by the subscribers to the funds. The trustees make regulations regarding the fees of scholars, the salaries of teachers, and generally for the management of the schools. The Government endowment received in 1949–50 amounted to £32,200. In addition, a sum of £17,133 was received by way of fees for the tuition of State scholarship holders while £62,049 was paid to denominational schools. The Grammar schools are inspected annually by officers of the Department of Public Instruction.

2. **Growth of Private Schools.**—The enrolment and average attendance at private schools in 1891 and at varying intervals to 1949 were as follows :—

PRIVATE SCHOOLS : ENROLMENT AND ATTENDANCE.

Year.	Enrolment.	Average Attendance.	Year.	Enrolment.	Average Attendance.
1891	124,485	99,588	1945	272,814	249,024
1901	148,659	120,742	1946	276,561	252,726
1911	160,794	132,588	1947	280,543	257,430
1921	198,688	164,073	1948	281,354	251,092
1931	221,387	189,665	1949	293,306	264,164
1939	247,482	219,171			

3. **Registration of Private Schools.**—Conditions in regard to the registration of private schools were referred to in previous Official Year Books (*see* No. 18, p. 451).

§ 5. Free Kindergartens.

The following information regarding Free Kindergartens has been compiled from particulars supplied by the principals of the chief institutions or the organizing secretary in each State, except in the case of Western Australia where the details were furnished by the Education Department. It refers to kindergarten unions or associations, and excludes the kindergarten branches in the Government schools of the various States.

FREE KINDERGARTENS, 1950.

State.	No. of Schools.	Average Attendance.	Permanent Instructors.	Student Teachers.	Voluntary Assistants.
New South Wales ..	33	1,491	86	32	..
Victoria..	43	1,541	93	..	65
Queensland	6	250	13	..	..
South Australia(a) ..	67	2,171	135	..	8
Western Australia ..	35	695	55	6	..
Tasmania	10	325	20	..	..
Total—1950 ..	194	6,473	402	38	73
1949 ..	186	6,446	385	72	112

(a) Includes affiliated suburban and country centres.

Only 26 of these 194 kindergartens in 1950 were located outside metropolitan areas; these were as follows:—New South Wales—three at Newcastle; Victoria—two each at Geelong and Ballarat, one each at Bairnsdale, Castlemaine, Euroa, Horsham, Maryborough, Mildura and Red Cliffs; South Australia—one at Nuriootpa; Western Australia—two at Kalgoorlie and one each at Carnarvon, Geraldton, Kojunup, Merredin and Northam; Tasmania—two at Launceston and one each at Devonport and St. Mary's. In each capital city, excepting Hobart, there is a training college and the number of students in training during 1950 was 114 in Sydney, 117 in Melbourne, 29 in Brisbane, 29 in Adelaide, and 31 in Perth.

§ 6. Universities.

1. **Origin and Development.**—A brief account of the origin and development of the Universities in the various States is given in preceding issues of the Official Year Book (*see* No. 22, pp. 442–3). Details of the Australian National University for the year 1950 are shown in paragraph 9 and for the New South Wales University of Technology in paragraph 12 following.

2. **Teaching and Research Staff.**—The following table shows the number of professors, readers, associate and assistant professors, lecturers in charge, lecturers full-time and part-time, demonstrators and tutors full-time and part-time, honorary lecturers and demonstrators, on the teaching and research staffs of the Universities during the years 1948 to 1950:—

UNIVERSITIES: TEACHING AND RESEARCH STAFF, 1950.

University.	Professors.	Readers, Associate Professors, Assistant Professors, Lecturers in Charge.	Lecturers.(*a*)		Demonstrators and Tutors.		Honorary Lecturers and Demonstrators.	Total.
			Full-time.	Part-time.	Full-time.	Part-time. (*b*)		
Sydney	51	17	261	358	74	47	42	850

1949	170	102	705	820	236	267	92	2,392
1948	159	97	680	696	274	237	104	2,247

(*a*) Includes Senior Lecturers and Assistant Lecturers. (*b*) Excludes part-time Demonstrators in 1950. (*c*) Includes Department of External Studies, 10.

The Conservatorium of Music in Sydney is attached to the Education Department, but in Melbourne and in Adelaide the Conservatorium of Music is under the control of the University.

3. **Students.**—(i) *Total.* The number of students, including Commonwealth Recordstruction Training Scheme students, enrolled for courses at the Universities during the years 1948 to 1950 is shown in the following table.

UNIVERSITIES : TOTAL STUDENTS ENROLLED, 1950.

University.	Degree Courses.	Diploma Courses. Post-Graduate.	Diploma Courses. Sub-Graduate.	Certificate Courses.	Miscellaneous Subjects.	Total. (a)
Sydney	8,219	168	715	..	388	9,383

Total 1950, ..	24,224	394	2,629	614	2,882	30,630
1949 ..	25,230	345	2,810	605	2,787	31,753
1948 ..	25,857	385	2,892	620	2,733	32,453

(a) Adjustment made for students enrolled for more than one course. (b) Includes 15 students enrolled but attending Canberra University College.

Of the total students in 1950, 24,023 were males and 6,607 females. Included in those enrolled for degrees were 20 enrolled for higher degree courses in Sydney, 260 in Melbourne, 11 in Queensland, 129 in Adelaide, 48 in Western Australia, 13 in Tasmania, 9 at the Canberra University College, and 6 at the New South Wales University of Technology.

(ii) *Commonwealth Reconstruction Training Scheme Students.* The number of Commonwealth Reconstruction Training Scheme students enrolled for courses at the Universities during 1948 to 1950 is shown in the following table :—

UNIVERSITIES : COMMONWEALTH RECONSTRUCTION TRAINING SCHEME STUDENTS ENROLLED, 1950.

University.	Degree Courses.	Diploma Courses. Post-Graduate.	Diploma Courses. Sub-Graduate.	Certificate Courses.	Miscellaneous Subjects.	Total (a)
Sydney	2,139	70	97	..	..	2,306

Tasmania (Hobart) ..	114	7	..	2	15	137
New England University College	11	5	..	..	..	16
Canberra University College	51	..	17	..	6	74
New South Wales University of Technology	21	..	..	..	..	21
Total 1950 ..	5,941	129	643	265	259	7,236
1949 ..	8,300	121	930	310	431	10,087
1948 ..	10,182	80	1,287	337	614	12,464

(a) Adjustment made for students enrolled for more than one course. (b) Includes 2 students enrolled but attending Canberra University College.

Of the total Commonwealth Reconstruction Training Scheme students in 1950, 7,070 were males and 166 females. Included in those enrolled for degrees were 50 enrolled for higher degrees in Melbourne, 2 in Queensland, 16 in Adelaide, 13 in Western Australia, and 2 in Tasmania.

(iii) *New Students Enrolled.* The number of new students, including Commonwealth Reconstruction Training Scheme students, enrolled for courses at the Universities during the year 1950 is shown in the following table :—

UNIVERSITIES : NEW STUDENTS ENROLLED, 1950.

University.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Total. (a)
		Post-Graduate.	Sub-Graduate.			
Sydney	2,012	..	428	..	..	2,409
Melbourne	1,345	..	68	8	361	1,782
Queensland (Brisbane) ..	611	1	110	61	122	905
Adelaide	430	..	187	..	346	963

New England University College	64	..	1	..	..	65
Canberra University College	53	..	12	..	66	131
New South Wales University of Technology	155	..	..	..	..	155
Total	5,228	2	806	81	949	7,034

(a) Adjustment made for students enrolled for more than one course.

Of the total new students enrolled in 1950, 5,046 were males and 1,988 females Included in those enrolled for degrees were 13 enrolled for higher degree courses in Melbourne, 2 in Queensland, and 5 at the Canberra University College.

(iv) *New Commonwealth Reconstruction Training Scheme Students.* The number of new Commonwealth Reconstruction Training Scheme students enrolled for courses at the Universities during 1950 is shown in the following table :—

UNIVERSITIES : NEW COMMONWEALTH RECONSTRUCTION TRAINING SCHEME STUDENTS ENROLLED, 1950.

University.	Degree Courses.	Diploma Courses.		Certificate Courses.	Miscellaneous Subjects.	Total.
		Post-Graduate.	Sub-Graduate.			
Sydney	156	..	43	..	..	199
Melbourne	97	..	..	..	17	114
Queensland (Brisbane) ..	31	..	28	3	6	68
Adelaide	9	..	15	..	10	34
Western Australia (Perth) ..	27	..	..	..	5	32
Tasmania (Hobart) ..	11	..	..	..	1	12
New England University College	..	..	..	..	..	..
Canberra University College	6	..	1	..	4	11
New South Wales University of Technology	4	..	..	..	..	4
Total	341	..	87	3	43	474

Of the 474 new Commonwealth Reconstruction Training Scheme students 460 were males, including 2 males enrolled in Melbourne for higher degrees, and 14 females.

4. **University Receipts.**—The receipts of the Universities are derived principally from State and Commonwealth Government grants, students' fees, and income from private foundations, etc. From all sources other than new bequests the receipts during 1950 for general university functions were as shown in the table below. In South Australia Government grants and income from private foundations include amounts in respect of the Waite Agricultural Research Institute. The receipts and expenditure for extra-university activities are shown in par. 7 following.

UNIVERSITIES : RECEIPTS, GENERAL ACTIVITIES, 1950.

(£.)

University.	Government Grants.	Students' Fees.	Interest, Rent, Dividends and Donations.	Other.	Total.
Sydney	338,264	326,051	52,922	17,978	735,215
Melbourne	545,099	184,997	32,751	43,166	806,013
Queensland (Brisbane) ..	323,197	78,862	17,963	18,769	438,791

Canberra University College	31,300	4,189	111	470	36,070
New South Wales University of Technology	80,055	6,466	..	42	86,563
Total 1950 ..	1,967,625	696,546	144,923	135,356	2,944,450
1949 ..	1,485,278	771,298	145,941	127,731	2,530,248
1948 ..	1,202,504	765,984	144,541	124,281	2,237,310

The figures in the foregoing table do not include the value of new foundations received by the Universities, which, in 1950, were as follows:—Sydney, £41,709; Melbourne, £50,373; Queensland, £15,484; Adelaide, £80,021; Tasmania, £1,077; New England University College, £2,503; Canberra University College, £205; and New South Wales University of Technology, £74,172.

5. **Principal University Benefactions.**—In preceding issues of the Official Year Book information is given in some detail in regard to the extent to which the Universities have benefited from private munificence. Space will permit of reference herein to the more important benefactions only.

The endowments to the Sydney University include the Challis Fund, £374,080; the G. H. Bosch Fund, £268,029; the P. N. Russell Fund, £101,457; the Oswald Watt Fund, £115,744; and the Fisher Estate, £43,386. In addition, the University receives a large annual revenue from the trustees of the McCaughey bequest. Excluding the principal of the latter, the credit balances of the private foundations amounted to £1,710,291 at 31st December, 1950.

Endowments to the Melbourne University include Mr. Sidney Myer's gifts for various special and general purposes amounting to £60,000, while Sir Samuel Gillott, Mr. Edward Wilson (Argus Trust), and Sir Samuel Wilson contributed £41,000, £34,000 and £30,000 respectively. The estate of the late Miss Helen Mackie provided £50,000 for the endowment of pre-clinical chairs, while Mr. R. B. Ritchie's gifts for the endowment of a Chair of Economics amounted to £30,000, and two sums of £30,000 and £25,000 were received from the Supreme Court Library Fund for the endowment of a Chair of Public Law and for the development of law teaching respectively. Dr. James Stewart founded scholarships in Anatomy, Medicine and Surgery to the capital value of £26,000. The Hon. Francis Ormond contributed £20,000 to the University as an endowment for the Chair of Music and for scholarships in music, and the late Dr. F. Haley left £70,000 for medical research. Bequests of approximately £20,000 each for general purposes were made by Mr. John Hastie and Mr. C. D. Lloyd. The late Sir John Higgins bequeathed £26,000 for research scholarships in industrial chemistry and biochemistry as related to the pastoral and agricultural industries. Mr. R. J. Fletcher gave £20,000 for medical research. The late Mr. E. Truby Williams gave £54,000 for the Conservatorium of Music, the library and general purposes. Mr. Russell Grimwade has given £50,000 for a new school of biochemistry, and the trustees of the W. L. Baillieu Trust have given £47,795 of a gift of about £100,000 with which a new library will be built. The *Melbourne Herald* gave £30,000 to establish the first Chair of Fine Arts in Australia. From the estate of the late Mr. W. P. Greene £25,000 has been received for cancer research and from the Baillieu family £30,000 for the erection of a Metallurgy Research School. A bequest of £22,500 has been received from the estate of the late Dr. Georgina Sweet to provide three fellowships in Economic Zoology, Medicine and Economic Geology. Of £30,000 promised by an anonymous benefactor to provide for a Vice-Director of the Conservatorium of Music, £18,000 has been received. Amounts of £20,000 were given by the family of the late Sir Thomas Lyle for a research fellowship in physics and by Nicholas Pty. Ltd. for building a School of Nutrition.

Queensland University to 30th April, 1951 had received £275,736 from the McCaughey estate and £50,188 from the Walter and Eliza Hall Trust, while the Hon. T. C. Beirne gave £20,000 in 1935 for the endowment of a Chair of Law in Queensland. The permanent site for the University and other land valued at £62,000 were presented by Dr. and Miss Mayne. In 1937 the trustees of Mr. W. Robertson bequeathed £19,400 for the Chair of Agriculture.

The chief benefactors to the Adelaide University have been Sir George Murray, and his sister Miss M. T. Murray, £134,000 ; Mr. Peter Waite and his daughter Elizabeth Macmeikan, £120,000 ; Sir Thomas Elder, £100,000 ; Sir Langdon Bonython, £72,000 ; Mr. T. E. Barr Smith, £44,000 ; Dr. F. Lucas Benham, £44,000 ; Mrs. R. F. Mortlock and her son Mr. J. T. Mortlock, £30,000 ; Mrs. Jane Marks, £30,000 ; Broken Hill Prop. Co. Ltd., £30,000 ; Mr. Edward Neale, £28,000 ; family of Mr. John Darling, £25,000 ; Sir William Mitchell, £25,000 ; Mrs. A. M. Simpson and Miss A. F. Keith Sheridan, £20,000 ; Sir Walter Hughes, £20,000 ; and Mr. R. Barr Smith and family, £20,000.

Under the will of Sir Winthrop Hackett the University of Western Australia received £425,000 for the erection and maintenance of University buildings and for studentships, scholarships, bursaries and other financial help for deserving students. In addition, an endowment of £18,000 was made in 1913 for the Hackett Chair of Agriculture. The late Robert Gledden bequeathed an estate valued at £60,000, particularly to provide travelling scholarships, and numbers of bequests, aggregating about £55,000, have been made to the University mainly for the establishment of a medical school or research in connexion therewith.

6. University Expenditure.—The principal item of disbursements under the general University activities consists of the salaries of teaching and research staff, representing 69.4 per cent. of the total in 1950 compared with 67.9 per cent. in 1949 and 68.5 per cent. in 1948. The following table shows the expenditure, excluding capital expenditure on buildings, during the years 1948 to 1950 :—

UNIVERSITIES : EXPENDITURE, GENERAL ACTIVITIES, 1950.

7. Extra-University Activities.—(i) *General.* The tables shown in paragraphs 4 and 6 relate to the general University activities while those following show the financial position of all extra-university activities. The heterogeneous character of the items in the statements for these activities varies to such extent between the Universities that comparisons of the totals are misleading, but they include all items excluded from the general statement and give useful information within limits.

(ii) *Receipts, Extra-University Activities.* The following table shows the main receipts for the years 1948 to 1950:—

UNIVERSITIES : RECEIPTS, EXTRA ACTIVITIES, 1950.

(£.)

University.	Government Grants.	Interest, Rent, and Dividends.	Candidates' Fees, Public Examinations.	Special Research Grants.	Other.	Total.
Sydney	16,750	194,044	4,395	39,393	2,672	257,254

9. **The Australian National University.**—By the Australian National University Act No. 22 of 1946 (assented to 1st August, 1946, proclaimed to commence on 7th February, 1947) as amended by Acts Nos. 21 and 56 of 1947, provision was made for the establishment and incorporation of a University in the Australian Capital Territory. The University is governed by a Council consisting of two representatives elected by each House of Parliament, five nominated by the Governor-General, six elected by Convocation, three elected by the teaching staff and three co-opted members. The Vice-Chancellor is an *ex officio* member of the Council.

The University is required by the Act to provide facilities for post-graduate research and may establish research schools including :—

(*a*) A School of Medical Research to be known as " The John Curtin School of Medical Research " ; (*b*) the Research School of Physical Sciences ; (*c*) the Research School of Social Sciences ; and (*d*) the Research School of Pacific Studies.

It may also provide facilities for University education generally, for the incorporation in the University of the Canberra University College and for specialist training for officers of the Public Service. The Council has decided to concentrate initially on the establishment of the Research Schools and the training of research workers.

Prior to 1st July, 1951, when the permanent Council took office, the University was governed by an Interim Council appointed by the Governor-General.

The Chancellor of the University is Viscount Bruce of Melbourne, the Vice-Chancellor of the University is Sir Douglas Berry Copland and the Registrar Mr. R. A. Hohnen.

The senior academic body of the University is the Board of Graduate Studies which consists, in general, of the Directors of Research Schools and Professors. The Board assists the Council by tendering advice on all questions affecting education, learning and research in the University.

The Act provides that after a period of five years from 1st July, 1946 (prior to which the Commonwealth Treasurer granted such funds not exceeding £325,000 per annum as were necessary to meet the expenses of the University) the University is to receive an annual grant of £325,000. In addition, grants for capital works and services have been made in the Parliamentary Estimates.

The establishment and development of the Research Schools have progressed well, and a number of senior appointments to the academic staff have been made. Professor M. L. E. Oliphant, F.R.S., has taken up duty as Director of the Research School of Physical Sciences. Sir Howard Florey, F.R.S., acts as Adviser to the Council on the development of the John Curtin School of Medical Research. Professorial appointments so far made are :—

The John Curtin School of Medical Research—

Professors A. H. Ennor (Biochemistry), A. Albert (Medical Chemistry), F. J. Fenner (Microbiology), J. C. Eccles, F.R.S. (Physiology).

The Research School of Physical Sciences—

Professors E. W. Titterton (Nuclear Physics), J. C. Jaeger (Geophysics), Honorary Professor R. v. d. R. Woolley (Astronomy).

The Research School of Social Sciences—

Professors G. Sawer (Law), T. W. Swan (Economics), P. A. Moran (Statistics), P. H. Partridge (Social Philosophy).

The Research School of Pacific Studies—

Professors W. R. Crocker (International Relations), S. F. Nadel (Anthropology and Sociology), J. W. Davidson (Pacific History), O. H. K. Spate (Geography).

The Librarian is Mr. A. L. G. McDonald.

Each department of the Research Schools accepts a small number of graduate research students of first class calibre, the general minimum entrance requirement being a Master's degree or its equivalent in a University of senior standing. Each student is assigned to a supervisor and pursues a course of research under his direction.

Subject to certain conditions the following degrees may be awarded by the University :—Master of Arts (M.A.), Master of Science (M.Sc.), Doctor of Philosophy (Ph.D.), Doctor of Letters (Litt.D.), Doctor of Science (D.Sc.), Doctor of Laws (LL.D.).

Up to the present time the University has awarded some 65 Research Scholarships to enable younger graduates to obtain further research training in fields of interest to the Research Schools of the University.

An area of 204 acres of land at Acton, Canberra, has been granted to the University and construction is proceeding there on :—

University House—a residential college for single members of the University staff and student body (providing individual living quarters and intended to serve as the centre of the community life of the University) which is expected to be fully in use towards the end of 1953 ;

a building for the Research School of Physical Sciences, expected to be completed in 1952 ;

preparation of the site and construction of ancillary buildings for the John Curtin School of Medical Research.

Buildings formerly occupied by the Canberra Community Hospital remain on the University site and are being used as offices and laboratories for the academic and technical staffs, and to accommodate the Library. For the time being the Department of Medical Chemistry is located in the buildings of the Wellcome Foundation, London ; the Department of Experimental Pathology is at the Oxford University ; while the Department of Biochemistry at the Commonwealth Serum Laboratories, and the Department of Microbiology in the Walter and Eliza Hall Institute, are in Melbourne. It is expected that the departments of the John Curtin School of Medical Research, with the exceptions of the Departments of Medical Chemistry and Experimental Pathology, will be in operation in Canberra towards the end of 1952.

Details of staff and financial operations of the Australian National University for the year 1950 were :—

Staff—(i) Teaching and Research : The John Curtin School of Medical Research—Three professors, two fellows, two research fellows and three research assistants ; The Research School of Physical Sciences—Three professors, five research fellows and a research assistant ; The Research School of Pacific Studies—Three professors, two readers and three research fellows ; The Research School of Social Sciences—Two professors, two readers, one senior research fellow, and a research assistant. (ii) Library, fifteen. (iii) Central Administration, 31. (iv) Departmental typists, nine. (v) Laboratories, sixteen. Total, 104.

Research Scholarships—These numbered 57 and all the holders were working abroad.

Library—Number of volumes, 39,000, and pamphlets, 1,300.

Receipts—Commonwealth Government Grant, £226,000 ; interest, donations, etc., £1,317. Total, £227,317.

Expenditure—(i) Administration, £32,835. (ii) Teaching departments, £137,373. (iii) Library, £42,280. (iv) Maintenance of Premises, £4,733. (v) Special Grants, £4,199. (vi) Scholarships, £46,151. Total, £267,571.

Capital Works and Services—The expenditure from grants provided by the Commonwealth Government for capital works and services was £289,183.

10. **Canberra University College.**—The main functions of the Canberra University College, created in 1930 by an Ordinance of the Australian Capital Territory, are to establish courses of lectures for degrees in co-operation with the University of Melbourne, and to conduct a School of Diplomatic Studies for the training of diplomatic officers of the Department of External Affairs.

The University of Melbourne recognizes the instruction given at the College, examines students and grants degrees. The curriculum is that of the University of Melbourne and academic staff is appointed by the College with the approval of that University.

The Canberra and Melbourne lecturers work very closely together and in some subjects the Canberra lecturers act as first or second examiners. The arrangement with the University of Melbourne is regarded as temporary only and it is expected that the College will eventually be associated with the Australian National University, although this is unlikely to take place until that University is firmly established as a post-graduate centre.

The Council of the College consists of nine members appointed by the Governor-General, and a member of the academic staff of the College co-opted by the Council.

The College is financed by an annual grant from the Commonwealth Government, which in the year 1950 amounted to £34,200, plus £4,190 fees, etc., received from students.

During 1950 there were 331 students enrolled at the College. The enrolments were distributed as follows :—(*a*) Melbourne University Courses—Arts 76, Economics and Commerce 138, Law 16, and single subjects 89 ; (*b*) College Courses—School of Diplomatic Studies—First year 7, Second year 9, and Patent Law Courses 8.

In 1950, the full-time academic staff consisted of a principal, who was also the Professor of Economic History, two professors and sixteen lecturers. There were also a number of part-time lecturers.

The College library contains only approximately 9,500 books, but the resources of the National Library and the Government departmental libraries are available. Together, these are considerable, especially in the social sciences.

11. **New England University College.**—The New England University College, comprising a faculty of arts and a faculty of science, is governed by the University of Sydney. It is situated at Armidale, on the northern tablelands of New South Wales. The original university building, standing in 183 acres of land, was presented to the Government of New South Wales by Mr. T. R. Forster in 1937; since that time the University has acquired another 500 acres. The Government of New South Wales has borne the larger share of the expense of the conversion to its present use. Two large buildings providing lecture theatres and laboratories and residential blocks to accommodate 75 students have already been erected. Work on a new library and a students' union building was planned to commence in 1951. Lectures began at the College on 14th March, 1938. Students wishing to proceed to degrees in the Sydney faculties of medicine, veterinary science, agriculture and pharmacy may take the earlier courses at the College.

12. **New South Wales University of Technology.**—Officially incorporated by the Technical Education and New South Wales University of Technology Act of the New South Wales Parliament of April, 1949, the New South Wales University of Technology was established to meet the need of providing facilities for training and research in the fields of Applied Science and Technology and to ensure a more adequate supply of highly skilled scientists and technologists to the expanding industries of Australia. The history of the University dates from the 8th July, 1947, when the New South Wales Government approved the establishment of a Developmental Council to bring the University into being, and to establish its earliest degree courses.

Under the guidance of the Developmental Council the first four degree courses in Civil, Electrical, Mechanical and Mining Engineering were established and commenced in March, 1948. To these were added in the following year degree courses in Applied Chemistry and Chemical Engineering.

In determining the structure of these courses the Developmental Council approved two basic principles which were later to be confirmed as essentials in all undergraduate courses at the University, namely the inclusion of the Humanities and the requirement of a specified period of practical training as integral parts of each course.

The University is governed by a Council consisting of not more than thirty members, representing parliament, industry and commerce, the trade unions, technical education, professional bodies, the University of Sydney and the teaching staffs and the graduate and undergraduate members of the University of Technology. The President of the Council is Mr. Wallace C. Wurth, C.M.G., LL.B., Chairman of the New South Wales Public Service Board.

The Director, who is also a member of the Council of the University, is Mr. A. Denning, B.Sc., Dip.Ed., A.S.T.C. Mr. G. L. Macauley, B.Ec, is the Registrar.

The objects of the University are :—

(a) to provide facilities for higher specialized instruction and advanced training in the various branches of technology and science in their application to industry and commerce ; and

(b) to aid, by research and other suitable means, the advancement, development and practical application of science to industry and commerce.

The Council may provide courses in applied science, engineering technology, commerce, industrial organization and such related courses as it deems fit and may, after examination, confer the several degrees of Bachelor, Master and Doctor, and such other degrees and such certificates in the nature of degrees or otherwise as it thinks fit.

Further, the Council is empowered to establish and maintain branches, departments or colleges of the University at Newcastle, Wollongong, Broken Hill and elsewhere in the State. The first of such colleges was officially opened at Newcastle on 3rd December, 1951.

Since the inaugural meeting of the Council of the University on 6th July, 1949, further degree courses have been added, namely Architecture in 1950 and Wool Technology and Applied Physics in 1951.

By mutual agreement of the Council of the University and of the State Technical Education Advisory Council in March, 1951, the following Diploma Courses are also administered by the University of Technology :—Aeronautical Engineering, Architecture, Building, Chemical Engineering, Chemistry, Civil Engineering, Electrical Engineering, Food Technology, Leather Chemistry, Mechanical Engineering, Metallurgy, Mining Engineering, Naval Architecture, Optometry, Physics, Production Engineering, Quantity Surveying, Radio Engineering, Science and Secondary Metallurgy.

The course for the Bachelor's degree is of four years in each case, except in the cases of Architecture (six years) and Chemical Engineering (five years). The Diploma courses generally are of five stages of one year each, and for the Diploma student desirous of taking a degree certain conversion courses are available, by means of which he is enabled at an appropriate stage to transfer and enrol as a candidate for the Bachelor's degree.

The Council is empowered to carry out special investigations into any technological or scientific matter on request, and in respect of any such investigation may charge appropriate fees.

Benefactions and grants made to the University for the furtherance of its research activities include :—

Nuffield Bequest—Lord Nuffield on 25th February, 1950, presented the University, on behalf of the Nuffield Foundation, a grant of £25,000 sterling over a period of ten years to establish the Nuffield Research Chair in Mechanical Engineering.

Commonwealth Grant—The Commonwealth Government granted £10,000 to aid the University's programme of research during 1950.

Grant by J. I. Carroll and Electricity Meter and Allied Industries—In June, 1951, a grant of £10,000 was made to the University by J. I. Carroll and Electricity Meter and Allied Industries for the purpose of equipping a research laboratory for investigations into the properties of materials used in the electrical engineering industry. A special section of the School of Applied Physics is being adapted at present for this laboratory to be known as the J. I. Carroll Research Laboratory.

Staff. The academic appointments are as follows :—Applied science : six professors, fourteen senior lecturers and 50 lecturers. Engineering : two professors, three associate professors, twelve senior lecturers and 40 lecturers. Architecture : one professor, one senior lecturer and ten lecturers. Humanities : one professor and three acting lecturers.

Library. The Library of the Sydney Technical College is available to members of the New South Wales University of Technology. The number of bound volumes in the collection in 1951 was 38,000 : pamphlets numbered 3,000 and current technical and scientific journals, 1,200.

Buildings and Sites. Pending the erection of its own buildings and the acquisition of equipment, arrangements have been made for the New South Wales University of Technology to have at its disposal the resources of the Department of Technical Education of New South Wales, including staff, lecture rooms, drawing offices and laboratories. This arrangement made it possible for the University's degree courses to commence from the year of its establishment.

The erection of the first University building is proceeding on an area of land at Kensington specially reserved for University purposes. Accommodation to be provided in this building for the various departments of the University will be supplemented by the early completion of permanent single-story buildings to be used mainly for laboratories.

In the meantime, the planning and ultimate development of the University site at Kensington have been considered. The location and size of further permanent buildings are being determined to meet future instructional, laboratory and research requirements, and the provision of recreational areas and playing fields.

13. **Adult Education.**—(i) *New South Wales. University Department of Tutorial Classes.* In 1914 the University Senate established a Department of Tutorial Classes to provide classes and study groups along the lines of similar work in England. The Department was to be supervised by a Joint Committee of the Senate, on which representation was provided for the Workers' Educational Association, and the Secretary of which was the Director of Tutorial Classes.

This pattern has been adhered to, but the Department's work has expanded greatly. It now has, in addition to the Director, a full-time academic staff of nine, and administrative and typing staff. It has establishments at Newcastle and Armidale as well as Sydney. Its work consists of the following :—

(*a*) *Tutorial Classes.* Each year the Department conducts tutorial classes in a variety of subjects, grouped under the broad headings of Social, Political and Economic Studies ; History and International Affairs ; Psychology ; Philosophy ; Literature and Drama ; Foreign Languages ; Child Study ; Music and Art. Most of the classes in these subjects are organized by the Workers' Educational Association, and the Department supplies tutors from its full-time and part-time staff. In New England, however, the Department organizes its own classes. Classes range from 9 to 28 lectures, and some go on from first to second and sometimes fourth year. In 1950 the Department conducted 113 classes, with a total enrolment of 3,183.

(*b*) *Discussion Groups.* Since 1938 the Department has conducted a Discussion Group scheme, designed to provide country people, in particular, with opportunities for group study of the same types of subjects as are studied in its tutorial classes. Groups of five or more people are formed to discuss written lectures with the help of a corresponding tutor. In 1950, 136 groups were operating, taking in all 196 courses. Total enrolments were 2,125. This compares with nine groups and 114 enrolments in this scheme's first year of operation, 1938.

(*c*) *Kits.* In 1946 the Department embarked on a new venture for groups of people who were interested in activities such as play reading and performance, writing, public speaking, painting and music-making, rather than discussion. A number of " Kits " has been devised to provide programmes for such activities. In 1946, 16 groups were formed with a total enrolment of 179 ; by 1950 these figures had grown to 66 groups and 990 enrolments.

It will thus be seen that the Department enrolled 6,298 students for continuous work in classes and groups in 1950.

Finance for the Department's activities comes from a University appropriation (£10,000 in 1950); from the Adult Education Expansion Grant, distributed on the advice of the Adult Education Advisory Board by the New South Wales Government (the Department's share in 1950 being £11,756); and, to a small extent, from Discussion and Kit group fees. The fees for the Department's tutorial classes, except in New England, are allotted to the Workers' Educational Association for organizing purposes.

A library service is provided to all students in classes and groups by the Adult Education Section of the Public Library of New South Wales, a special section which is financed from the Adult Education Expansion Grant referred to above.

In November, 1951, the Department arranged to take over, as from the end of the year, the publication of the *Current Affairs Bulletin*. Commencing publication in 1942 for the Services, this periodical was re-started as a Service and civilian bulletin in 1947 by the Commonwealth Office of Education, edited from the Department of Tutorial Classes. Commonwealth staff economies in 1951 resulted in the University of Sydney's undertaking, with the assistance of a Commonwealth Government grant, to continue the publication as a part of the work of the Department of Tutorial Classes. Annual subscriptions in 1951 totalled £50,000.

(ii) *Victoria*. In 1947 the Victorian Government established the Council of Adult Education, and the University's part in adult education perceptibly diminished. The grant to the University Extension Board, which had been £5,900, was reduced to £1,000, and the Board was replaced by the University Extension Committee.

Its chief functions are to arrange and conduct public lectures, designed mostly to be of interest to members of the graduate body; to conduct lectures for school pupils at matriculation level, both in Melbourne and at country centres; to arrange special courses for professional training institutions, such as physiotherapists, optometrists, and speech and occupational therapists; and to stimulate interest in Australian literature by conducting lectures.

(iii) *Queensland*. The Adult Education service in Queensland has developed steadily, and in 1949 a total of 79,512 attendances were recorded at 2,550 meetings held in Brisbane and 55 country centres. Regular students included 2,300 at the Brisbane centre and 9,000 in the country. Courses most in demand were English Literature, English Expression, Psychology, Appreciation of Music and Art, Biology, Home Handicrafts and Photography. In smaller centres a number of groups and study circles have been formed. There were 40 of these operating in 1949, and lectures were also given by the permanent staff to 13 groups, comprising factory employees and youth organizations.

All Adult Education Board's services were provided free to the public, the total expenditure for the year being £24,000.

(iv) *South Australia*. Since 1917 the University of Adelaide, through the Joint Committee (with the Workers' Educational Association) for Tutorial Classes, has provided each year in the metropolitan area series of tutorial classes, lecture classes and study circles on a wide range of subjects of cultural and current interest for people who have no intention of proceeding to a degree or diploma and are unable to attend the ordinary University courses. The fee is nominal, and the enrolment for these classes in 1951 was 1,720. The Joint Committee extends its activities into the larger country centres by sending art exhibitions and plays on tour, lending boxes of books and arranging lectures and film screenings.

The University also arranges each year a number of free public lectures by members of the staff. Nine such lectures were given in 1951.

(v) *Western Australia*. In Western Australia the Extension Services of the University are handled by the Adult Education Board, the staff of which consists of a part-time Director and eleven full-time officers.

The objective and the revised policy of the Board in recent years has been defined in the following terms :—" To provide men and women of varying educational attainments in country districts as well as in the metropolitan area with facilities for the constructive use of leisure by use of head or hands and in such a way as to stimulate in the individual a sense of citizenship and to encourage community activities among groups ".

Examples of the application of this policy in 1951 and preceding years include :—

Music Recitals—Music Recitals are given in the metropolitan area and in numerous country towns. Teams of two to three artists or larger ensembles now give these performances of carefully graded programmes of classical music with simple commentary based on earlier experimental work with troops in the Australian Army. Total attendances at the Board's musical activities in metropolitan and country districts averaged over 20,000 in the two years 1949 and 1950.

Country Drama and Ballet—Following on the experimental work of the Board during 1948 and 1949, 1951 has seen a vastly increased activity in the field of drama and ballet in country areas. A professional team of ballet dancers was engaged and a tour was arranged embracing 23 towns, covering 3,000 miles. The company travelled by chartered bus with complete equipment, giving in effect a performance of the same standard as would have been the case in a capital city. In the field of drama, the Board has arranged two major productions involving a considerable cast and complete scenery. The companies visited fourteen towns and reported large attendances. Following on the tours of ballet and drama, there is evidence of a growing demand for these types of activities.

Summer School—A substantial broadening of the pre-war Summer School now brings to Perth for 13 days a cross-section of the Western Australian community both in terms of occupation and location. In January, 1950, 120 men and women were in residence in a hostel adjacent to the University grounds which is used to house students during the University term. The open air theatre at Somerville Auditorium, in which a new stage has been erected and put into use this year, has now become the centre of Perth summer entertainments. The Australian Broadcasting Commission is presenting on the average five open-air concerts, while the Board itself is showing films and presenting dramatic productions as well as ballet performances.

Metropolitan Lecture Classes—Two series of Metropolitan Lecture Classes, each of ten meetings, are conducted each year. The average annual attendance at these classes totalled 800 in post-war years. With a few suburban exceptions, classes are held in the Adult Education Board rooms in Perth. The scheme was extended to Fremantle in September, 1951.

Box Discussion Group Scheme—The pre-war Box Discussion Group, which has been functioning in very reduced form in post-war years, is being revised and extended for use in country districts in 1952.

(vi) *Tasmania*. In Tasmania the University Extension Board which had previously controlled the work of providing extra-mural tuition was replaced in 1919 by a Committee for Tutorial Classes. This Committee ceased activities in 1940 and classes are not at present organized through the University.

14. **Workers' Educational Associations.**—In 1913, Workers' Educational Associations were formed in all the States of Australia, and later in New Zealand. The movement has for its object the bringing of the University into closer relationship with the masses of the people, and providing for the higher education of the workers in civic and cultural subjects.

In Victoria the Association has been superseded by the Council for Adult Education, a statutory body appointed by the Government. A Statutory Board has also been appointed in Queensland, but the Association still carries on as a purely voluntary organization. Direct grants are made by the Governments of New South Wales, South Australia and Tasmania. The particulars of grants for classes and discussion groups organized by the Association and serviced by their respective State Universities in 1950 were as follows :—New South Wales, £21,756, 113 tutorial classes, 136 discussion groups and 66 Kit groups; South Australia, £5,000, 31 tutorial classes and extension lectures at country centres.

Direct grants amounting to £6,865 were made to the Association in New South Wales for both organizing work and a teaching service. The teaching service in 1950 included 17 classes, 2 summer schools (each of 10 days), 24 week-end schools, 11 short courses of public lectures, and 127 lectures to various organizations including W.E.A. clubs. In South Australia the Association receives a grant of £240 for general organizing purposes. In Tasmania the Association received a grant of £1,000 from the Adult Education Board, 119 lectures were organized in 1950, mostly in short series from 3 to 13. The Association's primary interest has been in subjects related to social change such as Industrial History, Economics, Political Science and Sociology. In recent years, however, there has been a substantial increase in the number of classes studying Psychology, History, Literature, Music, Drama and Popular Science.

§ 7. The Commonwealth Office of Education.

1. **Establishment.**—Although, as has been explained elsewhere, education is primarily a concern of the State Governments, the activities of the Commonwealth Government in other directions inevitably brought it into the field of education at a number of points. It thus became necessary to create a permanent Commonwealth authority capable of providing the Government and others with reliable expert advice on the many educational problems that arise. To fulfil this need the Commonwealth Office of Education was established in 1945.

For administrative purposes the Office is attached to the Prime Minister's Department and at present is accommodated in Sydney with small branch offices in each of the capital cities. Under the Prime Minister, the control of the Office rests with the Director whose appointment is direct from the Governor-General in Council. By the Education Act, the Director is also *ex officio* Chairman of the Universities Commission. The administrative staff of the Universities Commission is housed with the Office of Education and shares its facilities. The special work of the Universities Commission is dealt with in the next section of this chapter.

2. **Functions.**—By the Education Act 1945 the functions of the Office of Education are defined as follows :—" (*a*) to advise the Minister on matters relating to education ; (*b*) to establish and maintain a liaison, on matters relating to education, with other countries and the States ; (*c*) to arrange consultation between Commonwealth authorities concerned with matters relating to education ; (*d*) to undertake research relating to education ; (*e*) to provide statistics and information relating to education required by any Commonwealth authority ; and (*f*) to advise the Minister concerning the grant of financial assistance to the States and to other authorities for educational purposes, and shall include such other functions in relation to education as are assigned to it by the Minister ".

3. **Activities.**—Thus the Commonwealth Office of Education advises the Commonwealth Government and its various Departments on educational matters relative to the States and oversea countries. It provides a very useful channel for negotiations between State Departments of Education and the Commonwealth Government ; it organizes consultations between education authorities generally.

Information about recent important developments in education is collected continually from many sources within Australia as well as from countries overseas and is disseminated to State education authorities and others in a number of ways, one of which is the distribution of a bi-monthly publication " Education News ".

Research into educational problems arising out of its official commitments is one of the important activities of the Office. In addition, close attention is being given to special fields of education such as school broadcasting, visual aids to education, youth education and the education of handicapped children.

The Office of Education is a Commonwealth authority with which oversea countries may deal on educational questions concerning Australia as a whole. Close contact in international education is maintained through a representative of the Office on the staff of Australia House in London. An important post-war development in this international sphere is that of the United Nations Educational, Scientific and Cultural Organization. The responsibility for implementing the constitution of UNESCO in Australia, and for advising the Government on such matters, rests with the Office of Education. To further the aims of UNESCO twelve National Co-operating Bodies have been set up together with a Co-ordinating Committee. The Office of Education acts as the secretariat of these bodies. The Office participates in the administration of the schemes of assistance to South-East Asia. These include administration of the Fellowship scheme, participation in the British Commonwealth Technical Co-operation Scheme and supervision of the expenditure of the educational supply grant of £30,000 voted by the Commonwealth Government for Asian countries.

An educational programme for immigrants reaching Australia from displaced persons' camps in Europe has been organized by the Office of Education. Instruction involving practice in using the English language and help in understanding Australian ways begins in the pre-embarkation centres in Europe and continues through to the continuation classes and correspondence courses provided for migrants already in employment in Australia.

During 1950, schools were opened in the Northern Territory for the education of aboriginal children. These schools are staffed and administered by the Office of Education on behalf of the Department of the Interior. Teachers for these schools, in addition to their previous training and experience, received a special course in Native Education before entering on duty. Special primers are being devised for use with aboriginal children and books and equipment are suited to their particular needs.

A substantial part of the work of the Office is concerned with fostering the development in Australia of general educational and cultural activities. A series of publications for use as youth and adult education material has been commenced. A fortnightly *Current Affairs Bulletin* is provided at bulk rates to discussion groups and other bodies. Other pamphlets are also produced from time to time.

§ 8. The Universities Commission.

1. **General.**—The Universities Commission is a Commonwealth instrumentality which was set up at the beginning of 1943 under National Security (Universities Commission) Regulations primarily to achieve the following objects :—(*a*) To advise the Commonwealth Government on questions of man-power insofar as they relate to the training of university students ; (*b*) to arrange for the training of adequate numbers of the graduates for all kinds of national service and to attract able students to the University for such training ; and (*c*) to administer the scheme of financial assistance.

From the commencement of the 1939–45 War the Commonwealth Government had recognized the vital necessity of a continuing flow of properly trained graduates from certain of the faculties of the Universities, particularly from the six faculties of Medicine, Dentistry, Engineering, Science, Veterinary Science and Agriculture. The policy of the Government was to reserve students to commence and continue their studies in these faculties. In 1943 reservation was extended to cover the faculties of Arts, Economics, Law and Architecture.

With the passing of the Education Act 1945 the Universities Commission became associated with the Commonwealth Office of Education. Its functions are set out in Section 14 of Part 3 of the Act which is quoted below :—

> " 14. The functions of the Commission shall, subject to the regulations and any directions of the Minister, be—(*a*) to arrange, as prescribed, for the training in Universities or similar institutions, for the purpose of facilitating their re-establishment, of persons who are discharged members of the Forces within the meaning of the Re-establishment and Employment Act 1945 ; (*b*) in prescribed cases or classes of cases, to assist other persons to obtain training in Universities or similar institutions ; (*c*) to provide, as prescribed, financial assistance to students at Universities and approved institutions ; and (*d*) to advise the Minister with respect to such matters relating to university training and associated matters as are referred by the Minister to the Commission for advice."

With cessation of hostilities, the Commission was no longer called upon to administer the scheme of reservation but added to its functions that of administering training under the Commonwealth Reconstruction Training Scheme insofar as it applies to Universities and similar institutions.

2. **Financial Assistance.**—(i) *General.* At the commencement of 1943, in order to make the best possible use of university facilities, the Commonwealth Government adopted, through the Universities Commission, the policy of endeavouring to attract able students to the Universities. To this end a scheme of financial assistance was introduced. Under this scheme assistance was available (subject to a means test) to selected full-time students undertaking certain approved courses. In general, these were courses leading to a primary degree in any Australian University. Details of the courses approved and of the scale of assistance payable under the scheme are shown on pp. 251–2 of Official Year Book No. 38.

(ii) *Commonwealth Scholarship Scheme* The Financial Assistance Scheme was replaced by the Commonwealth Scholarship Scheme which came into operation on 1st January, 1951. The aims of the Scholarship Scheme are to lessen inequality of educational opportunity at the tertiary level and to ensure a flow of trained professional personnel from Universities and institutions of similar standing in Australia. The Scheme will absorb the Financial Assistance Scheme and will provide 3,000 scholarships annually for competition by boys and girls who have completed a normal secondary school course. A special feature is the provision for two per cent. of the 3,000 scholarships available each year to be awarded to students of mature age and these scholarships will be known as Mature Age Scholarships. The 3,000 scholarships will be divided amongst the States on a population basis and will be awarded entirely on merit, in general on the results of the examination qualifying for matriculation in the State concerned. The courses approved include all first degree courses at Universities ; certain undergraduate diploma courses at Universities ; Technical College and School of Mines diploma courses at approved standards and certain other professional courses. These include part-time as well as full-time courses. A scholarship will entitle the holder to payment of all compulsory fees irrespective of the means of his parents. A scholar who undertakes an approved full-time course on a full-time basis may apply for a living allowance which is payable subject to a means test. The maximum allowances are £149 10s. per annum for a student living with his parents and £214 10s. per annum for a student not living with his parents. These maximum allowances are payable when the adjusted family income of the student and his parents does not exceed £400. The adjusted family income is ascertained by taking the full income of the student and each of his parents for the financial year immediately preceding the year in which a scholarship is desired and by deducting therefrom £100 for the first dependent child (other than the applicant) under 16 years of age, and £50 for each other dependent child under 16 years of age. The maximum allowances are reduced at the rate of £3 for every £10 by which the adjusted family income exceeds £400.

The maximum living allowance payable to students awarded Mature Age Scholarships will be £214 10s. per annum in all cases and in addition. where the student is married, an allowance will be payable of £1 4s. per week for his wife, and 9s. per week for the first dependent child under 16 years of age. These allowances will be payable subject to a special means test, which will be based on the current income of the student, and will not take into account the income of the student's parents.

(iii) *Number of Students Assisted.* The following table shows the number of students assisted in the various faculties in each University in 1950 :—

NUMBER OF STUDENTS ASSISTED IN EACH FACULTY, 1950.

Course.	Sydney and Armidale.	Melbourne.	Queensland.	Adelaide.	Western Australia.	Tasmania.	Total.
Agriculture	16	15	1	7	15	..	54
Architecture	..	..	..	..	5	..	5
Arts	10	8	2	..	..	..	20
Dentistry	94	24	13	14	35	9	189

Other	9	23	..	1	1	..	34
Total	2,497	1,574	535	481	363	97	5,573

(*a*) Includes 25 at Canberra. (*b*) Includes 1 at Canberra.

In addition, at 30th June, 1950, there were 4,661 trainees in training in part-time courses.

(iv) *University Facilities.* With the influx of students under the Commonwealth Reconstruction Scheme immediate provision had to be made for the alteration and extension of existing University buildings and for the erection of new ones. Additional equipment also had to be supplied.

The Commonwealth Government offered to provide finance on the following terms and each State and University accepted these terms :—

"(*a*) That the Commonwealth meet the cost in the first instance of erecting essential additional buildings and plant required for Reconstruction Training at Universities ;

(*b*) In the case of temporary buildings or plant of a temporary nature, the assets to remain the property of the Commonwealth and to be disposed of as necessary after the need for their use is ended ;

(*c*) Where the buildings or plant are of a permanent nature the Commonwealth to meet the cost of erection in the first instance so as to ensure expedition on the distinct understanding that the buildings and plant will be taken over by the University on a basis to be determined by agreement between the Commonwealth and State and the University having regard to the permanent value of the buildings and plant to the University ; and

(*d*) The Commonwealth would bear the cost of special internal structural alterations ".

The following table shows the amount of Commonwealth moneys allocated to finance buildings at the Universities :—

University.	Permanent Buildings.	Permanent Alterations.	Temporary Buildings.	Total.
	£	£	£	£
Sydney	257,429	12,945	54,989	325,363
Melbourne	191,427	2,144	26,837	220,408
Queensland (Brisbane)	..	..	4,322	4,322
Adelaide	259,754	..	..	259,754
Western Australia (Perth)	87,298	..	23,572	110,870
Tasmania (Hobart)	11,531	1,500	31,352	44,383
New England University College ..	39,180	..	..	39,180
Total	846,619	16,589	141,072	1,004,280

For equipment the following amounts have been allocated :—

University.	Permanent Equipment.	Temporary Equipment.	Gift.	Total.
	£	£	£	£
Sydney	..	..	40,000	40,000
Melbourne	98,015	3,525	..	101,540
Queensland (Brisbane)	109,318	15,271	..	124,589
Adelaide	97,556	7,628	..	105,184
Western Australia (Perth)	42,786	3,513	..	46,299
Tasmania (Hobart)	19,766	..	..	19,766
Total	367,441	29,937	40,000	437,378

The Commonwealth Government agreed to pay the Universities the full cost of teaching all Reconstruction Trainees. The Universities Commission therefore pays each University a subsidy as running costs in addition to fees.

In 1950 the Commission made fee payments to Universities for Reconstruction Trainees amounting to £184,684, and in addition paid subsidies amounting to £283,715.

§ 9. Technical Education.

1 **General.**—Provision has been made in all States for many forms of technical education, and the rapid expansion of manufacturing industries in recent years is increasing the demand for technically trained personnel, while the technical training conducted by the Department of Labour and National Service and under the Commonwealth Reconstruction Training Scheme has been in operation for some years. (*See* §§ 10 and 11 following.)

In preceding issues of the Official Year Book an outline was given of the origin and development of technical education in each State (*see* No. 22, pp. 447–51), but considerations of space preclude the inclusion of more up-to-date information.

2. **Schools, Teachers and Students.**—The numbers of schools, teachers and enrolments of individual students during 1949 are given in the following table :—

TECHNICAL EDUCATION : SCHOOLS, TEACHERS AND ENROLMENTS, 1949.

State.	Schools or Colleges.	Teachers.			Individual Students Enrolled.	
		Full-time.	Part-time.	Total.	Male.	Female.
New South Wales	38	1,010	1,755	2,765	48,624	16,333
Victoria(*a*)	34	1,161	1,054	2,215	40,927	12,256
Queensland	12	111	264	375	10,746	3,911

Total	89,215	110,841	133,938	144,882	150,482	153,602

3. **Expenditure.**—The expenditure on technical education in each State for 1949 is shown below :—

TECHNICAL EDUCATION : EXPENDITURE, 1949.

(Including Loan Fund Expenditure.)

(£.)

State.	Salaries and maintenance.	Equipment.	Buildings.	Total Expenditure.	Receipts—Fees, etc.	Net Expenditure.
New South Wales ..	1,296,850	180,177	283,327	1,761,056	442,521	1,318,535
Victoria(*a*)	1,104,676	47,889	212,551	1,470,987	220,196	..
Queensland	176,922	58,552	30,919	266,393	30,131	236,262
South Australia ..	201,603	7,804	28,701	239,221	43,652	195,569
Western Australia ..	194,282	28,431	23,347	247,209	17,178	230,031
Tasmania	72,156	1,652	20,603	96,465	569	95,896
Total 1949 ..	3,046,489	324,505	599,448	4,081,331	754,247	
1948 ..	2,521,319	233,230	386,103	3,235,129	669,219	..

(*a*) Includes the expenditure on Junior Technical Schools.

Fees and other receipts are paid into Consolidated Revenue in all States except Victoria, where they are retained and spent by the Technical School Councils. The expenditure on buildings is largely financed from loan moneys, the sums provided from this source in 1949 being (the expenditure in 1948 is shown in brackets):—New South Wales, £229,807 (£139,698); Victoria, £190,050 (£130,156); Queensland, £24,328 (£11,327); South Australia, £20,135 (£3,976); Western Australia, £12,117 (£17,408); and Tasmania, £18,441 (£4,261).

The expenditure on maintenance for technical education in Australia in 1949 amounted to 8s. 9d. per head of the mean population, as compared with £3 per head expended on maintenance for primary and secondary education.

§ 10. Commonwealth War-time Technical Training Scheme.

1. **Origin of the Scheme.**—The Commonwealth Technical Training Scheme was originated during the 1939–45 War to provide for the training of civilians and Armed Services personnel for the production of aircraft and munitions and to meet the demand of the Armed Services for skilled technicians.

2. **Training.**—During the period of operation of the Scheme—from 18th December, 1939 to 29th April, 1949—instruction was given in 78 different types of courses in 60 Technical Colleges throughout Australia, 119,717 persons completing training. The figures for each State and service were given on p. 257 of Official Year Book No. 38.

§ 11. Commonwealth Reconstruction Training Scheme.

1. **Object of the Scheme.**—The object of the Commonwealth Reconstruction Training Scheme is to provide training to enable ex-service men and women and certain special non-service personnel to become re-established in suitable civilian occupations.

2. **Closing Date.**—The latest date for acceptance of applications for training under the Commonwealth Reconstruction Training Scheme was 30th June, 1950.

3. **Types of Training.**—The Scheme provided three types of training—(*a*) University-type (professional); (*b*) Technical-type (professional or vocational); and (*c*) Rural training.

Professional training follows normal lines at a university or similar institution. Vocational training includes most types of trade training given at technical colleges or schools. Members selected for vocational training usually receive approximately six month's basic training. On reaching an assessed proficiency of 40 per cent., they are placed in subsidized employment and are paid the full adult wage or determination for the trade concerned, the employer being reimbursed in the form of a wage subsidy according to the trainees' lack of proficiency. Proficiency is reviewed regularly and the subsidy adjusted accordingly.

4. **Allowances.**—Full-time trainees receive allowances ranging from £4 10s. per week for a single man to £6 10s. per week for a married man with dependants. In addition, all tuition fees are paid and allowances provided for fares, books and instruments. Trainees may claim a special allowance if they are required to live away from home.

5. **Part-time Training.**—Tuition fees and expenses incidental to tuition (such as books), up to a limit of £60, are payable in respect of members accepted for part-time training.

6. **Organization and Administration.**—The Scheme is administered by the Repatriation Commission through the Central Reconstruction Training Committee, which has the functions of general planning, organization and direction. This Committee comprises representatives of the Repatriation Commission, Universities Commission, Department of Labour and National Service, and three members appointed by the Minister and drawn from organizations of employers, employees and ex-servicemen.

7. **Number Trained.**—The Scheme commenced to operate in a limited way in March, 1944, and between that date and 31st May, 1951, 334,269 ex-service men and women were accepted for training. The position as at 31st May, 1951 was as follows :—

COMMONWEALTH RECONSTRUCTION SCHEME : NUMBER TRAINED AND IN TRAINING, 31st MAY, 1951.

Particulars.	University-type Training.		Technical-type Training.		Rural Training (Full-time).	Total.
	Full-time.	Part-time.	Full-time.	Part-time.		
Accepted	24,939	19,086	91,253	195,985	3,006	334,269
Withdrawn before commencement	3,137	2,349	26,768	31,420	815	64,489
Awaiting commencement ..	74	141	199	..	13	427
Commenced	21,728	16,596	64,286	164,565	2,178	269,353
Withdrawn after commencement	6,246	6,743	22,724	98,905	525	135,143
Completed	12,177	4,983	33,757	41,948	1,583	94,448
In training	3,305	4,870	7,805	23,712	70	39,762

The number of withdrawals prior to commencement of training was largely owing to members lodging applications for training on discharge from the Forces, but later securing employment or business opportunities for which they were suited without training. Withdrawals from training after commencement of courses were due to a number of reasons, including sickness, failure in examinations and re-enlistment in the Forces ; but many trainees, especially in the building trades, have been able, without formally completing their training, to follow the trade by engaging in sub-contract construction work or by going into partnerships with tradesmen. Of the part-time trainees who have discontinued courses, a large proportion are members who overstated their training requirements in the first instance, and who might more appropriately be regarded as having completed the training which they have since considered necessary for their re-establishment in civilian life.

§ 12. Libraries.

1. **General.**—The Munn-Pitt report of 1935 greatly stimulated interest in libraries and librarianship throughout Australia. This is seen in the rapid development of libraries in all States, all of which, except Western Australia, have now passed legislation to increase library services, and in the establishment in 1937 of the Australian Institute of Librarians to improve the standard of librarianship. This body was reconstituted in 1949 as the Library Association of Australia, its functions now including the promotion and improvement of libraries and library services. The Association conducts annual examinations for which students are prepared by courses of instruction in all States. Formal library schools exist in the National Library, Canberra, and the Public Libraries at Sydney and Melbourne.

2. **Commonwealth.**—(i) *Commonwealth National Library.* This library was created as the Commonwealth Parliamentary Library in 1901. The library of Congress was chosen in 1903 as the model upon which its collections and services should be developed and it has therefore assembled a great reference collection with special emphasis on Australian material and rendering services on a national basis.

While the provision of a reference service to Members of Parliament and to Government Departments remains a primary responsibility, the National Library now offers research facilities to University institutions in the Australian Capital Territory and to students of Australian history and affairs, publishes basic bibliographies in the field of Australiana and serves as a free public library for residents of the Australian Capital Territory.

In 1950 it contained about 350,000 volumes, together with many tens of thousands of pamphlets, pictures, prints, maps, manuscripts and historical objects, scores of thousands of feet of microfilm, about two million feet of moving picture films and 100,000 cubic feet of archives. It is particularly strong in the social sciences, in its holdings of Government publications, Australiana, and material relating to countries of the Pacific and adjacent regions.

The rapid growth of its Australiana, strengthened by the acquisition of the Petherick collection of 16,500 items in 1911, and the notable collection of Cook manuscripts in 1923, caused the Library Committee in the latter year to adopt the title of "Commonwealth National Library".

It has been enriched by several important gifts, notably the Gregory Mathews collection on Australian Ornithology in 1940, and the Ferguson collection of books, manuscripts and pictures relating to Australia and the South Seas in 1946. The great pictorial collection of Rex Nan Kivell in the same field was received on indefinite loan in 1947.

The National Library's activity in the field of Australiana was substantially advanced when, following the posting of a Liaison Officer to London in 1944, arrangements were concluded to microfilm, in association with the Public Library of New South Wales, original records relating to Australia in the Public Record Office and elsewhere. Acquisition of these microfilms will permit resumption at a later date of the *Historical Records of Australia* of which 34 volumes had been published by 1926.

The operation of the Commonwealth Publications Exchange Agency, established in 1947, brings substantial sets of official publications of oversea countries as well as those of research institutions and learned societies throughout the world. Under the Commonwealth Copyright Act of 1912 the publisher of every book, pamphlet, etc., printed in Australia is required to deposit a copy in the Library.

In 1945, following the death of President Roosevelt, the Government established, as its memorial to him, a Roosevelt wing in the Library, housing a comprehensive and growing collection of material illustrating the growth and activity of the American people.

Following the appointment of the War Archives Committee in 1942, the National Library become an Archival Authority for the war-time records of all Commonwealth Departments and agencies other than the Service Departments, the latter being entrusted to the Australian War Memorial. In 1947 the activity was extended to cover all records created since 1901. Repositories have been established in Canberra, Melbourne, Sydney and Brisbane, and to date over 1,000,000 cubic feet of records have been surveyed, of which about 100,000 cubic feet of records of permanent historical value have been transferred to the custody of the Library.

Following the establishment of the Australian National Film Board in 1945, the Library's existing activity in the collection of Australian historical films was expanded into a central library of documentary and educational films and made the non-theatrical distributing agency in Australia for the Board, on which the Library has been represented since its creation. Films are loaned direct to organizations in Commonwealth Territories and to Commonwealth Departments and agencies, and to State Education Departments and Advisory Committees to supplement their individual resources. An information service is given on new and unusual films, and exchanges are conducted with twelve oversea governments. The film collection contains about 3,000 titles, together with Australian historical films and a great number of film strips.

Training in librarianship for Commonwealth Government Departments and for students from the States has been a function since 1938. A post-graduate library school is conducted in which students are prepared for the examinations of the Library Association of Australia.

The National Library is also responsible for providing and servicing the Australian reference libraries at all Commonwealth Government establishments overseas. These now number 36, those in London and New York being major collections under the direct control of officers of the National Library. The services to Commonwealth Territories began in 1936, when, with the assistance of a Carnegie grant of 7,500 dollars, free library services were established in association with the local Administrations. All of these were interrupted by the 1939–45 War, but have since been re-established on an extended basis in Papua-New Guinea and in the Northern Territory, as well as in Norfolk Island and Nauru. The National Library selects, purchases and catalogues the major part of the book stocks, assists in meeting reference needs, and provides from its staff the Chief Librarian in the Northern Territory. In Papua-New Guinea the central library is at Port Moresby, with regional libraries at Rabaul, Lae and Samarai, and several small branches. Parcels of books, carried free by the postal service, are sent to remote areas.

Since the transfer of the seat of Government to Canberra in 1927, the National Library has been accommodated in more than one building in Canberra. Plans are being drawn for further building on its permanent site to enable a consolidation of its collections and services.

A union catalogue of serials in the social sciences held by Australian libraries has been compiled and the following publications issued :—Historical records of Australia—34 volumes, 12s. 6d. per volume (publication temporarily suspended in 1926) ; Parliamentary Handbook and record of elections—eleven issues, 10s. 6d. per volume ; Annual catalogue of Australian publications—No. 1, 1936 to date, 2s. per volume ; Books published in Australia, a list of books supplied under copyright—January–March, 1946 to date (monthly) ; Select list of representative works dealing with Australia (reprinted from the Official Year Book)—1933 to 1948 (annual) ; Australian books (supersedes Select list)—1939 to date (annual) ; Australia Public Affairs Information Service (subject index to current literature)—July, 1945 to date (monthly) ; Catalogue of 16 mm. films—1950, and supplement 1951, 10s.

(ii) *Patent Office Library.* The library of the Commonwealth Patent Office, Canberra contains over 56,000 volumes. Patent specifications of inventions are received from the principal countries of the world, and a wide range of technical literature and periodicals is available.

(iii) *Other Departmental Libraries.* The following Commonwealth authorities in Canberra have specialized collections in their own fields, and in addition draw largely on the National Library :—Attorney-General's Department, Australian War Memorial, Commonwealth Bureau of Census and Statistics, Commonwealth Forestry and Timber Bureau, Department of Commerce and Agriculture, Department of External Affairs, Department of External Territories, Department of Health, Department of National Development, Department of Trade and Customs, Department of Works and Housing, and News and Information Bureau of the Department of the Interior.

The Department of Labour and National Service has its main library in Melbourne, and branch libraries in Sydney and Adelaide. Other departmental libraries in Melbourne are those of the Department of Air, Department of Defence, Department of Social Services and Postmaster-General's Department. The library of the Commonwealth Office of Education was established in Sydney during 1945.

(iv) *Commonwealth Scientific and Industrial Research Organization.* The head office in East Melbourne maintains a library covering all branches of science except the medical sciences. In addition, each division and section of the Organization has its own library ; together, these form a series of specialist libraries covering such subjects as food preservation, horticulture, fisheries, entomology, botany, agriculture, veterinary science, animal husbandry, building research, dairy products, etc. There are 22 such branches, each with its own staff varying in number from one to sixteen, and also smaller collections under the care of research officers aided by visiting librarians. Ten of the branches are in Victoria, eight in New South Wales, two in South Australia, and one each in the Australian Capital Territory and Queensland.

The Head Office Library maintains a union catalogue of the holdings of all C.S.I.R.O. libraries, and smaller union catalogues are being developed among groups of branch libraries with similar interests.

The collections are particularly strong in the publications of oversea scientific and technical research institutions, with many of which exchange relations exist.

The general public may have access to these materials for reference purposes.

3. States.—(i) *Metropolitan Public Libraries.* In each of the capital cities there is a well-equipped Public Library, the institutions in Melbourne and Sydney especially comparing very favorably with similar institutions elsewhere in the world. The following statement gives the number of volumes in the Public Library of each capital city at 30th June, 1950:—

METROPOLITAN PUBLIC LIBRARIES, 30th JUNE, 1950.

City.	Number of Volumes in— Reference Branch.	Ordinary Lending Branch.	Country Lending Branch.	Total
Canberra(*a*)	350,000	..	(*b*)	**350,000**
Sydney	(*c*) 460,689	(*d*)	122,882	**583,571**
Melbourne	584,622	124,258	32,215	**741,095**
Brisbane	96,887	..	12,262	**109,149**
Adelaide	209,417	27,717	(*e*) 49,100	**286,234**
Perth	183,753	..	(*f*) 6,325	**190,078**
Hobart	43,741	21,214	(*g*) 118,107	**183,062**

(*a*) Includes Parliamentary section. (*b*) Books are lent to libraries or students throughout Australia whenever necessary for research work. (*c*) Includes 150,106 volumes in the Mitchell Library. (*d*) The maintenance and control of the ordinary lending branch of the Public Library at Sydney were transferred in 1908 to the Municipal Council. In 1950, books in this library numbered 112,732. (*e*) Includes 21,110 in the Country Lending Service, 5,691 in Children's Branch and 22,299 in Children's Book Service. (*f*) Includes 3,576 volumes in the School Libraries Branch. (*g*) Includes 82,657 volumes in the Children's Branch.

(ii) *New South Wales.* The Free Library Movement in New South Wales, founded for the establishment of a system of public libraries on the basis suggested in the Munn-Pitt Report of 1935, helped to pave the way for the Library Act 1939, which was fully proclaimed as from 1st January, 1944. The Library Board was fully constituted in 1944, and came into effective operation in September of that year. Ninety-eight local authorities have adopted the Library Act and during 1949–50 spent £133,482 on their libraries from rates, as well as £37,000 received in subsidy. There are 82 libraries, containing 520,820 volumes, being operated by 62 councils.

The Joint Coal Board made grants for library purposes to Councils in coal mining areas, a grant of £5,000 having been made to the City of Greater Wollongong to help establish a mobile library service to mining centres, and a grant of £4,150 to the City of Greater Newcastle to meet part of the cost of establishing a library at Wallsend.

The State Library has been housed since 1942 in a new building, whose reading room provides seating accommodation for 500 persons, and has 50,000 volumes in open access. Within four years, however, the old building had to be reoccupied in part owing to lack of space caused by the Library's extended functions.

New South Wales departmental libraries are staffed by officers seconded from the State Library, which also provides a central book buying and master cataloguing service for departmental libraries, and municipal and shire libraries constituted under the 1939 Act.

In 1943 the Banks Memorial Trust was set up to report on the best use of funds which had accumulated since 1905. The government has approved of a memorial at Kurnell, and of the publication of the Banks Papers.

The State Library has undertaken the management of the libraries of the University Tutorial Class and the Workers' Educational Association.

The Country Circulation Department forwards books on loan to State schools, to Schools of Arts and to individual students. During 1949–50, 67,340 books were lent to small State schools, 31,719 to Schools of Arts and small country libraries, 306 to the Far Western Division, while 26,044 reference works were lent to individual country students.

The Mitchell Library in Sydney of more than 60,000 volumes and pamphlets, and 300 paintings, principally relating to Australasia and the Southern Pacific, and valued at £100,000, was bequeathed to the trustees of the Public Library in 1905 by Mr. D. S. Mitchell, together with an endowment of £70,000. The testator stipulated that the regulations of the British Museum were to be adopted as far as possible, hence the library is the resort of specialists. There are now 150,106 volumes in the library, in addition to valuable manuscripts, collections of Australian postage and fiscal stamps, and various pictures, coins, etc.

In Newcastle, Dr. Roland Pope has given his collection, worth £10,000, which is being housed temporarily at the School of Arts.

Other important libraries in New South Wales are the Australian Museum, 32,933 volumes; Teachers' Colleges, 105,995; Technical Education Branch, 64,998; Public Schools, 864,704; Railways' Institute, 141,343; Road Transport and Tramways Institute, 43,728; Cooper Library of the New South Wales Public School Teachers' Federation, 17,467; and the Library at the National Herbarium, 10,000 volumes. At 30th June, 1950 the Parliamentary Library contained 103,175 volumes.

(iii) *Victoria.* A Library Service Board appointed in 1940 to inquire into existing library services issued its report in November, 1944. This recommended the establishment of a State Libraries Board, and suggested a plan for State financial aid. The Free Library Service Board Act of December, 1946 set up a Free Library Service Board of nine members to assist in the organization and promotion of free library services by municipal and other authorities, to register libraries, recommend the allocation of grants, promote library service in State schools, and to provide advisory services to registered free libraries and associated institutions.

There are now 33 municipalities offering adequate library facilities to approximately 550,000 citizens, that is, about 27 per cent. of the States' population. Nine of these serve 339,600 people in the metropolitan area, and 24 serve 214,000 in the country.

Government expenditure on libraries for the year 1949–50 was £49,400. Of this amount £43,400 was allocated to municipal libraries, £5,500 to 200 country mechanics' institute libraries and £500 to 34 children's libraries.

With the passing of the Public Library Act 1944, the Public Library of Victoria was separated for administrative purposes from the National Gallery and the Museum, and is now controlled by a Board of seven members concerned with the Library only. The Library provides reference services with a collection of some 570,000 volumes, 2,500 current periodicals and 450 current newspapers; lending services to metropolitan borrowers; country lending services to individual readers throughout the State; and travelling library services by a box system to rural and provincial libraries.

The Reference Library reading room, opened in 1913, is capable of seating 320 readers at a time, with an additional 50 readers in a special Art Room. The Library is particularly strong in Australiana, early and fine modern printing, English county records and genealogy, Shakespeariana and the fine arts. Associated with the Reference Library is the Victorian Historical Collection containing 13,000 documents, maps, paintings and other items illustrating the history of the State.

(iv) *Queensland.* Prior to 1945 Queensland's library needs were met by the State Public Library, established in 1902 and administered by the Chief Secretary's Department, and by Schools of Arts or similar libraries in metropolitan and country districts supported by members' subscriptions. The Libraries Act 1943 constituted a Library Board "to attain efficient co-ordination and improvement of the library facilities of the State with the object of placing such facilities on a sound basis for the benefit and educational improvement of the citizens generally throughout the State".

The control and management of the Public Library has been entrusted to the Board, which had built up the book collection to 96,224 volumes in 1948–49, and 109,149 in 1949–50. The Libraries Act Amendment Act of 1949 provides for the deposit in the Public Library of a copy of all books, pamphlets, maps and other printed material published in Queensland.

As a long-range policy, the Board has planned a State-wide and co-ordinated modern library service, but meantime, as an immediate programme, subsidy is granted on a fifty per cent. basis on books, library accommodation and equipment, with an upper limit of £1,000 in respect of the latter.

The Act empowers local authorities to establish library facilities and to take over the management of Schools of Arts when requested to do so by the trustees of the Schools of Arts or when the local authority deems it advisable.

Five Schools of Arts were transferred to local authorities in 1948–49, and nine in 1949–50, making a total of 23. The Brisbane City Council has established seven libraries, of which four have separate children's collections, and hopes to increase the number to 28. The number of local bodies subsidized was 87 in 1948–49, and 68 in 1949–50. The Board's policy is to subsidize not more than one local body in any area in providing library facilities.

A country extension service for people residing outside the metropolitan area is now operating on a limited scale. Its book collection numbered 7,172 in 1948–49, and 12,262 in 1949–50.

The Oxley Memorial Library was established under the terms of a Declaration of Trust dated 26th August, 1926, from the balance of moneys remaining in the Oxley Centenary Fund. Its object is the promotion of the study of Australian literature, literature relating to Australia and Queensland historical material. The library, housed in the Public Library since 1934, remained under separate administration until 1946, when its assets were transferred to the Library Board. Since that date it has been administered as a department of the Public Library, and the collection kept segregated. It is governed by a committee which has advisory powers only. During the year 1949–50 its holdings in volumes increased from 14,069 to 14,768. A valuable addition in 1950 was the L'Estrange collection of Queensland stamps.

The library of the Parliament of Queensland was established in 1860. It contained in 1950 approximately 74,000 volumes, consisting of official publications and books devoted largely to history and the social sciences. The cataloguing and reclassification of the library commenced in 1948. An amendment to the Act in 1949 entitles the library to a copy of every book published in Queensland.

(v) *South Australia.* Following the Price Report of 1937, which stressed the need for a free lending service for metropolitan and country readers, and suggested the establishment of a State Libraries Board, the Public Library of South Australia was separated from the Museum and Art Gallery early in 1940 and became a government department, administered by a Principal Librarian and a Libraries Board.

In the Reference department there are about 210,000 volumes and seating for 300 readers. Most of the books may be borrowed, and about 32,000 volumes are lent every year. Over 3,000 periodicals are filed, and the collection of newspapers includes every newspaper printed in South Australia.

The Adelaide Lending department, which lends books to persons living in the metropolitan area, has 29,000 books, 17,000 registered borrowers, and an annual book issue of 232,000 volumes.

In the Country Lending Service there are 44,000 volumes, of which about half are suitable for children. In 1949–50 this service sent out 41,000 volumes to adults and 83,000 to children, including 23,000 volumes lent to schools.

The Research Service specializes in scientific and technical enquiries, and supplements the resources of the Public Library by borrowing from other libraries and by obtaining microfilm copies of material not available locally. It has an extensive collection of trade catalogues. *See also* Children's Library, page 250.

The Institutes Association in 1950 comprised 256 suburban and country libraries with 739,072 volumes.

(vi) *Western Australia.* During 1944 the Government appointed a provisional committee to report on the question of establishing free lending libraries in country centres. The scheme outlined in its report of January, 1945 was accepted, and a permanent Country Free Lending Libraries Committee established. In order to commence a library service for rural areas £1,000 was placed on the estimates for 1945 and 1946, funds being made available on a £1 for £1 basis up to £50. By July, 1945, eight such libraries had been started, and by 1950, 50 libraries were receiving aid under the scheme, which is worked through the Municipalities and Road Boards. In each case the local authority makes its own arrangements for the supervision and lending of books.

In 1945 an Archives Branch was established at the Public Library as a repository for the non-current records of the Government and other historical material relating to Western Australia. Also, the collection of the Western Australia Historical Society is being housed in the Public Library.

An Adult Education Library of 12,000 volumes of general reading and fiction provides for readers in metropolitan and country areas. The library is conducted by the Adult Education Board and requires no deposit from its readers. The Board pays outward freight for country readers.

(vii) *Tasmania.* Library service in Tasmania has expanded rapidly during the past few years. Under the Libraries Act 1943 the Tasmanian Library Board was constituted, and the State Library of Tasmania was established on 1st January, 1944. The Board, in addition to administering the State Library head-quarters in Hobart, is responsible for the extension of library services throughout the State and for the control of State aid. Municipalities adopting the Act spend the proceeds of local rates on library premises, salaries and maintenance, and books for permanent retention. State aid is provided in the form of books of a value equal to the amount collected in rates, which are exchanged at intervals. In Launceston State aid is given in cash. The Launceston City Council now contributes approximately £3,079 per annum, and a like amount is received in State aid. Since the library became free under the Act, membership has increased from 1,000 to over 16,500.

Of the 49 municipalities in the State, 34 have adopted the Act and seven libraries have been established with the support of the Hydro-Electric Commission.

The State Library provides lending and reference services for the people of Hobart and operates a reference service for people throughout the State. In addition, it conducts screenings of documentary films, recitals of recorded music, summer schools, lectures, library weeks in country centres, puppetry demonstrations, etc.

The Parliamentary Library works in close collaboration with the State Library, which provides a reference officer to serve members during session, and undertakes to catalogue all new books added to the library as well as supplying recreational reading.

4. **University Libraries.**—The libraries of the Australian Universities provide material not only for the education of graduates and undergraduates, but also for scholars, research workers and practical investigators all over the continent. Much of the material they contain is not available elsewhere, for although in most cases smaller, they are in many directions more highly specialized than the public libraries. They lend to one another and to State and private institutions as well as to individual investigators. Each of them is governed by a librarian, who is responsible as a rule to an executive sub-committee and a committee which is practically co-extensive with the professional staff. In size, the Library of the University of Sydney is the third library in Australia, and the Libraries of the Universities of Adelaide and Melbourne are respectively seventh and eighth. The following table shows the sizes and rates of growth and expenditure of the Australian university libraries; it is impossible to give borrowing statistics, as they differ too widely to be comparable without much explanation.

UNIVERSITY LIBRARIES, 1950.

University.	Volumes.	Accessions during year.	Expenditure.
	No.	No.	£
Sydney	330,886	7,151	21,909
Melbourne	169,049	9,563	33,490
Queensland	103,383	7,383	14,460
Adelaide	157,387	4,610	15,463
Western Australia	95,000	3,688	10,696
Tasmania	74,642	3,171	10,720
New England University College	19,055	1,490	3,705
Canberra University College	9,517	2,132	4,095

The first books were bought for the Library of the University of Sydney as early as 1851 ; only since 1910, however, has it possessed a building of its own. It is named after its principal benefactor, Thomas Fisher, who bequeathed to it in 1885 the sum of £30,000. It contains an up-to-date bookstack of glass and steel and a fine reading room in which, since the beginning of 1941, about 18,000 volumes of the collection have been made available on open access shelves. In addition, members of the teaching staff and certain classes of undergraduates are admitted to the bookstacks ; all readers are encouraged to borrow freely. The Library possesses a large number of periodicals, especially scientific, valuable collections of seventeenth-century pamphlets and Elizabethan translations from the classics, and an extensive collection of Australian literature. Besides medical and law branches, there are a number of departmental libraries.

Early in 1854 the University of Melbourne made its first allocation for books, but the Library was housed in temporary quarters for a number of years. In recent years the university authorities have treated the Library generously, and there have been some welcome benefactions, but accommodation is insufficient and a new library building is a pressing need of the University. The W. L. Baillieu Trust has made available the first instalments of a £100,000 gift for building purposes All the books are accessible on open shelves, and though the Library is intended primarily for reference purposes, borrowing, except of text-books and certain valuable volumes, is made as easy as possible. The Library is administered from the centrally situated general library ; there is a large medical branch library specially rich in periodicals, and smaller branch libraries in some of the science departments.

The Library of the University of Queensland, founded in 1911, began with £3,000 worth of books, £2,000 having been raised by public subscription and £1,000 granted by the Government. The main library is now in its own building in the new university, St. Lucia.

The Adelaide University Library bears the title of its original benefactor, Robert Barr Smith, who, with members of this family in and after 1892, gave the University about £50,000 for library purposes. Some 20,000 volumes are shelved in the reading room and are available to the ordinary student. Up-to-date steel bookstacks provide accommodation for about 100,000 volumes. Borrowing facilities are available to all matriculated students, to country students and to graduates. There are medical and law departmental libraries. The medical library has on permanent loan the collection of the Institute of Medical and Veterinary Science, and also incorporates the library of the British Medical Association (South Australian Branch).

In the University of Western Australia the first permanent library staff was not appointed until 1927. Provision of permanent library accommodation was not possible when the university moved to its present site, and space and facilities have consequently been inadequate. Extensions to the temporary quarters were made in 1946. The whole collection, consisting of about 95,000 volumes, is accessible on open shelves, and there are several departmental libraries. A special feature is the use made of student co-operation.

The Library of the University of Tasmania was founded in 1893, but for many years it comprised little more than a collection of text-books. In 1913 a substantial increase of funds was allotted and important gifts were received. In 1919 it was organized for the first time in accordance with modern library practice. A full-time librarian was appointed for the first time at the end of 1945, and the staff has increased from two to ten. The Library is now providing a cataloguing service for the library of the Royal Society of Tasmania.

The New England University College Library was founded in 1938, and bears the name of its first benefactor, Sir William Dixon. At the end of 1950 it contained some 19,055 volumes mainly on open shelves.

The Canberra University College Library was established in 1938. At the end of 1950 it contained 9,517 volumes, which are on open shelves; reference books may be borrowed.

The library of the Australian National University is unique in that it is designed to serve the research staff of a wholly post-graduate institution. It specializes in the fields of the physical and medical sciences, excluding clinical materials. In the social sciences and Pacific studies consideration is given to the holdings of the Commonwealth National Library to avoid unnecessary duplication. The library was established in 1948 and operated in Melbourne until December, 1950, when the main library was transferred to Canberra, the biochemistry and microbiology sections remaining in Melbourne with the respective departments of the university. The collection comprises some 45,000 volumes, and in addition a special collection of 30,000 books in Chinese.

5. **Children's Libraries and School Libraries.**—(i) *General.* A survey conducted early in 1946 revealed that only a small proportion of children was being catered for by adequate library service. The effective use made of the few existing children's libraries is proof that the growing interest in this branch of library work will be well rewarded.

(ii) *New South Wales.* Children's libraries are being developed as departments of municipal and shire libraries. Three formerly independent children's libraries at Mosman, Wollongong and Moss Vale are now departments of municipal and shire libraries and have greatly increased budgets.

From 1937–38, school library work has been fostered by the State Library in co-operation with the Education Department. A "Model School Library" was established, and vacation classes for teacher librarians are held. In 1948 there were 63 district units under the central library scheme. Subsidies paid by the Department during 1949–50 amounted to £2,197.

(iii) *Victoria.* Since 1943–44 children's libraries have shared a grant of £500 between them, the number participating in 1950 being 34.

The Education Department is making provision for libraries in new schools being erected. Where accommodation is available in existing schools, grants of up to £4 for £1 are provided to furnish and equip libraries. In addition, the Government subsidizes the purchase of approved books on the basis of £1 for £1, or £2 for £1, according to the size of the school, to a maximum grant of £60 per annum. In 1948–49 the total government contribution for this purpose was £10,549.

With the assistance of school committees and municipalities, subsidized by the Department, many country districts have established circulating group libraries. Boxes of books are circulated to all schools in the group, changes being made at the commencement of each school term. During 1949, twenty-six such groups were functioning.

Financed by a bequest from the late William Gillies, a scheme of circulating libraries for small schools, particularly in remote areas, has been operating for some years. At present 441 schools benefit from this scheme.

The Department has a Library Services Officer with a small staff to advise and assist schools in the organization of libraries. A number of Education Department teachers have been trained at the Library School of the Public Library of Victoria, and an increasing number of schools have well-equipped library rooms with trained teacher-librarians in charge.

(iv) *Queensland.* The purchase of books in State school libraries in Queensland is financed by school committees and parents' associations, with a subsidy from the Department of Public Instruction on a £1 for £1 basis. The subsidy was suspended from 1931 to 1943.

In 1937 a system of Circulating Supplementary Readers was commenced. Books are graded for age levels and are moved from school to school, sufficient copies of each book for a whole class being sent, and reading being done in school. There are 96,000 such books now in use, the distribution at present being confined to primary schools.

(v) *South Australia.* A Children's Library of 6,000 volumes is used by school classes and individual children living in the metropolitan area. The books are lent to children of 14 years and over, and non-fiction may be borrowed by children of any age.

(vi) *Western Australia.* For schools with more than two teachers, including high schools and technical schools. £1 for £1 subsidy up to £50 is granted each year. New primary schools are provided with a room for a library, while high schools and some technical schools have a teacher acting as librarian.

For schools with one or two teachers there are two services. Through the Small Schools Fixed Library Service reference books up to the value of £12 are supplied annually to be kept permanently in the school. The Charles Hadley Travelling Library provides recreational reading, and operates 250 boxes which can be exchanged every three months through a local school acting as distributing centre for a district. All boxes are returned to head-quarters for repair and renewal at the end of the year. The government grants £250 per annum for this service, and the participating schools contribute the commission received from the Commonwealth Bank for the teachers' services—about £200.

Children in isolated country areas are catered for by books sent out by the State Correspondence Schools Library. The children are kept in touch with the Library by means of radio talks and leaflets issued periodically. There is as yet no general scheme to serve children in the metropolitan area.

The Federation of Police and Citizens Boys' Clubs of Western Australia aims at establishing a system of circulating boxes of books at an estimated cost of £10,000. Books are in circulation to 44 centres, of which 15 are Police Boys' Clubs, 24 State Schools, and 5 Children's Libraries.

Western Australian Children's Book Council Inc. was incorporated in 1948 and receives a government grant to assist its work of interesting local authorities in establishing children's free libraries.

(vii) *Tasmania.* Early in 1945 an appeal fund was opened for the establishment of Lady Clark Memorial Children's Libraries. The fund closed on 30th June, 1947, with an approximate total of £17,000. With its head-quarters at the State Library, in Hobart, it aims to serve all children in Tasmania with books. It works through the municipal authorities; at 30th June, 1950 children's libraries had been established in 46 municipalities, including Hobart, and five special Hydro-electric districts, children's books being provided on a population basis.

Practically all State secondary schools in Tasmania have libraries, with full-time librarians in four of them. The libraries of the Friends' School, Hobart, and the Hobart High School are among the foremost of their kind in Australia.

A Schools' Library Service assists with loans of curriculum books, 30 at a time, and provides advice and guidance in the use of books. The majority of primary schools have libraries; most area schools, in particular, have good ones.

The Education Department sends, each year, selected students or teachers to the Library School in Sydney.

6. **Industrial Libraries.**—Before the war industrial libraries were practically unknown in Australia, but during recent years many manufacturing firms have found it necessary to establish libraries to keep their scientific staffs informed of the latest

technical advances. At present there are seventeen libraries staffed by trained librarians attached to commercial organizations in Sydney, and 38 libraries in government and semi-government departments and scientific institutions. There are some 60 industrial libraries in Victoria, and several in other States.

7. **Microfilms.**—The following libraries supply microfilm or photostat copies of material, usually at a small charge (the letter " P " signifies photostat supplied and "M" microfilm supplied) :—*Australian Capital Territory*—Australian War Memorial (P), Commonwealth National Library (PM) ; *New South Wales*—Metropolitan Water Sewerage and Drainage Board (P), Public Library of New South Wales (M), Standards Association of Australia (P), School of Public Health and Tropical Medicine (M), Fisher Library, University of Sydney (PM) ; *Victoria*—Commonwealth Serum Laboratories (P), Technical Information Section, Munitions Supply Laboratories (PM), Public Library of Victoria (M), Standards Association of Australia (Melbourne Branch) (P), University of Melbourne (PM) ; *Queensland*—Public Library (P) ; *South Australia*—Public Library of South Australia (PM), University of Adelaide (PM), Waite Agricultural Research Institute (P) ; and *Tasmania*—University of Tasmania (PM).

§ 13. Public Museums.

The Australian Museum in Sydney, founded in 1836, is the oldest institution of its kind in Australia. In addition to possessing fine collections of the usual objects found in kindred institutions, the Museum contains a very valuable and complete set of specimens of Australian fauna. The cost of construction of the building to 30th June, 1950 was £86,560 The number of visitors to the institution during 1949–50 was 225,101, and the average attendance on week-days 422, and on Sundays 1,361. The expenditure for 1949–50 amounted to £32,014. A valuable library containing 32,933 volumes is attached to the Museum. Courses of evening popular lectures are delivered and lecturers also visit distant suburbs and country districts, while afternoon lectures for school children are provided. Nature talks are also broadcast by radio. Representative collections illustrative of the natural wealth of the country are to be found in the Agricultural and Forestry Museum and the Mining and Geological Museum. The latter institution prepares collections of specimens to be used as teaching aids to country schools. The " Nicholson " Museum of Antiquities, the " Macleay " Museum of Natural History and the Museum of Normal and Morbid Anatomy attached to the University, and the National Herbarium and Botanical Museum at the Sydney Botanic Gardens, are all accessible to the public. There is a Museum of Applied Arts and Sciences in Sydney with branches in five country centres. Expenditure during the year 1950 was £27,566. Valuable research work is being performed by the scientific staff in connexion with oil and other products of the eucalyptus and the gums, kinos, tanning materials, and other economic products of native vegetation generally.

The National Museum at Melbourne, devoted to natural history, geology and ethnology, is located in the eastern section of the Public Library Building. The National Art Gallery is situated in the same building. The Museum of Applied Science, also housed under the same roof, contained at 30th June, 1949, 23,120 exhibits which cover applied and economic aspects of all branches of science. There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens. In addition to the large collection in the geological museum attached to the Mines Department in Melbourne, well-equipped museums of mining and geological specimens are established in connexion with the Schools of Mines in the chief mining districts.

The Queensland Museum, founded in 1855, comprises exhibited and reference collections of zoology, geology and ethnology. It is entirely maintained by the State Government, and cost of the building was £31,736. Expenditure for the year 1949–50 was £11,225, including loan expenditure of £293. The collections are principally, but not exclusively, Australian ; there is, for example, the excellent series of ethnological material formed by Sir William McGregor in New Guinea. The publication is *Memoirs of the Queensland Museum* which was preceded by the *Annals of the Queensland Museum.* The library is extensive and valuable, and of great assistance to research workers in the State.

The Queensland Geological Survey Museum has branches in Townsville, opened in 1886, and in Brisbane, opened in 1892.

Under the Public Library Act of 1884 the South Australian Institute ceased to exist, and the books contained therein were divided amongst the Museum, Public Library, Art Gallery and the Adelaide Circulating Library. The South Australian Museum has considerable collections of most branches of natural history and was attended by 120,000 visitors in 1949–50. Cost of construction of the Museum building was returned as £65,000. In 1949–50 expenditure was £19,137.

The latest available returns show that the Western Australian Museum and Art Gallery contains altogether 202,000 specimens, of an estimated value of £105,500. The Museum, Art Gallery, and Library are housed in one building, and the visitors to the combined institutions during the year reached 80,000. At the 30th June, 1950, the structure was valued at £65,500.

There are two museums in Tasmania—the Tasmanian Museum at Hobart, and the Victoria Museum and Art Gallery at Launceston—both of which contain valuable collections of botanical, mineral, and miscellaneous products. The Museums received aid from the Government during 1949–50 to the extent of £7,050. The cost of construction in each case is included in that of Art Galleries given below.

§ 14. Public Art Galleries.

The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871. Cost of construction of the present building amounted to about £96,000. At the end of 1949 its contents, which are valued at £261,000, comprised 1,080 oil paintings, 665 water colours, 1,842 black and white, 232 statuary and bronzes, and 1,054 ceramics, works in metal and miscellaneous. Since 1895 loan collections of pictures have been regularly forwarded for exhibition in important country towns.

The National Gallery at Melbourne at 30th June, 1949 contained 2,125 oil paintings, 7,792 objects of statuary, bronzes, ceramics, etc., and 21,887 water colour drawings, engravings and photographs. The Gallery is situated in the same building as the Museum and Public Library, the total cost of construction being £439,000. Cost of purchases during 1948–49 was £24,807 and the total to that date amounted to £717,619. Several munificent bequests have been made to the institution. That of Mr. Alfred Felton, given in 1904, amounts to about £8,000 per annum. In 1913, Mr. John Connell presented his collection of art furniture, silver, pictures, etc., the whole being valued at £10,000. There are provincial art galleries at Ballarat, Bendigo, Geelong, Castlemaine and Warrnambool, and periodically pictures are sent on loan from the National Gallery.

The Queensland National Art Gallery, situated in the Executive Buildings, Brisbane, was founded in 1895, and contains a small, but well chosen collection of pictures. At the end of 1950 there were on view 279 oil paintings, 135 water colours, 243 black and white, and 44 pieces of statuary, together with 158 various prints, mosaics, and miniatures. Exclusive of exhibits on loan, the contents are valued at about £23,500. Visitors during the year averaged 925 on Sundays and 214 on week-days.

The Art Gallery at Adelaide dates from 1880, when the Government expended £2,000 in the purchase of pictures, which were exhibited in the Public Library Building in 1882. The liberality of private citizens caused the gallery rapidly to outgrow the accommodation provided for it in 1889 at the Exhibition Building, and on the receipt of a bequest of £25,000 from the late Sir Thomas Elder, the Government erected the present building, which was opened in April, 1900. The Gallery also received bequests of £16,500 in 1903 from the estate of Dr. Morgan Thomas, and valuable prints and £3,000 in 1907 from Mr. David Murray. In 1935 Mr. Alex Melrose gave £10,000 for the extension of the building. At the 30th June, 1950 there were in the Gallery 1,438 paintings in oil and water colour, 549 drawings and black and white, and 67 items of statuary, the contents being valued at £88,600. The cost of construction of the Art Gallery amounted to £48,000.

The foundation stone of the present Art Gallery at Perth in Western Australia was laid in 1901, and the Public Library, Museum, and Art Gallery are all situated in the one structure. The collection comprises 223 oil paintings, 149 water colours, 371 black and white, 276 statuary, and 1,275 ceramic and other art objects, the whole being valued at £32,500. Cost of construction of the buildings amounted to £10,000.

In Tasmania, the Art Gallery at Hobart was opened in 1887. At June, 1950 the contents consisted of 109 oil paintings, 56 water colours, 7 black and white, 3 statuary, and 521 etchings, engravings, etc. The cost of construction of the building was £4,500. Expenditure in 1949–50 was £6,207.

The Art Gallery at Launceston was erected in 1888 at a cost of £6,000, and opened on the 2nd April, 1891. Only a small proportion of the contents belongs to the gallery, the bulk of the pictures being obtained on loan. At June, 1950 there were on view 49 oil paintings, 21 water colours, 4 black and white, and 3 engravings and miscellaneous exhibits. Expenditure in 1949–50 was £4,402.

§ 15. Scientific Societies.

1. **Royal Societies.**—In previous issues of the Official Year Book an outline was given of the origin and progress of the Royal Society in each State (*see* No. 22, pp. 454–5). The accompanying table contains the latest available statistical information regarding these institutions, the head-quarters of which are in the capital cities.

ROYAL SOCIETIES : PARTICULARS, 1950.

Particulars.	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.	Hobart.	Canberra.
Year of foundation	1866	1854	1884	1880	1914	1843	1930
Number of members	369	245	268	172	183	422	60
Vols. of transactions issued ..	83	94	61	72	35	84	..
Number of books in library ..	30,000	19,100	4,000	10,000	4,000	24,393	..
Societies on exchange list ..	420	354	240	185	187	260	..
Income .. .. £	1,678	1,173	364	860	468	692	38
Expenditure .. .. £	2,365	1,490	266	1,077	350	654	38

2. **The Australian and New Zealand Association for the Advancement of Science.**—This Association was founded in 1887. Its head-quarters are at Science House, Gloucester-street, Sydney, and meetings are usually held biennially within the various States and in the Dominion of New Zealand. The last meeting was held in Sydney in August, 1952.

3. **Other Scientific Societies.**—The Linnean Society of New South Wales, with head-quarters in Sydney, was founded in 1874. Sir William Macleay, who died in 1891, during his lifetime and by his will endowed the society to the amount of £67,000, which has been increased by investment to approximately £100,000. The Society maintains a research bacteriologist and offers annually, to graduates of the University of Sydney, three research fellowships in various branches of natural history. Three fellowships were awarded in 1950. The library comprises some 18,000 volumes, valued at about £9,000. Seventy-five volumes of proceedings have been issued, and the Society exchanges with about 250 kindred institutions and Universities throughout the world. The membership at the end of 1950 was 238.

The British Astronomical Society has a branch in Sydney, and in each of the States the British Medical Association has a branch.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation.

§ 16. State Expenditure on Education, Science and Art.

The expenditure in each State on education, science and art during the years 1948–49 and 1949–50 is shown in the following table. Owing to the details not being available in all States, the figures exclude officers' pensions and superannuation, pay-roll tax, and interest and sinking fund on capital expended on buildings. The cost of the medical and dental inspection of school children is also excluded, as this service is more appropriately classified under Public Health, etc. :—

STATE EXPENDITURE ON EDUCATION, SCIENCE AND ART.
(£.)

State.	Expenditure from—				Receipts.	Net Expenditure.
	Revenue.	Loan.	Other Funds.	Total.		
			1948–49.			
New South Wales ..	11,424,789	966,986	..	12,391,775	598,306	11,793,469
Victoria	7,240,548	982,320	10,980	8,233,848	(a)164,341	8,069,507
Queensland ..	3,751,406	293,121	200,705	4,245,232	50,953	4,194,279
South Australia ..	2,397,392	293,774	..	2,691,166	64,057	2,627,109
Western Australia ..	2,076,153	223,698	..	2,299,851	125,012	2,174,839
Tasmania	1,131,024	206,036	..	1,337,060	9,587	1,327,473
Total ..	28,021,312	2,965,935	211,685	31,198,932	1,012,256	30,186,676
			1949–50.			
New South Wales ..	13,413,467	1,468,191	..	14,881,658	443,274	14,438,384
Victoria	8,707,522	2,122,332	3,736	10,833,590	(a)112,520	10,721,070
Queensland ..	4,267,601	467,891	231,571	4,967,063	51,024	4,916,039
South Australia ..	2,834,277	412,044	..	3,246,321	66,443	3,179,878
Western Australia ..	2,523,133	328,446	..	2,851,579	110,698	2,740,881
Tasmania	1,358,399	237,375	..	1,595,774	8,378	1,587,396
Total ..	33,104,399	5,036,279	235,307	38,375,985	792,337	37,583,648

(a) In addition, fees in respect of technical education amounting to £224,764 in 1948–49 and £220,196 in 1949–50 were received and spent by the School Councils.

CHAPTER VII.

PUBLIC JUSTICE.

§ 1. Lower (Magistrates') Courts.

1. **General.**—In considering the criminal returns of the various States, due allowance must be made for certain factors, such as the relative powers of the higher and lower courts. In the case of lower courts, the actual number of laws in each State whose breach renders a person liable to fine or imprisonment must be taken into account. Again, the attitude of the magistracy and police towards certain classes of offences is a factor, for in the case of liquor laws or laws connected with vagrancy or gaming, the views of the magistrates, and instructions issued to the police, may be responsible for considerable variations in the numbers. The strength and distribution of the police forces, and the age-constitution and distribution of the population of the States, also influence the results. Due weight should be given also to the prevalence of undetected crime, but information on this point is not available for all States. It may be mentioned that each State has its own separate judicial system, the Commonwealth jurisdiction being confined to the High Court of Australia (largely a Court of Appeal intermediate to the Privy Council although it has also original jurisdiction), the Commonwealth Court of Conciliation and Arbitration and the Federal Court of Bankruptcy. Full particulars regarding the judicial power of the Commonwealth will be found in Chapter III. of the Commonwealth Constitution which appears on page 18 of this issue.

2. **Powers of the Magistrates.**—(i) *New South Wales.* There is no general limit to the powers of the magistrates in regard to offences punished summarily, their authority depending in each case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences, the power of sentence is limited to six months. Imprisonment in default of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of liquidated debts and damages, whether liquidated or unliquidated, the amount is limited to £50 before a court constituted by a stipendiary magistrate. The amount in actions of debt before two or more Justices of the Peace is limited to £30 and in actions of damage to £10, but may extend to £30 with the consent of the defendant. Outside the Metropolitan Area of Sydney and certain other prescribed districts one justice of the peace may hear cases of debt, liquidated or unliquidated, or damage up to £5 and to £30 by consent of parties.

(ii) *Victoria.* The civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £50, and to actions arising out of torts or contracts. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences sentences up to two years may be imposed. The proportion of long sentences is, however, comparatively small.

(iii) *Queensland.* Generally speaking, the maximum term of imprisonment which justices can inflict is six months, but in certain exceptional cases, such as offences against sections 233, 344, and 445 of the Criminal Code (betting houses, aggravated assaults, and illegally using animals), sentences of twelve months may be imposed.

There is provision for applying cumulative sentences, but in practice, in general, not more than one sentence is made cumulative on a previous sentence.

Magistrates have no power to deal with habitual offenders, but there are such powers vested in the Supreme Court.

(iv) *South Australia.* In South Australia the power of special magistrates to impose fine and imprisonment is defined by the special act creating the offence and conferring jurisdiction. In the case of minor indictable offences, triable summarily, a maximum penalty of £100 fine or 2 years' imprisonment is fixed by the Justices Act 1921–1947. Magistrates also have power to hear certain civil actions in which the amount claimed is less than £750.

(v) *Western Australia.* The powers of magistrates and justices in regard to offences triable summarily are governed by the act creating the offence and giving them jurisdiction. Imprisonment in default of payment of a fine is regulated by a scale limiting the period according to the amount of the fine but not to exceed six months.

The civil jurisdiction of magistrates and courts is restricted in general to £250, but disputed actions, the subject matter of which exceeds £100, must be tried by a judge. By consent of the parties, any action that might be brought in the Supreme Court may be dealt with in a Local Court. Justices may act in the case of illness or absence of the magistrate.

Magistrates are coroners and justices may be appointed as acting coroners.

Magistrates have appellate jurisdiction under some statutes and in country districts act as Chairmen of the Courts of Session. They may be appointed as Commissioners of the Supreme Court.

On the goldfields, the magistrate is also the warden.

(vi) *Tasmania.* Magistrates may hear and determine in Courts of Petty Sessions all offences other than those punishable on indictment. Stealing and analogous crimes where the property involved does not exceed £10 in value may be dealt with by magistrates unless the defendant objects.

No general limit is fixed in respect of sentences, the statute creating the offence almost invariably laying down the penalty. Where this is not the case, the Contravention of Statutes Act 1889 provides that a fine of £50 may be imposed. Generally speaking, sentences which justices can inflict are limited to six months, although in several cases sentences of up to two years may be imposed. The aggregate term of cumulative sentences cannot exceed two years.

The civil jurisdiction of magistrates is divided into two categories. A Commissioner of the Court of Requests, who must be a legal practitioner, and is invariably a police magistrate, may hear actions for the recovery of debts and damages not exceeding £100. The jurisdiction of these courts may be increased by proclamation to £250, and this has been done in five instances. Courts of General Sessions, constituted by at least two justices, exercise similar powers, but the jurisdiction cannot exceed £50. Only one court has the maximum jurisdiction, the others being limited to £30.

3. **Cases Tried at Magistrates' Courts.**—The total number of arrest and summons cases tried at Magistrates' Courts in each State is given below for 1939 and for the years 1945 to 1949 :—

CASES TRIED AT MAGISTRATES' COURTS.

State or Territory.	1939.	1945.	1946.	1947.	1948.	1949.
New South Wales ..	144,848	141,079	173,311	180,835	198,456	205,817
Victoria	82,858	60,744	64,487	73,990	76,516	80,511
Queensland(*a*) ..	32,501	27,838	33,096	34,664	36,149	40,503
South Australia ..	22,770	(*a*)22,837	(*a*)27,067	(*a*)27,005	(*a*)25,376	(*a*)28,349
Western Australia ..	24,111	19,716	24,831	22,893	26,257	27,373
Tasmania	9,498	6,422	9,390	9,024	9,060	11,713

Aust. Cap. Territory ..	284	354	633	893	777	1,018
Total ..	318,370	279,339	333,601	350,406	374,189	396,483

(*a*) Year ended 30th June following.

Investigation of the returns shows that considerable variations in the figures for single States are occasioned by breaches of new Acts, or the more stringent enforcement of the provisions of existing Acts. Any deductions drawn from the total returns as to the increase or decrease of criminality should, therefore, be based upon a careful analysis of the detailed list of offences.

4. **Convictions at Magistrates' Courts.**—The figures given in the previous table include, of course, a number of people who were charged without sufficient reasons, and, statistically, are not of general importance. A classification of convictions of persons who appeared before the lower courts in each State during 1949 is given in the following table :—

CONVICTIONS AT MAGISTRATES' COURTS, 1949.

Class of Offence.	N.S.W.	Vic.	Qld.(*a*)	S.A.(*a*)	W.A.	Tas.	N.T.(*a*)	A.C.T.	Aust.
Against the Person ..	2,551	860	382	233	337	212	80	42	4,697
Against Property ..	10,327	3,810	2,099	1,254	1,980	717	29	103	20,319
Forgery and Offences against the Currency..	105	5	..	1	3	11	3	..	128
Against Good Order ..	100,484	24,503	26,901	7,231	7,081	1,660	804	712	169,376
Other Miscellaneous ..	76,488	43,238	9,309	16,777	15,987	7,606	211	60	169,676
Total	189,955	72,416	38,691	25,496	25,388	10,206	1,127	917	364,196

(*a*) Year ended 30th June following.

The following table shows the number of convictions in 1939 and in each year from 1945 to 1949 :—

CONVICTIONS AT MAGISTRATES' COURTS.

State or Territory.	1939.	1945.	1946.	1947.	1948.	1949.
New South Wales ..	126,353	125,982	157,108	165,472	183,367	189,955

(*a*) Year ended 30th June following.

5. **Convictions for Serious Crime at Magistrates' Courts.**—(i) *General.* While the figures given in the preceding table refer to the entire body of convictions, the fact must not be overlooked that they include a large proportion of offences of a technical nature, many of them unwittingly committed, against various Acts of Parliament. Cases of drunkenness and minor breaches of good order, which, if they can be said to come within the category of crime at all, at least do so in a very different sense from some other offences, also help to swell the list. The following table has therefore been prepared for the purpose of showing the convictions at magistrates' courts for what may be regarded as the more serious offences, i.e., against the person and property, either separately or conjointly, and forgery and offences against the currency. Owing to the smallness of the population, the rates for the Northern and the Australian Capital Territories are subject to considerable variation.

(ii) *Number and Rates, Years* 1939 *and* 1945 *to* 1949. The following table shows the number and rates of convictions for serious crime at magistrates' courts for the years 1939 and 1945 to 1949 :—

CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS.

State or Territory.	1939.	1945.	1946.	1947.	1948.	1949.
			NUMBER.			
New South Wales ..	12,724	15,768	14,870	14,626	13,308	12,983

Total ..	36.91	38.84	37.45	35.68	33.44	31.66

(*a*) Year ended 30th June following.

(iii) *Rate of Convictions,* 1881 *to* 1949. Statistics of convictions reveal a consistent increase in the rate of serious crime from 1925 to 1931, when 37.1 convictions per 10,000 of the population were recorded. Following this comparatively high figure the rate declined to 32.4 in 1933 but increased considerably to 36.9 in 1939. By 1941 the rate had declined to 33.6 but rose in the next two years to 43.2, the highest recorded since 1891, when the average number of convictions was 44.8. Since 1943 it has declined steadily to the rate of 31.7 for 1949. The rate of convictions over a series of years is shown below ; only the more serious offences particularized on the preceding page have been taken into consideration.

RATE OF CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS : AUSTRALIA.

Year	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1949.
Convictions per 10,000 persons	69.3	44.8	29.1	24.6	29.2	37.1	33.6	31.7

6. **Committals to Superior Courts.**—(i) *General.* In a previous paragraph it has been pointed out that comparisons of criminality based on a consideration of the total returns from magistrates' courts are somewhat inadequate, inasmuch as the figures include numbers of cases which are merely technical breaches of laws having in some instances a purely local significance. The committals to higher courts give a better basis of comparison, although even in this connexion allowances must be made for the want of uniformity in jurisdiction. A classification of the offences for which persons appearing in the lower courts were committed to higher courts in each State and Territory for the year 1949 is shown in the following table.

COMMITTALS TO SUPERIOR COURTS, 1949.

Class of Offence.	N.S.W.	Vic.	Qld.(*a*)	S.A.(*a*)	W.A.	Tas.	N.T.(*a*)	A.C.T.	Aust.
Against the Person ..	828	316	193	139	62	39	7	6	1,590

Australian Capital Territory	14.4	4.0	4.4	12.9	4.7	11.3
Total	7.1	7.7	8.2	8.0	7.8	8.4

(*a*) Year ended 30th June following.

(ii) *Rate of Committals*, 1881 *to* 1949. With occasional variations the rate of committals for serious crime has remained fairly stable during recent years, and, if the comparison be carried back further, the movement in the rate has undergone very little change during the present century. The rate at intervals since 1881 is as follows :—

RATE OF COMMITTALS TO SUPERIOR COURTS : AUSTRALIA.

Year	1881.	1891.	1901.	1911.	1921.	1931.	1941.	1949.
Committals per 10,000 persons	12	11	8	6	7	8	5	8

7. **Drunkenness.**—(i) *Cases and Convictions.* The number of arrest and summons cases of drunkenness and the convictions recorded during the year 1939 and the years 1946 to 1949 are given in the following table :—

DRUNKENNESS : CASES AND CONVICTIONS.

State or Territory.	1939.		1946.		1947.		1948.		1949.

(*a*) Year ended 30th June following.

Under the heading "drunkenness" are included cases of ordinary drunkenness, drunkenness and disorderliness, and habitual drunkenness.

The number of convictions is, as might naturally be expected, almost identical with the number of cases.

(ii) *Convictions per* 10,000 *of Population.* The convictions for drunkenness per 10,000 of population during 1939 and each of the years from 1945 to 1949 are shown in the following table :—

CONVICTIONS FOR DRUNKENNESS PER 10,000 OF POPULATION.

State or Territory.	1939.	1945.	1946.	1947.	1948.	1949.
New South Wales ..	117.8	149.3	210.9	225.5	272.7	251.2
Victoria	60.8	52.0	57.3	72.3	78.5	83.2
Queensland(*a*)	108.9	107.2	146.2	155.1	186.2	212.9
South Australia	43.5	(*a*) 55.6	(*a*) 67.1	(*a*) 75.2	(*a*) 82.1	(*a*) 78.0
Western Australia ..	56.6	82.0	82.2	84.5	84.8	101.0
Tasmania	17.0	9.0	17.8	16.9	18.9	25.9
Australian Capital Territory	91.2	24.7	85.6	163.8	215.7	205.3
Total	88.0	99.4	132.1	144.4	170.4	167.9

(*a*) Year ended 30th June following.

In the twenties the convictions for drunkenness averaged approximately 100 per 10,000 of population, but the rate fell away considerably during the following years and was only 57.1 in 1931. With the improvement in the social condition of the people following that year, the average rose steadily to 84.1 in 1936. The annual average for the period 1936 to 1939 was 82.7 as compared with 90.8 for the years 1940 to 1945. Following an appreciable increase in the previous year the convictions per 10,000 rose very steeply in 1946 to 132.1 and increased to 170.4 in 1948 but fell to 167.9 in 1949. Figures for the consumption of beer have followed a somewhat similar course. The average consumption of beer per head, which in the twenties was slightly over eleven gallons, fell to 7.32 gallons in 1931–32. It rose to 10.34 in 1936–37, averaged 11.75 gallons for the years 1936–37 to 1939–40 and increased further to an average of 13.23 for the years 1940–41 to 1945–46. Consumption increased in 1945–46, and has continued to do so, except for a slight decline in 1947–48, to reach the 1950–51 figure of 19.73.

The convictions for drunkenness taken by themselves are not altogether a satisfactory test of the relative sobriety of the inhabitants of each State, inasmuch as several important factors must be taken into consideration. The age and sex constitution of the people, for example, are by no means identical in all the States. Another factor is the distribution of the population. Arrest or summons for drunkenness obviously is more likely in the regions densely populated than in those sparsely populated. In addition, allowance must be made for the attitude of the magistracy, the police and the general public in regard to the offence. Due account also must be taken of the effect of legislation dealing with the limitation of hours during which liquor may be sold in hotels.

(iii) *Consumption of Intoxicants.* The following table shows the consumption of spirits, wine and beer per head of population in Australia during the years 1938–39 and 1945–46 to 1950–51 :—

CONSUMPTION OF INTOXICANTS IN AUSTRALIA PER HEAD OF POPULATION.

Year.	Spirits.	Wine.	Beer.
	Proof Gals.	Gals.	Gals.
1938–39	0.22	0.65	12.13
1945–46	0.32	0.96	13.45
1946–47	0.29	1.09	15.90
1947–48	0.31	1.37	15.47
1948–49	0.33	1.38	17.87
1949–50	0.32	1.50	18.23
1950–51	0.38	1.55	19.73

(iv) *Treatment of Drunkenness.* (*a*) *General.* Though the problem of the correct method of dealing with dipsomania is by no means an easy one, it seems fairly clear that the present plan of bringing offenders before magistrates, and subjecting them to the penalty of imprisonment or fine, has little deterrent effect, as the same offenders are constantly reappearing before the courts. During recent years the dangers of moral contamination in this way have been more accurately appreciated, and a system of classification of prisoners has been adopted whereby the petty offender is as far as possible kept from association with those convicted of more serious offences.

(*b*) *Remedial.* Legislation has been passed in each State providing for the commitment of inebriates to special Government institutions. The laws in the various States are as follows :—New South Wales, Inebriates Act 1912 ; Victoria, Inebriates Act 1928 ; Queensland, Inebriate Institutions Act 1896 ; South Australia, Inebriates Act 1908–1934, Convicted Inebriates Act 1913–1934 ; Western Australia, Inebriates Act 1912–1919 ; Tasmania, Inebriates Act 1885, Inebriate Hospitals Act 1892. Curative work was first undertaken by the Government of New South Wales in 1907. In most cases the institutes are connected with the gaols, and, naturally, custodial measures are still a strong feature in their management ; nevertheless, the results of remedial measures have been encouraging.

8. **First Offenders.**—In all the States, statutes dealing with first offenders have been in force for many years. Existing legislation is as follows :—New South Wales, Crimes Act 1900 amended in 1924 and 1929, First Offenders (Women) Act 1919 ; Victoria, Crimes Act 1928 ; Queensland, Criminal Code Acts 1899 to 1945 ; South Australia, Offenders Probation Act 1913–1941 ; Western Australia, Criminal Code Act 1913–1942 ; Tasmania, Probation of Offenders Act 1934. The method of procedure is practically the same in all cases, i.e., with regard to most first offenders convicted of a minor offence the magistrate or judge is empowered to allow the offender to go free on recognizances being entered into for his good behaviour for a certain period. In practice, this humane law has been found to work excellently, very few of those convicted under it having been found to relapse into crime.

9. **Children's Courts.**—Special courts for the trial of juvenile offenders have been established in New South Wales, Victoria, Queensland, Western Australia and Tasmania, while Children's Courts, although not under that title, are provided for by the Maintenance Act 1926–1941 in South Australia. The object of these courts is to avoid, as far as possible, the unpleasant surroundings of the ordinary police court.

§ 2. Superior Courts (Judges' Courts).

1. **Convictions at Superior Courts.**—The following table shows for each State and Territory during 1949, and in Australia as a whole in that and the previous year, the number of convictions at Superior Courts for each of the principal offences.

CONVICTIONS AT SUPERIOR COURTS, 1949.

Offence.	N.S.W. (a)	Vic.	Qld. (a)	S.A.	W.A.	Tas.	N.T. (a)	A.C.T.	Australia. 1949.	Australia. 1948.

Australian Capital Territory	11.2	2.7	4.4	8.8	3.6	10.9
Total	3.2	3.4	3.8	3.7	3.7	3.5

(*a*) Year ended 30th June following.

The rate of convictions per 10,000 of mean population for Australia, which in 1930 stood at 4.0, fell each year thereafter until 1936 when the record low level of 2.3 was reached. It rose during each of the next three years to 3.2 in 1939, and, after falling to 2.8 in 1940, rose in each of the next three years, reaching 3.5 in 1943. Following a fall to 3.3 in 1944, the rate subsequently rose as high as 3.8 (1946), but had fallen to 3.5 by 1949. Owing to the smallness of the population and the particular conditions prevailing there the rates for the Territories naturally show considerable variation.

3. **Habitual Offenders.**—An account of the methods adopted in each State in connexion with habitual offenders is given in the following paragraphs.

(i) *New South Wales.* The Habitual Criminals Act of 1905 gives power to judges to declare as habitual criminals persons who have a certain scheduled number of previous convictions. Action may be taken either on the initiative of the judge in indictable matters, or on the recommendation of a stipendiary magistrate, when the matter becomes a special hearing before a judge. The result of the declaration is that the offender is kept for an indefinite period after the completion of his sentence, and is released only when he is considered to be fit to be at large. During the indeterminate stage of his sentence the conditions of detention are governed by regulations under the Act which are somewhat less restrictive than those under the Prisons Act 1899.

At 31st December, 1951 there were 47 prisoners detained in pursuance of the legislation.

(ii) *Victoria.* The Indeterminate Sentences Act came into force in Victoria in July, 1908, and up to the end of June, 1950, 5,964 individual prisoners had been detained under its provisions. Of the 5,195 who were released on parole or probation, 2,146 were reconvicted or returned, 2,750 had completed probation or not offended again, so far as is known, and 270 were reporting on parole or probation. The report of the Indeterminate Sentences Board indicates that the successful results from all inmates approximates 59 per cent., while the results from the younger delinquents (up to 25 years of age) is over 62 per cent. The Indeterminate Sentences system was brought into operation with the object of more comprehensive control of prisoners, particularly after parole and probation, with the twofold object of the reform of the inmate and protection of society.

Committals to reformatory prison are generally by Supreme Court Judges or Chairmen of General Sessions pursuant to the provisions of Sections 514 and 515 of the Crimes Act and by Special Magistrates of Children's Courts pursuant to the provisions of Section 28 of the Children's Court Act. This latter provision is limited to children between the ages of fifteen and seventeen.

(iii) *Queensland.* Sections 659A to 659I of the Queensland Criminal Code deal with habitual criminals. Only the Supreme Court or a judge thereof may declare a person to be an habitual criminal. An habitual criminal is to be detained in a reformatory prison (Section 659D) and there employed (Section 659F).

Where the Supreme Court or a judge recommends the discharge of an habitual criminal, the Governor may direct his discharge and may order him so long as he remains in Queensland to report at intervals during any period not exceeding two years (Section 659G).

(iv) *South Australia.* The Criminal Law Consolidation Act 1935–1940 provides that persons convicted of a certain number of indictable offences shall be detained, upon further conviction, during the Governor's pleasure. Proof of previous conviction is always relevant to the question of penalty.

(v) *Western Australia.* Under the Criminal Code Amendment Act of 1918, power is given to sentence prisoners to be detained in a reformatory prison during the Governor's pleasure, where such prisoner is deemed to be an habitual criminal, or in other special circumstances where the Court considers such a sentence is fit.

The number under preventative detention on 30th June, 1951, was 20, and the total number dealt with since the passing of the Act was 128.

(vi) *Tasmania.* Since the Indeterminate Sentences Act came into operation in 1922, 55 persons have been confined under its provisions; at present four are in custody, two being re-committals.

Of the 51 released on probation, 13 have been re-committed, two of them on three occasions.

4. **Capital Punishment.**—There were seven executions in Australia during the period 1939 to 1949. One took place in New South Wales (in 1939), three in Victoria (two in 1939 and one in 1942), two in South Australia (one in 1944 and one in 1946) and one in Tasmania (in 1946).

Under the Criminal Code Amendment Act 1922 capital punishment was abolished in Queensland.

In the early days of the history of Australia the penalty of death was attached to a large number of offences, many of which at the present time would be dealt with in the lower or magistrates' court. With the growth of settlement and the general amelioration in social and moral conditions, the list was, however, considerably curtailed, and the existing tendency is practically to restrict death sentences to cases of murder. It may be stated that in cases of rape, which is a capital offence in some of the Australian States, the penalty has been but sparingly inflicted during the last few years. Juries are reputed to be loth to convict on this charge, owing to the uncertainty whether sentence of death will be carried out.

The average annual number of executions in Australia from 1861 to 1880 was 9; from 1881 to 1900, 6; from 1901 to 1910, 4; from 1911 to 1920, 2; from 1921 to 1930, 2; and from 1931 to 1940, 1.

§ 3. Civil Courts.

1. **Lower Courts.**—The total number of plaints entered and the amounts awarded to plaintiffs during the years 1948 and 1949 are shown in the following table. Particulars for earlier years appear in preceding issues of the Official Year Book.

The figures represent the returns from the Small Debts Courts in New South Wales, Petty Session Courts in Victoria, Magistrates' Courts in Queensland, Local Courts of South Australia and Western Australia, Courts of Requests in Tasmania, Courts of Summary Jurisdiction in Northern Territory and Court of Petty Sessions in the Australian Capital Territory.

2. **Superior Courts.**—The following table shows the transactions on the civil side in the Superior Courts during the years 1948 and 1949. The particulars given below include the number and amount of judgments entered by default or confession, or agreement, and differ from those in issues of the Official Year Book prior to No. 29, which related in most States only to causes actually tried during the year.

The New South Wales returns refer to judgments in the District Courts only, and exclude 1,393 judgments in 1948 and 1,548 judgments in 1949 signed in the Supreme Court, for which the amounts entered are not available.

NOTE.—Excludes nullity of marriage.

(vi) *Divorces Granted—Duration of Marriage and Issue of Persons Involved.* The following table shows the number of divorce decrees made absolute in 1950, classified according to the legal duration of the marriage (i.e., the period from the date of marriage to the date when the decree nisi was made absolute) and the issue involved. Of the couples divorced in 1950, 36.6 per cent. had no children, 31.9 per cent. had one child, 18.0 per cent. had two children, 7.4 per cent. had three children and 6.1 per cent. had four or more children.

(vii) *Number of Divorced Persons at Censuses* 1891 *to* 1947. The following table shows the number and proportions of divorced males and females in Australia at each Census from 1891 to 1947 according to their ages. Prior to 1911 no record was made of divorced persons in South Australia, so comparisons cannot be made to extend beyond that date.

(a) Excludes South Australia.

4. **Bankruptcies.**—Particulars relating to bankruptcy in each State up to the end of 1927 were incorporated under this heading in issues of the Official Year Book prior to No. 23. Under the terms of the Bankruptcy Act 1924–1950 jurisdiction in bankruptcy and insolvency was taken over by the Commonwealth from 1st August, 1928. The Act made provision for the declaration of districts, and each State (except Queensland) and Northern Territory have been declared bankruptcy districts. The bankruptcy district of New South Wales includes the Australian Capital Territory. Queensland has been divided into three districts corresponding to the three Supreme Court districts in that State. Operations under the Act for the year ended 31st July, 1950 are shown in the following table. For the purposes of comparison, the annual averages for periods between the years 1929 and 1948 are appended to the table.

FEDERAL BANKRUPTCY ACT : OPERATIONS, 1949–50.

It is pointed out that the procedure in certain States has been influenced largely by the procedure in force prior to the passing of the Commonwealth Act, and that, therefore, no particular significance attaches to the large number of compositions, etc., in South Australia and Western Australia.

The Bankruptcy Act 1930 created a Federal Court of Bankruptcy and provided for the appointment of a Judge or two Judges thereto. In 1930 a Commonwealth Judge in Bankruptcy was appointed in addition to the State Judges to deal with bankruptcy work in New South Wales and Victoria, as the Courts in these States were unable to cope with the business. All the bankruptcy cases in these States are now heard in the Federal Court which sits in Sydney and Melbourne alternatively.

5. **High Court of Australia.**—Under the provisions of Section 71 of the Commonwealth Constitution, the judicial power of the Commonwealth is vested in a Supreme Court called the High Court of Australia, and in such other courts as the Parliament creates or invests with federal jurisdiction. The Commonwealth High Court possesses both original and appellate jurisdiction. The powers of the Court are defined in the Commonwealth Constitution, and in the Judiciary Act 1903–1950. The Court consists of a Chief Justice and six other judges. Sittings of the Court are held in the capitals

of the various States as occasion may require. The High Court functions as a Court of Appeal for Australia. The following statement shows the transactions of the High Court for 1949 and 1950.

TRANSACTIONS OF COMMONWEALTH HIGH COURT.

Original Jurisdiction.	1949.	1950.	Appellate Jurisdiction.	1949.	1950.
Number of writs issued	96	128			
Number of causes entered for trial ..	18	8	Number of appeals set down for hearing ..	95	86
Judgments for plaintiffs	27	14	Number allowed ..	36	31
Judgments for defendants	4	3	Number dismissed ..	51	37
Otherwise disposed of ..	11	31			
Amount of judgments	£264,204	£37,203	Otherwise disposed of	2	17

During 1949 and 1950 respectively the High Court dealt also with the following: Appeals from Assessments under Taxation Assessment Act, 23, 22; Special cases stated for the opinion of the Full Court, 30, 5; Applications for Prohibitions, etc., 63, 49. The fees collected amounted to £1,390 in 1949 and £1,277 in 1950.

6. **Commonwealth Court of Conciliation and Arbitration.**—Some information regarding this Court, which was established under the Commonwealth Conciliation and Arbitration Act 1904–1950, will be found in Chapter XI.—Labour, Wages and Prices, of this volume, and in the *Labour Report* issued by this Bureau.

§ 4. Police and Prisons.

1. **General.**—Early issues of the Official Year Book (*see* No. 4, p. 918) contain a *résumé* of the evolution of the police force in Australia up to the passing of the Police Act 1862 (25 Vic. No. 16) in New South Wales.

2. **Duties of the Police.**—In addition to the ordinary employment attaching to their office, the police are called upon to perform many duties which in other countries are carried out by various functionaries. Much of the time of the several forces is taken up in extraneous duties not connected with the protection of life and property, while the cash value of the services rendered to other Government departments is considerable.

3. **Strength of Police Force.**—(i) *General.* The strength of the police force in each State during 1939 and the years 1945 to 1949 is shown in the following table. It may be mentioned that the police forces (with the exception of the small body of Commonwealth police maintained in the Northern Territory and in the Australian Capital Territory) are entirely under State control, but, by arrangement, the Commonwealth Government utilizes their services in various directions, such as acting as aliens registration officers, and policing the various regulations, etc.

STRENGTH OF POLICE FORCES.

(a) 30th June of year following.

The figures for New South Wales for 1949 exclude 15 "black trackers" and three "cadet trackers" (i.e., natives employed in detection of offenders chiefly in outlying districts) and 4 matrons, while the Victorian returns exclude one black tracker. For Queensland the figures exclude 30 black trackers, for South Australia 3 wardresses, for Western Australia 29 black trackers and 5 female searchers, and for the Northern Territory 33 black trackers. Women police are employed in all the States, the respective numbers for 1949 included in the table above being :—New South Wales 29, Victoria 18, Queensland 10, South Australia 18, Western Australia 9, Tasmania 6 and Australian Capital Territory 1. Their work is mainly preventive, relating particularly to females and neglected children. They also carry out escort duties in respect of female prisoners.

(ii) *Proportion to Population.* The average number of persons in the various States to each police officer during 1939 and the years 1945 to 1949 is shown in the following table. In considering these figures allowance must, of course, be made for the unequal area and unequal distribution of the population of the various States.

POLICE FORCES IN RELATION TO POPULATION.

State or Territory.	Number of Persons per Sq. Mile, 1947 Census.	Persons to each Police Officer.

Total	72	71	5,490	5,486	849	849	3,682	3,983

(*a*) Year ended 30th June following.

The figures refer to prisoners under sentence and exclude aborigines and debtors. There are no gaols in the Australian Capital Territory, but there is a lock-up consisting of three cells attached to the police station at Canberra, and a similar lock-up at Jervis Bay, where offenders are held while awaiting trial or serving short sentences not exceeding one week imposed by the Magistrate's Court.

5. **Prisoners in Gaol, 1939 and 1945 to 1949.**—The number of prisoners in gaol at 31st December in each of the years 1939 and 1945 to 1949 and the proportion per 10,000 of the population are shown in the following table. The figures refer to prisoners under sentence and exclude aborigines and debtors.

PRISONERS IN GAOL.

State or Territory.	1939.	1945.	1946.	1947.	1948.	1949.
			NUMBER.

Tasmania(*a*)	4·5	3·8	4·7	3·8	3·5	4·4
Total	4·8	5·0	5·1	4·6	4·7	4·9

(*a*) 30th June of year following.

After remaining stationary at 6.5 per 10,000 for the four years ended 1932 the proportion of prisoners in gaol to the total population declined each year to 4.5 in 1937. It fluctuated slightly during the next four years but remained under 5.0. The proportion was 4.9 in 1942, but it rose slightly above this rate to 5.5 in 1944 and then fell to 4.6 in 1947, to rise again to 4.9 in 1949. This figure compares most favorably with that obtaining in 1891, when the proportion was as high as 16 per 10,000. Rates for the Northern Territory have not been included on account of the prevailing conditions.

6. **Improvement in Prison Methods.**—In previous issues of the Official Year Book a fairly detailed account is given of the improvements effected in each State during recent years in regard to methods of prison management (*see* Official Year Book No. 22, pp. 471–4), but this information is not repeated in the present volume.

§ 5. Cost of Administration of Justice.

1. **Expenditure by the States.**—The table below shows the expenditure from Consolidated Revenue during 1938–39 and 1948–49 and 1949–50 in connexion with the administration of justice in each of the States.

Net costs are shown instead of gross expenditure as it is difficult to obtain comparable figures of the total costs of the various services under this heading. It will be noted that in South Australia and Western Australia (except for 1949–50) the receipts for legal fees and registrations exceed the actual expenditure under "Justice".

NET EXPENDITURE ON ADMINISTRATION OF JUSTICE.

Total ..	755,785	7,761,750	1,006,421	1 11	19 4	2 6

2. **Commonwealth Expenditure.**—The expenditure shown in the previous table is that incurred by the State Governments only, and does not include expenditure of the Commonwealth Attorney-General's Department which is shown hereunder for the years 1938–39 and 1945–46 to 1949–50.

EXPENDITURE OF THE COMMONWEALTH ATTORNEY-GENERAL'S DEPARTMENT.

(£.)

Year.	Gross Expenditure.	Receipts.	Net Expenditure.
1938–39	281,497	111,036	170,461
1945–46	472,604	135,239	337,365
1946–47	569,234	155,419	413,815
1947–48	688,572	178,591	509,981
1948–49	745,106	176,310	568,796
1949–50	820,560	183,398	637,162

The totals for each year include expenditure in connexion with patents and copyright which amounted in 1949–50 to £151,572. The Commonwealth took over jurisdiction in bankruptcy in August, 1928, and the expenditure thereon in 1949–50 amounted to £59,315. Expenditure in connexion with the Australian Capital Territory police in 1949–50 amounted to £35,955, and £12,847 was expended on miscellaneous items including the Law Court, Titles Office and Industrial Board. Revenue of the Attorney-General's Department for the year 1949–50 amounted to £183,398, comprising £123,727 for patents, copyright, trade marks and designs, £21,993 for bankruptcy and £37,678 miscellaneous, including fees and fines.

In addition to the foregoing, the amounts of £70,439 during 1948–49 and £71,923 in 1949–50 were expended in the Northern Territory for the upkeep of the police force and prison services.

CHAPTER VIII.

PUBLIC HEALTH AND RELATED INSTITUTIONS.

A. PUBLIC HEALTH.

§ 1. State Public Health Legislation and Administration.

1. **New South Wales.**—The Department of Public Health comes under the jurisdiction of the Minister for Health, with an Under-Secretary as Permanent Head of the Department for administrative purposes.

There is also a Director-General of Public Health and Chief Medical Adviser to the Government, who is ex-officio President of the Board of Health and Chairman of the Nurses' Registration Board. He is assisted by a Deputy Director-General.

The Inspector-General of Mental Hospitals, who, under present arrangements, is also the Director-General of Public Health, is responsible for the administration of that part of the Lunacy Act relating to the care and treatment of mental patients. There is also a Deputy Inspector-General.

The following statutory authorities are constituted under Acts administered by the Minister for Health :—Board of Health (Public Health Act), Hospitals Commission of N.S.W. (Public Hospitals Act), Milk Board (Milk Act), Dental Board (Dentists Act), Pharmacy Board (Pharmacy Act), Medical Board (Medical Practitioners Act), Board of Optometrical Registration (Opticians Act), Ambulance Transport Service Board (Ambulance Transport Service Act), Physiotherapists Registration Board (Physiotherapists Registration Act) and Nurses Registration Board (Nurses Registration Act).

The Department's activities extend over the whole of the State and embrace all matters relating to the public health and the greater part of the general medical work of the Government. These include the following :—(*a*) Supervision of the work of local authorities (municipal and shire councils) in relation to public health matters connected with the following Acts—Public Health Act, Noxious Trades Act and Pure Food Act ; (*b*) Scientific Divisions (Government Analyst, Microbiological Laboratory, and Division of Industrial Hygiene) ; (*c*) Tuberculosis and Social Hygiene Divisions ; (*d*) Medical Officers of Health at Sydney, Broken Hill, Newcastle, Wollongong, Bathurst and Lismore ; (*e*) State Hospitals and Homes and State Sanatoria ; (*f*) Mental Hospitals ; (*g*) Public Hospitals (Hospitals Commission) ; (*h*) Maternal and Baby Welfare (Baby Health Centres) ; (*i*) School Medical and Dental Services ; and (*j*) Publicity, Nutrition and Library Services.

2. **Victoria.**—The Ministry of Health Act 1943 made the Minister of Health responsible for all Acts administered up to that time by the Department of Public Health, the Hospitals and Charities Acts, the Mental Hygiene Acts, and all legislation and matters relating to the health and well-being of the people of the State.

The former Department of Public Health became the General Health Branch controlled by a Chief Health Officer. The latter also administers the Maternal and Child Hygiene Branch, and the recently constituted Tuberculosis Branch. These three with the Mental Hygiene Branch make up the four branches of the Department of Health.

The Secretary of the Department of Health and a number of administrative officers assist the Minister with all matters relating to policy, legislation, etc.

On 1st February, 1952 the Mental Hygiene Authority Act 1950 came into operation. This Act provides for the establishment of an Authority of three members with a medical expert in mental illnesses at its head. This Act established a pattern for the extension of the services of the Branch and for the improvement of treatment and accommodation of mental patients throughout the State. The Authority is responsible for the administration of the Mental Hygiene Branch.

The constant fight against infectious disease is actively carried on in the General Health Branch by seven District Health Officers and their staffs, in collaboration with the local health authorities. Where any specific infection is unduly prevalent, immunization is concentrated and the success obtained over a period of years is illustrated in the comparison of the following figures in respect of diphtheria :—Year 1927—cases, 3,254; deaths, 93 : Year 1950—cases, 326 ; deaths, 12.

The control and treatment of venereal disease is undertaken by a special division of the General Health Branch, and clinics for prophylaxis and treatment are attached to all hospitals receiving Government aid throughout the State.

The Poliomyelitis Division, formed during the outbreak of the disease in 1949 and expanded since that time, supervises treatment and after-care of patients throughout the State. The Division is staffed by three medical officers, ten physiotherapists and three visiting nurses. In addition to providing services for poliomyelitis sufferers, the Division gives some oversight to the care of persons suffering from spastic paralysis. For this latter purpose, a property has been purchased and is used as a training centre for children suffering from that condition.

Determining the suitability of sewerage projects and ensuring the safety of public buildings are the responsibilities of the Engineering Division of the General Health Branch, and it acts in an advisory and supervisory capacity in municipal undertakings of this nature. In conjunction with the Hospitals and Charities Commission of Victoria, it examines plans and advises on all hospital construction throughout the State.

The Industrial Hygiene Division supervises the environmental conditions of the 300,000 persons employed in industry in Victoria and consists of three medical officers, three special scientific officers and a number of inspectors.

Under the direction of a medical director, the Tuberculosis Branch comprises State sanatoria, tuberculosis clinics, tuberculosis bureaux and the Mass X-ray Survey Division. The latter service has visited every large Victorian centre and many of the smaller townships, affording to the population throughout the State every facility in obtaining an X-ray. A relatively new project, made possible by the acquisition by the Government of a suitable property, is a hostel for the accommodation of ex-tuberculosis patients during their rehabilitation.

As with the Tuberculosis Branch, a medical director supervises the activities of the Maternal and Child Hygiene Branch. This Branch embraces pre-natal hygiene, infant health, pre-school child hygiene and school medical and dental services. An extensive State-wide correspondence scheme for women during their pregnancy and early motherhood supplies these women with all the latest advice and information. With the recent appointment of a dental director to organize and develop the School Dental Services, it is hoped to provide regular and thorough dental attention for every school child in the State. Several well-equipped dental vans have already been purchased and will soon be in operation, and others are in the course of construction.

Legislation which comes within the purview of the Minister of Health includes the following :—Anti-Cancer Council Act, Birth Notification Act, Cancer Institute Act, Cemeteries Acts, Dietitians Registration Act, Goods Act, Hairdressers Registration Act, Health Acts, Hospitals and Charities Acts, Infectious Diseases Hospital Acts, Masseurs Acts, Medical Acts, Mental Deficiency Act, Mental Hygiene Acts, Midwives Act, Nurses Acts, Opticians Registration Act, Poisons Act and Venereal Diseases Act.

3. **Queensland.**—(i) *General.* The Health Acts 1937 to 1949 are administered by the Director-General of Health and Medical Services, under the direction of the Minister for Health and Home Affairs. The executive staff consists of the Director-General,

Deputy Director-General, State Health Officer, and twenty-seven food and sanitary inspectors and cadets. In addition, there is a Laboratory of Microbiology and Pathology under the control of a Director assisted by a medical officer, bacteriologists, and ancillary staff. Among other duties, the staff of this laboratory performs any necessary medico-legal work. A medical officer controls the Enthetic Diseases Section with the assistance of a female medical officer, nurses and trained attendants, while a microscopist and an inspector have charge of the Hookworm Campaign. A Leptospirosis Campaign, with head-quarters in Innisfail, North Queensland, is operating with a staff of five health inspectors.

The following services also come under the purview of the Department :—School Health Services, Maternal and Child Welfare Services, Chemical Laboratory, Mental Hygiene, Industrial Hygiene, and supervision of private hospitals.

The Health Acts of the State have made it obligatory for cases of certain diseases to be notified to the Health Department. These diseases are either of an infectious or contagious nature.

Branch offices, in charge of inspectors, are located at Toowoomba, Rockhampton, Mackay, Townsville, Cairns and Thursday Island, and, in conjunction with the Brisbane staff, are responsible for the enforcement of provisions of the Health Acts and Regulations dealing with food and drugs, milk sellers, health (food supply), fish supply, poisons, etc., and are concerned in a supervisory capacity with Local Authority health administration.

(ii) *Immunization.* Immunization of children against diphtheria and whooping cough is carried out on an extensive scale by Local Authorities. Active immunization against tetanus has been commenced in several areas. Up to the middle of 1950 the diphtheria prophylactic most favoured was formalinized toxoid, but recently local authorities have been using a more highly purified prophylactic with very satisfactory results. This toxoid will probably become the prophylactic of choice. Approximately 90 per cent. of children of school age have been immunized against diphtheria in Queensland. This is a highly satisfactory figure and diphtheria is no longer the menace of former years.

Although prophylaxis against whooping cough has not been practised as extensively as prophylaxis against diphtheria, most Local Authorities offer free immunization against whooping cough. The incidence of whooping cough appears to have declined markedly in recent years.

Several Local Authorities have already commenced campaigns for the active immunization of children against tetanus. It is believed that immunization against tetanus will become widely practised in this State.

Immunizing agents against diphtheria, tetanus and whooping cough are provided free to Local Authorities by the Commonwealth Government.

(iii) *Hospitals.* (*a*) *General.* There is a system of public hospitals throughout the State. The Brisbane General, South Brisbane Auxiliary, the Children's and the Brisbane Women's Hospitals provide public hospital accommodation for Brisbane. In addition, there are 66 private hospitals registered in the State, 35 per cent. of which are in Brisbane. The Mater Misericordiae has public, intermediate, private, and children's sections, and St. Martin's is a large private hospital. In the whole State, during 1950–51, there were 122 public hospitals, 2 tuberculosis sanatoria, and nine ambulance brigades, which were administered by 55 District Hospital Boards. Five other hospitals received aid from the Government. There were also 107 public maternity hospitals or sections of the foregoing hospitals.

Public hospitals supply free consultation and treatment, including radiological and pathological service, to out-patients. In-patient treatment in the public wards is also free. In conjunction with public hospitals, thirty dental clinics (excluding the Brisbane Dental Hospital) and twenty-one branch clinics are in operation.

The above-mentioned 66 private hospitals in Queensland are registered under the provisions of the Health Acts 1937 to 1949 (Division XI.). Licences may be issued under four categories :—(*a*) A general private hospital for medical, surgical, and maternity cases; (*b*) a lying-in hospital for maternity cases only; (*c*) a hospital for mental cases only (other than persons who have been certified as insane pursuant to the Insanity Acts); (*d*) any hospital for the treatment of mothers and/or infants.

Convalescent homes are not licensed or registrable.

Leprosaria are situated at Peel Island, in Moreton Bay, and at Fantome Island, near Townsville, each with a full-time medical officer. The former is for white persons only, and the latter for aboriginals. In Brisbane there is an Industrial Institution for the Blind, and a school for the Deaf and Dumb.

(*b*) *Public Hospitals.* The Hospitals Act Amendment Act 1944 provided, as from 1st July, 1945, that all the public hospitals in the State would come within the jurisdiction of District Hospitals Boards. Each board consists of not less than five and not more than nine members, including the chairman. One of the members is a representative elected by the component Local Authorities. The chairman and the remaining members are appointed by the Governor-in-Council.

The State Government is responsible for the net annual cost of administration and maintenance of all hospitals controlled by Hospital Boards, but from 1st January, 1946 the Commonwealth, under the Hospital Benefits Scheme, paid six shillings per patient per day for patients in public and private sections of public hospitals. The State Government agreed not to make any charge for patients in public sections of public hospitals. The Commonwealth subsidy extends to approved private hospitals. The amount was increased to eight shillings per day from 1st July, 1948 for patients in public wards of public hospitals, and from 1st November, 1948 for all other public hospital patients and private hospital patients.

4. **South Australia.**—The Department of Public Health embraces the activities of the Central Board of Health, the School Medical Services and the public health aspect of the control of tuberculosis, including the State X-ray Health Survey, under the control of the Director of Tuberculosis.

The Central Board of Health consists of five members, three of whom (including the chairman) are appointed by the Governor while one each is elected by metropolitan local boards and all other local boards.

The Central Board of Health administers the Health, Food and Drugs, Dangerous Drugs, Noxious Trades, Bakehouses Registration and Early Notification of Birth Acts. The Board is also concerned to some degree with Acts relating to local government, abattoirs and cremation.

Other legislation administered by the Department of Public Health relates to venereal diseases and vaccination.

The Health Act 1935–1950 constitutes every municipal council and every district council a local board of health for its municipality or district. There are 143 of these local boards under the general control and supervision of the Central Board. Under the Food and Drugs Act every local board is constituted the local authority for its respective district, except in the metropolitan area, for which the Metropolitan County Board is the local authority.

The medical staff of the Department includes the Director of Tuberculosis, a Senior Medical Officer and the Principal Medical Officer for Schools, five full-time medical officers, two temporary medical officers and six part-time medical officers. A dentist, dental assistant and six nurses are engaged in connexion with the School Medical Services.

There are seven full-time and sixteen part-time inspectors directly responsible to the Board.

There is also a nurse inspector employed to advise and assist local boards in connexion with infectious diseases.

The inspectors appointed under the Health and Food and Drugs Act periodically visit the local districts and see generally that the local boards are carrying out their duties.

5. Western Australia.—The legislation in this State is the Health Act 1911–1950. This was consolidated and reprinted in 1948 and amended by Act No. 25 of 1950. The Central Authority is the Department of Public Health, controlled by a Commissioner, who must be a qualified medical practitioner. The State is covered by Local Authorities which are constituted as Municipalities or Road Boards.

It is provided that a Local Board of Health may be set up in lieu of a Road Board, but this method of control is no longer used. In any emergency the Commissioner may exercise all the powers of a Local Health Authority in any part of the State.

Interesting features of recent legislation are as follows :—(*a*) Act No. 70 of 1948 gave compulsory power to control sufferers from tuberculosis and established a Tuberculosis Control Branch ; and (*b*) Act No. 71 of 1948 provided that within areas declared for the purpose all still-born infants must be submitted for post-mortem examination and all still-births must be notified to the Commissioner by the attending medical practitioner.

All the usual provisions for public health control are embodied in the Health Act. They include the medical and dental examination of school children, control of public buildings, inspection of food and the provision of standards thereof. The Nurses Registration Act now makes provision for the registration of nurses in each of the following branches of the nursing profession—general, midwifery, tuberculosis, infant health, mothercraft, mental and children's.

6. Tasmania.—The Department of Public Health is under the jurisdiction of the Minister for Health, and the administration of the various services is controlled by the Director of Public Health, Hospital and Medical Services as permanent head of the Department. Associated with the permanent head are the Director of Tuberculosis, Director of Mental Hygiene, and two Assistant Medical Directors with varying duties allotted to each Director.

Public Health functions comprise administration of laws relating to public health, food and drugs, places of public entertainment and cremation, and the following services : School Medical and Dental, Maternal and Child Welfare, Venereal Disease Clinics, Analytical Laboratory, and Mothercraft Home. The Hospital and Medical Services section is responsible for administration of the laws relating to hospitals and nurses' registration, and the following services :—Government Medical Service, Bush Nursing Service, Institutions for the Aged and Infirm at St. John's Park and Cosgrove Park. The Tuberculosis section is responsible for administration of the laws relating to tuberculosis, and for the management of Chest Clinics and Chest Hospitals at New Town and Perth. The Mental Hygiene section is responsible for administration of the laws relating to mental hospitals and mental defectives, and for the management of Lachlan Park Hospital (Mental Hospital) and Millbrook Psychopathic Home.

§ 2. The National Health and Medical Research Council.

In 1926 the Commonwealth Government established a Federal Health Council, in accordance with a recommendation of the Royal Commission on Health (1925), "for the purpose of securing closer co-operation between Commonwealth and State Health Authorities ". This Council held sessions each year except in 1932. In 1936 the Commonwealth Government decided to create a body with wider functions and representation, and the National Health and Medical Research Council was established with the following functions :—

To advise Commonwealth and State Governments on all matters of public health legislation and administration, on matters concerning the health of the public and on medical research.

To advise the Commonwealth Government as to the expenditure of money specifically appropriated as money to be spent on the advice of this Council.

To advise the Commonwealth Government as to the expenditure of money upon medical research and as to projects of medical research generally.

To advise Commonwealth and State Governments upon the merits of reputed cures or methods of treatment which are from time to time brought forward for recognition.

The Council consists of the Commonwealth Director-General of Health (as Chairman), two officers of his Department, the official head of the Health Department in each State, together with representatives of the Federal Council of the British Medical Association, the Royal Australasian College of Surgeons, the Royal Australasian College of Physicians, the Australian Regional Council of the Royal College of Obstetricians and Gynaecologists, the Australian Dental Association, and (jointly) the four Australian Universities having medical schools. A prominent layman and laywoman, appointed by the Commonwealth Government, also serve on the Council.

The first session of the National Health and Medical Research Council met at Hobart in February, 1937; the thirtieth session met at Sydney in November, 1950.

Under the Medical Research Endowment Act 1937, the Commonwealth Government has made an annual appropriation of funds to provide assistance :—

(*a*) to Departments of the Commonwealth or of a State engaged in medical research;
(*b*) to Universities for the purpose of medical research;
(*c*) to institutions and persons engaged in medical research;
(*d*) in the training of persons in medical research.

Approved research institutions under this system now number 51. During the year 1950, grants numbered 46 in the following fields :—bacteriology, biochemistry, biophysics, clinical dentistry, epidemiology, neurology, neuro-physiology, obstetrics, parasitology, physiology and pharmacology, and tuberculosis and virus diseases. In certain instances, equipment and apparatus have been made available by the Council; this has greatly facilitated some specialized lines of research. The wide scope of work being carried out is greatly assisted by the formation of committees which meet regularly and advise the Council in such subjects as industrial hygiene, public health, epidemiology, maternal and child welfare, radio-active isotopes, antibiotic distribution, tropical physiology and hygiene, tuberculosis and the latest developments in X-ray technology and application.

The research work being done under these grants is of a high standard, many of the individual investigators enjoying international reputation. Beyond this practical achievement, the original objectives of the Council are being attained in encouraging young graduates to take up research work and in securing a continuity and permanence of medical research in Australia.

An insurance benefit scheme for medical workers on the lines of the Federated Superannuation System for Universities is now in operation.

§ 3. The Commonwealth Department of Health.

1. **General.**—An Order-in-Council dated 3rd March, 1921 defined various functions to be performed by the Commonwealth Department of Health in addition to Quarantine, which at that time was the only specific public health power of the Commonwealth Parliament under the Commonwealth Constitution. An amendment of the Constitution in 1946 gave the Commonwealth Government power to provide a complete Health Service to the nation including medical advice and treatment. The National Health Service Act 1948–1949 provides for Commonwealth activity in establishing hospitals, laboratories, health centres and clinics, post-graduate training in all branches of medicine, courses of training in the Auxiliary Medical Services, research, prevention of disease and medical education. Many essential services have been developed by the Department to meet current needs and to further public health throughout Australia. In earlier issues of the Official Year Book reference has been made to several features of this development,

including :—The Royal Commission on National Health, 1925 (*see* No. 22, pp. 509–10), the International Pacific Health Conferences (*see* No. 22, p. 510 and No. 29, p. 334), Industrial Hygiene (*see* No. 18, pp. 522–55), Tropical Hygiene (*see* No. 22, pp. 506–7, No. 25, pp. 415–7, and No. 32, p. 226), and the Commonwealth Advisory Council on Nutrition (*see* No. 32, pp. 222–23). Reference to quarantine is made below (*see* § 3. pars. 12 and 13 and § 4. par. 2).

2. **The Commonwealth Serum Laboratories.**—The establishment for the preparation of Jennerian vaccine situated at Royal Park, near Melbourne, formerly known as the "Calf Lymph Depot" was in 1918 greatly enlarged by the Commonwealth. The remodelled institution is designated the "Commonwealth Serum Laboratories" and is administered by the Commonwealth Department of Health. The laboratories are now installed in fully equipped buildings and a large staff is employed. At Broadmeadows, near Melbourne, a farm of 254 acres has been developed, under veterinary supervision, for the many thousands of animals required for the work of the laboratories.

The list of biological preparations produced by the laboratories has been extended, until at the present time almost the whole range of these products is manufactured and Australia is practically independent of other countries in thus producing its own requirements. Penicillin is being produced in increasingly large quantities, which it is anticipated will shortly suffice for total Australian requirements. Constant research is being conducted into every relevant aspect of bacteriology and immunology and new sera and prophylactic agents are being tested as the growth of medical knowledge opens up new avenues of treatment, prevention and diagnosis. Other original and applied research relating to all aspects of public health is maintained. The laboratories serve as the national centre for the maintenance in Australia of the international standards of the Permanent Commission on Biological Standards (World Health Organization Interim Commission). For the past 27 years the production of veterinary biological products has been a feature of the work of the laboratories. In recent years an extensive development has occurred in this direction and the products are being used in greatly increased amounts in all States for the prevention or treatment of diseases in domestic animals and stock.

3. **The Commonwealth Health Laboratories.**—The fifteen health laboratories of the Department are situated at strategic points throughout Australia. They are located at Darwin, Cairns, Townsville, Rockhampton, Toowoomba, Lismore, Bendigo, Launceston, Hobart, Port Pirie, Kalgoorlie, Broome, Tamworth, Wollongong and Albury. These laboratories were established as an essential part of the quarantine system but were also to undertake research into local health problems and to provide medical practitioners of each district with up-to-date facilities for laboratory investigation and diagnosis. It was realized that co-operation between the general practitioner with his clinical observations and knowledge of the environment of disease on the one hand, and the staff of a well-equipped laboratory on the other hand, is essential to the efficient investigation of disease and the effective operation of control measures.

From this standpoint, the laboratories have already proved their value in the determination of Weil's disease and endemic typhus in North Queensland, in the investigation of special local problems at Darwin, of undulant fever throughout Australia, of silicosis and tuberculosis at Kalgoorlie and of plumbism at Port Pirie. In these investigations close co-operation has existed with State and local health and hospital services; especially is this so in Queensland where collaboration has yielded exceptionally valuable results in differentiating the groups of fevers hitherto unclassified in that State. In this investigational work, as well as in more routine activities, the laboratories have at their disposal the full resources and technical and specialist facilities available at the Commonwealth Serum Laboratories and the Sydney School of Public Health and Tropical Medicine.

A major part of the work performed at the Kalgoorlie laboratory, since its establishment in 1925, has been the medical examination, on behalf of the State Department of Mines, of employees and applicants for employment in the metalliferous mines in Western Australia. These examinations are performed in accordance with the provisions of the

State Mines Regulation Act and the Mine Workers' Relief Act, the objects of which are to provide a healthy body of men for the industry and to free the industry and protect the future of those found to be suffering from serious pulmonary disease. The examinations include clinical, laboratory and radiographic investigation. By means of a mobile X-ray unit an annual tour is also made of outlying mining centres.

X-ray facilities are also provided at the Bendigo laboratory, as part of the campaign against tuberculosis, for the examination of miners and for other radiographic work in the district.

4. **Commonwealth Acoustic Laboratories.**—The Department of Health established the first of the series of Acoustic Laboratories in January, 1947, in Erskine House, York-street, Sydney.

The laboratory continued and expanded the work of the Acoustic Research Laboratory which was sponsored by the National Health and Medical Research Council during the years 1942–1946 for the purpose of investigating problems of noise and difficulties of intercommunication in aircraft and tanks. With the cessation of hostilities the Acoustic Research Laboratory directed its attention to the problem of deafness in children, particularly the group whose affliction was caused by the mothers contracting rubella in the early months of pregnancy.

The taking over of the Acoustic Research Laboratory by the Department of Health was influenced by the request from the Repatriation Commission for technical assistance in the matter of the supply of hearing aids to deafened ex-servicemen. Arrangements for this purpose were completed and branch laboratories were established in all other State Capital Cities.

During the year 1948 the Acoustic Laboratories Act was passed to allow the expansion of activities on the following lines :—(1) To carry out the requirements of the Repatriation Commission for deafened ex-Service personnel and to provide a similar service for the Commonwealth Department of Social Services in respect of deafened ex-Service personnel whose disability was not caused by war service ; (2) to assist the Education Departments of the States in measuring deafness, fitting aids, and maintaining hearing aid equipment for school children ; (3) to act on behalf of various State and other authorities who desire to have independent tests made before assisting financially in the purchase of hearing aids for people under their care ; and (4) the investigation of problems associated with noise in industry.

The laboratory in Sydney is now known as the Commonwealth Central Acoustic Laboratory and is responsible for the training of personnel for the whole Acoustic Service, the production of equipment, the calibration of hearing aids and audiometers and the technical administration of the branch laboratories.

5. **Commonwealth Bureau of Dental Standards.**—The National Health and Medical Research Council sponsored the Dental Materials Research Laboratory during the years 1939–1946, for the purpose of assisting the Defence Services, the Medical Equipment Central Committee and other Government Departments in the selection and purchase of suitable dental equipment and materials. Valuable assistance was also given to Australian manufacturers of dental materials in relation to improvement of their products and the development of new materials.

Much of the work was of a routine nature and with the cessation of hostilities the National Health and Medical Research Council decided to cease its sponsorship but recommended that the Department of Health should take over the laboratory as it was serving a good purpose. This was done in January, 1947, and the laboratory was renamed the Commonwealth Bureau of Dental Standards and is at present situated in the grounds of the University of Melbourne.

The functions of the Bureau are as follows :—(1) Original research into dental equipment, materials, techniques and processes ; (2) the development, in consultation with a representative committee of the Commonwealth Department of Health, of the Australian Dental Association and the Standards Association of Australia of specifications for dental materials and equipment ; (3) regular systematic surveys of dental materials on sale to the profession in Australia, and the reporting of the results of such investigations in recognized Australian scientific journals; and (4) the provision of a consultative service and testing facilities for local manufacturers of dental materials with the view to assisting them in the improvement of existing products and the development of new materials.

6. **The School of Public Health and Tropical Medicine.**—The Commonwealth Government, under an agreement with the University of Sydney, established a School of Public Health and Tropical Medicine at the University of Sydney as from 4th March, 1930, for the purpose of training medical graduates and students in the subjects of public health and tropical medicine. The organization of the Australian Institute of Tropical Medicine at Townsville was merged in the new school, and the staff, equipment and material were transferred to Sydney.

The work of the school comprises both teaching and investigation. Courses are held for the University post-graduate diploma of public health and the diploma of tropical medicine and hygiene. Lectures are given in public health and preventive medicine as prescribed for the fifth year of the medical curriculum. Other classes include students in architectural, social and school hygiene, and lay officers and nurses in the tropical services and missionaries. In addition to this work throughout the war, all the resources of the School were made available for the training of medical and hygiene officers and other ranks from all the Services of the Australian and Allied Forces.

Investigational work covers a wide field of public health and medical subjects, both in the laboratory and in the field. Field work has been carried out not only in Australia but in co-operation with the local administrations in Papua, New Guinea, Norfolk Island and Nauru. Sections of Child Health and Occupational Disease have been established and suitable staff selected. Further details may be found in previous issues of the Official Year Book (*see* No. 29, p. 334).

7. **The Australian Institute of Anatomy.**—Information concerning the Australian Institute of Anatomy at Canberra is given in previous issues of the Official Year Book (*see* No. 32, pp. 919-21). In 1931 the Institute became an integral part of the Commonwealth Department of Health. The work of the Institute on general problems of comparative anatomy has now been concentrated on aspects of structure and function with special reference to the development of the growing child. Biochemical and biological research in this field is being developed in close association with the model kindergarten centres established by the Department in each capital city (*see* par. 10 below). Work in specialized aspects of nutrition has steadily increased. The Institute now plays an important part in research and the scientific application of nutritional knowledge under Australian conditions. The background of comparative anatomy and the museums of the Institute are maintained as part of the general plan of work, and an expert zoologist is a member of the body of research workers at the Institute. *See also* Chapter XXIX.—Miscellaneous.

8. **The Northern Territory Medical Service.**—As from 1st April, 1930, the Commonwealth Department of Health assumed administrative responsibility for the medical and health services of the Northern Territory, absorbing the Northern Territory Medical Service. With the growing importance of Darwin as the northern gateway to Australia and as an administrative and service centre, its health services were strengthened, a new hospital at Darwin was built and the hospital at Alice Springs was enlarged.

With civilian evacuation during the Pacific war, military control of the medical services operated in the years 1942 to 1945. Civilian control was resumed by the Department during the period November, 1945 to May, 1946, starting at Alice Springs and gradually extending north to Darwin. The hospitals at Alice Springs, Tennant Creek, Katherine and Darwin, and the Health Laboratory at Darwin were re-established as civilian institutions. A pathological laboratory and leprosarium are maintained at Darwin. Dental services are available at hospitals and mobile road and aerial district units serve the outback.

An aerial medical service, operated by the Department, is based on Darwin, and comprises two Dragon and a Miles Gemini aircraft and two pilots. Emergency and routine flights and surveys are undertaken by this service, and at Alice Springs medical officers of the Northern Territory Medical Service act for the Flying Doctor base.

The Commonwealth Department of Health maintains a Quarantine Station at Darwin which is a major first port of entry for oversea aircraft. Public health services are provided at the major centres.

9. **National Fitness.**—Health authorities in Australia have closely followed the world-wide movement for the advancement of physical fitness and in several States active work has been proceeding over some years. In 1938, following a recommendation of the National Health and Medical Research Council, the Commonwealth Government agreed to appoint a Commonwealth Council for National Fitness, under the Commonwealth Minister for Health, to effect collaboration of Commonwealth, State and local government authorities in the movement. Meetings of this Council are held at regular intervals, at least annually. Meanwhile, active State Councils have been formed in all States. As a result of the recommendations of the central Council, the Commonwealth Government agreed to make available an annual sum of £20,000 for five years and grants were allocated to each State for purposes of organization and to each of the six Australian universities to establish lectureships in physical education. In July, 1941 a National Fitness Act was passed by the Commonwealth Parliament to ensure greater permanence to the movement, and in June, 1942 the Commonwealth grant was increased to £72,500 to include grants to State Education Departments and for the work in the Australian Capital Territory. In 1946 the total grants were extended for a further period of five years. The movement continues to develop and to gain public interest and support throughout Australia.

10. **The Pre-school Child.**—Sessions of the National Health and Medical Research Council and the reports of the Commonwealth Advisory Council on Nutrition have called attention to the need for greater effort throughout Australia directed towards the care of the growing child, especially during the pre-school period. Movements for the care of the infant and the welfare of the school child are already developed by State authorities as recorded in §§ 7 and 8 below. The Commonwealth Government felt that more could be done for the child of pre-school age, and it was decided to give a lead by making it possible to demonstrate what could be done and the practical methods which could be applied.

The Commonwealth Government therefore decided to establish in each capital city a pre-school demonstration centre, known as the Lady Gowrie Child Centre, and in order to achieve the best results in association with those who have had experience in this field it has secured the co-operation of the Federal Organization of Kindergarten Unions which is operating under the title of "The Australian Association for Pre-school Child Development". A suitable site was secured in each capital city and the necessary school structure was built. Formerly the administration of these centres was under the direction of the local Kindergarten Union and the employment of staff was made with the approval of the Commonwealth Department of Health. Recently the local Lady Gowrie Child Centre Committees were given a greater degree of autonomy, so that while the technical supervision still rests with the Australian Association for Pre-school Child Development, the management of each centre, including staffing, is in the hands of the local Committee. This development is associated with a change in the method of financial control. An annual grant is made to each Committee towards the cost of the centre, the disbursement of these funds being at the discretion of the local Committee, subject to the general supervision of the Australian Association for Pre-school Child Development. This applies in so far as the educational side is concerned, and in this field advantage is being taken of the opportunity to try new methods and to make systematic records of observations with the object of securing reliable knowledge of the educational technique of this pre-school period.

Along with this educational practice there proceeds also the study of physiological requirements of the child and of the interaction between physical and mental health under varying conditions. The children available at these centres provide a considerable mass of human material for control and study, which is of great value in view of the importance of the study of growth and of nutrition of their age-period. Not only are routine measurements made of height, weight and other bodily data, but problems of nutrition are studied in detail. The medical work at each State centre is conducted on a uniform basis, according to a scheme formulated at, and directed from, the Australian Institute of Anatomy, Canberra, where parallel investigations on the laboratory side are being undertaken.

11. **Organization for the Control of Cancer.**—The persistent increase in cancer mortality has led to the development in Australia of a national organization directed towards the control of this disease. The Commonwealth Department of Health has actively participated in this movement. Since 1928 the Australian Cancer Conferences, convened by the Department, have provided an opportunity each year for those actively engaged in the campaign against the disease to meet for the discussion of problems and the determination of lines of action and further development. The tenth conference in this series met in New Zealand in February, 1939, and so marked an association which has been maintained between Australia and the Dominion since the inception of the conferences.

A large amount of radium purchased in 1928 by the Commonwealth Government for use in treatment and research has been distributed on loan to treatment centres throughout Australia. Under the terms of this loan, treatment at well-equipped clinics is available to all requiring it, irrespective of ability to pay. This work is co-ordinated by the Department.

Close co-operation is maintained between research workers, physicists and biochemists and the medical men engaged in the clinical investigation and treatment of the disease, so that problems are mutually investigated and treatment is applied with the highest attainable degree of scientific accuracy.

Realizing the essential importance of accuracy in determining the quality of radiation used in the treatment of cancer and in measuring the dosage of this radiation actually delivered to the tumour, and the need for the investigation of physical problems in connexion with the utilization of X-rays and radium in the treatment of disease, the Commonwealth Department of Health in 1935 extended the work of the Commonwealth Radium Laboratory, established in 1929, to include the investigation of the physical problems of radiation therapy generally. This laboratory, known as the Commonwealth X-ray and Radium Laboratory, is situated by agreement with the University of Melbourne within the University grounds, and is maintained, controlled, and staffed by the Commonwealth Department of Health. It is accommodated in a building specially designed for work with X-rays and radium, and is amply provided with all necessary equipment for research work, including a 500,000 volt high tension generator.

The laboratory co-operates closely with the local physical services which have been developed in the other capital cities of Australia to provide local facilities for the production of radon, for the calibration of X-ray therapy equipment, and for the measurement of radiation exposure of X-ray and radium workers.

The laboratory has continued to repair radium containers. It also undertakes investigations into physical problems arising in the use of X-ray and radium in treatment.

During the year 1950, a total of 95,290 millicuries of radon was prepared and issued from the laboratory, while 41,124 millicuries were issued by the associated centres in Sydney, Adelaide and Brisbane. The corresponding figures for 1949 were 81,187 and 38,858 millicuries respectively. The issue of radon from a few centres to serve hospitals all over the continent is a unique Australian development, and enables a very efficient use to be made of the radium available.

The development of atomic energy programmes overseas has made available supplies of artificial radio-isotopes which can be used as an alternative to natural isotopes such as radium and radon. Supplies of radio-phosphorus and radio-iodine are now being distributed by the laboratory for medical work throughout Australia according to a policy developed by the National Health and Medical Research Council Standing Committee on X-rays. The use of radio-iodine has involved the laboratory in the development of a scheme of physical measurements which can readily be made in hospitals.

12. **Animal Quarantine.**—The Division of Veterinary Hygiene was created in 1926 to deal with the administration of the Quarantine Act 1908–1950 in so far as it relates to animal products and other articles which might be the means of transmitting diseases of animals. Formerly the full responsibility of this aspect was carried by the Director of Quarantine.

The organization of the Division provides an excellent example of Commonwealth and State co-operation. The Central Administration is situated within the Health Department at Canberra with a Director, an Assistant Director and Veterinary Officers. By provision in the Quarantine Act and by arrangement with the States, the Principal Veterinary Officer of the Department of Agriculture in each State is appointed Chief Quarantine Officer (Animals) of the State and members of his staff Quarantine Officers (Animals). These State officers, acting in their Commonwealth capacity, implement quarantine policy as formulated by the Central Administration. Quarantine accommodation is provided at permanent animal quarantine stations at each Capital City.

Animal Quarantine is authorized by the provisions of the Quarantine Act 1908–1950 and has as its objective the prevention of the introduction or spread of diseases of animals. This legislation covers the importation of all animals, raw animal products, biological cultures, etc., associated with animal diseases and goods associated with animals.

Domesticated animals, i.e., horses, cattle, pigs, sheep, goats, dogs, cats and poultry are admitted from a limited number of countries depending on diseases present in the country of origin. All must be accompanied by health certificates which include prescribed tests. On arrival in Australia they are subject to quarantine detention.

Zoological specimens are imported into registered zoos where they remain in permanent quarantine. Circuses are also registered if exotic species of animals are kept. In a somewhat similar manner, animals for scientific purposes are imported to approved laboratories. All of these premises are kept under constant surveillance.

Raw animal products such as hair, special types of wool, skins, hides, etc., are subjected to special treatment under quarantine control, whilst such items as raw meat, sausage casings and eggs, which cannot be sterilized, are admitted from very few countries. Other items such as harness, fittings, fodder, ship's refuse, etc., are appropriately treated to destroy possible infection.

The Division participates in world-wide international notification of the more serious contagious diseases of animals and maintains a census of such diseases throughout the world.

Information regarding animal diseases and parasites in Australia is also collected and disseminated by means of service publications.

Consultation on technical matters is maintained with various scientific institutions, notably the Commonwealth Scientific and Industrial Research Organization.

In matters of policy and the implementation of quarantine control of imports there is a close liaison with the Department of Trade and Customs.

The Division collaborates with the "General" and "Plant" Divisions of the Quarantine Service. Many diseases of animals are communicable to man and for this reason "Animal" and "General" quarantine administration are in some respects inseparable. Similarly the interests of "Animal" and "Plant" Divisions overlap, many items such as insects, fodder, straw, etc., being the subject of combined control.

13. **Plant Quarantine.**—Since 1st July, 1909, the importation into Australia of all plants or parts of plants, cuttings, seeds and fruits, whether living or dead, has been subject to an increasingly stringent quarantine with the object of preventing the introduction of insect pests, plant diseases and weeds not yet established in this country.

Under the Quarantine Act 1908–1950 general powers are held by which the quarantine inspectors are required to examine all plant material at the first port of entry and to release only such material as is free from diseases and pests. Everyone reaching Australia is required to declare if he or she has any plant material in luggage or personal effects. Heavy penalties are laid down for those found deliberately evading the regulations. All plant material entering as cargo must also be declared.

When the Commonwealth became responsible for all plant quarantine, the State Governments agreed to co-operate by providing and maintaining inspection facilities and personnel for which they are reimbursed by the Commonwealth. In 1921 the administration of the regulations came under the newly-formed Department of Health, and in 1927 the Division of Plant Quarantine was created under a Director who is responsible for policy and legislation and for co-ordinating the work of the State Officers who carry out the detailed administration in their capacity as Commonwealth Officers.

Any plant material found carrying diseases or pests or suspected of doing so may be ordered into quarantine for remedial treatment, or if the treatment be impracticable, may be destroyed. Such treatments are paid for by the importer. Air transport has created many new problems in maintaining effective control. It is impossible in this summary to give details of regulations governing the different types of plants, but the following will indicate certain broad principles in them.

(*a*) The importation of plant diseases, insect pests, noxious fungi, certain weeds and poison plants, and soil likely to carry these things is prohibited.

(*b*) Agricultural seed must conform to standards of purity.

(*c*) Many commodities such as hops, cotton, peanuts in shell, nursery stock, potatoes, important crop seeds, vines and specified plants may only be imported by approved importers under special conditions.

(*d*) Certain plant products, such as bulbs and timber (in logs or sawn), from specified areas may only be imported if accompanied by certificates showing that prescribed treatment has been given in the country of origin.

The regulations are constantly being amended in the light of experience, with the object of maintaining for Australia the freedom from a large number of serious diseases and pests of plants which ravage crops in other lands.

§ 4. Control of Infectious and Contagious Diseases.

1. **General.**—The provisions of the various Acts in regard to the compulsory notification of infectious diseases and the precautions to be taken against the spread thereof may be conveniently dealt with under the headings—Quarantine; Notifiable Diseases, including Venereal Diseases; and Vaccination.

2. **Quarantine.**—The Quarantine Act is administered by the Commonwealth Department of Health, and has three sections of disease control, as follows :—(i) Human quarantine which controls the movements of persons arriving from overseas until it is apparent that they are free of quarantinable disease; (ii) Animal quarantine which

controls the importation of animals and animal products from overseas and the security of other animals present on vessels in Australian ports, and (iii) Plant quarantine which regulates the conditions of importation of all plants and plant products with the object of excluding plant diseases, insect pests and weeds. (*See* § 3. pars. 12 and 13 above.)

In regard to interstate movements of animals and plants, the Act becomes operative only if the Governor-General be of opinion that Federal action is necessary for the protection of any State or States ; in general, the administration of interstate movements of animals and plants is left in the hands of the States.

The Commonwealth controls stations in each State for the purposes of quarantine of humans, animals and plants.

3. Notifiable Diseases.—(i) *General.* (*a*) *Methods of Prevention and Control.* Provision exists in the Health Acts of all the States for the observance of precautions against the spread and for the compulsory notification of infectious disease. When any such disease occurs, the local authority must at once be notified, and in some States notification must be made also to the Health Department. The duty of making this notification is generally imposed, first, on the head of the house to which the patient belongs, failing whom on the nearest relative present, and, on his default, on the person in charge of or in attendance on the patient, and, on his default, on the occupier of the building. Any medical practitioner visiting the patient is also bound to give notice.

As a rule, the local authorities are required to report from time to time to the Central Board of Health in each State as to the health, cleanliness and general sanitary state of their several districts, and must report the appearance of certain diseases. Regulations are prescribed for the disinfection and cleansing of premises, and for the disinfection or destruction of bedding, clothing, or other articles which have been exposed to infection. Bacteriological examinations for the detection of plague, diphtheria, tuberculosis, typhoid and other infectious diseases within the meaning of the Health Acts are continually being carried out. Regulations are provided in most of the States for the treatment and custody of persons suffering from certain dangerous infectious diseases, such as small-pox and leprosy.

(*b*) *Diseases Notifiable and Cases Notified in each State and Territory.* The following table, which has been compiled by the Commonwealth Department of Health, shows for each State and Territory the diseases notifiable in 1949 and 1950 and the number of cases notified. Diseases not notifiable in a State or Territory are indicated by an asterisk.

[NOTE.—The table has been altered to conform to the recommendation of the National Health and Medical Research Council, Thirtieth Session, 1950, Meningococcal Infection being substituted for Cerebro-spinal Meningitis, Leptospirosis for Weil's Disease and Ornithosis for Psittacosis, while Beriberi, Coastal Fever, Erysipelas, Gastro-enteritis, Influenza, Measles and Whooping Cough have been deleted. Other diseases recommended to be notifiable will be included as appropriate legislation is amended and notification becomes operative in the States and Territories.]

DISEASES NOTIFIABLE IN EACH STATE AND TERRITORY AND NOTIFICATIONS FOR THE YEARS ENDED 31st DECEMBER, 1949 AND 1950.

* Not notifiable. † Victorian and Western Australian cases of Anchylostomiasis were ex-service personnel infected overseas. ‡ Diarrhoea of more than 48 hours' duration in infants under two years of age became notifiable in Queensland on 26th March, 1949; infantile diarrhoea became notifiable in Western Australia on 31st March, 1949. § Hydatid became notifiable in Tasmania on 12th January, 1949. ‖ Rubella in females over 14 years of age become notifiable in Queensland on 17th September, 1949 and in Tasmania rubella was made notifiable on 9th November, 1949. ¶ Salmonella infection became notifiable in Western Australia on 31st March, 1949.

(*a*) Cases reported include flea-borne, tick-borne and mite-borne typhus.

(ii) *Venereal Diseases.* (*a*) *General.* The prevention and control of venereal diseases are undertaken by the States. Each State has a Venereal Diseases Act, or provisions in the Health Act govern the working of the measures taken to combat these diseases. Under these Acts notification has been made compulsory in every State. Steps have been taken to ensure free treatment by medical practitioners or in subsidized hospitals and clinics. Registered pharmaceutical chemists are allowed to dispense prescriptions only when signed by medical practitioners. Clinics have been established and, in some cases, beds in public hospitals have been set aside for patients suffering from these diseases.

Penalties may be imposed on a patient who fails to continue under treatment. Clauses are inserted in the Acts which aim at preventing the marriage of any infected person and the employment of an infected person in the manufacture or distribution of foodstuffs.

For several years the Commonwealth Government granted a subsidy to each of the States to assist in providing hospital treatment and administrative control of venereal diseases, but this subsidy has been discontinued.

In 1927 a Division of Tuberculosis and Venereal Disease was established in the Commonwealth Department of Health, with a medical officer as Director. This Division ceased to exist in April, 1932.

(*b*) *Details by States.* A statement of the preventive provisions in each State, together with certain statistical data, appeared in earlier issues of the Official Year Book (*see* No. 22, pp. 503–4).

4. **Vaccination.**—(i) *Demand for Vaccination.* There is statutory provision for compulsory vaccination in all States except New South Wales. Jennerian vaccine for vaccination against small-pox is prepared at the Commonwealth Serum Laboratories in Melbourne. There has been a considerable increase in the demand for vaccination, especially by people about to travel overseas by air, so that they may conform with the quarantine requirements of countries to which they are travelling.

(ii) *Details by States.* In earlier issues of the Official Year Book (*see* No. 22, pp. 504–5) information was given concerning the provisions regarding vaccination in each State.

§ 5. Inspection and Sale of Food and Drugs.

Public Health legislation in force in all States provides for the inspection of foods and drugs with the object of ensuring that all those goods which are sold shall be wholesome, clean and free from contamination or adulteration ; and that all receptacles, places and vehicles used for their manufacture, storage or carriage shall be clean. For further particulars in this connexion *see* § 1. State Public Health Legislation and Administration, pp. 276–80.

§ 6. Supervision of Dairies, Milk Supply, Etc.

1. **General.**—In earlier issues of the Official Year Book (*see* No. 22, p. 498) reference is made to the legislation in force in the various States to ensure the purity of the milk supply and of dairy produce generally.

2. **Number of Dairy Premises Registered.**—The following table shows, so far as the particulars are available, the number of dairy premises registered and the number of cows in milk thereon. In some States registration is compulsory within certain proclaimed areas only.

DAIRY PREMISES REGISTERED, AND COWS IN MILK THEREON, 1950.

(*a*) Year 1948. (*b*) Dairy farms registered with the Milk Board for whole milk for Metropolitan Area and country towns. (*c*) March, 1950.

§ 7. Medical Inspection of School Children.

1. **General.**—Medical inspection of school children is carried out in all the States and the Australian Capital Territory. Medical staffs have been organized, and in some States travelling clinics have been established to deal with dental and ocular defects.

2. **New South Wales.**—A complete system of medical inspection of school children is carried out by the School Medical Service, Department of Public Health. In the metropolitan area a full medical examination of all children in first and fifth classes is carried out and children in other classes are reviewed as necessary. In country districts, a full medical examination of every child is carried out two or three times during the usual period of school attendance (6–15 years). Parents are notified of the defects found, and urged to seek treatment for them. In the metropolitan area these notices are followed up in many cases by a visit from a school nurse who, in some instances, assists in arranging hospital and clinical treatment.

At the end of 1950 the establishment of the School Medical Service provided for 31 medical officers (including the Director, Deputy Director and 4 psychiatrists), 4 psychologists, 4 social workers, 19 school nurses, and 4 speech therapists. In the metropolitan area all primary schools are visited once each year.

Special attention is paid to the supervision of high school pupils, both girls and boys, and medical inspection is carried out annually in these schools in the metropolitan area, as well as certain country high schools. However, it is hoped in 1951 to carry out medical inspection of all schools, both primary and secondary, in the metropolitan area. This will be possible only if the establishment for medical officers is filled.

Every student, before entering a Teachers' College, is medically examined and X-rayed and any defects found must be remedied before final acceptance. Health supervision is maintained at these colleges by women medical officers, who are also lecturers to their respective colleges in hygiene and physiology.

The Child Guidance Clinics examine free of charge children referred by school medical officers, teachers, officers of the Child Welfare Department and various outside bodies. Boys coming before the Children's Court are examined at the clinic at the Metropolitan Boys' Shelter attached to the Court and at Yasmar Hostel for Boys. Girl delinquents are examined at the two clinics at Blackfriars.

The medical examination of certain children under the jurisdiction of the Child Welfare Department and the Widows' Pensions Branch is also carried out by medical officers of this service.

During the year an audiometric survey by school nurses was commenced of children in the metropolitan, Wollongong and Newcastle areas to determine those who suffered from impairment of hearing. Those children who showed a loss of hearing were examined by a part-time Ear, Nose and Throat Surgeon Specialist, either at school or at the Deaf Clinic, established at Head Office. Recommendations with regard to the children were made to the Education Department as to the most suitable method of education, and through liaison with the Commonwealth Acoustic Laboratory a number of children were fitted with hearing aids free of cost.

During 1950, 73,718 children were fully examined (routine inspection) in schools and 19,551 were reviewed. Of those fully examined 40.04 per cent. were notified for medical and/or dental defects.

These figures do not include record of the medical examination and health supervision of children (1) in residence at the Glenfield Special School for backward children, and (2) attending the Department's Nursery Schools.

The School Medical Service carries out regular and/or periodical investigations into problems affecting the health of children, and special investigations into outbreaks of infectious diseases occurring in schools. One special survey carried out during 1950 was an anthropometric survey of samples of school children to assist the Education Department to design new school furniture. The sanitary condition of school buildings is also inspected. One medical officer attached to this service was included on the panel of lecturers to parents' groups on sex education of children.

The foregoing statement does not include record of the numerous medical examinations of teachers, and other Departmental work of a medical nature, done by the School Medical Service.

3. **Victoria.**—Medical inspection of school children was established in 1909, one of the objectives being to examine medically each child in the State three times during his or her school life.

The School Medical and School Dental Services were transferred in 1944 from the Education Department to the Department of Health under the Ministry of Health Act 1943.

At the routine inspection each child is weighed and measured, eyesight and hearing tested and defects of teeth, throat, skin and posture noted. The child is questioned and advised concerning general hygiene, cleanliness, etc., and is then undressed and examined. A school nurse assists each medical officer at the examination and is also responsible for the sending of defect notices to the parent. In many cases she also interviews the mother either at the school or in the home, thus acting as liaison between medical officer, parent and teacher. School nurses also visit metropolitan schools at regular intervals to examine for pediculosis, other infectious skin conditions, and lack of cleanliness.

Special classes or schools are provided by the Education Department for physically and mentally handicapped children, such as the partially sighted, partially deaf (in process of building), undernourished, those with minor postural defects, speech handicaps, mentally retarded, etc. Children attending these classes are referred by the School Medical Officers and kept under regular medical supervision during their school career. Many children are given special appointments on account of behaviour problems, truancy, etc. These cases are also investigated by a school nurse, and, if necessary, sent on to the appropriate psychiatric clinic. Visits to state schools within the metropolitan area are maintained regularly. Extension of the service to children attending registered primary schools in metropolitan districts and country areas as medical staff became available was agreed upon in April, 1950, and these schools are now included in the regular itineraries.

Country schools are gradually being included in regular inspection. A part-time medical officer for the provincial centre of Hamilton took up duty in August, 1949, and it is hoped to interest in this work, in other centres, medical women who are not engaged in private practice. Meanwhile, owing to a small increase in staff it has been possible to visit schools in the district of Glenelg in the far south-west of the State. Additional school nurses were appointed during the latter half of 1950, and regular visits are now being made to schools in the provincial cities, Bendigo, Ballarat and Geelong.

A limited number of metropolitan (industrial areas) and rural schools are covered by the School Dental Service, but owing to difficulties in obtaining staff it has not been possible to maintain the desired policy of providing dental treatment at regular yearly intervals with initial treatment at a maximum age of eight years. Children are transported from school to the Dental Centre and return by bus (under contract to the Department of Health). A medical officer has been appointed as part-time anaesthetist, part-time school medical officer. A new building has been purchased at 448 St. Kilda-road, to which the Dental Centre was transferred in January, 1951.

During the year ended 30th June, 1950, 28,621 children and 3,558 teachers were medically examined, and 16,539 children received dental treatment involving 20,766 visits with 21,842 extractions, 17,506 fillings and 7,614 other treatments. General anaesthetics numbering 543 were administered. The cost of the School Medical and Dental Services for 1949–50 was £36,025.

4. **Queensland.**—The School Health Services Branch, under the direction of the Chief Medical Officer, consists of three sections known as the Medical, Dental and Nursing Sections.

Medical inspection of schools and school children is carried out by two full-time and one part-time officer under the general direction of the Chief Medical Officer, School Health Services. These officers, as far as possible, examine children for cardiac and pulmonary conditions, and in addition make a thorough examination of all children referred to them by the school nurses.

The nurses now number 16. Each nurse is assigned a group of schools and is instructed to make a list at each school of those children who should be seen by the medical inspector at his next visit. She supervises the sanitation, cleanliness and ventilation of the school and notifies the head teacher of all infectious or verminous children or those suffering from impetigo, scabies, etc., who are then excluded. During 1949–50, school nurses examined 62,649 children. In the metropolitan area the nurses examine the teeth and report all eligible carious cases to the Dental Hospital for treatment.

The Department now has a staff of 21 dentists, and one part-time dental inspector. These officers are each assigned a district, which is not changed for three years unless for reasons which the Chief Medical Officer, on the recommendation of the Chief Dental Inspector, considers advisable. During 1949–50, 34,846 children were examined; 17,098 extractions were performed; and there were 72,568 fillings and 23,594 other treatments.

In order to give the same medical and dental facilities to the children of the back country as are obtainable by city dwellers, four Rail Dental Clinics equipped on the most modern lines have been constructed. A motor car is carried on a railway wagon attached to each clinic for use at each stopping place to visit the surrounding villages served by the rail centre.

At the Wilson Ophthalmic School Hostel children suffering from trachoma are treated and educated. They are admitted from time to time on the recommendation of the part-time Ophthalmic Officer. Beneficial results have already been obtained. The Institution is situated at Eildon Hill, Windsor, and is fully equipped to treat all types of eye cases.

The work of Hookworm Control (the dealing with anchylostomiasis duodenale and necator Americanus infestation) throughout the State is under the control of the Director-General of Medical Services and his deputy. This activity has resulted in a marked reduction of the incidence of this dangerous menace on the northern coastal belt. Two sisters of the School Health Services are seconded for hookworm duty. The personnel consists of a microscopist, a health inspector and two trained sisters.

This service cost £48,690 in 1949–50.

5. **South Australia.**—The system of medical inspection in force requires the examination of all children attending both primary and secondary schools. As a rule they are examined three times during their primary course in Grades I., IV. and VII., and twice during their secondary course in the 2nd and 4th years. Country schools are not visited annually because of staff shortage, but approximately every three or four years. On these visits all the children are examined. Reports are furnished to the parents of any remediable defects found during these examinations. The medical inspectors meet the parents after the examination of the children and give an address on the prevention and treatment of the conditions which were found during the inspection. After these lectures the parents are given an opportunity to ask questions regarding their children. When there is an epidemic or a threatened epidemic in a district, similar lectures are given and special visits paid to all the schools in that locality. All students are examined before they enter the Teachers' College and before they begin teaching. Medical and physiological tests are conducted four times during the course (two years) on all candidates taking the Diploma of Physical Education. Courses of lectures in Hygiene and in First Aid are given to all College students and in Home Nursing to Domestic Arts students.

The medical staff consists of a principal medical officer, 3 full-time and 2 part-time medical inspectors and 5 trained nurses. Two dentists and 2 dental assistants are responsible for dental work in country schools.

The more important defects of the 22,079 children examined during 1950 were as follows:—Vision 525, hearing 147, and tonsils and adenoids 744.

No survey of children wearing spectacles was made in 1949. In 1950 the proportions per cent. of boys and of girls in primary schools who were wearing spectacles at the time of the medical examination were as follows :—Grade 1—boys 1.4, girls 1.4 ; Grade 2—2.5, 3.3 ; Grade 3—3.1, 4.4 ; Grade 4—3.5, 4.6 ; Grade 5—4.1, 4.4 ; Grade 6—5.1, 5.0 ; and Grade 7—4.0, 5.3.

Of the 5,999 children tested for hearing with a pure tone audiometer, 3,619 showed no hearing loss.

The Psychology Branch consists of a psychologist, two assistant psychologists, one senior guidance officer, two guidance officers, a social worker, an advisory teacher of opportunity classes and a special teacher of hard of hearing children. The work of the Branch may be divided into three sections—clinical, educational and vocational.

Clinical. The clinical work involves examining difficult children of many types, including those with such problems as backwardness, retardation, truanting, delinquency, etc. In addition, the parents of all children examined are always interviewed and their co-operation is sought.

Educational. In addition to supervising 36 opportunity and special classes for children backward in school work, the Branch advises on questions of placement and types of education for ordinary children in schools.

Vocational. The guidance officers test and advise all children about to leave school. The guidance officers are also responsible for the supervision of record cards where used in primary schools.

The Branch also undertakes lectures to students of the Teachers' College as well as to other interested organizations such as mothers' clubs.

The cost of these services combined in 1949–50 was £14,435.

6. **Western Australia.**—Under the Public Health Act 1911–1935 the medical officers appointed by the local authorities became medical officers of schools and of school children. The principle aimed at is—

(*a*) in the metropolitan area, that each child shall be examined three times during his school life—
  (i) when he enters school between 5 and 6 years,
  (ii) in his eighth year, and
  (iii) between the ages of 12 and 13 years ;
(*b*) in the country, that the child is examined twice during his school life, or more often if it is possible to arrange such medical examinations.

In the Health Department there are 2 full-time and 6 part-time medical officers for schools. One full-time medical officer and three half-time officers are employed in the country, and one full-time officer and three half-time officers are employed in the metropolitan area. During 1950, 39,023 children were examined (metropolitan 18,303, country 20,524, and summer camp classes 196), of whom 20,250 were boys and 18,773 girls. There were 357 schools visited, comprising—metropolitan, 74 State schools and 15 convents and country, 222 State schools and 46 convents. During 1950 the 11 full-time dental officers employed visited 29 metropolitan schools, and in five dental vans visited 135 country schools ; the number of children examined was 7,858 of whom 4,913 were treated with parents' consent.

The cost of this service for 1949–50 was £19,817.

7. **Tasmania.**—During the year 1950 one full-time medical officer and two part-time officers were employed in the examination of school children. Six Government medical officers also performed routine examinations as part of their ordinary duties. Nine full-time and one part-time sister visit homes and schools regularly. In all, 13,925 children were examined, of whom 8,559 were found to have defects.

There are now three dental clinics—one at Hobart, another at Launceston and the third at Devonport—each with a full-time dental surgeon in charge. Three other dentists were employed for varying periods during the year, and the department paid four private dentists to do work in various areas. The mobile clinic is still operating along the north-west coast. There were 6,170 new visits paid to dental clinics in Tasmania and 5,229 repeat visits.

The cost of medical and dental services for the year ended June, 1950 was £13,498.

8. **Australian Capital Territory.**—By arrangement, education facilities are provided by the Education Department of New South Wales. The Commonwealth Department of Health, however, took over from the State in 1930 the medical inspection of school children and carried out examinations of entrants and those leaving during 1930.

Subsequently to 1931, examinations of entrants and those leaving the primary schools have taken place. During 1937 this examination was supplemented by examinations of all pupils of all rural schools (including Duntroon and Molonglo). No examinations were made in 1942. Since 1943 all primary pupils of Government schools in the Territory have been medically examined annually. During 1950 a total of 1,420 children were examined, comprising 732 boys and 688 girls. Defects found were—nose and throat, 94 or 6.6 per cent.; eye defects notified, 52 or 3.6 per cent.; hearing defects, 29 or 2 per cent.; nutrition unsatisfactory, 138 or 9.7 per cent. Dental defects were not recorded because school dental clinics were supervising most of the children examined.

§ 8. Supervision and Care of Infant Life.

1. **General.**—The number of infant deaths and the rate of infant mortality for the five years 1946 to 1950 are given in the following table, which shows that during this period no less than 24,385 children died in Australia (excluding Territories) before reaching their first birthday. Further information regarding infant mortality will be found in Chapter XIV.—Vital Statistics :—

(*a*) Excludes Territories.

(*b*) Number of deaths under one year of age per 1,000 live births registered.

During recent years greater attention has been paid to the fact that the health of the community depends largely on pre-natal, as well as after-care, in the case of mothers and infants. Government and private organizations, therefore, provide instruction and treatment for mothers before and after confinement, while the health and well-being of mother and child are looked after by the institution of baby health centres, baby clinics, crèches, visits by qualified midwifery nurses, and special attention to the milk supply, etc.

2. **Government Activities.**—In all the States acts have been passed with the object of supervising and ameliorating the conditions of infant life and reducing the rate of mortality. Departments control the boarding-out to suitable persons of the wards of the State, and wherever possible the child is boarded out to its mother or near female relative. Stringent conditions regulate the adoption, nursing and maintenance of children placed in foster-homes by private persons, while special attention is devoted to the welfare of ex-nuptial children. (*See also* in this connexion Chapter IX.—Welfare Services.) Under the provisions of the Maternity Allowances, Part V. of the Social Services Consolidation Act 1947–1951, from 1st July, 1947 a sum of £15 is payable to the mother in respect of each confinement at which a living or viable child is born. Where there are one or two other children under 16 the amount payable is £16, and where there are three or more other children under 16 the amount payable is £17 10s. Where more than one child is born at a birth the amount of the allowance is increased by £5 in respect of each additional child born at that birth. Detailed particulars regarding Maternity Allowances are given in Chapter IX.—Welfare Services.

3. **Nursing Activities.**—(i) *General.* In several of the States the Government maintains institutions which provide treatment for mothers and children, and, in addition, subsidies are granted to various associations engaged in welfare work.

(ii) *Details by States.* In earlier issues of the Official Year Book (*see* No. 22, pp. 515–6) information may be found concerning the activities of institutions in each State.

(iii) *Summary.* The following table gives particulars of the activities of Baby Health Centres and Bush Nursing Associations :—

BABY HEALTH CENTRES AND BUSH NURSING ASSOCIATIONS, 1950.

(*a*) Year ended 30th June, 1950. (*b*) Includes five mobile units. (*c*) Includes four mobile units.

In the last twenty years the number of attendances at the Baby Health Centres has more than trebled. The numbers of attendances, at five-yearly intervals, since 1930 were as follows :—1930, 919,893 ; 1935, 1,355,306 ; 1940, 2,035,299 ; 1945, 2,927,764 ; 1950, 3,049,375.

§ 9. Hospital Benefits Act.

Under the Hospital Benefits Act 1945–1948 the Commonwealth has entered into agreements with the States to pay to the States hospital benefits at an agreed rate for each bed occupied by a qualified person in a public ward in a public hospital, provided that the States abolish the means test for admission into public wards and cease charging fees to qualified persons admitted thereto. The benefit rate for public wards, which was six shillings per day until 30th June, 1948, was increased to eight shillings per day from 1st July, 1948. For dates of operation and payments made in the several States *see* page 302.

The agreements provide for the Commonwealth to pay benefits towards the cost of treatment of qualified persons occupying beds in non-public wards in public hospitals, and for the State Governments to reduce the hospital fees by the equivalent of the benefit rate, thus relieving qualified persons of fees to this extent. The benefit rate for non-public wards which was six shillings per day until 31st October, 1948, was increased to eight shillings per day from 1st November, 1948.

Private hospitals are entitled to claim benefits for beds occupied by qualified patients. These hospitals must be approved by a joint committee of Commonwealth and State Health authorities before payment of benefit is made. The hospitals are required to reduce each qualified patient's account by the amount of the benefit payable by the Commonwealth. The benefit rate for private hospitals which was six shillings per day until 31st October, 1948, was increased to eight shillings per day from 1st November, 1948.

Hospital benefits are payable also to, or in respect of, any person who, whilst temporarily absent from Australia, has been a qualified patient in a hospital in any country outside Australia. The benefit rate for persons temporarily absent from Australia which was six shillings (Australian currency) per day until 31st October, 1948, was increased to eight shillings (Australian currency) per day from 1st November, 1948. Arrangements have been made for these benefits to be paid in several countries overseas where Commonwealth Officers are established. Any claims not dealt with overseas receive attention in Australia.

The Commonwealth and States have agreed to form a National Hospital Council of Commonwealth and State representatives, the functions of which will be to advise the Commonwealth and State Governments on any hospital matters referred to it by their Governments.

§ 10. Mental Institution Benefits Act.

The Mental Institution Benefits Act was assented to on 17th December, 1948. It authorizes the execution, on behalf of the Commonwealth, of agreements with all or any of the States relating to the provision of mental institution benefits.

These agreements will provide for the Commonwealth to pay to the States, in respect of qualified persons in mental institutions, benefits at an agreed rate per patient-day, and for the States to ensure that no means test is imposed on, and that no fees are charged to, or in respect of, qualified persons.

§ 11. Tuberculosis Act.

The main provisions of this Act, which was assented to on 25th November, 1948, are as follows :—(*a*) Section 5, which authorizes the Commonwealth to enter into an arrangement with the States for an effectual national campaign against tuberculosis ; (*b*) Section 6, which empowers the Commonwealth to take over or provide specified facilities for the diagnosis, treatment and control of tuberculosis ; (*c*) Section 8, which provides for the setting up of an Advisory Council to advise the Commonwealth Minister for Health on matters relating to the national campaign ; and (*d*) Section 9, which authorizes the Commonwealth to pay allowances to sufferers from tuberculosis and their dependants to enable sufferers to give up work and undergo treatment, and thus minimize the spread of infection.

The Commonwealth has completed an arrangement with each State, and the National campaign is already under way. Under the arrangement each State is required to conduct an effectual campaign against tuberculosis and to provide adequate facilities for that purpose. In consideration of this, the Commonwealth undertakes to reimburse the State for all approved capital expenditure in relation to tuberculosis on and after 1st July, 1948, and for net maintenance expenditure to the extent it is in excess of net maintenance expenditure for the base year 1947–48. Thus, the States are required to carry out the actual physical or field work of the national campaign with the Commonwealth acting in an advisory, co-ordinating and financial capacity. For this reason, the Commonwealth has not found it necessary to make much use of its powers under Section 6.

An Advisory Council, known as the National Tuberculosis Advisory Council, has been set up and has already had three meetings. There are eleven members under the chairmanship of the Commonwealth Director-General of Health. The members are the Commonwealth Director of Tuberculosis, the six State Directors of Tuberculosis, the Consultant (Chest Diseases) of the Department of Repatriation, two specialist private practitioners, and the Chief Administrative Officer of the Commonwealth Department of Health.

A system of tuberculosis allowances has been drawn up and is an important factor in the campaign against the disease. Payments under the scheme were commenced on 13th July, 1950. The rates of allowance from 1st November, 1951 were £8 5s. a week for a married sufferer with a dependent wife, £5 a week for a sufferer without dependants (reducible to £3 when maintained free of charge in an institution), and 9s. a week for each dependent child under the age of sixteen (which is additional to child endowment). There is a means test, generous to the sufferer, which has regard only to income and not to property.

§ 12. Pharmaceutical Benefits Act.

A Pharmaceutical Benefits Act was passed by the Commonwealth Parliament in March, 1944 and was amended in September, 1945. This Act was the subject of a High Court action, as a result of which the Government sought by means of a referendum of the people the constitutional power necessary to implement the Act. This power having been granted, a further Pharmaceutical Benefits Act, which repealed the Acts of 1944 and 1945, was assented to on 12th June, 1947. This Act embodied a scheme for providing pharmaceutical benefits to all persons ordinarily resident in Australia. The benefits provided were contained in a Commonwealth Pharmaceutical Formulary, which was subject to periodic revision by a Formulary Committee comprised of members of the medical and pharmaceutical professions. Benefits were supplied without cost to the person receiving the benefit, payment being made by the Commonwealth to authorized suppliers from the National Welfare Fund. Special arrangements existed for supplying benefits or their equivalent to persons residing in isolated areas. These pharmaceutical benefits were first made available to the public on 1st June, 1948. In August, 1950, the Government amended the regulations under the Act, thereby limiting the range of benefits to a list of life-saving and disease-preventing drugs compiled on the recommendation of a special Medical Advisory Committee. These regulations came into force on 4th September, 1950.

§ 13. Disposal of the Dead by Cremation.

The disposal of the dead by cremation has been in existence in Australia for many years, as the first crematorium was opened in South Australia in 1903. The number of crematoria in New South Wales is five; the first was opened in 1925. There are two crematoria in Victoria; the first crematorium opened in 1905, but was closed in 1926 and re-opened in 1936, while the other one was opened in 1927. There are two crematoria in Queensland, the first being opened in 1934. In South Australia there is one crematorium which opened in 1903. In Western Australia there is one crematorium which opened in 1939. In Tasmania there are two crematoria; the first was opened in 1936.

The following table shows the number of cremations in each State for the years 1940 to 1951 :—

CREMATIONS.

Year.	N.S.W.	Victoria.	Q'land.(*a*)	S. Aust.(*a*)	W. Aust.	Tas.	Australia.
1940	4,605	1,624	892	109	242	167	7,639
1941	5,081	1,826	1,063	137	302	210	8,619

1950	9,170	4,425	2,155	225	726	421	17,122
1951	9,815	4,808	2,377	280	874	485	18,639

(*a*) Year ended 30th June.

B. INSTITUTIONS.

§ 1. General.

In Australia, institutions related to public health may be classified in three groups : (*a*) State ; (*b*) public ; and (*c*) private. To the first group belong those institutions wholly provided for by the State, such as the principal mental hospitals in the various States and the Government and leased hospitals in Western Australia. To the second group belong public institutions of two kinds, namely :—(i) those partially subsidized by the State or by State endowments for maintenance, but receiving also private aid, and (ii) those wholly dependent upon private aid. To the first of these two kinds belong such institutions as the principal metropolitan hospitals ; in the second are included institutions established and endowed by individuals for the benefit of the needy generally. All institutions of a private character are included in the third group. A more or less accurate statistical account is possible in classes (*a*) and (*b*), but in regard to (*c*) general tabulation is, for obvious reasons, impossible. Owing to differences in the dates of collection and tabulation it is impossible to bring statistics of some charitable institutions to a common year.

§ 2. Public Hospitals (other than Mental Hospitals).

1. **General.**—All the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres there are hospitals for infectious diseases, tubercular patients, women, children, incurables, etc.

The particulars given herein refer to public hospitals at the latest available date and include all institutions affording hospital relief, whether general or special, with the exception of mental hospitals, repatriation hospitals and private hospitals conducted commercially. The particulars for New South Wales in the following tables relate to hospitals operating under the control of the Hospitals Commission.

2. **Principal Hospitals in each State.**—In earlier issues of the Official Year Book (*see* No. 22, pp. 481–2) particulars respecting staff, accommodation, etc., of each of the principal hospitals were given.

3. **Number, Staff and Accommodation, 1949–50.**—Details regarding the number of hospitals, staffs and accommodation for the year 1949–50 are given in the following table :—

PUBLIC HOSPITALS : NUMBER, STAFF AND ACCOMMODATION, 1949-50.

Particulars.	N.S.W.	Vic.(*a*)	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.

(*a*) Year ended 31st March, 1950, and includes private and intermediate patients previously excluded.

In addition to those admitted to the hospitals there are large numbers of out-patients. During 1949–50 there were 927,450 out-patients treated in New South Wales, 404,743 in Victoria, 438,694 in Queensland, 102,055 in South Australia, 69,804 (estimated) in Western Australia, 80,444 in Tasmania and 11,028 in the Australian Capital Territory, making a total for Australia of 2,034,317.

5. **Revenue and Expenditure.**—Details of the revenue and expenditure for the year 1949–50 are shown in the next table. The revenue includes the Commonwealth Hospital Benefit Scheme which operated in Victoria, Queensland, Western Australia and Tasmania from 1st January, 1946, in South Australia from 1st February, 1946, and in New South Wales and the Australian Capital Territory from 1st July, 1946.

(a) Partly estimated.

§ 3. Leper Hospitals.

Isolation hospitals for the care and treatment of lepers have been established in New South Wales (Little Bay); Queensland (Peel Island, near Brisbane, and Fantome Island, North Queensland); Western Australia (Derby); and the Northern Territory (Channel Island, near Darwin). At the end of 1950 there were 20 cases in residence at Little Bay, 54 at Peel Island, 72 at Fantome Island, 305 at Derby, 133 at Channel Island, and 3 cases at Wooroloo, Western Australia. Of the 587 cases, 456 were full-blood aborigines, 51 half-caste aborigines, 4 Asiatics and 76 Europeans.

§ 4. Mental Hospitals.

1. **General.**—The methods of compiling statistics of mental diseases are fairly uniform throughout the States, but there is an element of uncertainty about possible differences in diagnosis in the early stages of the disease. The figures for the States cannot be brought to a common year; consequently the following particulars relate to a combination of calendar and financial years. Licensed houses are included in all particulars excepting revenue and expenditure for New South Wales. The figures exclude those of reception houses and observation wards in gaols. In New South Wales the expenditure includes the cost of Broken Hill patients treated in South Australian mental hospitals.

2. **Hospitals, Staff, etc., 1949–50.**—Particulars regarding the number of hospitals, the medical and nursing staffs, and accommodation are given in the following table for the year 1949–50 :—

MENTAL HOSPITALS : NUMBER, STAFF, ACCOMMODATION, 1949–50.(*a*)

Total	3.38	2.95	3.41	3.19	2.78	2.43	3.18

(*a*) See footnote (*a*) to previous table.

Persons who are well advanced towards recovery are allowed to leave the hospitals and reside with their relatives or friends, but they are under supervision and their names are kept in the records.

4. **Revenue and Expenditure, 1949–50.**—The revenue of Government mental hospitals is small in comparison with their cost, and consists chiefly of patients' fees, and mental institution benefits. The proportion of expenditure borne by the State amounts to about 88 per cent. In New South Wales the expenditure includes the cost of Broken Hill patients treated in South Australian mental hospitals :—

MENTAL HOSPITALS : FINANCES, 1949–50.

Inmates at end of year ..	"	26,509	27,045	27,214	27,425	27,922
Revenue (excluding Government Grants)	£	262,817	457,131	508,201	593,601	725,405
Expenditure—Total ..	£	1,903,817	2,893,208	3,575,676	4,484,879	6,238,956
" —Per Average Daily Resident..		£79/2/4	£116/6/11	£143/7/11	£179/11/9	£246/8/3

6. **Number of Mental Patients, 1938–39 and 1946–47 to 1949–50.**—The total number returned as under treatment shows slight fluctuations during the period but the proportion to total population shows a slight decline to 1949–50. A more rational attitude towards the treatment of mental cases has resulted in a greater willingness in recent years to submit afflicted persons to treatment at an early stage, and an increase in the number of recorded cases, therefore, does not necessarily imply an actual increase in mental diseases.

MENTAL PATIENTS IN HOSPITALS.

State.	1938–39.	1946–47.	1947–48.	1948–49.	1949–50.
NUMBER.					
New South Wales	11,678	11,834	11,836	11,825	12,023
Victoria	7,326	7,037	7,052	7,120	7,203
Queensland	3,650	3,933	4,008	4,068	4,153
South Australia	1,747	2,107	2,165	2,213	2,310
Western Australia	1,477	1,471	1,505	1,537	1,547
Tasmania	631	663	648	662	686
Australia	26,509	27,045	27,214	27,425	27,922
PER 1,000 OF POPULATION.					
New South Wales	4.25	3.96	3.91	3.80	3.73
Victoria	3.92	3.45	3.42	3.38	3.33
Queensland	3.59	3.55	3.55	3.54	3.51
South Australia	2.93	3.26	3.29	3.29	3.30
Western Australia	3.16	2.96	2.96	2.94	2.84
Tasmania	2.66	2.58	2.47	2.46	2.46
Australia	3.81	3.59	3.56	3.50	3.45

The difference between States in the number of mental patients in hospitals per 1,000 of population may be due to some extent to differences in classification.

7. **Causes of Mental Diseases.**—The general information available respecting the causes of the mental diseases of persons admitted to institutions is too unsatisfactory to enable a classification of patients by cause to be given.

8. **Length of Residence in Hospital, 1949–50.**—(i) *New South Wales and Victoria.* Particulars are not available regarding the average length of residence in hospitals of persons who died or were discharged during the year.

(ii) *Queensland.* The average residence of those who died during 1949–50 was 9 years 189 days for males, and 7 years 235 days for females; of those discharged, 295 days for males, and 1 year 7 days for females.

(iii) *South Australia.* The average residence of those who died during 1949–50 was 8 years 11 months 23 days for males, and 6 years 9 months 22 days for females; of those discharged, 3 years 7 months 9 days for males, and 2 years 8 months 9 days for females.

(iv) *Western Australia.* The average residence of those who died in 1949 was 9 years 11 months 11 days for males, and 8 years 8 months 1 day for females; of those discharged, 1 year 7 months 28 days for males, and 3 years 11 months 6 days for females.

(v) *Tasmania.* The average residence of those who died during 1949–50 was 5 years 28 days for males, and 6 years 1 month 14 days for females; of those discharged, 1 year 1 month 8 days for males, and 1 year 3 months 21 days for females.

CHAPTER IX.

WELFARE SERVICES.

A. COMMONWEALTH SOCIAL SERVICE BENEFITS.[*]

§ 1. Introduction.

Commonwealth social service benefits are provided under the Social Services Consolidation Act 1947–1951 which came into operation on 1st July, 1947. This Act provided for the repeal of the existing laws relating to age and invalid pensions, maternity allowances, child endowment, widows' pensions and unemployment and sickness benefits, and for the immediate re-enactment of the necessary provisions for the grant and payment of these benefits under a unified law. Its more important effects were the elimination of obsolete provisions, the removal of anomalies, the amalgamation of like provisions, and the modernizing and grouping of the legislation so that it presented a symmetrical part of a well-defined pattern of social security. The history of the variations in the rates and conditions of age and invalid pensions, maternity allowances, child endowment, widows' pensions and unemployment and sickness benefits prior to 1st July, 1947 is referred to in earlier issues of the Official Year Book.

A summary of the Commonwealth expenditure in each State on Social and Health Services provided from the National Welfare Fund, is shown in the following table :—

COMMONWEALTH EXPENDITURE ON SOCIAL AND HEALTH SERVICES, 1950–51.
(£'000.)

Social and Health Services.	N.S.W. (a)	Vic.	Q'land.	S. Aust. (b)	W. Aust.	Tas.	Total.

(a) Includes Australian Capital Territory. (b) Includes Northern Territory. (c) Includes payments abroad, £5,000. (d) Includes payments abroad, £1,000. (e) Includes allowances and reimbursements to the States. (f) Includes administration, £9,000. (g) Includes administration, £38,000. (h) Includes administration, £35,000.

§ 2. Age and Invalid Pensions.

1. **General.**—Age pensions are payable to men, 65 years of age and over, and women, 60 years of age and over, who have resided in Australia for a continuous period of 20 years. Any periods of absence during which a person's home remained in Australia, and absences in certain other circumstances, are counted as residence. Absence in a Territory of the Commonwealth does not break continuity of residence.

Invalid pensions are payable to persons, 16 years of age and over, who have resided in Australia for a continuous period of five years, and who are permanently incapacitated for work or permanently blind. For the purpose of the residential qualification, the position in regard to absences is the same as for age pensions. A person is deemed to be permanently incapacitated for work if the degree of his permanent incapacity is not less than 85 per cent. The claimant must have become permanently incapacitated or permanently blind while in Australia or during a temporary absence from Australia, but this condition is waived if he has resided in Australia for not less than 20 years (continuous or otherwise), which may be partly before or partly after the occurrence of the permanent incapacity or blindness.

---

[*] Rates shown in this division were operating up to October, 1952. **For rates operating subsequently,** *see* Appendix to this volume.

2. **Persons Disqualified.**—A pension is not payable to :—an alien (except a woman who, prior to marriage, was a British subject) ; a person who has deprived himself of property or income in order to qualify for a pension ; a person in receipt of income of £234 per annum or more (blind persons £676 per annum) or £468 per annum for a married couple (£832 per annum where both husband and wife are blind) ; a person who owns property, apart from his permanent home and other exempt property, to the net value of more than £1,000 (£2,000 for married persons) ; a person who is not deserving of a pension ; a person who is not of good character or who has deserted his wife (or her husband) or children for six months or upwards immediately preceding the date of the claim (age pension only) ; or a person under 21 years of age who is adequately maintained by his parents (invalid pension only).

3. **Aboriginal Natives.**—Pensions may be granted to aboriginal natives of Australia who have been granted exemption from State control laws, or who, in any State where exemption is not provided for, are considered suitable persons to receive pensions by virtue of character, standard of intelligence and social development.

4. **Pension Rate.**—The maximum rate of pension from 1st November, 1951, is £156 per annum. (*See* footnote, page 307.)

5 **Effect of Income.**—Permissible income is £78 per annum. Any income in excess of this amount is deducted from the pension. The income of a married person is deemed to be half the total income of husband and wife except where they are legally separated or in certain other circumstances. Permissible income for blind persons, whether single or married, is £520 per annum. Any excess income is deducted from the pension. Where both husband and wife are blind, half the amount of any income in excess of £520 per annum is deducted from each pension. "Income" does not include gifts or allowances from children or parents, benefits from friendly societies, payments in respect of illness, infirmity or old-age from any trade union, the value of State food relief, child endowment or other payments for or in respect of children, benefits under the Commonwealth Hospital Benefits, Pharmaceutical Benefits and interest on Commonwealth war gratuities.

6. **Effect of Property.**—The rate of pension is reduced by £1 per annum for every complete £10 of that portion of the net value of property which exceeds £100 but does not exceed £450, and by £2 per annum for every complete £10 of the remainder (if any) of the net value of the property up to £1,000. The value of property of a married person is deemed to be half the total value of property of husband and wife.

The value of a home, furniture and personal effects, the surrender value (up to £750) of any life assurance policies, the capital value of any life interest, annuity or contingent interest, the present value (up to £750) of any reversionary interest, the value of any property from the estate of a deceased person which has not been received and the amount of any Commonwealth war gratuity are disregarded in the computation of property.

7. **Claimants Receiving War Pensions.**—A person receiving a war pension may be granted an age or invalid pension in addition to the war pension, but the total amount payable in respect of the two pensions must not exceed £208 per annum. In the case of a married couple where husband and wife each receive a civil pension (age or invalid, wife's allowance or service pension), the total amount which may be received in respect of war pensions and civil pensions is £377 per annum ; in other cases of married persons the limit is £305 10s. per annum. Where the war pension (or pensions) and the civil pension (or pensions) together exceed the appropriate limit, the civil pension (or pensions) is (or are) reduced by the amount of the excess, but the pensioner is permitted to have other income to bring the total war pension and civil pension payments, plus the other income, up to the appropriate limit of income plus pension, £208 per annum for a single person or £416 per annum for a married couple, both qualified for pensions.

8. **Inmates of Institutions.**—A pensioner who is an inmate of a benevolent asylum is paid £54 12s. per annum of his pension and the balance of the pension is paid to the institution for his maintenance.

9. **Wives' Allowances.**—An allowance, not exceeding £78 per annum, may be granted to the wife of an invalid pensioner (or an age pensioner who is permanently incapacitated for work or permanently blind) if she is living with her husband and is not receiving an age or invalid pension or a service pension. The rate of the allowance is affected by income and property on the same basis as an age or invalid pension.

10. **Childrens' Allowances.**—An allowance of £29 18s. per annum in respect of one child under the age of 16 years may be granted to the wife of an invalid pensioner living with her husband. The allowance may also be granted to any invalid pensioner who has the custody, care and control of a child under the age of 16 years, but where both husband and wife are invalid pensioners (living together) the child's allowance is payable only to the wife.

11. **Rehabilitation of Invalid Pensioners.**—The scheme for the rehabilitation of invalid pensioners, by which invalid pensioners may be given suitable treatment and vocational training at the Commonwealth's expense with a view to enabling them to learn some suitable craft or occupation whereby they may eventually become self-supporting, came into operation from the 10th December, 1948. The cases selected for treatment and training are those in which the pensioner's disability is remediable and where there are reasonable prospects of his engaging in a suitable vocation within two years after the commencement of treatment or training.

During the period of treatment payment of the pension is continued, and when vocational training is commenced the pension is suspended and, in its place, the trainee is paid a rehabilitation allowance at a rate equivalent to the rate of invalid pension (including any wife's or child's allowance) for which he is qualified, plus a training allowance of £1 5s. per week. Where it is necessary for a trainee to live away from home for the purpose of receiving training, an additional allowance is paid. The cost of fares regularly incurred by the pensioner in travelling for the purpose of receiving treatment or training may also be paid by the Commonwealth. A pensioner undergoing treatment or training may be provided with any artificial replacements, surgical aids and appliances and with such books, equipment and tools of trade (costing not more than £20) as are required for his treatment or training or to enable him to engage in employment. The pensioner, however, is required to pay the cost of any articles which he retains for his own use, but payment may be made by small instalments after he has commenced employment.

If, in any case, the treatment or vocational training of a pensioner does not result in his being able to engage in employment, his right to continuance of his invalid pension is not thereby prejudiced in any way.

The grant or continuance of an invalid pension may be refused unless the claimant or pensioner undergoes such treatment or training as the Director-General of Social Services considers is reasonable for him to undergo, having regard to the pensioner's age and physical and mental capacity and to the facilities available. During the year 1950–51 the number of pensioners examined was 11,135, of whom 782 were accepted for treatment, and 495 were placed in employment.

12. **Funeral Benefits.**—From 1st July, 1943 a funeral benefit of up to £10 has been payable to the person who has paid, or is liable to pay, the cost of the funeral of an age or invalid pensioner or of a claimant who, but for his death, would have been granted an age or invalid pension. Where the cost of the funeral has been partly met by payment from a contributory funeral benefit fund of an organization other than a friendly society, funeral benefit is payable to the extent of the amount (not above £10) by which the cost of the funeral exceeded the amount paid from the fund. A funeral benefit is not payable to a person administering a contributory funeral benefit fund.

13. Rates of Pension Payable.—The following statement shows the rates of pension at 1st July, 1909 and the rates as they have been varied since that date :—

MAXIMUM RATES OF PENSION PAYABLE.

(*a*) Additional pension of £6 10s. per annum (2s. 6d. per week) was payable to a pensioner with no income. Pensioners with income of less than 2s. 6d. per week were paid additional pension of 2s. 6d. less the amount of income. (*b*) Variation according to rise in retail price index-number. (*c*) Increase paid on 9th July, 1942, retrospective to 2nd April, 1942. (*d*) Rate restored to £70 4s. per annum under National Security (Supplementary) Regulation 112A—Statutory Rule 315 of 1943. (*e*) *See* footnote, page 307.

NOTE.—Provision for variations according to retail price index-numbers repealed 6th April, 1944.

14. Age Pensions.—(i) *Number in force.* At 30th June, 1950, there were 334,923 age pensions in force. During 1950–51, 34,842 age pensions claims were granted and 5,563 pensioners were transferred from the invalid pension list, while 32,522 pensions expired through cancellations and deaths. The net increase for the year was 7,883 and the total in force at 30th June, 1951, was 342,806.

(i) *Sexes of Age Pensioners—States.* Of the age pensioners at 30th June, 1951, 116,222 (or 34 per cent.) were males, and 226,584 (or 66 per cent.) were females. Details for each State are as follows :—

AGE PENSIONS : SEXES OF PENSIONERS AT 30th JUNE, 1951.

State.	Males.	Females.	Total.	Masculinity.(*a*)
New South Wales (*b*)	50,289	91,369	141,658	55.04
Victoria	26,268	59,942	86,210	43.82
Queensland	17,069	31,006	48,075	55.05
South Australia (*c*)	9,630	21,368	30,998	45.07
Western Australia	8,967	15,350	24,317	58.42
Tasmania	3,999	7,549	11,548	52.97
Total—30th June, 1951	116,222	226,584	342,806	51.29
„ 1950	115,356	219,567	334,923	52.54

(*a*) Number of males to each 100 females. (*b*) Includes Australian Capital Territory. (*c*) Includes Northern Territory.

(iii) *Age and Conjugal Condition of Age Pensioners.* The recorded ages of the 34,842 persons (12,395 males and 22,447 females) to whom age pensions were granted during the year 1950–51 varied considerably, ranging from 6,426 at age 60 to one at age 103, but 25,966 were in the 60–70 group. The conjugal condition of these new pensioners was as follows :—Males—single, 1,630 ; married, 8,541 ; and widowed, 2,224 : Females—single, 3,347 ; married, 10,363 ; and widowed, 8,737.

15. **Invalid Pensions.**—(i) *Number in force.* The number of invalid pensioners decreased from 73,494 in 1949–50 to 68,918 in 1950–51, a decrease of 4,576. Total pensions granted during the year were 8,166, while 7,179 pensions ceased through cancellations or deaths, and 5,563 were transferred to the age pension list.

(ii) *Sexes of Invalid Pensioners—States.* Of the 68,918 persons in receipt of invalid pensions at 30th June, 1951, 37,580 (or 55 per cent.) were males, and 31,338 (or 45 per cent.) were females. Details for each State are as follows :—

INVALID PENSIONS : SEXES OF PENSIONERS AT 30th JUNE, 1951.

State.	Males.	Females.	Total.	Masculinity.(*a*)
New South Wales (*b*)	18,321	14,388	32,709	127.34
Victoria	7,443	6,534	13,977	113.91
Queensland	5,947	4,793	10,740	124.08
South Australia (*c*)	2,211	2,212	4,423	99.95

(*a*) Number of males to each 100 females. (*b*) Includes Australian Capital Territory. (*c*) Includes Northern Territory.

(iii) *Age and Conjugal Condition of Invalid Pensioners.* The recorded ages of the 8,166 persons (4,835 males and 3,331 females) to whom invalid pensions were granted during 1950–51 varied from 16 to 87, 4,028 or 49 per cent. being in the 45–59 years age-group.

The conjugal condition of persons to whom invalid pensions were granted during the year was as follows : —Males—single, 1,581 ; married, 2,963 ; and widowed, 291 : Females—single, 1,490 ; married, 1,283 ; and widowed, 558.

16. **Age and Invalid Pensions : Payments and Annual Liability.**—Separate particulars of the payments to age and invalid pensioners are not available but the total payments in 1950–51 in each State together with the annual liability of each class of pensioner at 30th June, 1951 are shown in the following table :—

AGE AND INVALID PENSIONS : PAYMENTS AND ANNUAL LIABILITY.
(£.)

State.	Total Payments Age and Invalid Pensions, 1950–51.(*a*)	Annual Liability at 30th June, 1951.		
		Age Pensions.	Invalid Pensions.	Total.

Total—1950–51 ..	49,520,285	42,513,959	8,663,717	51,177,676
1949–50 ..	44,557,161	35,190,935	7,838,078	43,029,013

(*a*) Includes amounts paid to Benevolent Asylums and Hospitals for the maintenance of 5,644 pensioners, and 18,892 allowances to wives of invalid pensioners. (*b*) Includes Australian Capital Territory. (*c*) Includes Northern Territory.

The actual sum disbursed in age and invalid pensions in the financial year 1950–51, apart from the cost of administration but including the amount paid to asylums and hospitals for the maintenance of pensioners and allowances to wives of invalid pensioners, was £49,520,285 (£5 19s. 2d. per head of mean population). In 1949–50 it was £44,557,161 (£5 10s. 8d. per head of mean population).

17. Summary.—The following table gives details of age and invalid pensions and approximate cost of administration for the five years 1938–39 and 1946–47 to 1950–51 :—

(a) Based on an estimate of the aggregate of males aged 65 and over and females aged 60 and over at 30th June of each year. (b) Includes allowances to wives of invalid pensioners payable from the 8th July, 1943, but excludes funeral benefits in respect of deaths of pensioners, £209,349 in 1946–47; £209,588 in 1947–48 ; £252,479 in 1948–49 ; £245,822 in 1949–50 ; and £243,058 in 1950–51. (c) Not available.

§ 3. Maternity Allowances.

1. **General.**—A maternity allowance is payable to a woman who, at the date of giving birth to a child, is residing in Australia or is in Australia and intends to remain. The allowance is payable in respect of a birth which occurs in Australia or on board a ship proceeding from a port in Australia or a Territory of the Commonwealth to another port in Australia or a Territory of the Commonwealth. The allowance is also payable in respect of a birth which occurs on board a ship proceeding to Australia, provided the mother receives no maternity benefit in respect of the birth from the country from whence she came. Payment may be made in respect of the birth of a still-born child, or a child which lives for less than twelve hours, if the period of intra-uterine life of the child was at least 5½ calendar months. There is no means test.

2. **Alien Mothers.**—Payment may be made to an alien mother if she was a British subject prior to her marriage, or if she or her husband resided in Australia for at least twelve months immediately prior to the birth of the child. Payment in respect of a

birth which occurs within twelve months of the mother's arrival in Australia may be made at the end of that twelve months, but may be made immediately if the mother is likely to remain in Australia.

3. **Aboriginal Natives.**—Maternity allowances may be paid only to those aboriginal natives of Australia who have been granted exemption from State control laws or who, in any State where exemption is not provided for, are considered suitable persons to receive the allowance by virtue of character, standard of intelligence and social development.

4. **Amount Payable.**—From 1st July, 1947, the amount of a maternity allowance has been £15 where there are no other children; £16 where there are one or two other children; and £17 10s. where there are three or more other children. "Other children" means children under the age of sixteen years who were in the custody, care and control of the claimant on the date of the birth in respect of which the claim is made. The amount payable is increased by £5 in respect of each additional child born at a birth. Payment of £5 on account of a maternity allowance may be made available, upon application, within a period of four weeks prior to the expected date of birth. The balance is payable immediately after the birth.

5. **Persons Temporarily Abroad.**—Maternity allowances may be paid, under certain conditions, to persons ordinarily resident in Australia who are temporarily abroad.

6. **Summary.**—The following table gives details of the maternity allowance claims paid and rejected and of the amount paid since the inception and for the six years 1938–39 and 1946–47 to 1950–51 :—

MATERNITY ALLOWANCES : SUMMARY.

Year.	Claims Paid.	Claims Rejected.	Amount Paid.	Cost of Administration (approximate).	Cost per £100 allowance paid (approximate).

(a) Includes Australian Capital Territory. (b) Includes Northern Territory. (c) Quadruplets £32 10s., in Western Australia.

§ 4. Child Endowment.

1. **General.**—Any person who is resident in Australia and has the custody, care and control of one or more children under the age of sixteen years, and an approved institution of which children are inmates shall be qualified to receive an endowment in respect of each child. There is a twelve months residential requirement in respect of a claimant and a child who were not born in Australia, but this is waived if the claimant and the child are likely to remain permanently in Australia. A child born during the mother's temporary absence from Australia is deemed to have been born in Australia. There is no means test.

2. **Child of Alien Father.**—Endowment may be paid in respect of a child of an alien father if the child was born in Australia, or the mother is a British subject and the child is likely to remain permanently in Australia.

3. **Aboriginal Natives.**—Endowment may be paid to aboriginal natives of Australia unless they are nomadic, or unless the child concerned is wholly or mainly dependent on the Commonwealth or a State for his support.

4. **Rate of Payment.**—From 20th June, 1950, the rate of endowment payable has been (a) where the endowee has the custody of one child only—5s. per week ; (b) where the endowee has the custody of two or more children—in respect of the elder or eldest child 5s. per week and in respect of each other child 10s. per week ; and (c) in the case of an approved institution the rate is 10s. per week for each child inmate. From 1st July, 1941, the date of the inception of the scheme, the rate of endowment was 5s. per week for each child in excess of one in a family, and for each child under sixteen years in an approved institution. The rate was increased to 7s. 6d. per week from 25th June, 1945, and to 10s. per week from 9th November, 1948.

5. **Divided Families.**—There are provisions to meet cases of families divided by reason of divorce, separation, unemployment, death of a parent or other circumstances. In these cases endowment may be paid to the father, mother or other person.

6. **Australians Temporarily Abroad.**—Endowment may be paid, under certain conditions, to persons ordinarily resident in Australia who are temporarily abroad.

7. **Members of United Kingdom Defence Forces.**—Endowment will be paid for the children of members of the Naval, Military or Air Forces of the United Kingdom who are serving with the Australian Forces from the time of arrival in Australia.

8. **Summary.**—During the year 1950–51, 510,273 claims were granted, cancellations amounted to 22,375 and the number of endowed family group claims in force at 30th June, 1951 was 1,150,847, an increase of 487,898 or 73.6 per cent. during the year. This

large increase was due mainly to the extension from 20th June, 1950, of endowment to the first or only child under sixteen years of age in a family. The following table shows particulars of the operations during the year ended 30th June, 1951, and earlier years :—

CHILD ENDOWMENT : SUMMARY, 1950–51.

(*a*) Under 16 years of age.

§ 5. Widows' Pensions.

1. **General.**—Widows' pensions and the rates in each class, as from 6th November, 1951, have been payable to the following classes of women :—

Class "A"—A widow who has the custody, care and control of one or more children under the age of 16 years. Rate £169 per annum.

Class "B"—A widow, not less than 50 years of age, who has no children under 16 years of age in her custody, care and control. Rate £130 per annum.

Class "C"—A widow, under 50 years of age, who has no children under the age of 16 years in her custody, care and control, but is in necessitous circumstances within 26 weeks after the death of her husband. Rate £2 10s. per week for not more than 26 weeks.

Class "D"—A woman whose husband has been serving a term of imprisonment for at least six months, if she has the custody, care and control of one or more children under the age of 16 years or is not less than 50 years of age. Rate £130 per annum.

The term "widow" includes :—a "dependent female" (i.e. a woman, who, for not less than three years immediately prior to the death of a man, was wholly or mainly maintained by him as his wife on a permanent and *bona fide* domestic basis) ; a deserted wife (i.e. a woman deserted by her husband for not less than six months) ; a divorcee (i.e. a woman whose marriage has been dissolved and who has not remarried); and a woman whose husband is an inmate of a mental hospital.

The residential qualification is five years' continuous residence in Australia immediately prior to the date of lodgment of the claim. Concessions in respect of absences are the same as for age pensions. (*See* footnote, page 307.)

2. **Persons Disqualified.**—A widow's pension is not payable to :—an alien (except a woman who, prior to marriage, was a British subject) ; a woman who is in receipt of an age or invalid pension, or a war widow's pension under the Repatriation Act in respect of the death of her husband ; a woman who has deprived herself of property or income in order to qualify for a pension ; a deserted wife or a divorcee who has not taken reasonable action to obtain maintenance from her husband or former husband ; a woman who is not of good character ; a woman who is not deserving of a pension ; a woman in Class "A" in receipt of income of £247 per annum or more or owning property, apart from her permanent home and other exempt property, to the net value of more than £1,250 or a woman in Classes "B" or "D" in receipt of income of £208 per annum or more or owning property, apart from her permanent home and other exempt property, to the net value of more than £1,000.

3. **Aboriginal Natives.**—Widows' pensions may be granted to aboriginal natives of Australia under the same conditions as age pensions.

4. **Effect of Income.**—Permissible income is £78 per annum. Any income in excess of this amount is deducted from the pension. "Income" has the same meaning as for age pensions. Any amount in excess of 15s. per week received by a deserted wife or a divorcee from her husband or former husband in respect of the maintenance of a child is taken into account in the claimant's income for pension purposes.

5. **Effect of Property.**—The rate of pension for women in Classes "B" and "D" is reduced by £1 per annum for every complete £10 of that portion of the net value of property which exceeds £100 but does not exceed £450, and by £1 per annum for every complete £7 of the remainder (if any) of the net value of the property up to £1,000. Property disregarded in determining eligibility for pension is the same as for age pensions.

6. **Claimants Receiving War Pension.**—A widow is not permitted to receive, in respect of the death of her husband, both a war widow's pension under the Repatriation Act and a civil widow's pension. Other widows, however, may receive a civil widow's pension in addition to a war pension, but the total amount payable in

respect of the two pensions must not exceed £234 per annum in the case of a Class "A" widow or £195 per annum in the case of a widow coming within Classes "B", "C" or "D". Where the war pension and the widow's pension together exceed the limit applicable, the widow's pension is reduced by the amount of the excess. The widow is permitted to have, in addition, other income to bring her total war pension and widow's pension payments up to the appropriate limit of income plus pension, £247 per annum for a Class "A" widow, £208 for a Class "B" or "D" widow.

7. **Payment of Class "A" Pension for Children Continuing Education.**—The pension payable to a Class "A" widow may be continued after her child attains the age of 16 years if the child continues with full-time education at a school or university and is still dependent on the widow and is not in employment. These conditions apply until the child reaches the age of 18 years.

8. **Summary.**—The number of widows' pensions current at 30th June, 1951, was as follows :—Class "A", 17,717 ; Class "B", 23,997 ; Class "C", 120 ; Class "D", 128 ; total, 41,962. The amount paid in pensions during 1950–51 was £4,828,086. The following table shows details of widows' pensions paid in each State in the year 1950–51 and for Australia for each of the years 1946–47 to 1950–51 :—

WIDOWS' PENSIONS AT 30th JUNE, 1951.(*a*)

State.	Pensions Current.(*b*)		Children for whom Pensions Payable.	Average Fortnightly rate of Pension. (*c*)	Amount paid in Pensions during 1950–51.

(*a*) The Commonwealth Government commenced to pay widows' pensions from 1st July, 1942. (*b*) Excludes nine (1950–51),fourteen (1949–50), eleven(1948–49), six (1947–48), thirteen (1946–47), pensions in respect of pensioners in Benevolent Asylums. (*c*) Payments were four-weekly up to the 24th June, 1947 pay. (*d*) Based on mean population for the financial year. (*e*) Includes Australian Capital Territory. (*f*) Includes Northern Territory.

§ 6. Unemployment and Sickness Benefits.

1. **General.**—From 1st July, 1945, men over 16 and under 65 years of age, and women over 16 and under 60 years of age, have been eligible to apply for an unemployment benefit or a sickness benefit. There is a twelve month's residential requirement but this is waived if the claimant is likely to remain permanently in Australia. A person in receipt of an age, invalid or widows' pension, or a service pension (as distinct from a war pension) under the Repatriation Act is ineligible to receive a benefit.

2. **Unemployment Benefit.**—To qualify for an unemployment benefit a person must establish that he is unemployed and that his unemployment is not due to his being a direct participant in a strike; that he is capable and willing to undertake suitable work; and that he has taken reasonable steps to obtain such work.

3. **Sickness Benefit.**—To qualify for a sickness benefit a person must establish that he is temporarily incapacitated for work by reason of sickness or accident and that he has thereby suffered a loss of salary, wages or other income.

4. **Married Women.**—A married woman is not qualified to receive a sickness benefit if it is reasonably possible for her husband to maintain her. Where her husband is able to maintain her only partially, a benefit may be paid at such rate as is considered reasonable in the circumstances.

5. **Aboriginal Natives.**—A benefit may be paid only to those aboriginal natives of Australia who are considered suitable, by reason of character, standard of intelligence and social development.

6. **Maximum Rates of Benefits and Income.**—The maximum weekly rates of benefit and permissible income are as follows:—

MAXIMUM RATES OF BENEFITS AND INCOME.(*a*)

(*s. d.*)

Age and Conjugal Condition.	Maximum Weekly Benefit.				Permissible Income.
	Claimant.	Dependent Spouse.	Child.	Total.	
Unmarried—					
16 years and under 17 years	15 0	..	..	15 0	5 0
17 " " " 18 "	15 0	..	..	15 0	10 0
18 " " " 21 "	20 0	..	..	20 0	15 0
21 years and over	25 0	..	..	25 0	20 0
Married	25 0	20 0	5 0	50 0	20 0

(*a*) *See* footnote, page 307.

Where an unmarried claimant has the custody, care and control of a child under the age of sixteen years, the total income may be increased by 5s. per week.

Additional benefit of up to 20s. per week may be paid in respect of a claimant's housekeeper where no such benefit is payable in respect of his wife, provided there are one or more children under 16 years of age in the house and the woman is substantially dependent on the claimant but is not employed by him.

7. **Means Test.**—Any income in excess of the permissible income shown in the previous table is deducted from the rate of benefit. For unemployment benefit purposes, the income of the claimant and his spouse are taken into account, but where the claimant and his spouse are permanently separated any income received by the spouse may be disregarded. "Income" does not include child endowment, or other payments for or

in respect of children, benefits under the Commonwealth Hospital Benefits and Pharmaceutical Benefits, or an amount paid in reimbursement of medical, dental or similar expenses actually paid. For sickness benefit purposes, there is disregarded £1 per week of any payment received from an approved friendly society or other similar approved body in respect of the incapacity for which sickness benefit is payable.

Where a person qualified for sickness benefit receives or is entitled to receive (in respect of the same period and the same incapacity for which sickness benefit is payable) any payment by way of compensation (including workers' compensation), damages, or otherwise under any law (except payments for which he has contributed), the amount of the compensation, etc., is not taken into account as income but is deducted from the rate of sickness benefit otherwise payable.

8. **Waiting Period.**—There is a waiting period of seven days in respect of which unemployment or sickness benefit is not payable.

9. **Special Benefit.**—A special benefit may be granted to a person not qualified for unemployment or sickness benefit who is not in receipt of an age, invalid or widow's pension or a service pension, if, by reason of age, physical or mental disability or domestic circumstances, or for any other reason, he is unable to earn a sufficient livelihood for himself and his dependants.

10. **Rehabilitation.**—Unemployment and sickness beneficiaries are eligible for participation in the Commonwealth rehabilitation scheme under the same conditions as invalid pensioners. The grant or continuance of an unemployment or sickness benefit may be refused if the claimant or beneficiary, on being required, fails to undergo a medical examination or to receive treatment or undertake training or to do any suitable work.

During the year 1950–51 the number of persons examined was 9,226, of whom 1,152 were accepted for treatment and 842 were placed in employment.

11. **Statistics, 1949–50 and 1950–51.**—(i) *Persons on Benefit.* At 30th June, 1951, 8,569 persons were paid benefits, comprising 604 unemployment, 7,044 sickness and 921 special benefits.

(*a*) Includes amounts paid in respect of migrants. (*b*) Includes Australian Capital Territory. (*c*) Includes Northern Territory.

§ 7. Reciprocity with New Zealand.

1. **Original Agreement.**—A reciprocal agreement between Australia and New Zealand in respect of invalid and age pensions and the corresponding benefits in New Zealand came into operation from 1st September, 1943 under the provisions of the Invalid and Old-age Pensions (Reciprocity with New Zealand) Act 1943.

2. **Existing Agreement.**—A new agreement between the two countries was signed on 15th April, 1949, and was given effect from 1st July, 1949 by the Social Services (Reciprocity with New Zealand) Regulations. The Invalid and Old-age Pensions (Reciprocity with New Zealand) Act 1943 was repealed from the latter date by the Social Services Consolidation Act 1949.

The new agreement covers age, invalid and widows' pensions, child endowment and unemployment and sickness benefits in Australia and the corresponding benefits in New Zealand. It provides a new basis of entitlement for reciprocal benefits which is, broadly speaking, that citizens of one country who take up permanent residence in the other country shall be entitled to the social service benefits of the new country on the same basis as citizens of that country. For this purpose residence in New Zealand is regarded as residence in Australia (and *vice versa*); a person born in New Zealand is regarded as a person born in Australia (and *vice versa*); and permanent incapacity or blindness which occurred in New Zealand is treated as if it had occurred in Australia (and *vice versa*).

Persons going from one country to the other for temporary residence continue to receive any benefits which they have been receiving in their own country. The home country continues to provide the benefits during these temporary periods, but the payments are made, on an agency basis, by the country in which the person is temporarily resident.

B. OTHER SERVICES.

§ 1. Benevolent and Destitute Asylums.

1. **General.**—The public provisions for the care of indigent old people have been a feature of the social development of recent years in most countries. Numerous establishments exist in Australia for the housing and protection of persons no longer able to provide for themselves. These institutions are supported by Government and municipal aid, public subscriptions, bequests, etc.; while in many cases relatives of poor and afflicted persons contribute to their maintenance.

An entirely satisfactory statistical tabulation in regard to all forms of charitable aid is especially difficult in the case of benevolent institutions, because the services provided by these institutions are not always identical.

2. **Principal Institutions.**—Particulars respecting the accommodation and the number of inmates of the principal institutions were published in earlier issues of the Official Year Book (*see* No. 22, p. 485).

3. **Revenue and Expenditure.**—Details regarding revenue and expenditure for the year 1949–50 are given in the following table :—

BENEVOLENT ASYLUMS : REVENUE AND EXPENDITURE, 1949–50.

(£.)

(*d*) Year 1948. (*e*) Nine months ended 31st March, 1949. (*f*) Includes £95,431 in Victoria, £32,987 in Queensland, £1,567 in South Australia and £1,663 in Western Australia, covering such items as purchases of land, cost of new buildings and additions to buildings.

§ 2. Orphanages, Industrial Schools, etc.

1. **General.**—The methods of caring for orphans and neglected children differ extensively, inasmuch as some of the children are more or less segregated in orphanages and industrial schools, while others are boarded out with their mothers or female relatives or with approved foster-mothers. The children in orphanages and similar institutions may receive, in addition to primary education, some craft training. In all cases employment is found for the children on their discharge from the institution, and they remain for some time under the supervision of the proper authorities. The conditions under which orphans, neglected children and children boarded out live are subject to frequent departmental inspections.

2. **Principal Institutions.**—Particulars concerning the principal institutions in each State were published in earlier issues of the Official Year Book (*see* No. 22, p. 486).

3. **Transactions of State Departments.**—The following table summarizes the transactions of State Departments during 1949–50 in connexion with children under their control or supervision. In addition to neglected children, the figures include

uncontrollable and convicted children who are wards of a Government authority, as well as poor children whose parents obtain assistance from the Government without giving up the legal right of custody :—

CHILDREN UNDER GOVERNMENT AUTHORITY : SUMMARY, 1949–50.

1948–49 ..	563,348	214,956	178,073	105,892	27,910	14,641	1,104,820

(a) Year ended 31st December, 1949. (b) Includes inmates of hospitals.

The total expenditure on children's relief in the foregoing table shows considerable variation amongst the States owing to the different methods of treating assistance to mothers with dependent children. In South Australia, Western Australia and Tasmania large amounts have been excluded from the total expenditure on this account owing to the difficulty of obtaining separate amounts for allowances made in respect of the dependent children only.

§ 3. Protection of Aborigines.

For the protection of the aboriginal Australian race there are institutions, under the supervision of Aborigines Boards, where these people are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic, and receive food and clothing when they call, whilst others but rarely come near the stations. The native race is extinct in Tasmania. The expenditure from Consolidated Revenue in 1949–50 was as follows (figures in brackets are for year 1948–49) :—New South Wales, £97,146 (£80,478) ; Victoria, £8,413 (£7,626) ; Queensland, £293,099 (£233,114) ; South Australia, £45,362 (£26,988) ; Western Australia, £140,761 (£96,261) ; Northern Territory, £74,334 (£53,420) ; Australian Capital Territory, £1,292 (£1,158 ; total for Australia, £640,412 (£499,045).

§ 4. Royal Life Saving Society.

In each of the State capitals, " centres " of the Royal Life Saving Society have been established, and in some States sub-centres have also been established in the larger provincial districts. In 1934 an Australian Federal Council of this Society was formed with head-quarters at Melbourne, and each State centre, or branch, as it is now called, is controlled by the new organization. Saving of life from drowning and other forms of asphyxiation is the object of the Society, and its immediate aims are (*a*) educative and (*b*) remedial. The encouragement of swimming and life-saving in schools, colleges, clubs, etc., will bring about a more widespread knowledge of these necessary matters, and there is increasing provision of life-belts, reels, lines, warning provisions, and other first-aid appliances on ocean beaches, wharves and other suitable places. Numerous certificates of proficiency in various grades are issued annually after examination throughout Australia, the number for the individual States for 1948–49 being :—New South Wales, 9,272 ; Victoria, 4,701 ; Queensland, 2,098 ; South Australia, 751 ; Western Australia, 357 ; Tasmania, 1,325.

§ 5. Royal Humane Society.

The Royal Humane Society of Australasia has as its main object the granting of awards to all who with bravery, skill and perseverance promptly risk their own lives in saving or attempting to save those of their fellow creatures. The classes of awards are (*a*) Gold Medal, (*b*) Silver Medal, (*c*) Bronze Medal, (*d*) Certificate of Merit, and the Clark Medal for the outstanding case of the year. About 75 awards are made annually.

§ 6. Other Charitable Institutions.

Owing to the variety of name and function of other charitable institutions it has been found impracticable to give detailed results. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity, to indoor treatment over long periods in those that exist for the relief of the aged and the infirm. The institutions not so particularized include asylums for the deaf, dumb and blind, infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, rescue homes for females, free kindergartens, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bush fire, flood and mining accident relief funds, etc.

CHAPTER X.

THE TERRITORIES OF AUSTRALIA.

GENERAL.

The Territories under the control of Australia are: The Northern Territory; the Australian Capital Territory; Papua (formerly British New Guinea); Norfolk Island; the Territory of New Guinea (under Trusteeship Agreement with the United Nations); Nauru (under Trusteeship Agreement with the United Nations); the Territory of Ashmore and Cartier Islands; Macquarie and Heard Islands; and the Australian Antarctic Territory. (For details regarding the acquisition of these Territories by the Commonwealth, *see* pp. 6–8 of this volume.)

THE NORTHERN TERRITORY.

§ 1. Area and Population.

1. **Area.**—Upon the extension of New South Wales westward to the 129th meridian in 1825, the Northern Territory was incorporated in that colony, but in 1863 was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1st January, 1911. The total area is 523,620 square miles, or 335,116,800 acres—about six times as large as Victoria.

2. **Population.**—(i) *Europeans.* At the Census taken in 1881 there were only 670 Europeans in the Territory. The number increased slowly, reaching 3,767 persons in 1918. At the Census of 1933 the white population had decreased to 3,306. This number, however, was 34.5 per cent. greater than the figure at the census of 1921. At the Census of 1947 it had risen to 9,116, an increase of 176 per cent. on the 1933 figures.

(ii) *Non-Europeans.* The number of full-blood non-Europeans, excluding Australian aboriginals, in the Northern Territory on 30th June, 1947 was 388, of whom 250 were Chinese, the remainder being mainly Filipinos (47), Fijians (23), Japanese (21), and Malays (20). There were at one time over 4,000 Chinese in the Territory.

The half-caste population recorded at the Census of 1947 numbered 1,364, of whom 1,247 were half-caste Australian aboriginals. Corresponding figures at the 1933 census were, respectively, 800 and 743.

(iii) *Total Population.* The estimated population at 31st December in each of the years 1939 and 1946 to 1950, is shown in the following table:—

NORTHERN TERRITORY: ESTIMATED POPULATION (EXCLUDING FULL-BLOOD ABORIGINALS).

31st December.	Males.	Females.	Total.
1939	5,136	2,151	7,287
1946	7,263	3,379	10,642
1947	7,403	3,588	10,991
1948	8,065	4,429	12,494
1949	8,728	5,122	13,850
1950	9,520	5,611	15,131

The population at the Census of 30th June, 1947, was 7,378 males and 3,490 females, total 10,868.

(iv) *The Aboriginals.* The total number of full-blood aboriginals at 30th June, 1951 was estimated at 12,200, of whom approximately 2,850 were in regular employment. Part-aboriginals who are subject to the Aboriginals Ordinance numbered about 2,000. There are fifteen "aboriginal" reserves, comprising an area of approximately 66,000 square miles. (*See also* Chapter XIII.—Population.)

§ 2. Legislation and Administration.

On 1st January, 1911 the Territory was transferred by South Australia to the Commonwealth. The terms are outlined in Official Year Book No. 15, p. 940. For particulars of the administration up to the Northern Territory (Administration) Act 1931, when it was placed in the hands of an Administrator, residing at Darwin, *see* Official Year Book No. 38 and earlier issues.

An amendment to the Northern Territory (Administration) Act, assented to in June, 1947, enabled the Northern Territory to set up a Legislative Council. The Council consists of the Administrator, seven official members (nominees of the Administrator) and six members elected from five districts (two from Darwin district). The normal term of office of the elected members is three years. The Council is able to make ordinances for the Territory, but it must submit each one to the Administrator for assent. The Administrator may, or may not, assent, or he may refer the ordinance to the Governor-General. The Governor-General may also disallow any ordinance assented to by the Administrator within six months from the date of assent. Ordinances that (1) grant or dispose of Crown lands, (2) make leases or grants of land or money, donations or gratuities to the Administrator, or (3) relate to aboriginals or aboriginal labour, must contain a clause suspending their operation until the signification of the Governor-General's pleasure thereon. All ordinances must be laid before Parliament after assent. Money votes may be proposed in the Council only by the Administrator himself, or by his permission or direction.

The Territory elects a member to the House of Representatives, who may take part in debates, but may not vote, except on a motion for the disallowance of any ordinance of the Northern Territory or on any amendment of any such motion.

§ 3. Physiography.

1. **Tropical Nature of the Country.**—The Territory is within the torrid zone, with the exception of a strip 2½ degrees wide which lies south of the Tropic of Capricorn.

2. **Contour and Physical Characteristics.**—The low flat coast-line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl and ironstone form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries.

The principal features of the coast-line are enumerated in Official Year Book No. 1, p. 66; the rivers in No. 2, p. 76; the mountains in No. 3, p. 67; the lakes in No. 4, pp. 77, 78; the islands in No. 5, pp. 71, 72; and the mineral springs in No. 6, p. 65.

Inland, the country generally is destitute of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea and those that form the scanty supply of the interior systems. Towards the centre of the continent the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

§ 4. Climate, Fauna and Flora.

1. **The Seasons.**—There are two main climatic divisions—the wet season, November to April, and the dry season, May to October, with uniform and regular changes of weather. Nearly the whole of the rainfall occurs in the summer months. Fuller particulars appear in Official Year Book No. 6, p. 1116.

2. **Fauna.**—The ordinary types of native Australian fauna inhabit the Territory. As elsewhere on the continent, the higher *Theria* are rare, but marsupials, birds, crocodiles, fresh-water tortoises, snakes (mostly non-venomous) and frogs abound. There are many varieties of freshwater fish and littoral mollusca. Butterflies and beetles are strongly represented. The white ant is a pest, anthills in the Territory sometimes attaining great dimensions. Mosquitoes and sandflies are very troublesome, particularly in the wet season. Native fauna are in some cases protected. Buffalo formerly existed in large herds, but their number has been greatly reduced by indiscriminate shooting. Buffalo shooting is now controlled.

3. **Flora.**—The vegetation is North Australian in type, but a number of the forms belong to the Malayan and Oceanic regions. The timber trees are not of great commercial value, but in the coastal regions tropical vegetation grows luxuriantly to the water's edge. In the north, cypress pine, bloodwood and paperbark timbers are now cut and milled for local building purposes. These three timbers are resistant to termites. On the wide expanses of plain country in the interior there is little vegetation, the principal orders represented being :—*Euphorbiaceae, Compositae, Convolvulaceae, Rubiaceae, Goodenoviaceae, Leguminosae, Utricaceae.*

Fuller particulars regarding fauna and flora are given in Official Year Book No. 6, pp. 1116–7.

§ 5. Production.

1. **Agriculture.**—Up to the present agriculture has made little progress in the Territory, although it has been proved that rice, tobacco, coco-nuts, mangoes, bananas, cotton, various fodder plants, and peanuts can be successfully grown. Expense of harvesting is, at present, an obstacle to the economic production of rice, and until labour-saving machinery is procured it cannot be produced with profit. There is a large stretch of first-class coco-nut land on the coast, but hitherto planting has not been attempted on a commercial scale. For the encouragement of primary production a Primary Producers' Board was established in 1931. After the end of the 1939–45 War, returned servicemen and others began to grow with some initial success vegetables, fruit and other crops in the Darwin environs and as far south as Katherine. Vegetables grown were of consistently good quality and found ready local markets. In 1949 a group of Queensland farmers began an experiment in large-scale sorghum growing near Newcastle Waters, but the experiment has been unsuccessful for the first two seasons.

2. **Pastoral Industry.**—The pastoral possibilities of certain parts of the Northern Territory were recognized at an early date, and in 1866 stock was brought into the Macdonnell Range country from South Australia. Six years later cattle were moved from Queensland to the northern parts of the Territory, and in 1879 Giles reached the Katherine River with 2,000 head of cattle and 12,000 sheep from South Australia. For various reasons sheep-raising did not succeed. The cattle industry, however, progressed steadily and development of stock routes and other plans for the expansion of the industry are continuing.

Cattle exported during 1950–51 numbered 145,638—98,711 to Queensland, 40,835 to South Australia, and 6,092 to Western Australia. Importations of live-stock were :—bulls, 813 ; other cattle, 1,385 ; stallions, 2 ; other horses, 2,862 ; rams, 67 ; other sheep, 806.

The estimated number of live stock in the Territory at the end of the years 1939 and 1946 to 1950 is given in the table hereunder :—

NORTHERN TERRITORY : LIVE STOCK.

31st December—	Horses.	Cattle.	Sheep.	Pigs.	Goats.	Camels.	Donkeys.	Mules.
1939 ..	32,721	922,581	38,587	483	20,335	331	1,443	366
1946 ..	30,019	972,990	28,005	208	11,914	296	1,621	513
1947 ..	32,318	991,429	19,058	680	15,260	193	1,232	632
1948 ..	33,197	1,052,811	25,791	384	14,045	173	1,192	609
1949 ..	32,904	1,048,875	25,725	419	12,102	165	935	466
1950 ..	29,366	1,019,149	28,888	1,122	12,329	94	918	603

3. **Hides and Skins.**—The number of hides and skins exported from the Northern Territory during 1950–51 was as follows :—buffalo, 7,984 ; sheep, 1,050 ; crocodile, 3,203 ; goat, 60 ; snake, 150 ; and donkey, 71. In addition, a considerable number of kangaroo skins were exported, but details are not available.

4. **Mining.**—(i) *General.* Alluvial gold digging in the Northern Territory commenced in 1869 and in 1881 maximum production was achieved when the yearly return was valued at £111,945. All of this production was confined to the northern part of the Territory. The production of metals, other than gold, has suffered on account of the vagaries of prices, and the high cost of transport. At present, Tennant Creek is the principal producer of gold. Three batteries operated by companies and one Government battery are in operation. This area is noted for its rich patches of ore. The Harts Range Mica Field which was found in 1892 continues to produce the bulk of the Australian high grade mica. Wolfram mining has increased since considerable rises in the price of wolfram concentrates occurred during late 1950 and early 1951. A Government treatment plant has commenced operations at Hatches Creek. Copper production has increased considerably from various copper producing fields. High grade copper ore is now supplied to fertilizer companies for use as a trace element. Tin concentrates were produced from the Maranboy Field, where a Government battery is in operation.

(ii) *Mineral Production.* The following table shows the value of mineral production for the years 1946 to 1950 compared with 1939 :—

NORTHERN TERRITORY : MINERAL PRODUCTION.

(£.)

Year.	Gold.	Tin Concentrates.	Ochre.	Copper Ore.	Mica.	Wolfram.	Tantalite.	Silver-lead.	Total Value all Minerals.
1939	163,414	4,487	607	2,248	15,539	58,183	..	..	244,478
1946	105,376	3,228	1,983	6,282	27,969	21,696	..	..	166,543
1947	118,563	4,698	2,564	..	62,547	41,020	45	..	229,437
1948	163,482	12,055	2,374	7,370	75,796	30,780	814	1,407	294,078
1949	369,027	10,138	501	145,839	52,014	20,521	240	973	599,253
1950	543,121	15,139	4,199	56,741	61,813	25,647	520	883	708,063

5. **Pearl and Other Fisheries.**—In 1884 mother-of-pearl-shell was discovered in the harbour of Port Darwin. Difficulty in working, principally through heavy tides and muddy water, retarded the development of the industry for many years. The production of pearl-shell has declined rapidly since 1937–38. The production for 1939–40 amounted to only 179 tons, valued at £14,350, compared with 804 tons, £67,000, in 1937–38 and 410 tons, £31,500, in 1938–39. In view of the importance of the industry it was included in the terms of reference of the Northern Australia Development Committee, which placed before the Minister for the Interior recommendations of a conference of interested bodies in March, 1946 on such matters as labour, boats and equipment, financial assistance, the marketing problem and economic survey, institution of administrative arrangements and biological investigations.

In 1947–48, eleven vessels resumed fishing for pearl-shell. Inexperienced crews and initial difficulty in locating good deposits of shell were given as the reasons for a disappointing return—45 tons to December, 1948. Owing, however, to the high price (up to £600 per ton for first grade shell) offering at that time, the value of the catch was estimated at £22,500. For the 1951 season buyers have offered up to £800 per ton for first grade shell.

Darwin continues to provide a firm and ready local market for fish. The lack of suitable refrigerating plants on the fishing-boats is responsible for the deficiency of regular supplies of fish, except in limited quantities obtained from traps close to the town.

§ 6. Land Tenure.

1. **General.**—A description of the system of land tenure in force in the Territory in 1928 was given in Chapter V.—Land Tenure and Settlement, Official Year Book No. 22. This description has been brought up-to-date in the following three paragraphs.

2. **Pastoral, Agricultural, etc., Leases.**—(i) *Pastoral Leases.* A pastoral lease may be granted for such term, not exceeding 42 years, as the Administrator determines. The rental for the first period is fixed by the Administrator, and is subject to re-appraisement on such dates as are specified in the lease or as are prescribed.

(ii) *Agricultural Leases.* Agricultural lands are classified, and the maximum area which may be included in any one lease is as follows :—Division A, Cultivation Farms, Class 1, 1,280 acres, Class 2, 2,560 acres : Division B, Mixed Farming and Grazing, Class 1, 12,800 acres, Class 2, 38,400 acres. Agricultural leases are granted in perpetuity, and the rent for the first period is fixed by the Administrator, and is re-appraised every 21 years. The lessee must—(*a*) in the case of lands for mixed farming and grazing, stock the land to the extent prescribed by the regulations and keep it so stocked ; (*b*) establish a home within 2 years and reside on the leased land for 6 months in each year in the case of land for cultivation, and for 4 months in each year in the case of land for mixed farming and grazing ; (*c*) cultivate the land to the extent notified by the Administrator ; and (*d*) fence the land as prescribed.

(iii) *Leases of Town Lands.* Except in Darwin, leases of town lands are granted in perpetuity, the rental being fixed every 14 years. Such leases must, in the first instance, be offered for sale by public auction, and if not so sold, may be allotted by the Administrator to any applicant, at the rental fixed by the Administrator. The lessee must erect, within such time as is notified, buildings to the value specified in the conditions of sale. Leases in the town of Darwin are granted for periods up to 99 years under the Darwin Town Area Leases Ordinance 1947. Short-term leases of up to 5 years' duration are also granted in the Darwin area under the Darwin Short-term Leases Ordinance 1946.

(iv) *Miscellaneous Leases.* The Minister may grant a lease of any portion of Crown lands, or of any dedicated or reserved lands, for any prescribed or approved purpose. Such leases are for a term not exceeding 21 years, and may be offered for sale by public auction, or granted to an applicant at an annual rental fixed by the Administrator. Leases of garden lands may be granted over areas within 10 miles of a town, provided the Administrator has declared the area as garden lands.

(v) *Grazing Licences.* Licences may be granted to graze stock on Crown lands for such period, not exceeding one year, as is prescribed, and at the rent and on the conditions specified.

(vi) *Occupation Licences.* Licences may be granted for any period not exceeding 5 years, and on specified rentals and conditions, for the purpose of drying or curing fish, or for any manufacturing or industrial purpose, or for any prescribed purpose.

(vii) *Miscellaneous Licences.* The Administrator may grant licences for miscellaneous purposes for a period not exceeding 12 months on prescribed terms and conditions.

(viii) *Leases to Aboriginals.* The Governor-General may grant to any aboriginal native, or to the descendant of any aboriginal native, a lease of Crown lands not exceeding 160 acres for any term of years upon such terms and conditions as he thinks fit.

3. Mining Leases, etc.—(i) *General.* Mining generally is governed by the Mining Ordinance 1939–1947, and special Ordinances have been promulgated by the Commonwealth respecting mining for mineral oil and coal, encouragement of mining, inspection and regulation of mining and inspection of machinery.

(ii) *Holdings under Miners' Rights.* The fee for a miner's right is 5s. for 12 months from the date of issue, and a holder thereof is entitled to occupy Crown lands for mining purposes, to construct races, to divert water, to reside on his holding, etc.

(iii) *Gold-mining Leases.* The area of a gold-mining lease must not exceed 20 acres, and the term is 21 years, renewable for a further 21 years. The rent is 2s. per acre per annum. A royalty of 3d. in the £ on the gross value of all gold and minerals won must be paid, and leases must be worked constantly by not less than 2 men for the first 12 months and thereafter by not less than 1 man for every 5 acres with a minimum of 2 men, unless exemption is obtained.

(iv) *Mineral Leases.* Mineral leases may be granted in blocks not exceeding 40 acres each. A mineral lease is issued for the same term as a gold-mining lease, with similar right of renewal. The rent is 1s. per acre per annum, and the royalty on minerals is the same as in the case of a gold-mining lease, except that payment was suspended as a war-time measure, and such temporary suspension still obtains.

(v) *Dredging Claims.* These claims may be granted for dredging for gold or minerals at a rental of 2s. per acre per annum. The maximum area of each claim must not exceed 300 acres, and 6 months after registration the holder must employ continuously on the claim not less than 3 men and fully manned machinery valued at not less than £1,000.

(vi) *Mineral Oil and Coal Licences.* A licence to search for mineral oil or coal, or for both, may be granted over an area not exceeding 1,000 square miles for a period of 5 years on payment of an annual fee of £10. At least 4 white men must be employed for not less than 6 months in each year. A holder of a mineral oil licence who discovers payable mineral oil on the land held under his licence has a preferential right to a mineral oil lease of 160 acres, together with a reward area of 640 acres thereon. A discoverer of coal in payable quantities has a preferential right to an area of 640 acres as a coal lease.

(vii) *Mineral Oil and Coal Leases.* Leases may be granted for a period of 21 years, renewable for a further 21 years, for mining for mineral oil or coal, the maximum areas being (*a*) for mineral oil, 160 acres; and (*b*) for coal, 640 acres. In the case of mineral oil and coal, the annual rent is 1s. per acre, and a royalty of 5 per cent. on the gross value of all crude oil obtained is payable; the lessee must also work the land to the satisfaction of the Minister. In the case of coal, the royalty and conditions are fixed by regulation.

(viii) *Business and Residence Areas.* A business area may be granted at the prescribed fee and authorizes the holder to occupy on a gold-field or mineral field, for the purpose of residence and carrying on his business, an area not exceeding 1 acre, provided that when the area is for residence only it shall not exceed one-quarter of an acre.

(ix) *Garden Areas.* The warden may grant market garden areas upon any gold-field or mineral field for the purpose of growing fruit or other garden produce. The conditions as to rent, etc., are as prescribed, but the area of each garden area must not exceed 5 acres.

4. Areas Occupied, Reserved, etc.—Areas occupied, reserved and unoccupied at 30th June, 1951 totalled 335,116,800 acres, 455,322 of which were alienated and 171,841,055 leased or held under licence (pastoral, 129,266,284; other tenures, 42,574,771). Reserves amounted to 45,647,537 acres and 117,172,886 acres were unoccupied and unreserved. Land revenues collected for the year amounted to £65,649.

§ 7. Commerce, Shipping and Air Services.

1. **Trade.**—No record is kept of the trade between the States and the Territory. The value in Australian currency of the direct oversea imports and exports for 1901 and for the years 1938–39 and 1946–47 to 1950–51 is shown hereunder :—

NORTHERN TERRITORY : OVERSEA IMPORTS AND EXPORTS.
(£.)

Items.	1901.	1938–39.	1946–47.	1947–48.	1948–49.	1949–50.	1950–51.
Imports	37,539	36,831	89,204	277,779	267,108	766,564	639,666
Exports	29,191	12,729	17,098	73,239	21,943	11,042	9,053

2. **Shipping.**—The Territory is dependent for its shipping facilities on a quarterly visit by a ship of the Australian Shipping Board from the Eastern States and a monthly service from Western Australia by ships of the Western Australian State Shipping Service. Pearling vessels and other small craft also use the port. The following table shows the number of entrances and clearances and aggregate net tonnages of oversea and interstate vessels for the port of Darwin during the years 1938–39 and 1946–47 to 1950–51 :—

NORTHERN TERRITORY : SHIPPING.

Year.	Entrances.		Clearances.	
	Number.	Net Tons.	Number.	Net Tons.
1938–39	161	181,961	172	179,422
1946–47	23	50,890	23	48,136
1947–48	31	51,552	33	56,062
1948–49	24	42,025	23	39,817
1949–50	39	60,316	41	66,001
1950–51	33	57,685	28	46,807

3. **Air Services.**—Darwin is the first port of arrival in Australia for virtually all aircraft from Europe and Asia. Qantas Empire Airways Ltd. (under contract to the Commonwealth Government) operates, through Darwin, a Sydney–Singapore–London passenger service ; a freight service to London ; a Sydney–Hong Kong–Japan service ; and a Sydney–Manila–Japan service. British Overseas Airways Corporation operates a London–Singapore–Sydney service, and Australian National Airways, in conjunction with Air-Ceylon, operates a service to London. Both these services call at Darwin. Regular inland services calling at Darwin are Trans-Australia Airlines (Adelaide–Darwin and Brisbane–Darwin), and MacRobertson-Miller Aviation, which runs regular services between Darwin and Perth, and Darwin and Wyndham. Now established as a first-class international airport, Darwin is also visited by aircraft from many other oversea airlines, besides privately-owned machines.

§ 8. Internal Communication.

1. **Railways.**—Under the agreement made between the Commonwealth and the State of South Australia for the transfer of the Northern Territory, which was ratified by the Northern Territory Acceptance Act 1910, the Commonwealth was to construct the Northern Territory portion of the transcontinental railway line (connecting Adelaide and Darwin via Port Augusta).

The northern line from Adelaide terminates at Alice Springs, about 192 miles north of the southern boundary of the Territory. The Commonwealth Government acquired, on 1st January, 1911, the property in the line from Port Augusta to Oodnadatta (478 miles), and on 1st January, 1926 the control thereof was transferred to the Commonwealth Railways Commissioner. The line from Darwin to Katherine River, about 200 miles, has been extended as far as Birdum, 316 miles from Darwin.

The Clapp plan for the standardization of Australian railways recommended, *inter alia*, the construction of a standard gauge (4 ft. 8½ in.) strategic and developmental railway between Dajarra (Queensland) and Birdum, and the conversion to standard gauge of the Birdum–Darwin line but not the conversion of the Port Augusta–Alice Springs line nor the construction of a 4 ft. 8½ in. line between Alice Springs and Birdum. Provision for both of the last two projects, however, was included in the Railway Standardization Agreement Act 1946, involving the Commonwealth and the States of New South Wales, Victoria and South Australia. The Birdum–Dajarra project is dependent on the completion of the Queensland section of the general plan. The 1946 Agreement was not ratified by New South Wales, but the South Australia-Northern Territory projects were provided for in a subsequent separate agreement with South Australia.

2. **Roads.**—During the war, roads were built connecting Alice Springs with Darwin, and Mount Isa (Queensland) with Tennant Creek. The first of these roads, known as the North–South Road or Stuart Highway, is 954 miles long, and runs via Larrimah and Tennant Creek. The Mount Isa–Tennant Creek Road (Barkly Highway) is 403 miles long. Both were used extensively during the war, the Stuart Highway, in particular, experiencing very heavy and continuous traffic. Since the war, the Stuart Highway has been used continually as a means of transporting foodstuffs and other supplies to Darwin and northern centres, and is now the main route for overland tourists and travellers from the southern States to Darwin. The introduction of road trains for the rapid transport of fat cattle and other stock to State markets has further proved the value of both the Barkly and Stuart Highways as national assets. Both roads have good water bores and communications. As part of the post-war plan to increase beef production in the Territory a new network of roads is being constructed, survey work having been commenced in 1949.

3. **Posts, Telegraphs, Telephones and Wireless.**—Postal communication is maintained by a regular service of vessels between the Territory and the Eastern States. In addition, the vessels belonging to the Western Australian State Shipping Service give a periodic service between Fremantle and Darwin. Mail is carried between the capital cities of Australia and Darwin by the airway companies operating in each State. Inland, the northern part of the Territory receives its mail via Darwin or by means of the aerial services, and the southern districts are served via Adelaide.

The transcontinental telegraph line, covering a length of 2,230 miles, runs in a northerly direction from Adelaide to Darwin, whence telegraphic communication is provided with Asia and Europe, via Banjoewangie (Java), Singapore and Madras. Between Darwin and Banjoewangie the submarine cable is duplicated.

Long-distance telephone communication between Darwin and the other capital cities of Australia was established after the outbreak of war in the Pacific.

The majority of homesteads on pastoral leases are equipped with pedal wireless sets operated under licence from the Postmaster-General's Department. These stations are in daily communication with Flying Doctor Bases situated at Alice Springs (Northern Territory), Wyndham (Western Australia) and Cloncurry (Queensland), and are used for transmission of radio-telegrams and other communications.

§ 9. Educational Facilities.

1. **General.**—The South Australian Education Department provides teachers and the curriculum for schools in the Northern Territory, while the Commonwealth Government supplies all buildings and equipment. An officer of the South Australian Education Department is on loan to the Northern Territory Administration. This officer, designated the Assistant Supervisor of Education, Northern Territory, works in close co-operation with the Administrator.

The number of teachers in the Northern Territory at 30th June, 1951 was 39, all officers of the South Australian Education Department.

When the war ended, the only schools functioning in the Northern Territory were Tennant Creek, with 30 pupils, and Alice Springs, with 120. Katherine and Pine Creek re-opened in August, 1945, and the school at Darwin re-opened in May, 1946.

The number of pupils under instruction in Public Schools on 30th June, 1951 was 1,176, of whom 310 are of native extraction and 64 of Asiatic origin.

Of marked significance is the fact that 51 per cent. of school population in Darwin and 49 per cent. in Alice Springs are below the age of nine years. This, together with the fact that the number of pre-school children in both centres is high, indicates that attendances will continue to increase, and it is estimated that by 1954 Alice Springs will have a school population of approximately 600 and Darwin 800.

It is proposed to build a " comprehensive " school at Alice Springs to take children at the infant, primary and secondary stages. A site of 11 acres has been set aside and a further 20 acres has been reserved for agricultural education. Secondary education was established at Alice Springs in 1945, with facilities for instruction in general and commercial courses to the Intermediate standard of the University of Adelaide. The secondary block in the proposed new school will have practical rooms, including woodwork, sheet metalwork, domestic arts, science laboratories, millinery, dressmaking, library and commercial.

Alice Springs is now regarded as the educational centre for the greater part of the Northern Territory. Boarding students at Alice Springs are accommodated at hostels provided by Methodist, Church of England and Roman Catholic Church organizations. A boarding allowance (£30 primary and £40 secondary) for each child is paid by the Commonwealth Government to assist parents to keep their children at school. In addition, six exhibitions are offered annually on the results of the Intermediate examinations. These exhibitions carry a subsistence allowance of £50 a year, £5 for books and return fares between home and school once a year, and are tenable at any approved secondary school in Australia.

Plans have been completed for a new primary school at Darwin, built on tropical lines. The new school will be erected on a nine acre site in the town proper. This site has been specially allocated in the Darwin town plan. It is estimated that Darwin will have 100 secondary students by 1954 and consideration is being given to building a separate technical high school in the town. A site has been set aside in the town plan for this purpose. Because of the scattered nature of Darwin, transport is provided for school children and more than 400 children are conveyed to school every day in special buses. At Alice Springs, 100 go to school each day in buses provided.

Approximately 30 per cent. of all children attending school in the Northern Territory are part-aboriginal. Relationships with other children are normal and their scholastic progress compares favourably with that of white children. A special school for full-blood aboriginal children was begun at Bagot, near Darwin, in February, 1949. Attendance at the school averages 10 to 25.

2. **Theoretical Training of Apprentices.**—The recognition that technical school training is an extension of workshop training has led to the introduction of day-time classes which apprentices attend without loss of pay. Apprentices are directed by the Apprentices Board to undertake correspondence courses conducted by the Technical Correspondence School of the South Australian Education Department, these courses covering the work prescribed for the various trades in South Australia. Syllabuses were revised thoroughly in 1950 and passed by Trade Committees and the Apprentices Board in that State.

3. **The " School of the Air ".**—The " School of the Air " was officially opened by the former Administrator, Mr. A. R. Driver, on 8th June, 1951.

Forty-one children, including some from Queensland, listen regularly and enquiries have been made from Wilcannia, New South Wales, and it is expected that children will soon be enrolled in that area.

There are five sessions each week and the programme includes stories and songs for the younger children ; numbers, spelling and language lessons ; health talks ; appreciation of music and literature ; social studies ; and a Question and Answer Session.

§ 10. Finance.

Details of revenue and expenditure of the Territory for the year 1949–50 are shown below :—

NORTHERN TERRITORY : REVENUE AND EXPENDITURE, 1949–50.

(*a*) Includes railways operating in the Northern Territory. (*b*) Excludes electricity supply, included with "Other".

AUSTRALIAN CAPITAL TERRITORY.

1. **Introductory.**—In Official Year Books Nos. 4 and 5 information was given in Section XXXI. in regard to the events leading to the selection of the Australian Capital Territory and the necessary legislation and the progress of operations in connexion with the establishment of the capital city. The physiography of the Territory was dealt with extensively and topographical and contour maps accompanied the letterpress, as well as reproductions of the award-winning designs for the laying out of the city. On 12th March, 1913 the official ceremony to mark the initiation of operations in connexion with the establishment of the Seat of Government was carried out. At this ceremony the selection of "Canberra" as the name of the capital city was announced. The Seat of Government Acceptance Act 1909–1938 provides that the Territory shall be known as the Australian Capital Territory. (A special article contributed by Dr. F. Watson, entitled "Canberra Past and Present", appears on p. 454 of Official Year Book No. 24).

2. **Transfer of Parliament.**—On 9th May, 1927 Parliament House at Canberra was officially opened by His Royal Highness Albert, Duke of York—afterwards His Majesty King George VI.—the occasion being the 26th anniversary of the opening of the first Parliament of the Commonwealth at Melbourne by His Royal Highness George, Duke of Cornwall and York—afterwards His Majesty King George V.—on 9th May, 1901. (For particulars of the opening ceremony *see* Official Year Book No. 21, p. 604.)

3. **Administration.**—In Official Year Book No. 18 a summary is given of the development of the administration prior to the taking over of the control of the Territory by the Federal Capital Commission, and in Official Year Book No. 22 a summary is given of the administrative activities of the Federal Capital Commission.

The administration of the Territory by the Federal Capital Commission was continued until 30th April, 1930, when the Seat of Government (Administration) Act 1924–1929 was repealed, and the powers and functions of the Commission reverted to the Government.

Since April, 1932 the general control of the Territory has been exercised by the Minister for the Interior, certain specific services, however, being undertaken by the Department of Health, the Department of Works and Housing, and the Attorney-General's Department.

4. **Progress of Work.**—The general progress of the work of construction up to the time the Territory was taken over by the Commission is outlined in Official Year Book No. 18. Later progress under the Commission is described in Official Year Book No. 22.

Since the reversion of the powers and functions of the Commission to the Government in 1930, there has been great development of works in the Territory, despite the halts in activity caused by the general reduction in Governmental expenditure during the depression years, and the necessity for restricting labour and materials to purely defence purposes during the war years. A summary of the work carried out to 30th June, 1948 is given in Official Year Books Nos. 37 and 38.

During the years 1948–49 to 1950–51, the works programme has been designed to overtake further the lag in building operations caused by the war, as well as to cope with ordinary current requirements and the impetus given to Canberra's expansion by the increase in Government business generally and the gradual centralization of Departmental Head Offices in the National Capital. The programme, therefore, has had to provide for permanent and temporary housing, hostel, guest house and office accommodation, public buildings and allied engineering and electrical works and services.

To undertake this programme, the combined labour forces of the Department of Works and Housing and contractors working for the department during this time expanded from 1,900 men in 1948 to 3,200 men in 1951. Some of these men were employed building workmen's houses, both temporary and permanent structures, and erecting workmen's hostels to build up a potential labour capacity of approximately 4,000 men.

House erected during this period were :—1948–49, 285 ; 1949–50, 410 ; and 1950–51, 545. These figures include nine houses erected for the War Service Homes Division in 1949–50 and 42 erected in 1950–51. There were also 1,622 houses under construction at 30th June, 1951, in various projects. Some of the major housing projects were as follows :—

Three hundred concrete houses being erected at Turner and O'Connor ; of these, 101 had been completed, 72 were under construction and 127 had not been commenced.

One hundred timber houses at O'Connor ; 60 were under construction and 40 had not been commenced.

One hundred Econo steel houses at Narrabundah ; 41 were under construction and 59 had not been commenced.

Arrangements were progressing for the importation of 1,246 prefabricated houses from England. Contracts had already been arranged for erection of 596, of which 272 were under construction at 30th June, 1951. There were also 29 War Service Homes under construction in various localities, and 360 brick and 324 timber houses of standard types were being constructed in various suburbs.

Two groups of flats were being erected, one at Ainslie and one in the Braddon–Reid area. When completed these will provide 168 housing units of single and double bedroom flats.

Two permanent guest houses, Lawley House and Havelock House, each providing accommodation for approximately 200 persons, and two temporary units, Reid House and Narellan House, with accommodation for approximately 300 and 60 persons respectively, were completed during the period. Work was commenced also on a hostel for students attending the Forestry School at Yarralumla, which will provide accommodation for 40 students. Extensions to Acton Guest House provided additional accommodation for 30 persons, whilst two new wings, almost completed, to Hotel Acton, are designed to increase the capacity of this hotel by 50.

Hostel accommodation provided for workmen during the period by the Department of Works and Housing comprised the erection of hostels at Turner, Ainslie, Capital Hill and Fairbairn, together providing accommodation for 1,500 workmen. At the end of the period, a second hostel was under construction at Capital Hill, and this, together with extensions being made to other hostels, will accommodate a further 650 men. The hostel at Fairbairn has now been allocated to the Royal Australian Air Force for use under the National Service Training Scheme.

Other architectural works completed in the three years include the erection of a Post Office at Kingston, additions to the Bureau of Census and Statistics building at West Block, and erection of three temporary office units of wood and fibro at Barton. These three office units provide 98,000 square feet of office space and accommodate four departments employing approximately 830 persons.

As a result of the increased numbers of members of Parliament, extensive alterations and additions were made to Parliament House. Concurrently with this work, the air conditioning plant was remodelled and reinforcement of the sound reproduction system was carried out. Extensions were made to the Council for Scientific and Industrial Research Organization buildings at Black Mountain, and work commenced on a central administrative building for this authority. Further progress was made on the permanent administrative building at Parkes, and at 30th June, 1951 it was estimated that 17 per cent. of the work had been completed, including completion of the basement floor and most of the lower ground floor, and commencement of the ground floor. Work commenced on the erection of buildings for the Australian National University. University House, a large three-story building incorporating flats for the accommodation of staff, dining rooms, kitchen, refectory, secretarial quarters and sports rooms, was under construction, together with five cottages for senior professors. The Physical Sciences Building for nuclear science research, including the accelerator wing in which the cyclotron will be housed, had also been commenced. Alterations and additions to Ainslie Public School were commenced in March, 1950, and temporary fibro and wood classrooms were erected at Telopea Park and Ainslie Public Schools in December, 1950.

The major water supply project during this period was to increase the height of the Cotter Reservoir from 60 feet to 86 feet at the spillway, while wingwalls reaching 99 feet above the original stream bed were built at either end of the spillway. These extensions increased the dam's capacity from 350 million gallons to 880 million gallons, sufficient for a population of 35,000, and provided for a further extension to 1,100 million gallons capacity at a future date by installing flash boards on the spillway. Engineering and electrical works undertaken included provision of essential services to new houses and other buildings being erected in various suburbs; extensions to high and low tension electricity supply mains; construction of roads and footpaths; reconstruction of Lennox Crossing bridge; provision of services such as water supply, sewerage and drainage; runway construction and obstruction lighting improvements at Fairbairn Aerodrome; and the extension of electricity supply lines to rural areas.

5. **Forestry.**—A considerable amount of reafforestation work has been undertaken and plantations have been established at Uriarra, Mount Stromlo, Pierce's Creek, Green Hills and Kowen. Experimental plots have also been established in the Brindabella mountains.

The total area of plantations to 31st December, 1950 was 15,750 acres. Forestry operations were begun on Mount Stromlo in 1915, and up to 1925 approximately 700 acres had been planted with pine and other trees. The plantings up to this time were chiefly on aesthetic lines, but since the initiation of a wider programme, arrangements have been made for pruning and thinning, and sawmill timber is now being obtained from the logs resulting from thinning operations and clear felling of mature plantations. The yearly output of sawmill logs is gradually improving and has increased from 30,000 super. feet in 1930–31 to 10,000,000 super. feet in 1950.

In 1926 a comprehensive review was undertaken of the Territory's potentialities in regard to forest development. A system of forestry management was instituted in the existing forest areas, and a considerable amount of survey and assessment work has been completed. *Pinus radiata* has been most extensively planted, and also, as a result of experimental work, pinus areas of better quality pines on a longer rotation, such as *Pinus ponderosa* and *laricio*, have been planted during recent years, but *Pinus radiata* remains the principal species.

6. **Lands.**—(i) *General.* Reference has been made in previous issues of the Official Year Book to the general conditions of land tenure in the Australian Capital Territory and to the area of alienated and leased land.

As considerable portions of the Territory lands are not required in connexion with the establishment of the city, large areas have been leased under special improvement conditions in regard to the extermination of noxious weeds and the destruction of rabbits and other pests. The lands are classified into three grades of agricultural and three grades of grazing land. Leases may be granted for grazing, fruitgrowing, horticulture, agriculture, residential, business, or other purposes for a period not exceeding 25 years. The annual rental is 4 per cent. of the assessed value of the land, including improvements which are the property of the Crown, plus the amount of rates payable. No person may hold under lease land of a greater value than £10,000, exclusive of the value of buildings and fences thereon. About 317,869 acres comprising 472 leases and 24 grazing licences were held under lease and licence at 31st December, 1950, for periods varying from quarterly tenure to 25 years.

Under the Seat of Government (Administration) Act 1910, Crown lands in the Territory may not be sold or disposed of for any estate in freehold except in pursuance of some contract entered into before the commencement of that Act. Leases of land in the City Area are granted under the City Area Leases Ordinance 1936–1951, and leases of other lands under the Leases Ordinance 1918–1937. Land is also leased for various purposes in the City Area under the Church Lands Leases Ordinance 1924–1932, and the Leases (Special Purposes) Ordinance 1925–1943.

(ii) *City Leases.* The Government may grant leases in the city area of any Crown land for business or residential purposes. Such leases may be issued for a period not exceeding 99 years at a rental equal to 5 per cent. of the unimproved value of the land, which value is subject to re-appraisement at the expiration of 20 years, and thereafter every 20 years. A suitable building must be commenced within 6 months and completed within 12 months unless an extension of time is allowed.

Auction sales of city leaseholds are described in Official Year Book No. 22, p. 599.

Eight leases under the Church Lands Leases Ordinance 1924–1932, which require the lessees to submit a definite building programme within a specified period, and one lease under the Church of England Lands Ordinance 1926 have been granted for church purposes. A further nine leases under the Leases (Special Purposes) Ordinance 1925–1943, one lease under the City Area Leases Ordinance 1936–1947, and three leases under the Leases Ordinance 1918–1937 have been granted for church and scholastic purposes.

The total number of leases granted under the City Area Leases Ordinance, excluding surrendered leases, at the end of the year 1950 was 1,021 representing a capital value of £367,007. During the year 167 new leases were granted. The number of business and residential blocks surrendered to or determined by the Commonwealth to the end of the year was 389.

Under the terms of the City Area Leases Ordinance 1936–1951 each block is leased for a period of 99 years at a rental of 5 per cent. per annum of the unimproved capital value as assessed by the Commonwealth. At present such rentals are subject to a 20 per cent. rebate.

(iii) *In the Jervis Bay Territory.* The Commonwealth acquired from the State of New South Wales sovereign rights over the area comprising about 28 square miles of land and water at Jervis Bay for possible use as a port in connexion with the Australian Capital. The Royal Australian Naval College was established in this area on a site known as Captain's Point, but was removed in 1930 to Flinders Naval Base, Victoria. Leases have been granted over an area of 13,035 acres in the Jervis Bay Territory.

7. **Railways, etc.**—Canberra is connected with the railway system of New South Wales at Queanbeyan by a line 4¾ miles long. This line was opened for goods traffic on 25th May, 1914, and for passenger traffic on 15th October, 1923. The railway terminus is situated in the area known as Kingston.

A direct passenger service is in operation connecting Canberra with Sydney and Melbourne, and trains leave both cities for Canberra daily.

There are two companies operating air services each several times daily on the Melbourne–Canberra–Sydney route.

Regular motor-coach services link Canberra with New South Wales, Victoria and South Australia.

8. **Population.**—The census return of population on 30th June, 1938, was 11,290 in the Australian Capital Territory and 272 in the Jervis Bay Territory, or a total of 11,562 persons. The population at the Census of 30th June, 1947, was 16,905 persons—15,156 in the city area, 1,389 in the rural districts and 360 in the Jervis Bay area. A census was taken of the city area on 14th–16th September, 1951, the population then being 23,617 persons. At that time the estimated population of the Australian Capital Territory was 25,400 persons.

9. **Production.**—During 1949–50 the production of the more important items of the agricultural and pastoral industry was—Wheat, 91,641 bushels; wool, 2,123,000 lb.; butter, 6 tons; meat (bone-in weight, fresh), 2,451 tons. The numbers of live stock depastured at 31st March, 1951, were—Horses, 910; cattle, 11,477; sheep, 256,200; and pigs, 642.

10. **Educational Facilities.**—Arrangements exist with the New South Wales Education Department for the administration of education up to and including the secondary stage in the Territory, the expenditure involved being refunded annually to the State. There are seven schools in the Australian Capital Territory and two in the Jervis Bay Territory. The largest school is situated at Telopea Park, Barton, with accommodation for 1,200 scholars. Secondary education is provided at the Canberra High School, Acton, and the Telopea Park Central School has a secondary department. The High School has accommodation for 550 scholars, and its curriculum provides a standard of education comparable in range of subjects with that provided at the Government High Schools in New South Wales. The School also provides for commercial and junior technical classes, and there is an Evening Youth College attached, with commercial, matriculation and other classes.

The Canberra Technical College at Kingston is provided with modern equipment for supplementary courses for apprentices, journeymen desirous of improving their trade qualifications, and for others who desire to take any special courses. Provision is also made for the training of ex-service personnel under the Commonwealth Reconstruction Training Scheme.

The Canberra Nursery School, Acton, established in 1944, provides for the training of children between the ages of 3 and 5 years.

Eight neighbourhood pre-school centres provide modified nursery school facilities for children between the ages of 3 and 5 years. Additional centres of this type are to be established in other areas.

There are at present four private schools in the Territory. The Canberra Grammar School, the Canberra Church of England Girls' Grammar School, and St. Christopher's Convent School provide for sub-primary, primary and secondary education, and St. Patrick's School provides sub-primary and primary education.

Reference to the establishment of the Canberra University College will be found in Chapter VI.—Education.

An area of approximately 250 acres has been set aside at Acton—at the foot of Black Mountain—within easy distance of the City, for an Australian National University. Provision is made for the establishment of such research schools as may be deemed desirable, including a School of Medical Research, and Research Schools of Physical Sciences, Social Sciences and Pacific Studies. Further reference to this University appears in § 6 of Chapter VI.—Education.

11. **Finance.**—(i) *Year* 1949–50. Details of revenue and expenditure for the year 1949–50 are given in the following table :—

(*a*) Includes Commonwealth Railways operating in the Australian Capital Territory.

(iii) *From* 1901–2 *to* 30*th June*, 1950. The total receipts and expenditure from 1901–2 to 30th June, 1950. were as follows :—

AUSTRALIAN CAPITAL TERRITORY : RECEIPTS AND EXPENDITURE TO 30th JUNE, 1950.

Receipts.	£	Expenditure.	£
Commonwealth Treasury—		Lands	918,831
Parliamentary Appropriations—		Engineering works	7,138,810
Revenue	16,948,005	Architectural works	8,568,483
Loan	5,741,514	Other capital expenditure, sundry debtors, etc.	1,731,157
			18,357,281
		Seat of Government Establishment Account, being maintenance and administration less revenue; expenditure of a capital nature for which assets no longer exist; profit and loss accounts of trading activities, etc.	(*a*) 4,332,238
Total Receipts	22,689,519	Net Expenditure	22,689,519

(*a*) Excludes interest £5,325,889 net.

The foregoing table was prepared by the Department of the Interior and excludes part cost of national buildings (Parliament House, the secretariats, etc.), federal highways within the Territory, the Queanbeyan-Canberra Railway, the housing loan etc., and loans for housing—£2,207,000.

NORFOLK ISLAND.

1. **Area, Location, etc.**—Norfolk Island, discovered by Captain Cook in 1774, is situated in latitude 29° 3′ 45″ South, longitude 167° 56′ 29″ East. Its total area is 8,528 acres, the island being about 5 miles long and 3 miles wide. From Sydney it is distant 930 miles, and from Auckland, 630 miles. The length of the coast line is 20 miles, and its form that of an irregular ellipse. Except for a portion on the south side, inaccessible cliffs rise from the water's edge. The climate is equable, the temperature ranging between 49° and 85° F. with a mean of 68° F. The average annual rainfall is 52 inches. It has been said that the salubrious climate, coupled with the beauty of its landscapes and seascapes, should render Norfolk Island " the Madeira of the Pacific ". Before the war

the island was visited annually by a number of tourists. With the inauguration of direct air services from Australia and New Zealand, this traffic is again rapidly increasing.

2. **Settlement.**—The first colonization, in 1788, was by Lieutenant King, who in H.M.S. *Supply* established a small penal station as a branch settlement of that at Port Jackson. The settlement was abandoned in 1813, and for 13 years thereafter its chief use was as a whaling station and place of call for British warships.

From 1826 to 1855 it was again made a penal station. In 1844 it was annexed to Van Diemen's Land (Tasmania).

The descendants of the *Bounty* mutineers, having become too numerous to subsist on Pitcairn Island, were removed thence to Norfolk Island in 1856. The new community numbering 94 males and 100 females were the descendants of British sailors and Tahitian women. The last of those transferred died at Norfolk Island on 1st March, 1943.

3. **Administration.**—In 1856 the island was created a distinct and separate settlement under the jurisdiction of New South Wales. In 1896 it was made a dependency under the Governor of that Colony, and finally by the passage of the Norfolk Island Act 1913 it was accepted by the Federal Parliament as a territory of Australia. From July, 1914 until 1st January, 1929, Norfolk Island was administered by the Department of Home and Territories, and then, until 25th June, 1941, by the Territories Branch of the Prime Minister's Department, but is now administered by the Department of Territories through an Administrator. An amending measure, the Norfolk Island Act 1935, provided for the establishment of an Advisory Council of eight elected members to advise the Administrator.

4. **Population.**—The population as disclosed by the Census of 30th June, 1947, was 938, consisting of 505 males and 433 females. During 1949–50, 22 births, 15 deaths and 12 marriages were recorded. The average age of the persons who died was 59 years. Departures from the island exceeded arrivals by 15, the respective figures being arrivals, 1,355, departures, 1,370. The population at 30th June, 1950 was 1,140.

5. **Live-stock.**—The latest returns of live-stock show that at 30th September, 1946, there were on the island 1,464 cattle, 527 horses, 327 sheep and 25 pigs. In addition, there were 5,369 head of poultry.

6. **Production, Trade, etc.**—The soil throughout is good and is specially suitable for the cultivation of bananas, citrus and other fruits. The Hawkesbury Wonder bean seed is one of the staple crops of the island. Since the promulgation of the Ordinance regulating the export of seed the area planted with bean seed has increased. Of the 1949–50 crop, 2,145 bushels were exported, the average price realized being approximately £3 15s. per bushel for uncertified seed, and £4 10s. per bushel for certified seed.

Apart from the bean, agriculture generally has been depressed. A modern pulping factory was erected on the island during 1938, but whilst 82 tons of passion fruit pulp were produced during 1939–40, no pulp was produced during 1949–50. During this year, passion fruit seed to the value of £139 was exported. The pulping of cherry guavas for jelly has also been experimented with and investigations carried out with a view to cultivating flax and ramie.

The citrus trees in full bearing on the island are capable of producing over 3,000 cases of fruit, but owing to a lack of marketing facilities, production has been retarded. Lemon and orange juice, have, however, sold readily, the combined value of these two items of export during 1946–47 amounting to £460. There were no exports during 1949–50 as barrels were not available. Lemon seed exported during the year 1949–50 was valued at £137.

Large numbers of whales pass the island throughout the season. However, whaling had not been conducted for a number of years until 1948, when the industry was revived by the formation of a whaling company. The preserved fish industry which was established some years ago has met with a number of setbacks but several consignments of frozen fish valued at £220 were exported to Australia during 1947-48.

On 30th June, 1950, the total area of land held under freehold and Crown leasehold amounted to 6,330 acres, consisting of 4,140 acres freehold and 2,190 leasehold.

Imports and exports for the six years 1938–39 and 1945–46 to 1949–50 are shown hereunder; the values are expressed in Australian currency :—

No duties are chargeable on goods imported into Australia from Norfolk Island if the goods are (*a*) the produce or manufacture of Norfolk Island; (*b*) shipped direct to Australia; and (*c*) not goods which if manufactured or produced in Australia would be subject to excise duty.

7. **Communication.**—The "all-red" cable from Great Britain via Vancouver, Fanning Island and Fiji bifurcates at Norfolk Island, one line connecting with New Zealand, the other with Brisbane.

A shipping service to the Territory is maintained at approximately three-monthly intervals by vessels of Burns Philp & Co. Ltd., Sydney. The journey from Sydney to Norfolk Island occupies about four days.

The construction of an aerodrome on the island was completed during 1943. A fortnightly passenger and air freight service between Sydney and Norfolk Island is maintained by Qantas Empire Airways Ltd., and regular air services are also in operation from New Zealand and Fiji.

Until 10th June, 1947 the post office at Norfolk Island was part of the Commonwealth postal system, but as from that date Norfolk Island was established as a separate postal administration with its own issue of stamps.

8. **Social Condition.**—Education is free and compulsory up to the age of fifteen years. The school conforms to the Australian standard of public education, ranging from kindergarten to the intermediate certificate, with a two years' super-primary course of instruction in cultural subjects and in woodwork, needlework, leatherwork, basketry and hat-making. The headmaster and assistant teachers are lent by the New South Wales Education Department, but they are paid by the Norfolk Island Administration. The number of scholars enrolled at 30th June, 1950 was 193. During 1949–50, a dental examination of school children was carried out and free dental service provided.

The Court of Norfolk Island, presided over by a Chief Magistrate, is a court of record with dual jurisdiction. Sitting in its Limited Jurisdiction the Court has power to hear and determine actions of claims not exceeding £30 and to punish summarily all crimes and offences involving a pecuniary penalty or a sentence of imprisonment not exceeding six months. In its Full Jurisdiction the Court can hear and determine all actions, punish all crimes and offences, grant probate and letters of administration, hear and determine appeals from any conviction of the Court sitting in its Limited Jurisdiction, and has authority in all other matters. An appeal lies to the High Court of Australia from any judgment, order, decree or sentence of the Court sitting in its Full Jurisdiction.

9. **Finance.**—Details of revenue and expenditure for the years 1938–39 and 1945–46 to 1949–50 are shown in the following table :—

PAPUA AND NEW GUINEA.

Administration.

Following the outbreak of the Pacific War civil administration in Papua and New Guinea was suspended on 11th February, 1942, and military control commenced. The Territory of New Guinea came under Japanese occupation in 1942, but the greater part had already been recaptured by Australian and Allied Forces when the Japanese surrendered in August, 1945. During the period of military control matters relating to the former civil administration were dealt with by the Department of External Territories, Canberra. The Minister for External Territories was empowered by National Security Regulations to exercise the powers and functions of the Administrator, officers, and authorities of the territories, and jurisdiction of the Supreme Courts of Papua and New Guinea was vested in the Supreme Court of the Australian Capital Territory.

Pursuant to the provisions of the Papua-New Guinea Provisional Administration Act 1945, a single Provisional Administration Service was formed to take over from the military authorities in the Territories of Papua and New Guinea. Colonel J. K. Murray was appointed Administrator of the combined Territories on 11th October, 1945, and the transfer from military to civil control in Papua and the portion of the Territory of New Guinea south of the Markham River was effected on 30th October, 1945. Jurisdiction of the Supreme Courts of Papua and New Guinea was then vested in the Supreme Court of the Territory of Papua-New Guinea. As circumstances permitted, civil control was extended to other areas until the whole of the Territory of New Guinea came under control of the Provisional Administration of Papua-New Guinea on 24th June, 1946.

The Papua-New Guinea Provisional Administration Act 1945–1946 was repealed by the Papua and New Guinea Act 1949 which came into force on 1st July, 1949. The latter Act approved the placing of the Territory of New Guinea under the International Trusteeship system and provides for an Administrative Union, one Administrator, one Supreme Court and one Public Service.

Provision is made for an Executive Council of not less than nine officers of the Territory, who shall be appointed by the Governor-General, and a Legislative Council consisting of twenty-nine members, namely :—(*a*) the Administrator ; (*b*) sixteen officers of the Territory (who shall be known as official members) ; (*c*) three non-official members possessing such qualifications as are provided by Ordinance and elected, as provided by Ordinance, by electors of the Territory ; (*d*) three non-official members representing the interests of the Christian missions in the Territory ; (*e*) three non-official native members; and (*f*) three other non-official members.

The Legislative Council shall commence to perform its powers and functions under the Act on a date to be fixed by Proclamation.

Subject to the Act, provision may be made by Ordinance for the establishment of Advisory Councils for Native Matters and Native Village Councils.

The Act also makes provision for the continuance of the existing laws of the Territory of Papua and the Territory of New Guinea.

PAPUA.

§ 1. General Description.

1. **Early Administration.**—Particulars of the early administration of Papua are given in Official Year Book No. 19, p. 576.

2. **Administration by Commonwealth of Australia.**—The Territory was placed under the authority of the Commonwealth on 1st September, 1906, by proclamation issued in pursuance of Letters Patent of 18th March, 1902, and was accepted by the Commonwealth by the Papua Act 1905, which came into force by virtue of the aforesaid proclamation. The transfer was made under the authority of Section 122 of the Constitution. The Territory is now under the control of the Commonwealth, but not included within it, and is divided into seven magisterial divisions, viz. :—Central Highlands, Western, Delta, Gulf, Central, Milne Bay and Northern.

3. **Area, etc.**—Papua lies wholly within the tropics. The northernmost point touches 5° S. latitude; its southernmost portion, comprising Sudest and Rossel Islands, lies between 11° S. and 12° S. latitude. It is separated from Australia by Torres Strait. The length of Papua from east to west is upwards of 920 miles; towards either end the breadth from north to south is about 200 miles, but about the centre it is considerably narrower. The Territory comprises also the islands of the Trobriand, Woodlark, D'Entrecasteaux and Louisiade groups. The length of coast-line is estimated at 3,664 miles—1,728 on the mainland, and 1,936 on the islands. The total area is about 90,540 square miles, of which 87,786 are on the mainland, and 2,754 on the islands. A reference to the physical characteristics of the Territory appears in previous issues of the Official Year Book (*see* No. 18, p. 633).

§ 2. Population.

1. **Non-indigenous Population.**—(i) *General.* The number of the non-indigenous population enumerated at the Census of 30th June, 1947, was 3,239, of whom 2,057 were males and 1,182 females. There were 2,736 full-bloods, of whom 2,542 were Europeans and 194 non-Europeans; half-castes with one of the parents a European numbered 503.

The table following shows the non-indigenous population enumerated at the last three censuses and as estimated at 30th June, 1950:—

TERRITORY OF PAPUA: NON-INDIGENOUS POPULATION.

Race.	4th April, 1921.	30th June, 1933.	30th June, 1947.	30th June, 1950.
Full-blood—				
European	1,343	1,148	2,542	4,380
Non-European—				
Filipino	91	88	21	(b)
Malay	63	158	24	
Polynesian	372	488	96	
Other	51	52	53	
Total	577	786	194	
Half-caste (*a*)	158	227	503	
Not Stated	..	12	..	
Grand Total	2,078	2,173	3,239	

(*a*) Persons who have European blood to the extent of one-half. (*b*) Not available.

An Immigration Restriction Ordinance prohibits the immigration of persons who fail to pass the dictation test, or who are of bad character, or likely to become a charge upon the public. Exemptions may, however, be granted by the Administrator to persons of special skill required for employment as overseers or foremen.

(ii) *European Population.* The European population of Papua at the Census of 30th June, 1947, was 2,542, made up of 1,700 males and 842 females. The numbers recorded in earlier years were:—1937, 1,323; 1938, 1,488; 1939, 1,608; 1940, 1,822; and 1941, 3,070. At 30th June, 1950, the European population was estimated at 4,380.

(iii) *Non-European Population.* The non-European section of the non-indigenous population at 30th June, 1947 was 697 of whom 194 were full-bloods and 503 were half-castes with one of the parents a European.

2. **Native Population.**—It is not possible to give exact data regarding the number of natives, because part of the interior has not as yet been under complete Government control. A census of areas under Government control is at present being conducted, and the number of natives enumerated by 30th June, 1950 and the estimated number of uncounted natives are shown in the following table.

TERRITORY OF PAPUA : ENUMERATED AND ESTIMATED NATIVE POPULATION AS AT 30th JUNE, 1950.

Division.	Enumerated.(*a*)			Estimated.	Grand Total.
	Males.	Females.	Persons.		
Central Highlands ..	1,423	1,155	2,578	80,000	82,578
Western	9,076	7,753	16,829	9,000	25,829
Delta	7,349	6,555	13,904	8,900	22,804
Gulf	11,451	10,408	21,859	(*b*) 5,500	27,359
Central	28,680	25,300	53,980	27,530	81,510
Milne Bay	38,448	34,339	72,787	13,700	86,487
Northern	21,028	18,964	39,992	2,000	41,992
Total	117,455	104,474	221,929	146,630	368,559

(*a*) These figures are based on the results of the census up to 30th June, 1950. The census was then still proceeding. (*b*) No estimate given for grassland Kukukuku country.

§ 3. Native Labour, Taxation, Health, etc.

1. **Native Labour.**—The laws relating to the employment of natives are uniform in Papua and New Guinea and are contained in the Native Labour Ordinance 1950 of the Territory of Papua and New Guinea.

The Ordinance provides for the engagement of natives under a permit issued by a District Officer authorizing the permittee to engage natives for employment on his own behalf or with the written authority of a registered employer on his behalf. Provision is also made for the the issue to natives of Native Assistant's permits authorizing the permittee to engage employees on behalf of the employer endorsed on the permit. Such permits are limited to the district specified in the permit.

Natives are employed under written agreements which are sanctioned and attested by an authorized officer for any period not exceeding eighteen months and may be extended by the parties thereto for a further period of six months but not beyond that period. Employment during the period of extension may be terminated by either party by one month's notice to the other. An agreement commences to run as from the time it is attested. Civil remedies only apply to breaches of agreements. Employers must repatriate workers on the termination of their contracts.

Natives under sixteen years of age may not be employed and a minimum monthly wage of fifteen shillings and a working week of 44 hours are prescribed. An employer must supply his labourers with housing, medical attention, food and clothing free of charge. Provision also exists for compensation for injury or death arising out of employment.

2. **Native Taxes.**—Under the Native Taxes Ordinance 1917–1936, a tax not exceeding £1 per annum may be imposed on natives, except native constables, mission teachers and mission students, natives unfit for work, and those who have four living children. The proceeds of the tax must be expended on native education, or devoted to purposes directly benefiting the natives, but no taxes have been collected since 1941.

3. **Health.**—At 30th June, 1950, there were three European hospitals (one privately controlled), 32 native hospitals (one private and 14 mission), 144 aid-posts (65 mission), 39 welfare clinics (35 mission) and two leprosaria functioning in the Territory. Hospitals are also conducted by some of the plantation companies. The mission societies employ a number of doctors and trained nurses. European medical assistants are employed by the Government. A training school has been established for the purpose of training natives in first-aid, elementary physics, chemistry, anatomy, physiology and pathology in preparation for their employment as native medical assistants. Native students also attend the Native Medical Practitioners' School at Fiji. The chief complaints treated are malaria, yaws, ulcers, lung affections, hookworm, venereal and skin diseases.

§ 4. Land Tenure.

1. **Ownership of Land.**—The basic principle of the land laws of Papua is that all land not specifically alienated by due process from the natives is native land. On 30th June, 1950, of the total estimated area of Papua, approximately 58,000,000 acres, only 1,828,684 acres had been alienated. The following table shows the distribution of all land in Papua according to tenure.

TERRITORY OF PAPUA : LAND TENURE, 30th JUNE, 1950.

Tenure.	Area.
Alienated—	Acres.
Held by private non-indigenous inhabitants—	
Freehold	24,285
Leasehold	222,680
Held by indigenous inhabitant under leasehold	607
Held by Administration	1,520,205
Native Reserves(a)	60,907
Total	1,828,684
Held by Natives	56,171,316
Total Area of Papua	58,000,000

(a) Vested in Director of District Services and Native Affairs as Trustee for Natives.

2. **Types of Tenure Possible.**—Although, as the figures above show, a small amount of freehold land exists in Papua, no further estates in fee-simple or other estate in freehold can be granted under the provisions of the Land Ordinance 1911–1947 of Papua. Leases of various kinds may be granted by the Administration. The principal types of lease available are agricultural leases, pastoral leases, leases of town allotments, business leases and residence leases of other than town allotments, and various forms of special leases and licences over land. Leasehold terms are liberal and, in general, leases may be granted

for periods of up to 99 years. Rent is based on the unimproved value of the land. For agricultural leases the rental rate per annum is 5 per cent. of the unimproved value and for pastoral leases the rate is 2½ per cent. Concessions regarding freedom from, or reduced, rents apply during the early developmental periods of agricultural and pastoral leases. All leases are subject to improvement conditions which may be varied or relaxed under certain circumstances. The following table shows particulars of leases in force in Papua on 30th June, 1950.

TERRITORY OF PAPUA : LEASES IN FORCE, 30th JUNE, 1950.

Class of Lease.	No. of Leases.	Area.
		Acres.
Agricultural	581	202,738
Pastoral	24	18,870
Residence	137	163
Special	105	588
Mission	280	717
Business	57	108
Town Allotment	292	103
Total	1,476	223,287

3. **Methods of Obtaining Land.**—Leases of Crown land may be obtained from the Administration. Dealings in privately-owned land are a matter for private treaty. Native-owned land, however, cannot be acquired or leased from the native owners by private individuals. If a lease of land which is native-owned is desired, application must be made to the Administration. If satisfied that the land over which the lease is applied for is not required or likely to be required by the native owners, and if otherwise satisfied that the lease should be granted, the Administration itself purchases the land and grants an appropriate form of lease to the applicant.

4. **Registration of Land.**—The registration of titles, interests and dealings in land is provided for under the Real Property Ordinance 1913–1939 modelled on the Torrens system of land registration.

§ 5. Production.

1. **General.**—The products of the Territory are obtained from its agricultural, fishing and mining industries. The only manufacturing industry of importance is that of desiccated coco-nut. Native subsistence agriculture, fishing and hunting produce most of the food requirements of the native population. The main native agricultural products are taro, yams, sweet potatoes, bananas and paw paw. Non-indigenous enterprise produces most of the commodities exported. Natives, however, do produce copra for export and native enterprise in other fields of agricultural production for export purposes is being encouraged. The principal agricultural products of Papua for the export trade are copra and rubber. Most of the timber milled during 1949–50 was absorbed by local building requirements ; exports of timber were only about one per cent. of total production. The main products of fisheries exported from Papua are trochus and green snail shell. Gold is the principal mineral mined.

2. **Agriculture.**—(i) *Soil and Rainfall.* Rich soil at varying elevations and heavy and evenly distributed rainfall favour the cultivation of a wide variety of tropical products. There are large areas of rich alluvial and volcanic soils along the coast and fertile land is

found at elevations up to 6,000 feet. Experiments in rice growing are being carried out in the Mekeo district west of Port Moresby. The aim of these experiments is to promote rice production to a level in both Papua and New Guinea which could supply local requirements of this commodity, which is an important item of diet for the natives, particularly native labourers.

(ii) *Plantations.* Agricultural settlement has been mostly in the Central and Eastern Divisions, with coco-nuts and rubber as the principal crops. The Territory, however, is capable of growing a number of other crops, including jute and jute substitutes, manila hemp, sisal, cocoa, tea, coffee, rice, pepper, tobacco, peanuts, kapok, cassava, ginger, cinchona, nutmeg, vanilla, tropical fruits and vegetables, sago and tung oil. Development of these crops is being encouraged. Some plantings of cocoa have taken place in Papua since the 1939–45 War but these are not yet in bearing. Pre-war coffee plantations, which were not extensive, have been rejuvenated and high quality coffee beans have been produced. There has been little new planting of coffee.

(iii) *Government Plantations.* There are five Government plantations, the Orangerie Bay and Kikori coco-nut plantations and the Gobaregere, Cupola and Kokoda rubber plantations.

(iv) *United Kingdom Copra Contract.* A contract with the United Kingdom, which commenced on 1st March, 1949, for a period of nine years was entered into with a view to stabilizing the copra industry of Papua and New Guinea. The price of copra sold to the United Kingdom under the contract for the first contract year, 1949, was Stg. £48 per ton f.o.b. Territory ports, and it was provided that the price for each subsequent year would not be more than 10 per cent. higher or lower than the preceding years and would be negotiated before the end of the preceding year. The price for the third contract year (1st March, 1951–29th February, 1952) is Stg. £53 15s. per ton f.o.b. Territory ports.

3. **Forestry.**—The principal softwood timber is known as "ilimo," while among satisfactory timbers of the lowlands are "nara," "medobi," and "melila." There are large numbers of woods, varying from the softest to the hardest, including beautiful cabinet woods, but research is necessary to determine their usefulness. The development of a coniferous belt at the higher altitudes offers great possibilities. It is believed that teak and sandalwood are well suited for cultivation.

4. **Live-stock.**—At 31st December, 1940, the live-stock in the Territory consisted of 587 horses, 5,994 head of cattle, 87 mules, 1,244 goats, 665 pigs, 30 sheep and 6,320 fowls. The introduction of rabbits, foxes, hares and monkeys is prohibited. Post-war live-stock statistics are not available, but at 30th June, 1948, it was estimated that there were 312 horses, 2,100 head of cattle, 45 mules, 1,200 goats, 560 pigs and 4,500 fowls in the Territory. These figures exclude native-owned live-stock.

5. **Mining.**—(i) *Variety of Minerals.* Minerals have been found over a wide range of country. Those discovered so far are gold, copper, tin, lead, zinc, cinnabar, iron, osmiridium, gypsum, manganese, sulphur, graphite, chromite, lignite, platinum and petroleum.

The existence of petroleum has been traced at scattered intervals over a large area. Three companies hold permits under the provisions of the Petroleum (Prospecting and Mining) Ordinance 1938–1947 and oil prospecting has been carried on in the Western, Delta, Gulf and Central Divisions.

Of precious stones, only the topaz and beryl have been obtained. Large beds of apparently good coal also exist.

(ii) *Gold.* Gold was discovered in 1888 and the search gradually spread over every division, finds being reported wherever the explorers went. The estimated quantity in fine ounces and the value of the gold yield for the years 1940–41 and 1946–47 to 1949–50 are shown below :—

TERRITORY OF PAPUA : GOLD YIELD.(*a*)

1940–41.		1946–47.		1947–48.		1948–49.		1949–50.	
Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
Fine oz.	£	Fine oz.	£	Fine oz.	£	Fine oz.	£	Fine oz.	£
14,056	133,341	379	4,077	214	2,299	25	264	788	10,875

(*a*) Valued at average price realized for fine gold in Australia.

The total value of gold won to 30th June, 1950 was £3,286,657.

(iii) *Other Minerals.* Some good samples of galena (sulphide of lead) have been obtained, while cinnabar (sulphide of mercury), graphite (or plumbago), zinc-blende, native sulphur, and other minerals are known to exist. In 1924 a deposit of lignite was discovered on Smoky Creek, a tributary of the Era River. Copper matte to the value of £5,999 was exported during 1940–41. The principal value of this item is its gold content.

6. **Water Power.**—Most of the rivers in Papua carry a large volume of water from a great height over a relatively short distance, thereby offering opportunities for the installation of hydro-electric power plants. It is estimated that there is at least 10,000,000 h.p. available for this purpose.

§ 6. Trade and Shipping.

1. **Customs Tariff.**—As from 1st July, 1950, a new customs tariff came into force. This provides high revenue rates on ale, spirits, wines, timepieces, cigarette papers, fancy goods, jewellery and certain apparel and piece goods made of silk. Of 72 items mentioned in the import schedule, 55 are on the free list. The new tariff allows duty-free treatment of necessities, but increases rates on non-necessities. The purpose of the revision is to relieve both general industrial costs and the basic costs of living with a view to encouraging further development of the Territory. The rate of duty on items not specified in the schedule is 10 per cent. ad valorem. No preferential rates are specified in the schedule.

On 16th July, 1931, a primage duty of 4 per cent. ad valorem was imposed on all goods, whether dutiable or not, in addition to the ordinary customs dues ; the rate was subsequently reduced to 2½ per cent. and the duty ceased to operate on 1st July, 1937. From 12th July, 1940, the duty has been re-imposed, but certain specified articles have been exempted. The value of imports into Papua during 1949–50 was £4,684,028, and the duty collected, £240,547. In 1949–50 £23,234 was received in export duties.

Provision is made in the Australian Customs Tariff (Papua and New Guinea Preference) 1936 for the free entry into Australia of certain goods produced and imported direct from Papua (*see* Chapter XII.—Trade), and a proclamation of 25th September, 1935 exempted from primage duty goods produced or manufactured in the Territory.

2. **Imports and Exports.**—Tables of imports and exports during the years 1938–39 and 1946–47 to 1949–50 are shown below. The values of exports are expressed in Australian currency, but it is not possible to determine accurately the currency of the £ in the table of imports.

Pre-war, the trade of the Territory reached its maximum in 1939–40, when imports were valued at £826,412 and exports at £510,672. Since the war, the increase in value of imports has been due to a greater volume of goods and an increase in the prices of practically all commodities. The increase in exports has been due mainly to copra, the exports of which for 1949–50 exceeded those for 1948–49 by approximately 1,333 tons in quantity and £132,698 in value, and to surplus war stores exported by purchasers.

3. **Direction of Trade.**—Particulars of the countries of origin of the imports into Papua and of destination of the goods shipped therefrom are shown below for the years 1938–39, 1948–49 and 1949–50.

TERRITORY OF PAPUA : DIRECTION OF TRADE.

(£.)

Country.	Imports.			Exports.

Total ..	514,808	3,177,285	4,684,028	490,158	934,112	1,202,694

(*a*) Part of these imports may originate from Other British Countries, Europe, or Asia, excluding Japan.

4. **Shipping.**—The following table shows the number of entrances and clearances combined, and the corresponding net tonnage for overseas vessels at ports during the years 1938–39, 1940–41 and 1947–48 to 1949–50 :—

TERRITORY OF PAPUA : OVERSEA SHIPPING.

Year.	Number.	Net Tons.
1938–39	215	461,199
1940–41	217	489,469
1947–48	178	253,621
1948–49	218	398,618
1949–50	236	498,107

NOTE.—The figures above exclude ships of war and Government vessels.

Of the 1949–50 totals, British vessels constituted 216 with an aggregate net tonnage of 443,719. Total entrances in 1949–50 numbered 121 (250,052 net tons), and total clearances were 115 (248,055 net tons).

§ 7. Finance.

The revenue and expenditure of Papua for the years 1938–39, 1940–41 and 1947–48 to 1949–50 were as follows :—

TERRITORY OF PAPUA : REVENUE AND EXPENDITURE.

The table above and that on page 369 show separate particulars of the respective territories. When civil administration was resumed on 30th October, 1945, both territories were combined under one provisional administration. The Papua and New Guinea Act 1949, which came into force on 1st July, 1949, approved the placing of the Territory of New Guinea under the International Trusteeship system and provided for an Administrative Union, one Administrator, one Supreme Court and one Public Service. In order to provide a comparison with 1938–39, combined particulars are shown below for the years 1938–39 and 1945–46 to 1949–50.

TRUST TERRITORY OF NEW GUINEA.

§ 1. General Description.

The land area of the Territory of New Guinea is about 93,000 square miles and the area including the sea within the lines drawn through its extreme outer points is more than 1,000,000 square miles. As the coast of the Territory has not been completely surveyed, the areas of the various islands are known only approximately.

The approximate areas of the principal islands together with the small islands adjacent thereto are as follows :—

AREA OF TERRITORY OF NEW GUINEA.
(Sq. Miles.)

Particulars.		Approximate Area.
North-East New Guinea (also called " The Mainland ") ..		69,700
Bismarck Archipelago—		
New Britain	14,600	
New Ireland	3,340	
Lavongai	460	
Admiralty Islands	800	19,200
Solomon Islands—		
Bougainville	3,880	
Buka	220	4,100
Total		93,000

Information regarding physiography and climate will be found in Official Year Book No. 22, p. 613, and in the *Official Handbook of the Territory.*

§ 2. Government.

1. **The Military Occupation (1914–18 War).**—On 17th September, 1914, the Acting Governor of German New Guinea signed terms of capitulation with the officer commanding a Naval and Military Expedition sent from Australia, and thereafter the Territory was under military administration until the establishment of Civil Government on 9th May, 1921.

2. **Mandate (1920).**—In 1919 it was decided by the Principal Allied and Associated Powers that the Territory of New Guinea, which Germany gave up as one of the terms of peace, should be entrusted under Mandate from the League of Nations to the Government of the Commonwealth. The issuing of the Mandate was, however, delayed, and it was not until 17th December, 1920 that its terms were settled, and the Mandate itself did not reach Australia until April, 1921.

The terms of the Mandate are given in Official Year Book No. 33 (*see* p. 264).

3. **1939–45 War.**—For the events following the outbreak of the Pacific War and the formation of the Papua-New Guinea Provisional Administration in 1945, *see* p. 345 *ante.*

4. **Trusteeship (1946).**—The Commonwealth Government undertook to place the Territory of New Guinea under the Trusteeship System established under the Charter of the United Nations. The Trusteeship Agreement for the Territory, under which the Government of Australia is the sole administering authority, was approved by the General Assembly of the United Nations Organization on 13th December, 1946. The terms of the Agreement are as follows :—

> *Preamble* : The Territory of New Guinea has been administered in accordance with Article 22 of the Covenant of the League of Nations and in pursuance of a Mandate conferred upon His Britannic Majesty and exercised on his behalf by the Government of the Commonwealth of Australia.
>
> The Charter of the United Nations, signed at San Francisco on 26th June, 1945, provides by Article 75 for the establishment of an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements.
>
> The Government of Australia now undertakes to place the Territory of New Guinea under the trusteeship system, on the terms set forth in the present Trusteeship Agreement.

Therefore, the General Assembly of the United Nations, acting in pursuance of Article 85 of the Charter, approves the following terms of trusteeship for the Territory of New Guinea in substitution for the terms of the Mandate under which the Territory has been administered :—

Article 1. The Territory to which this trusteeship agreement applies (hereinafter called the Territory) consists of that portion of the island of New Guinea and the groups of islands administered therewith under the Mandate dated 17th December, 1920, conferred upon His Britannic Majesty and exercised by the Government of Australia.

Article 2. The Government of Australia (hereinafter called the Administering Authority) is hereby designated as the sole authority which will exercise the administration of the Territory.

Article 3. The Administering Authority undertakes to administer the Territory in accordance with the provisions of the Charter and in such a manner as to achieve in the Territory the basic objectives of the international trusteeship system, which are set forth in Article 76 of the Charter.

Article 4. The Administering Authority will be responsible for the peace, order, good government and defence of the Territory and for this purpose will have the same powers of legislation, administration and jurisdiction in and over the Territory as if it were an integral part of Australia, and will be entitled to apply to the Territory, subject to such modifications as it deems desirable, such laws of the Commonwealth of Australia as it deems appropriate to the needs and conditions of the Territory.

Article 5. It is agreed that the Administering Authority, in the exercise of its powers under Article 4, will be at liberty to bring the Territory into a customs, fiscal or administrative union or federation with other dependent territories under its jurisdiction or control, and to establish common services between the Territory and any or all of these territories, if (in its opinion) it would be in the interests of the Territory and not inconsistent with the basic objectives of the trusteeship system to do so.

Article 6. The Administering Authority further undertakes to apply in the Territory the provisions of such international agreements and such recommendations of the specialized agencies referred to in Article 57 of the Charter as are, in the opinion of the Administering Authority, suited to the needs and conditions of the Territory and conducive to the achievement of the basic objectives of the trusteeship system.

Article 7. The Administering Authority may take all measures in the Territory which it considers desirable to provide for the defence of the Territory and for the maintenance of international peace and security.

Article 8. The Administering Authority undertakes that in the discharge of its obligations under Article 3 of this agreement—

1. It will co-operate with the Trusteeship Council in the discharge of all the Council's functions under Articles 87 and 88 of the Charter.
2. It will, in accordance with its established policy—
   - (*a*) take into consideration the customs and usages of the inhabitants of New Guinea and respect the rights and safeguard the interests both present and future of the indigenous inhabitants of the Territory and, in particular, ensure that no rights over native land in favour of any person not an indigenous inhabitant of New Guinea may be created or transferred except with the consent of the competent public authority ;
   - (*b*) promote, as may be appropriate to the circumstances of the Territory, the educational and cultural advancement of the inhabitants ;
   - (*c*) assure to the inhabitants of the Territory, as may be appropriate to the particular circumstances of the Territory and its peoples, a progressively increasing share in the administrative and other services of the Territory ;

(*d*) guarantee to the inhabitants of the Territory, subject only to the requirements of public order, freedom of speech, of the press, of assembly, of petition, freedom of conscience and worship and freedom of religious teaching.

5. **Administration.**—For particulars of the administration of the Territory of New Guinea prior to the setting-up of the Papua and New Guinea Administration *see* Official Year Book No. 36 and earlier issues.

For administrative purposes the Territory is divided into the following districts :—New Britain, comprising New Britain and adjacent islands ; Morobe, Madang, Central Highlands, and Sepik on the mainland ; New Ireland, comprising New Ireland, Lavongai and adjacent islands ; Manus, comprising the Admiralty Group ; and Kieta, the former German portion of the Solomon Islands. Each district is under a District Officer, assisted by a small staff.

§ 3. Population.

1. **Non-indigenous Population.**—(i) *General.* The number of the non-indigenous population enumerated at the Census of 30th June, 1947, was 6,200, of whom 4,369 were males and 1,831 were females. There were 5,627 full-bloods, of whom 3,412 were Europeans and 2,215 non-Europeans. Half-castes with one of the parents a European numbered 573.

At the 30th June, 1950 the non-indigenous population was estimated at 8,680.

The following table shows the non-indigenous population enumerated at the last three censuses and as estimated at 30th June, 1950 :—

TERRITORY OF NEW GUINEA : NON-INDIGENOUS POPULATION.

Race.	4th April, 1921.	30th June, 1933.	30th June, 1947.	30th June, 1950.
Full-blood—				
European	1,288	3,191	3,412	(*b*)
Non-European—				
Chinese	1,424	1,449	1,769	
Other..	392	381	446	
Total	1,816	1,830	2,215	
Half-caste (*a*)	69	195	573	
Grand Total	3,173	5,216	6,200	8,680

(*a*) Persons who have European blood to the extent of one-half. (*b*) Not available.

(ii) *European Population.* The number of the European population for various years since 1885 is shown in the following table. At 30th June, 1947 the European population was 3,412, of whom 2,604 were males and 808 females.

TERRITORY OF NEW GUINEA : EUROPEAN POPULATION.

Year.	Number.	Year.	Number.
1885	64	1939	4,608
1933	3,191	1940	4,399
1937	4,286	1941	4,101
1938	4,445	1947	3,412

(iii) *Asiatic Population.* Malays seem to have been the first Asiatics brought by the Germans to German New Guinea ; 37 of them were recorded on the mainland in 1885. About 1889 the New Guinea Company began to bring Chinese, Malays and Javanese in growing numbers from Singapore and Java to work on the plantations ; in the year 1892 there were about 1,800 Asiatics on the mainland. By 1898 the number had decreased to 300 or 400, but it had risen to 1,830 at the time of the 1933 Census and at 30th June, 1941, numbered 2,228, of whom 2,199 were Chinese and 29 Japanese. The Japanese at the 1933 Census numbered 73. The Chinese are occupied mainly as skilled artisans and small traders. At the census of 30th June, 1947, non-Europeans numbered 2,215, of whom Chinese (1,769) and Filipinos (276) constituted the major proportion. At the same date half-castes with one of the parents a European numbered 573.

2. **Native Population.**—As a considerable portion of the Territory was not under Government influence at that time, the pre-war census of native population was not complete. A census of areas under Administration control is at present being conducted, and the number of natives enumerated by 30th June, 1950 and the estimated number of uncounted natives are shown in the following table :—

TERRITORY OF NEW GUINEA : ENUMERATED AND ESTIMATED NATIVE POPULATION AS AT 30th JUNE, 1950.

District.	Enumerated.(a)			Estimated.	Grand Total.
	Males.	Females.	Persons.		
Central Highlands ..	134,905	120,493	255,398	231,700	487,098
Sepik	77,018	64,329	141,347	24,000	165,347
Madang	53,876	33,855	87,731	16,000	103,731
Morobe	60,739	56,724	117,463	28,450	145,913
New Britain	41,972	37,413	79,385	900	80,285
New Ireland	18,960	15,993	34,953	..	34,953
Bougainville	22,080	19,111	41,191	..	41,191
Manus	6,389	6,198	12,587	..	12,587
Total	415,939	354,116	770,055	301,050	1,071,105

(a) These figures are based on the results of the census up to 30th June, 1950. The census was then still proceeding in most districts.

§ 4. The Natives.

1. **General.**—The natives are divided into two main groups—Melanesian and Papuan—the former, with a few exceptions, constituting the population of the Bismarck Archipelago, the Solomon Islands, and the coastal districts of the New Guinea mainland, the latter inhabiting the interior of the mainland. Odd tribes of Negritos exist in the mountains of New Guinea. There is a strain of Papuan, and, possibly, of Polynesian blood in the Admiralty Islanders, while the Western Islanders and the inhabitants of the small islands east and south-east of New Ireland are Micronesians. (*See* Official Year Book No. 16, p. 670, and *Official Handbook of the Territory*, Pt. V.)

2. **Land Tenure.**—Native customs in regard to the ownership and use of land may be briefly outlined as follows. The ownership and use of the land are generally individual, although, in some rare cases, particularly in North Bougainville, the communal system exists. In districts where a great many coco-nut palms are growing on native lands it is often found that the land is the property of a chief or of one of the old men of the tribe, and that the coco-nut palms growing thereon are divided into small groves, and are the property of several members of the tribe. Customs with regard to the use of unoccupied forest lands vary. Right of inheritance to land is almost invariably through the maternal branch. (*See* Official Year Book No. 17, p. 634, and *Official Handbook of the Territory.*)

3. **Research Work.**—During the German occupation of the Territory a certain amount of research work was carried out, partly by scientific expeditions, and partly by missionaries and by a local resident. For many years an anthropologist was engaged consolidating the work already done, and extending it throughout the Territory. The results of his work appear in special reports.

4. **Education.**—Provision for the education of natives is made in the Ordinance of 1922–1938 under which the Administrator is authorized to establish schools, grant money therefor, prescribe instruction, and arrange for the training of teachers and other matters. Natives are liable to pay education tax, but none has been collected since 1922–23. The European teachers have been recruited from Education Departments in Australia. During the year ended 30th June, 1950, 35 schools were maintained by the Administration for native children, three for part-native and Malay children, eight for European and four for Asian children. In addition, the Missions conducted different grades of schools having a total enrolment of 85,467 native students. Sixteen European and 302 Asian children also attended Mission schools. To assist the Missions in their educational work, the Administration provides professional advice and certain items of equipment and text-books. In addition to this assistance, the sum of £82,310 was distributed amongst the Missions as grants-in-aid during the year ended 30th June, 1950. Of this amount £53,930 was for reconstruction training.

5. **Health of Natives.**—The diseases taking the greatest toll of native life directly or through lowering vitality are—Malaria, respiratory diseases, dysentery, frambœsia, yaws, tropical ulcer, hookworm, filariasis and beri-beri.

The Health Department of the Administration consists of—(i) a staff of medical officers, medical assistants and orderlies; (ii) native hospitals at Government stations and sub-stations (its staff also supervises hospitals on plantations); (iii) a laboratory; (iv) a training system for natives as medical orderlies; (v) a scheme of distribution of medical necessaries; and (vi) leprosaria. It also undertakes the general oversight of sanitary conditions.

6. **Missions.**—A number of mission societies operate in the Territory.

The Society of the Sacred Heart of Jesus works in the Bismarck Archipelago, the Society of the Holy Ghost, the Franciscan Order and the Society of the Divine Word along the coast of north-east New Guinea from Sek to the Dutch border and in the Central Highlands, and the Marists in Buka and Bougainville. These are Roman Catholic Missions. The Protestant Missions are the Australian Methodist Mission in New Britain and New Ireland, the New Zealand Methodist Mission in Bougainville, the Lutheran Mission (supported and staffed by the Lutheran Churches in Australia and America) which works in Morobe, Madang, the Central Highlands, New Britain and Manus, the Melanesian Mission (Anglican) in New Britain, the Seventh Day Adventist Mission in Bougainville, New Britain, the mainland of New Guinea and Manus, the East and West Indies Bible Mission and the Baptist Mission in the Central Highlands. The South Seas Evangelical Mission (Undenominational) and the Assemblies of God Mission are also working in the Sepik area. All these societies include teaching with their missionary work.

§ 5. Land Tenure.

1. **Acquisition and Ownership of Land.**—The principles governing the acquisition and ownership of land and types of tenure available in New Guinea are in general similar to those which obtain in Papua. In New Guinea, although under the Land Ordinance 1922–1950 grants of freehold estates may be made, as a matter of policy freehold estates are no longer granted by the Administration, all grants now being restricted to leaseholds. However, in New Guinea the amount of freehold land of earlier origin held by private non-indigenous owners amounts to more than half a million acres. Freehold titles to this land, which includes a good deal of plantation land, may be transferred by purchase subject only to the general provision in New Guinea that dealings in land are subject to the approval of the Administrator.

The area of the Territory of New Guinea is estimated at 59,520,000 acres, of which, at 30th June, 1950, 1.53 per cent. was alienated. The following tables show the distribution according to tenure and particulars regarding leases in force in New Guinea on 30th June, 1950.

TERRITORY OF NEW GUINEA: LAND TENURE, 30th JUNE, 1950.

Tenure.	Area.
	Acres.
Alienated—	
Held by private non-indigenous inhabitants—	
Freehold	519,380
Leasehold	160,573
Held by Administration	209,240
Native Reserves(*a*)	26,611
Total	915,804
Held by Natives	58,604,196
Total Area of New Guinea	59,520,000

(*a*) Vested in Director of District Services and Native Affairs as Trustee for Natives.

TERRITORY OF NEW GUINEA: LEASES IN FORCE, 30th JUNE, 1950.

Class of Lease.	No. of Leases.	Area.
		Acres.
Agricultural	456	143,509
Pastoral	3	9,496
Residential and Business	418	454
Special	58	854
Mission	455	1,606
Leases granted to Chinese in towns	214	58
Long period leases from German régime ..	106	4,596
Total	1,710	160,573

2. **Registration of Titles.**—Under German law there was a system of registration of titles in a "Ground Book," but registration did not confer an indefeasible title. The German system has been replaced by one modelled on the Torrens plan, embodied in an Ordinance entitled the Lands Registration Ordinance 1924–1950.

§ 6. Production.

1. **General.**—The products of the Territory are obtained from its agricultural, fishing and mining industries. The only manufacturing industry of importance is that of desiccated coco-nut. Native subsistence agriculture, fishing and hunting produce most of the food requirements of the native population. The main native agricultural products are taro, yams, sweet potatoes, bananas and paw paw. Non-indigenous enterprise produces most of the commodities exported. Natives, however, do produce copra for export and native enterprise in other fields of agricultural production for export purposes is being encouraged. The principal agricultural products of New Guinea for the export trade are copra and rubber. Most of the timber milled during 1949–50 was absorbed

by local building requirements; exports of timber were only about one per cent. of total production. The main products of fisheries exported from New Guinea are trochus and green snail shell. Gold is the principal mineral mined.

2. **Agriculture.**—(i) *General.* The principal agricultural product of New Guinea is copra. Before the 1939–1945 War the peak annual exports of copra were 76,400 tons in 1936–37. The plantations suffered considerable damage during the war, but rehabilitation has been rapid and although 25 to 30 per cent. of palms were lost owing to war damage and abandonment, and the economic value of many remaining palms deteriorated owing to loss of the major portion of a number of plantations, production is now again approaching pre-war levels. Little replanting of damaged areas has taken place but a number of palms which were immature pre-war are now in bearing. Losses due to strangulation by secondary growth consequent upon abandonment were heavy amongst immature palms. Apart from coco-nuts, the main export crops were cocoa and coffee. Cocoa, by reason of extensive post-war plantings prompted by favorable prices, is now approximating the pre-war levels of exports. In 1949–50 207 tons of cocoa beans were exported from New Guinea. The average annual exports for the three years 1937–38 to 1939–40 were 243 tons. Coffee plantations which suffered extensive damage during the war are being rejuvenated, but their rehabilitation has not been rapid and the export of coffee beans in 1949–50 amounted to only 15 tons as compared with 63 tons in 1939–40. Owing to greatly increased prices, however, the value of the exports for 1949–50 (£2,797) exceeded that of the exports for 1939–40 (£2,060). The increased prices are creating interest in this crop among planters. New Guinea, like Papua, is capable of producing the wide range of crops described on p. 350 and development of these crops is being encouraged.

(ii) *Plantations.* Tables giving details of crops planted and areas and yields of plantations in 1939–40 and planted areas from 1885 to 1940 are shown in Year Book No. 38, pp. 379 and 380.

(iii) *Agricultural Experimentation and Agricultural Extension.* The Department of Agriculture, Stock and Fisheries of the Territory has been active since the war in carrying out experiments in tropical agriculture, mainly at three experimental stations. Aiyura Experimental Station in the New Guinea highlands has carried out experiments in growing cinchona, tea, coffee, food crops and various cover crops, in addition to experiments with timbers, live-stock and soil surveys. The Lowlands Experimental Station at Keravat on the Gazelle Peninsula of New Britain has done concentrated work on coco-nuts, cocoa, coffee, rubber, spices, manila hemp, jute, cotton, cover crops, sweet potato, rice and yams. This station has worked intensively on diseases and pests of coco-nuts, cocoa and oil palms. At Garaina, south of Lae on the New Guinea mainland, experiments are being conducted in the growing of tea and also coffee and cinchona. The experimental stations form an important part of agricultural extension programmes designed to service existing and developing agricultural industries and to teach agricultural techniques to the native peoples. Particular attention has been paid to promoting the growing by native enterprise of rice and ground nuts. Rice production by native growers is expanding, particularly in the vicinity of Madang, Rabaul, Buin, Wewak and Aitape. At present only upland types are in use.

3. **Live-stock.**—Little natural pasture is at present accessible in the Territory of New Guinea, though investigations have proved that good cattle country exists in the vicinity of the lower Sepik River, the nearest point of access being Marienberg, 38 miles from the river mouth. The swampy country through which the Sepik passes is not itself suitable for cattle. Apart from pasture lands which have been discovered in the Sepik area, in the Markham and Ramu Valleys there is excellent cattle country from Lae to Wau, and further inland to the upper Ramu and Purari. In the gold-fields area, also, large valleys of open country exist, probably suitable for grazing and stock-raising. An experiment is at present being conducted by the E. J. Hallstrom Trust in the breeding of Romney Marsh sheep at Nondugl in the Central Highlands District of the Territory of New Guinea.

Soils are variable and often the terrain is broken ; however, the loose, coral-derived soils and those from pumice and volcanic sands are gently undulating. The foothill soil is heavier, being generally a mixture of volcanic and sedimentary types. The hinterland soils are often heavy and lateritic. Generally, there is more good land on the island groups than on the mainland, except in certain valleys such as the Markham and Sepik.

District Agricultural Stations are located throughout the Territory. In the selection of sites for these, special consideration has been given to areas which suffered most under enemy occupation. Each of these Stations is in the charge of a District Agricultural Officer whose functions are largely those of extension. As a first step towards improving live-stock breeds and animal husbandry methods, a piggery has been established at each Station and stocked with imported Berkshires.

Pigs in many parts of the country were almost entirely annihilated during the Japanese occupation. As the pig is one of the chief sources of meat to most natives, a serious unbalancing of the native diet has been brought about in such areas. Pigs are also of considerable importance to the native people in social prestige, wealth and as a medium of exchange. With a view to increasing the number and the quality of pigs at present available, small studs of pure breeds have been established. From these studs, pigs of a superior type will be made available to natives, especially good type boars. It is hoped in this way gradually to improve the standard of native pigs.

A Quarantine Ordinance is in operation in the Territory and this is largely under the control of the Department of Public Health, in co-operation with the Department of Agriculture, Stock and Fisheries.

All stock introduced is carefully inspected in Australia prior to shipment, and on arrival is again inspected and treated for internal and external parasites. The stock is not allowed to land if parasites not already existent in the Territory are present on inspection.

4 **Timber.**—An investigation of the timber resources was made by the Commonwealth Inspector-General of Forests, and a report in connexion therewith was published in 1926. According to this report, while offering no prospects of immediate gain to large sawmilling interests, the Territory possesses forest potentialities of a high order. Surveys of the timber resources of the Morobe District indicate that there are approximately 500 million super. feet of timber in the pine forests of the Bulolo Valley. This is supporting sawmills cutting for local use, and flitches are also being exported to Australia for the manufacture of battery separator veneer. It is proposed to harvest this forest over a period of years and progressively re-afforest the area. Sawmills controlled by the Administration are established at Lae and Keravat, and are supplying local requirements. The log export trade has not yet recovered, but in 1949–50 shipments of some 926,399 super. feet of timber in the log were made.

The Forestry Ordinance 1936–1937 provides for the issue of permits and licences to cut timber. Present policy calls for the orderly development of the timber industry on sound forestry principles ; the grant of emergency timber permits to provide timber for Territory requirements ; the disposal by public tender of timber areas designated by forest officials of the Territory ; and the development of the pine stand in the Bulolo Valley by a joint company in which the Commonwealth Government shall have a majority shareholding. Timber growing on native lands cannot be acquired by private purchasers direct from the natives but must be obtained through the Administration. A royalty is payable on all forest produce taken under permit or licence. Some 26 permits covering approximately 200,000 acres, which were in force when the war intervened, were extended to cover the five-year period of suspension.

5. **Fisheries.**—The wealth of the waters of the Territory has been little exploited. Fish are caught at many places along the coast to supply the small local demand of the natives and of the few resident Europeans. Pearl-shell is exported in fair quantities, while bêche-de-mer, trochus-shell and tortoise-shell also figure amongst the exports. The value of marine products exported in 1949–50 was £17,219. A survey of the Territorial waters, undertaken with the co-operation of the Commonwealth Scientific and Industrial Research Organization with a view to ascertaining the fisheries resources and developing these and the shell industries, was completed during 1949–50.

6. **Mining.**—Except for gold there has been little mining in New Guinea. Gold has been discovered on the Waria, the Ramu, the Francisco, and the Markham Rivers, and in tributaries of the Sepik River. Rich gold was discovered in the Morobe District in 1926; the field is situated about 90 miles (40 by air) inland from Lae, the nearest coastal port. Communication is established with the coast by a regular aeroplane service and by road transport. Osmiridium is reported to have been found on the upper tributaries of the Ramu, and platinum on the Kabenau River. Copper has been discovered in the form of chalcopyrite and malachite in the Baining District. Iron occurs as magnesite and hæmatite in the Baining District, apparently in large quantities. Sulphur occurs in several localities in the volcanic regions of the Territory. Brown coal has been found on the mainland in the vicinity of Astrolabe Bay, and in the southern portion of New Ireland.

Mining is regulated by the Mining Ordinance 1928–1947. Copies of the Ordinance and Regulations made thereunder may be obtained from the Secretary, Department of Territories, Canberra.

The following table shows the production of gold during the years 1938–39, 1940–41 and 1947–48 to 1949–50 :—

TERRITORY OF NEW GUINEA : GOLD PRODUCTION.

Year.	Quantity.	Value.(a)
	Fine oz.	£
1938–39	237,705	2,153,018
1940–41	263,113	2,808,835
1947–48	82,852	891,696
1948–49	91,296	982,574
1949–50	84,958	1,209,001

(a) Valued at average price realized for fine gold in Australia.

Since the high market price of gold has been maintained, the search for profitable areas in various parts of the Territory has not diminished and systematic testing by drilling and other means has been undertaken on alluvial areas previously considered unworthy of attention. Although there were no new discoveries of alluvial or reef gold during 1949–50, work proceeded steadily on the known gold-bearing areas.

A search for petroleum has been actively conducted on the mainland. The Petroleum Ordinance 1936 has been superseded by the Petroleum (Prospecting and Mining) Ordinance 1938–1947, which has facilitated the carrying out of geological surveys and prospecting activities generally. On 30th June, 1950, two permits to search for petroleum were in force.

§ 7. Trade.

1. **Customs Tariff.**—As from 1st July, 1950, a new customs tariff came into force, This provides high revenue rates on ale, spirits, wines, timepieces, cigarette papers, fancy goods, jewellery and certain apparel and piece goods made of silk. Of 72 items

mentioned in the import schedule, 55 are on the free list. The new tariff allows duty-free treatment of necessities, but increases rates on non-necessities. The purpose of the revision is to relieve both general industrial costs and the basic costs of living with a view to encouraging further development of the Territory. The rate of duty on items not specified in the schedule is 10 per cent. ad valorem. No preferential rates are specified in the schedule.

Export duties are levied on copra, trepang, shell, feathers and sulphur. When the price, or the assessed value of copra is less than £5 15s. per ton no tariff is imposed, but when the price exceeds this figure but is not more than £11 per ton 2s. 6d. per ton is charged ; thereafter the charge increases on a sliding scale to 11s. 6d. per ton as the price rises to £18, with an additional 2s. per ton for every further increase of £1 in the price of copra. Imports in 1949-50 amounted to £4,791,799 on which £435,189 was received in import duties, while £254,489 was paid in export duties and royalties.

Provision is made in the Australian Customs Tariff (Papua and New Guinea Preference) 1306 for the free entry into Australia of certain goods produced and imported direct from the Territory of New Guinea (*see* Chapter XII.—Trade), and a proclamation of 25th September, 1935 exempted from primage duty goods produced or manufactured in the Territory.

2. **Imports and Exports.**—Values of the principal items of imports and exports for the years 1938–39, 1940–41 and 1947–48 to 1949–50 are shown below. The values of exports are expressed in Australian currency, but it is not possible to determine accurately the currency of the £ in the table of imports.

Total ..	1,268,097	4,393,873	4,791,799	3,681,120	3,202,257	4,234,978

(*a*) Part of these imports may originate from Other British Countries, Japan, France or Germany.

The bulk of the imports into the Territory of foodstuffs, beer, coal, paints, boats, launches and soap comes from Australia, which also supplies large quantities of machinery and metal manufactures, drugs, explosives, tobacco, cigarettes, apparel, boots, leather manufactures, timber, stationery and polishes.

§ 8. Shipping and Communication.

1. **General.**—A regular passenger and freight service between Australia and the Territory is operated by Burns Philp & Co. Ltd. Vessels engaged in the trade between Hong Kong and Australia also call at Territory ports. A regular coastal and inter-island shipping service for the carriage of cargo and passengers is maintained. The vessels for this purpose are provided by the Government of the Commonwealth of Australia and operate from and to the main ports in the Territory. Shipping within the Territory is regulated by the Shipping Ordinance 1936–1939 and the Coastal Shipping, Ports and Harbours Regulations.

2. **Oversea Tonnage in 1949–50.**—The number and net tonnage of oversea vessels which entered and cleared the Territory during 1949–50 are shown hereunder.

TERRITORY OF NEW GUINEA : OVERSEA SHIPPING, 1949–50.

Nationality.	Vessels Entered.		Vessels Cleared.		Total.	
	Number.	Net Tonnage.	Number.	Net Tonnage.	Number.	Net Tonnage.
British	(a) 105	220,353	(a) 93	210,891	198	431,244
Other	9	17,655	9	17,655	18	35,310
Total	114	238,008	102	228,546	216	466,554

(a) Five British vessels were still in Territorial waters at 30th June, 1950. The remaining seven British vessels cleared inwards to Territory ports and remained in the Territory for the coastal trade.

3. **Shipping, Ports and Inland Waterways.**—Shipping services on a regular basis ply between Australia and the Territory, providing passenger and cargo accommodation. Cargo vessels have been chartered at various times to supplement the regular service. Vessels of the Eastern and Australian Shipping Line on the Australia-Hong Kong service make calls at Rabaul with imports from Hong Kong. The Australian Government is responsible for the coastal and inter-island shipping service and it provides the vessels for the purpose.

Main ports of call for oversea vessels are established at Lae, Madang and Finschhafen (mainland), Rabaul (New Britain), Kavieng (New Ireland) and Lorengau (Manus). Ports proclaimed under the Coastal Shipping Ports and Harbour Regulations for the service of local vessels are, in addition to the main ports above-mentioned, Salamaua, Wewak, Aitape and Wanimo (mainland), Gasmata and Talasea (New Britain), Namatanai (New Ireland), and Kieta and Buka Passage (Bougainville).

There are no prepared inland waterways. The natural river system is not generally suitable for vessels except those of small tonnage. There is a fair measure of traffic on the Sepik River.

4. **Land Communication.**—Means of communication on land are scanty. There are no railways. Roads lead from Rabaul to places within 30 or 40 miles, and there is a road 200 miles long in New Ireland and also a road from Lae to Wau in the Morobe District. Elsewhere there are few roads outside plantations and the District Officers' stations.

5. **Air Transport and Civil Airfields.**—The discovery of gold in New Guinea resulted in great aviation activity in the vicinity of the gold-fields. On account of the mountainous country and dense undergrowth between the coast and the gold-fields the task of transporting food and stores to the fields and of bringing the gold to the seaboard by land was an irksome and costly process. The fields are situated about 90 miles (40 by air) inland from Lae.

Qantas Empire Airways Ltd. operates a regular service from Australia to Lae, Madang, Rabaul, Bulolo and Wau with extensions to Finschhafen, Torokina, Kavieng and Manus Island. Commercial aircraft operators located at Lae also maintain passenger and freight-carrying services to Wau, Bulolo, Mount Hagen, Kainantu, Goroka, Finschhafen, Madang, Wewak, Aitape, Maprik and Angorum. Charters are undertaken to other parts of the Territory as occasion arises.

Further reference to New Guinea air activities is contained in Chapter V.—Transport and Communication.

For information for 1945–46 and 1946–47 *see* Papua, § 7, p. 354.

TRUST TERRITORY OF NAURU.

1. **General.**—Nauru is an oval-shaped atoll about 12 miles in circumference, having an area of about 5,263 acres, of which approximately two-thirds is phosphate-bearing. It is situated in latitude 0° 32′ south of the Equator and longitude 166° 55′ east of Greenwich. Portion of the island between the sandy beach and the coral cliffs is fertile, and it is there that the Nauruans reside. With the exception of a small fringe around an inland lagoon, the plateau which contains the phosphate deposits possesses few food plants and is uninhabited, but portion of the area has been planted with fruit trees. The system of land tenure is governed by an old custom, and, with the exception of small allotments held by the Government, the British Phosphate Commissioners and the Missions, the

whole of the island is owned by individual natives. The temperature range is from 76° at night to 94° during the day and the average humidity about 80 per cent. Normally the rainfall is comparatively low for islands of the Pacific, the average for twenty years from 1920 to 1940 being 80.5 inches. However, falls as high as 181.76 inches during 1940 and as low as 12.29 inches during 1950 have been recorded.

2. **History.**—The island, discovered by Captain Fearn in 1798, was annexed by Germany in 1888, and prior to 1914 was part of the protectorate of German New Guinea.

In November, 1914, Nauru was occupied by a detachment from the Australian Naval and Military Expedition at Rabaul, and it was included in the cession of colonies made by Germany in 1919 to the Allied and Associated Powers, whose representatives agreed that a mandate for its administration should be conferred upon His Britannic Majesty. The mandate was confirmed by the Council of the League of Nations on 17th December, 1920. On 2nd July, 1919, the British, Australian and New Zealand Governments agreed that the administration (which, since 1915, had been in charge of an official appointed by the British Colonial Office) should be vested in an Administrator, who took up duty in June, 1921. The agreement between the three Governments was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919, and is shown in the Schedule to that Act. A supplementary agreement concerning Nauru was drafted in May, 1923, and ratified by the Commonwealth Parliament by the Nauru Island Agreement Act 1932.

On 25th August, 1942, nine months after the outbreak of the war in the Pacific, communications with Nauru ceased, and the island was occupied by Japanese forces. It was re-occupied by a joint Australian Naval and Military Force on 14th September, 1945, and civil administration was re-established on 1st November, 1945.

3. **Trusteeship Agreement.**—On 1st November, 1947 the General Assembly of the United Nations approved a Trusteeship Agreement for the Territory of Nauru submitted by the Governments of Australia, New Zealand and the United Kingdom in substitution for the terms of the mandate under which the Territory had been administered. This Agreement designates the Governments of Australia, New Zealand and the United Kingdom as the Joint Administering Authority, with the Government of Australia continuing, on behalf of the Administering Authority, to exercise full powers of legislation, administration and jurisdiction in and over the Territory. The terms of the Agreement are as follows:—

> *Preamble :* In pursuance of a Mandate conferred upon His Britannic Majesty, the Territory of Nauru has been administered in accordance with Article 22 of the Covenant of the League of Nations by the Government of Australia on the joint behalf of the Governments of Australia, New Zealand and the United Kingdom of Great Britain and Northern Ireland.
>
> The Charter of the United Nations, signed at San Francisco on 26th June, 1945, provides by Article 75 for the establishment of an international trusteeship system for the administration and supervision of such territories as may be placed thereunder by subsequent individual agreements.
>
> His Majesty desires to place the Territory of Nauru under the trusteeship system and the Governments of Australia, New Zealand and the United Kingdom undertake to administer it on the terms set forth in the present Trusteeship Agreement.
>
> Therefore, the General Assembly of the United Nations, acting in pursuance of Article 85 of the Charter, approves the following terms of the trusteeship for the Territory of Nauru in substitution for the terms of the Mandate under which the Territory has been administered:—
>
> *Article* 1. The Territory to which the Trusteeship Agreement applies (hereinafter called the Territory) consists of the island of Nauru (Pleasant Island) situated approximately 167° longitude East and approximately 0° 25′ latitude South, being the Territory administered under the Mandate above referred to.
>
> *Article* 2. The Governments of Australia, New Zealand and the United Kingdom (hereinafter called the Administering Authority) are hereby designated as the joint authority which will exercise the administration of the Territory.

Article 3. The Administering Authority undertakes to administer the Territory in accordance with the provisions of the Charter and in such a manner as to achieve in the Territory the basic objectives of the international trusteeship system, which are set forth in Article 76 of the Charter.

Article 4. The Administering Authority will be responsible for the peace, order, good government and defence of the Territory, and for this purpose, in pursuance of an agreement made by the Governments of Australia, New Zealand and the United Kingdom, the Government of Australia will on behalf of the Administering Authority and except and until otherwise agreed by the Governments of Australia, New Zealand and the United Kingdom continue to exercise full powers of legislation, administration and jurisdiction in and over the Territory.

Article 5. The Administering Authority undertakes that in the discharge of its obligations under Article 3 of this agreement—

1. It will co-operate with the Trusteeship Council in the discharge of all the Council's functions under Articles 87 and 88 of the Charter;
2. It will, in accordance with its established policy—
    - (*a*) take into consideration the customs and usages of the inhabitants of Nauru and respect the rights and safeguard the interests both present and future of the indigenous inhabitants of the Territory; and in particular ensure that no rights over native land in favour of any person not an indigenous inhabitant of Nauru may be created or transferred except with the consent of the competent public authority;
    - (*b*) promote, as may be appropriate to the circumstances of the Territory, the economic, social, educational and cultural advancement of the inhabitants;
    - (*c*) assure to the inhabitants of the Territory, as may be appropriate to the particular circumstances of the Territory and its peoples, a progressively increasing share in the administrative and other services of the Territory and take all appropriate measures with a view to the political advancement of the inhabitants in accordance with Article 76 (*b*) of the Charter;
    - (*d*) guarantee to the inhabitants of the Territory, subject only to the requirements of the public order, freedom of speech, of the press, of assembly and of petition, freedom of conscience and worship and freedom of religious teaching.

Article 6. The Administering Authority further undertakes to apply in the Territory the provisions of such international agreements and such recommendations of the specialized agencies referred to in Article 57 of the Charter as are, in the opinion of the Administering Authority, suited to the needs and conditions of the Territory and conducive to the achievement of the basic objectives of the trusteeship system.

Article 7. In order to discharge its duties under Article 84 of the Charter and Article 4 of the present agreement, the Administering Authority may take all measures in the Territory which it considers desirable to provide for the defence of the Territory and for the maintenance of international peace and security.

4. **Administration.**—The administration of the island is vested in the Administrator, who is obliged to conform to instructions issued by the Government which appointed him. Until the Government of Australia ceases to exercise full powers of legislation, administration and jurisdiction in and over the Territory on behalf of the Administering Authority in pursuance of Article 4 of the Trusteeship Agreement, all ordinances made by the Administrator are subject to confirmation or disallowance by the Governor-General of Australia acting on the advice of the Federal Executive Council. All administration expenses are met from local revenue and phosphate royalties. Native industries such as canoe-building, fishing, mat-making, etc., are encouraged by the provision of prizes at annual competitions. An agency of the Commonwealth Savings Bank has been established. There is a co-operative store managed to a large extent by

the natives. The store books, however, are audited by Government officers. Natives are not allowed to carry or be in possession of firearms, and the use by them of intoxicating liquors and deleterious drugs is prohibited.

5. **Population.**—The population figures on 1st April, 1939, 31st December, 1946 and 30th June, 1947 to 1950 are shown hereunder. Details are not available for the years 1942 to 1945, the period of Japanese occupation :—

TERRITORY OF NAURU : POPULATION.

Race.	1st April, 1939.	31st Dec., 1946.	30th June, 1947.	30th June, 1948.	30th June, 1949.	30th June, 1950.
Europeans	171	159	192	247	247	278
Chinese	1,512	787	1,163	1,370	1,440	1,491
Nauruans (*a*) ..	1,765	1,369	1,379	1,448	1,524	1,582
Other	44	33	31	97	58	81
Total	3,492	2,348	2,765	3,162	3,269	3,432

(*a*) The natives of Nauru are Micronesians.

During the year ended 30th June, 1950, there were 88 births, compared with 85 during the year ended 30th June, 1949. In 1949–50 there were 15 marriages and 22 deaths.

6. **Health.**—Cases of the usual diseases known in the Pacific occur. Venereal disease is rare, but elephantiasis is occasionally met with. An area has been set apart for the segregation of lepers, and the latest methods of treatment are applied. The total number of persons receiving treatment at 30th June, 1950, was 68 of whom 12 were in segregation at the Leper Hospital. Two hospitals are maintained on the island, one by the Administration for Nauruans, and one by the British Phosphate Commissioners for their employees. In common with other natives, the Nauruans are very susceptible to tuberculosis and influenza, and in 1921 an influenza epidemic caused the deaths of 230 islanders. Dysentery, both amœbic and bacillary, is endemic. A regular anti-mosquito campaign is conducted. Steps have been taken by the authorities to improve the water supply and to provide efficient sanitation generally. Every Nauruan is required to undergo a medical examination at intervals of three months. Baby clinics have been established to give help and advice to Nauruan mothers in regard to infant nurture.

7. **Education.**—Formerly the education of Nauruan and other native children was undertaken by the Missions subsidized by the Administration, but on 1st October, 1923, the Administration assumed responsibility for education. There are 8 primary schools for native, and one for European children. A total of 358 native and 48 European children was enrolled at 30th June, 1950. The European school is in the charge of a teacher on loan from the Victorian Education Department. Education generally is controlled by a Director of Education.

The curriculum is similar to that of corresponding schools in Australia, and the teaching is, as far as possible, wholly in English. Education is compulsory between the ages of six and sixteen for Nauruan and other native children.

8. **Judiciary.**—The judicial power is vested in the Administrator in a Central Court and a District Court. The right of appeal is provided.

9. **Religion.**—The London Missionary Society (Protestant) and the Sacred Heart of Jesus Mission (Roman Catholic) operate in Nauru.

10. **Phosphate Deposits.**—(i) *General.* From 1906 to 1919 the deposits were worked by the Pacific Phosphate Company, which also worked the deposits on Ocean Island

(about 165 miles east of Nauru and part of the Gilbert and Ellice Islands Colony administered by the Colonial Office). The quantity remaining on Nauru has been estimated at about 70,000,000 tons, and the exports average 85 per cent. to 88 per cent. of tricalcium phosphate.

The interests of the Pacific Phosphate Company in the two islands (though not in other islands in the Pacific in which it had workings) were bought by the British, Australian and New Zealand Governments in 1919 for £3,500,000, the purchase money being contributed in the proportions of 42, 42, and 16 per cent. respectively. The Agreement of 2nd July, 1919, provides for the working of the deposits by three British Phosphate Commissioners, one appointed by each Government; and the three countries are entitled to receive the output in the same proportions of 42, 42, and 16 per cent.

(ii) *Royalty on Phosphate.* Under a revised agreement between the British Phosphate Commissioners and the Nauruan landowners, an increased royalty of 1s. 1d. per ton of phosphate exported has been payable from 1st July, 1947, as follows :—

(*a*) 6d. per ton to be paid to the Nauruan landowner concerned;

(*b*) 3d. per ton to the Administrator for the benefit of the Nauruan people;

(*c*) 2d. per ton to the Administrator to be held in trust for the Nauruan landowner concerned and invested at compound interest for a period of 20 years. The capital will then remain invested and the interest thereon will be paid to the landowner.

(*d*) 2d. per ton to the Administrator to be held in trust for the Nauruan community and invested until the year 2000 at compound interest.

From 1st July, 1947 the lump sums payable to landowners from whom phosphate-bearing lands are leased were also increased to £45 per acre, with a minimum payment of £7 10s. for areas less than an acre.

(iii) *Nauru and Ocean Island Phosphate Industry.* The following table shows particulars regarding exports of phosphate during the years 1938–39 and 1946–47 to 1949–50 :—

NAURU AND OCEAN ISLAND : EXPORTS OF PHOSPHATE.

Year.	Total.	Proportion to Australia.	Proportion to New Zealand
	Tons.	%	%
1938–39	1,228,590	67.06	23.63
1946–47	213,875	87.07	12.93
1947–48	468,839	72.77	27.23
1948–49	857,824	78.18	21.82
1949–50	1,285,998	76.11	23.89

(iv) *Accounts of Commission.* A statement of Nauru and Ocean Island activities for the years 1938–39 and 1946–47 to 1949–50 is shown hereunder :—

Heading.	1938–39.	1946–47.	1947–48.	1948–49.	1949–50.
Receipts from sales, etc. ..	909,027	551,537	1,040,086	1,550,769	2,071,228
F.o.b. cost, including interest on capital, sinking fund, etc.	906,133	508,224	1,037,914	1,546,065	2,063,417

During the period of the Japanese occupation from August, 1942 to September, 1945, while waiting to resume activities at Nauru and Ocean Island, the Commissioners were engaged in meeting the phosphate requirements of Australia and New Zealand from other available sources. Reconstruction of equipment destroyed during the Japanese occupation is now practically completed and a programme of improvements and additions has been commenced.

The amount due by the British Phosphate Commissioners to the partner Governments for purchase-money and other capital sums was £3,666,457 on 30th June, 1921, and at 30th June, 1942, this had been reduced to £3,024,373. The partner Governments agreed to a suspension of interest and sinking fund payments from 1st July, 1942, while operations at Nauru and Ocean Island were curtailed. Modified payments were resumed in 1946–47, pending a review of the position.

The review was carried out in 1950, as a result of which the revised capital indebtedness of the Commissioners to the partner Governments at 30th June, 1950 was determined at £3,881,711. Interest and sinking fund payments were resumed with effect from 1st July, 1950 on the basis of repayment of the revised capital indebtedness in 35 years.

(v) *Employees.* Apart from a limited number of Europeans and a few Pacific Islanders, the employees are Chinese engaged under a one year's contract. Increasing numbers of Nauruans are being employed, mainly in trade capacities.

(vi) *Christmas Island Phosphates.* It may not be inappropriate to refer here to the phosphate deposits on Christmas Island in which the Australian Government is interested. The concession to work phosphate at Christmas Island, situated in the Indian Ocean near Java, had been held since 1897 by the Christmas Island Phosphate Company Limited, a private company incorporated in England.

The Australian and New Zealand Governments, jointly, have acquired the Company's interests and assets at Christmas Island as at 31st December, 1948.

The undertaking will be controlled by an authority to be appointed by the Australian and New Zealand Governments which will arrange for the phosphate to be distributed by the British Phosphate Commissioners, in conjunction with supplies obtained from Nauru and Ocean Island, to meet the agricultural requirements of Australia and New Zealand. In the meantime the British Phosphate Commissioners are so operating the undertaking on the direct behalf of the Australian and New Zealand Governments.

11. **Trade.**—The Customs Tariff of Nauru provides for the free admission of all goods other than cigars, cigarettes, tobacco, spirits, wines, beer, cider, and perry, and cylinder blocks for motor cycle engines. Articles imported by the Administration for its own use and spirits for scientific purposes are exempt.

The Tariff rates apply to all countries alike. Information regarding imports and exports for the years 1939, 1941 and 1947–48 to 1949–50 is shown in the following table.

TERRITORY OF NAURU : IMPORTS AND EXPORTS.

Heading.		1939.	1941.	1947–48.	1948–49.	1949–50.
Imports ..	£	170,624	106,978	621,764	527,104	646,155
Exports—						
Phosphate ..	tons	932,100	99,150	263,507	680,746	1,009,266
	£	605,974	69,375	527,014	1,174,287	1,589,594

Of the total imports, Australia supplied £492,560 or 76.23 per cent. during 1949–50; the balance came mainly from the United Kingdom, New Zealand and China in that order.

In 1949–50, 779,456 tons of phosphate were exported to Australia, and 229,810 tons to New Zealand.

12. **Revenue and Expenditure.**—The revenue and expenditure of the Administration during the years 1939, 1941 and 1947–48 to 1949–50 were as follows :—

TERRITORY OF NAURU : REVENUE AND EXPENDITURE.

(£.)

Heading.	1939.	1941.	1947–48.	1948–49.	1949–50.
Revenue	33,084	12,023	23,745	34,204	42,103
Expenditure	29,391	23,951	96,347	105,673	68,567

Of the revenue for the year ended 30th June, 1950, royalty on phosphate amounted to £25,443, post office and radio receipts, £3,547 and customs duties, £3,758.

CHAPTER XI.

LABOUR, WAGES AND PRICES.

A. RETAIL PRICES AND PRICE INDEXES.

§ 1. Collection of Information as to Retail Prices.

The retail prices of the extensive range of commodities and services in common demand (generally referred to as the "regimen") used in compiling the All Items ("C" Series) Retail Price Index have been ascertained at frequent and regular intervals since 1923 for each of the six capital cities and for 27 of the more important towns of Australia. Comparable information is available for the month of November in each year 1914 to 1922 for each of the six capital cities. The complete list of items covered by the retail price regimen is published in the annual *Labour Report*, and a summary of the main groups and sections of the regimen is given in § 6 of this chapter.

The retail prices of food and groceries in approximately 200 towns throughout Australia were collected as at November of each year from 1913 to 1942, when collection was discontinued.

Retail prices of food and groceries and average rentals of houses for earlier years extending back to 1901 were collected by this Bureau, and in some cases have been recorded by the Statisticians of various States as far back as 1864.

The methods by which prices used in the "C" Series Index are ascertained and the measures adopted to ensure their accuracy and comparability are briefly as follows :—

(i) Representative and reputable retailers are selected for each city and town covered by the Index and each is required to furnish information as to prices monthly in respect of food and groceries and quarterly in respect of other items. Prices for each item are obtained where practicable from ten or more retailers in each of the capital cities, and from five or more retailers in each of the provincial towns. To cover all commodities in the regimen, collection is made from approximately sixty retailers in each capital city and thirty in each provincial town.

(ii) Information is collected under authority of the Census and Statistics Act 1905–1949, which requires that information be supplied accurately and promptly and ensures that particulars supplied by individual retailers will not be divulged to any other person or Government authority. Penalties are provided against failure to supply information, against supplying false information and against failure to answer truthfully any question asked by an authorized officer in respect of the contents of any return.

(iii) The actual collection of returns is carried out by qualified Field Officers of the Commonwealth Bureau of Census and Statistics working under the supervision of the Statisticians of the respective States. These Field Officers have very wide powers of investigation, including entry of premises and inspection of goods, records, etc.

(iv) The Field Officers not only receive and check returns but visit the retail shops concerned, whenever necessary, to obtain requisite information. In respect of articles of clothing and the like, where variation of quality may be considerable, Field Officers are equipped with samples of the goods used for price comparisons. In such cases the Field Officers visit every retail informant at each quarterly collection and personally inspect the relevant goods and prices thereof.

(v) Before each quarterly collection Supervising Field Officers review the standards of the whole of the items for which prices are collected after making extensive inquiries among manufacturers, wholesalers and retailers. These Supervising Field Officers periodically accompany Field Officers at their price collections and check their work. This not only ensures accuracy and assiduity but also that all Field Officers work on uniform lines and that, as far as care and effort can make it possible, prices for identical goods and quality will be recorded at all times and for all places.

(vi) The list of items in the regimen and the standards thereof are revised from time to time to keep them in harmony with changing conditions. Where such changes become necessary suitable adjustment is made in computing the retail price index to ensure that it reflects changes in price with due precision and that it is not vitiated by the influence of other changes. (*See also* § 8 of this chapter.) Because of rapidly changing conditions since 1948, prices have been ascertained for a large number of items not embraced in the index, and for an increasing number of types of "regimen" items. The purpose of this is to ensure that the index is kept representative and reliable within its definition.

(vii) Returns of rents for unfurnished houses of four and five rooms are made at the middle of each quarter by a representative number (ranging up to 30) of house agents in each city and town covered by the Index, for brick and wooden houses respectively, classified according to number of rooms. These returns show the weekly rental of a substantial number of individual houses, each of which is selected by the Field Officer as suitable for inclusion in a sample designed to measure the quarterly ratio of change in weekly rentals. The aim is to measure variations equivalent to change in price for a constant standard. The ratio of change is used to vary basic average rentals derived from the Census of 1933 and other records and was checked with the results of the Census of 1947. Although expressed in money terms, the average rentals as published are essentially indexes. As such they do not necessarily indicate the average amount of rental actually paid for all rented houses, and still less do they indicate the rental at which vacant or new houses can be rented.

§ 2. Retail Price Indexes.

1. **General.**—The basic principle of a retail price index is relatively simple. It is to select commodities representative of the field to be covered and to combine their prices at regular intervals in accordance with their relative importance in that field. The aim is to measure the degree of change in prices for the selected field taken as a whole.

In practice the application of this principle over a term of years presents great difficulty by reason of the numerous changes which occur in the type, grade and relative quantities of many of the items commonly used.

A full explanation of the methods adopted and an analysis of problems involved is contained in the Appendix to *Labour Report* No. 9.

For convenience the group of selected items is called a " regimen ", and the quantities consumed per annum of each item used in the index are called " mass units " or " weights ". These terms are used herein. In compiling the index the price of each item is multiplied by its quantity " weight ", and then by its appropriate population or household " weight ". The sum of these products for all items at any given date represents an " aggregate expenditure ". The " aggregate expenditures " for successive periods are converted into an index by denoting the aggregate of a selected or " base " period as 1,000, and calculating all index-numbers to such base by the proportions which their aggregates bear to that of the base period. (*See also* § 6 (2) of this chapter.)

2. **Essential Features.**—Apart from clear thinking, common sense and sound arithmetic, the prime essentials in compiling a retail price index are—

(*a*) that prices be accurately ascertained at regular intervals for goods of constant grade and quality;
(*b*) that the regimen be as representative as possible of the field to be covered;
(*c*) that the weights be in approximate proportion to quantities actually used in the selected field.

3. **The Regimen.**—The regimen must be a selected regimen because it is impossible in practice to ascertain at regular intervals prices of every item of goods and services entering into household expenditure. Even in normal times there is considerable difficulty in ensuring that the selected items are always a true sample. Some items which it would be desirable to include must be excluded because comparative prices cannot be accurately ascertained for them at different times and different places. It is deemed better to limit the regimen of the index to items for which price variations can be ascertained with reasonable accuracy than to distend the regimen by including items for which price comparisons are necessarily inaccurate. Similarly, many items of small aggregate or individual importance are excluded. The regimen of the index therefore is not (as is sometimes erroneously supposed) a basic wage regimen nor yet is it a full list of component items in a standard of living. It does not imply that any particular goods or any selected grades or quantities of these goods should enter into determination of a basic or living wage. In fact the regimen used for the " C " Series Index is simply a selected list of items combined in certain proportions for the purpose of measuring price variations. The items are representative of the fields covered, and the proportions approximate to those in average consumption so far as can be ascertained.

The regimen and " weights " used in the " C " Series Index are published in full in the annual *Labour Report*. The regimen comprises 160 commodities and services, consisting of 20 items of Groceries; 6 of Dairy Produce; 15 of Meat; 1 of Rent; 77 of Clothing and Footwear; and 41 of Miscellaneous Household Expenditure comprising Household Drapery (9), Household Utensils (20), Fuel and Light (4), Union and Lodge Dues, Medicine, Newspapers, Recreation, Smoking, Fares and School Requisites (8).

4. **Purpose of Retail Price Indexes.**—Retail price indexes are designed to measure the extent of changes in price levels only. While they may be used as indicating proportionate variations in cost of a *constant* standard of living, they do not measure the absolute cost of any standard of living, nor the cost of changes in the standard of living. In other words, they measure, as nearly as may be, the proportionate change in aggregate cost of specified quantities and qualities of the selected regimen of items included in the index. The regimen is representative of a high proportion of the expenditure of wage-earner households (*see* the fourth paragraph on page 393).

5. **Effects of Abnormal Conditions on Indexes.**—Under abnormal conditions since 1940 scarcity of certain types of goods, erratic supply and changes of grades in common use have created unusual difficulty in obtaining the data necessary for measuring variations in prices. In some instances, this has rendered it necessary to substitute new grades,

qualities or types of articles for those formerly used as indicators of changes in price. This has been the case more particularly in the clothing, household drapery and household utensils sections of the regimen. Substitutions of similar kind were necessary at times under normal conditions in order to meet changes of fashion and usage. Such substitutions are not injurious to the index provided the transitional difficulties can be solved as they arise. No change in principle is involved. The index continues to measure as accurately as may be, price variations, and price variations only. Just as in the pre-war period, those differences in prices which are solely due to substitution of a new item for one which has ceased to be available or in common use are neutralized by taking the price of the old item as typical of price variation in its class up to the time of substitution, and the prices of the new item as typical of such changes in price thereafter.

In normal times, popular usage of items in general consumption changes slowly, and the weight of items and groups in the regimen is changed only at long intervals. In abnormal times, scarcity of supplies of some goods, rationing and kindred factors actually produce short term changes in usage. The weights applicable to the items in the regimen cannot, however, be changed frequently and at short intervals. (*See* § 8 (3) of this chapter.)

§ 3. Various Series of Retail Price Index-Numbers.

Two main series of retail price index-numbers are compiled and shown in some detail in the following pages, namely :—

(i) the " B " Series Index relating only to food, groceries and housing, continuously available since 1907 ;

(ii) the " C " Series Index relating to food, groceries, housing, clothing, household drapery and utensils, fuel and light, and other miscellaneous items of household expenditure, continuously available from 1914.

The " B " Series Index comprises only the food, groceries and housing sections of the " C " Series Index.

The " C " Series Index in total provides a reliable measure of aggregate variations in retail prices (as well as of group indexes for component sections) of a high percentage of goods and services used in wage-earner households. This index is compiled for—

(*a*) the capital city of each of the six States,

(*b*) four other principal towns in each of the six States,

(*c*) weighted average of five towns (including capital city) in each of the six States,

(*d*) weighted average for the six capital cities combined,

(*e*) weighted average for the thirty towns (including capital cities),

(*f*) separate indexes for Warwick, Port Augusta, Whyalla and Canberra.

The " C " Series Index forms the basis of the " Court " Series Index used by the Commonwealth Court of Conciliation and Arbitration for the " cost of living " adjustments of wages prescribed by awards made by the Court. (*See* § 9 of this chapter.)

§ 4. Retail Price Levels (" C " Series Index) 1914-1951.

The aggregate indexes for November, 1914, 1921 and the years 1929, 1939 and 1946 to 1951 for the Thirty Towns are published in summary form on page 389 of this chapter, while the following table furnishes the relevant index-numbers for the Six Capital Cities as a whole for certain significant dates since November, 1914—the earliest date for which this index is available.

ALL ITEMS (" C " SERIES) RETAIL PRICE INDEX-NUMBERS.

WEIGHTED AVERAGE OF SIX CAPITAL CITIES.

(*Base:* 1923–27 = 1,000.)

1914, November	687	(Beginning of War I.)
1918, November	905	(End of War I.)
1920, November	1,166	(Post-War peak)
1922, November	975	(Post-War trough)
1929, Year	1,033	(Pre-Depression peak)
1933, Year	804	(Depression trough)
1939, September Quarter	916	(Pre-War II.)
1943, March Quarter	1,123	(Pre-Price Stabilization)
1943, June Quarter	1,143	(War II. peak)
1945, September Quarter	1,126	(End of War II.)
1951, December Quarter	2,042	

The index reveals a rise of approximately 32 per cent. during the first world war, followed by a further rise of 29 per cent. in the two post-war years (November, 1918, to November, 1920). From November, 1920 to November, 1922, there was a fall of 16 per cent. and the index remained relatively stable until the onset of the depression in 1929. During the four years of the depression 1929 to 1933 the index fell by 22 per cent., rising thereafter steadily until 1939 when it was nearly 14 per cent. above the level of 1933, and approximately at the level it had occupied at the date of the Armistice of 1918. Between the outbreak of war (September, 1939) and March, 1943 (pre-price stabilization) the index rose by approximately 23 per cent. to a level slightly below that reached at the height of the post-war boom in 1920. Compared with the March Quarter, 1943, the index-number at the close of the war was practically unchanged. At December Quarter, 1951, the level was approximately 75 per cent. above that of the 1920 peak period.

Immediately after the outbreak of the war price control was established by the Government under Regulations dated 28th September, 1939, and a national policy of price stabilization was applied as from 12th April, 1943, backed by more stringent price control and price subsidies. The retail price level, as measured by the index, remained relatively steady throughout 1944 and 1945 at the level of March, 1943. This stabilized level was approximately 23 per cent. above that of 1939 and 63 per cent. above the level prevailing at the beginning of the first world war in 1914. Since June Quarter, 1946, war-time controls, subsidies, etc., have been progressively modified and inflationary influences have supervened. The retail price index for December Quarter, 1951, was 123 per cent. above that of September Quarter, 1939, and 81 per cent. above the level of September Quarter, 1945.

A reference to price control measures and to price stabilization in Australia is given on page 398.

The movement in the various groups of the index and in the index as a whole for each year for which it has been compiled is shown in the following table for the six capital cities as a whole.

ALL ITEMS (" C " SERIES) RETAIL PRICE INDEX AND ITS " GROUP " INDEX-NUMBERS(*a*) FOR THE SIX CAPITAL CITIES COMBINED, 1914 TO 1951.

(*Base of Each Group : Weighted Average of Six Capital Cities*, 1923–27 = 1,000)

§ 5. Increases in Retail Prices since Outbreak of War in 1939.

1. **Australia.**—The following statement shows for the Six State Capitals and Canberra separately and for the Six State Capitals as a whole, the percentage increases which have taken place in retail prices of items included in the " C " Series Index from September Quarter, 1939 to December Quarter, 1951, inclusive. The proportionate increase in the total index for each capital city is shown in the line marked " Total ". In the column headed " C " Series Index the total percentage rise is dissected to show what part of it was due to the rise in prices in each of the four main groups of items. Thus, of the 125.1 per cent. increase for Sydney 56.8 was due to food and groceries, 0.4 to house rent, 50.1 to clothing and 17.8 to miscellaneous items. The column headed " Group Index " shows the percentage increase in prices of items in each group considered as a group. Thus for Sydney, prices in the food and groceries group increased by 158.2 per cent., house rents by 1.6 per cent., prices of clothing by 252.4 per cent. and prices of miscellaneous items by 95.5 per cent. These when weighted and combined in the proportions of the " C " Series Index showed a rise of 125.1 per cent. For the Six Capital Cities as a whole the increase over the period shown was 122.9 per cent.

ALL ITEMS (" C " SERIES) RETAIL PRICE INDEX.

PERCENTAGE INCREASES SEPTEMBER QUARTER, 1939 TO DECEMBER QUARTER, 1951.

(a) Dissection of percentage rise in total index to show amount due to rise in each group. (b) Weighted average Six State Capitals.

The foregoing comparisons refer to two points of time (i.e., the months immediately preceding the war and the closing months of 1951, at each of which special temporary factors may have influenced relative price levels. For instance, prices of certain foods (e.g., meat) fluctuate with seasonal conditions. The percentage increases shown do not, therefore, necessarily indicate the degree of increase due solely to causes peculiar to the war and post-war period.

2. **International Comparisons.**—The following table shows the increase during this period in Australia and certain other countries. The increases during the first world war have also been included.

(*a*) Food, Rent and Miscellaneous Expenditure. (*b*) Quarterly indexes appear in preceding issues. (*c*) New series (Base: 17th June, 1947 = 100), commencing from September Quarter, 1947. (*d*) Consumers' Price Index from March Quarter, 1949, onwards. Index-numbers for earlier periods (shown for purposes of comparison) are obtained by linking the movement in the Retail Price Index (base 1926–30) with the new index.

At various stages during the first world war most of these countries introduced some measures of price control. But in the second world war they introduced price control measures at an early stage and these became more stringent as the war progressed, culminating in a policy of price stabilization.

Immediately after the outbreak of war in September, 1939, the Commonwealth Government took steps to control prices, and, by proclamations issued from day to day, pegged prices of various commodities at those ruling on 31st August, 1939. The National Security (Prices) Regulations, proclaimed on 28th September, 1939, under the authority of the National Security Act, established the basic principles of war-time price control, provided for the appointment of a Commonwealth Prices Commissioner and conferred upon him extensive powers to control the price of goods declared for that purpose by the Minister for Trade and Customs. Further reference to this control appears on page 398.

§ 6. Construction of All Items ("C" Series) Retail Price Index.

1. **The Regimen.**—The regimen from which the "C" Series Index is compiled consists of a list of commodities and services which commonly enter into the consumption of the average household, and in respect of which comparative prices can be ascertained with due precision from time to time and from place to place. (*See* § 2 (3 and 4) above). The regimen is divided into the following Groups and Sections :—

Group.	Section.
I. Food and Groceries	A.—Groceries.
	B.—Dairy Produce.
	C.—Meat.
II. Housing	D.—House Rent.
III. Clothing	E.—Clothing—Man.
	F.—Clothing—Woman.
	G.—Clothing—Boy (10½ years).
	H.—Clothing—Girl (7 years).
	J.—Clothing—Boy (3½ years).
IV. Miscellaneous	K.—Household Drapery.
	L.—Household Utensils.
	M.—Fuel and Light.
	N.—Other Miscellaneous.

The "C" Series Index includes the whole of the foregoing Groups, but for many purposes indexes are required for individual Groups or Sections. For this reason the following indexes are regularly compiled at the intervals shown, and published in various publications issued by the Bureau :—

Group.(*a*)	Content.	Frequency.
I.	Food and Groceries	Monthly
II.	Housing (4 and 5 roomed houses) (*b*)	Quarterly
I. and II.	Food, Groceries and Housing (4 and 5 rooms) ("B" Series)	Quarterly
III.	Clothing	Quarterly
IV.	Miscellaneous Household Requirements	Quarterly
I., II., III. and IV.	Food, Groceries, Housing (4 and 5 rooms), Clothing and Miscellaneous ("C" Series)	Quarterly

(*a*) "Group" or "Sectional" index-numbers in the various tables throughout this publication cannot be compared with each other in order to show the *relative cost* of Food and Groceries, Housing, Clothing or Miscellaneous requirements, since each "Group" or "Section" (or combination thereof) has its own Base = 1,000, viz., the weighted average cost for the Six Capital Cities as a whole during the five-yearly period 1923–27 for that "Group" or "Section". (*b*) *Rent.*—The rent index-numbers shown in the tables in this publication measure the proportionate rise and fall in the average weekly rentals paid for houses of four and five rooms taking corresponding houses throughout. They are "price" indexes in the strict sense, i.e., they are designed to measure only the "price" element in rent fluctuations. Similarly, "average rents" where shown are indexes of "price" changes in rentals expressed in terms of pence. They are not the average of rents actually paid by all tenants of 4 and 5-roomed houses. It would be inappropriate to include the average of rents actually paid in an index designed to measure price changes only. The average of rents actually paid is ascertained periodically by Census methods—*see also* pages 32 and 33 of *Labour Report*, No. 39.

For convenience of reference two of the indexes mentioned above have been given the "series" designation shown against them. These indexes are dealt with in turn in the following pages.

2. The Mass Units (or "Weights").—The "mass units" (or "weights") are multipliers representing the approximate average annual consumption *per head or per household* under normal conditions. The index-numbers are computed on a "total annual aggregative expenditure" basis, i.e., the total annual expenditure from time to time by a *standard population* in respect of the selected regimen of commodities and services commonly entering into household consumption, and of a constant *standard quality*. As a first step, therefore, it is necessary to multiply the price of each item by its "weight" per head or per household as the case may be. Thus, the "weight" of bread is 100 2-lb. loaves per head; of sugar 100 lb. per head; of towels 3 per household; and of housing 52 rent-weeks per household. The result of this initial calculation is designated the "P.MU" aggregate (i.e., Price x Mass Unit).

The sum of these "P.MU" results for each Section or Group is then multiplied by its appropriate population or household "weight" to produce their respective annual aggregate expenditures. Thus Sections A to C (Food and Groceries) are multiplied by the total population; Section D (Housing) by the total number of households; Sections E to J (Clothing) by the proportion of the total population applicable to each; and Sections K to N (Miscellaneous) by the total number of households.

The combination of the aggregates from the last paragraph gives the "total annual aggregate expenditure" for the whole regimen, from which the "C" Series index-number is derived by applying to 1,000 the ratio which the aggregate for any period bears to the aggregate for the base period of the Index. In the process of tabulation all prices are converted to pence for these final aggregates.

For tabulating purposes some of these "mass units" are varied when necessary to make up a deficiency or cancel out an excess in the aggregate resulting from a *change in the standard* of any item upon which prices are collected, to ensure that such changes shall not be wrongly recorded by the index as *variations* in prices. The published "mass units", however, still continue to show the correct *relative* consumption "weights" actually applicable to the commodities and services in the regimen for the *constant standards* used in the index. (*See also* § 2 (3) and 6 (3) of this chapter.)

In the case of Food and Groceries (Group I.) the "weights" adopted are approximately the annual average consumption per head for household purposes of the various articles during the years 1927 to 1929. The "weights" allotted to items in Clothing (Group III.) and Household Drapery (Section K of Group IV.) are based largely on the results of the inquiries of the Royal Commission on the Basic Wage, which reported in 1920 and 1921. After exhaustive inquiries the Commission published a "regimen" for an average working family of five persons, and set out the constituent items in its "Indicator List". This list, so far as it related to the articles in question was followed substantially in the original compilation of the "C" Series Index, and has been adjusted by subsequent investigations of the Bureau to accord with changes in popular usage. The "weights" allotted to the items were not adjusted to take account of war-time shortages or rationing, and the index therefore measured war-time price changes in relation to a normal (or pre-war) apportionment of household expenditure. (*See* § 2 (5) and § 8 (3) of this chapter.)

3. **Relative "Aggregate Expenditure" of Items and Groups.**—In the *base period* of the index (the years 1923 to 1927) the relative importance of each of the four main groups expressed as a percentage of the weighted average "aggregate expenditure" in the Six Capital Cities (from which all relative index-numbers are derived) was as shown in the third column of the following table. Although the "weights" of each item in the regimen are kept virtually constant, the relative "aggregate expenditure" of the various items and groups varies from time to time as relative prices change.

The percentage distribution for Melbourne in the *base period* was practically identical with that of the Six Capital Cities as a whole, and has continued to be representative of the relative movement of prices in the capital cities up to the present time. For this and other reasons, therefore, the percentage distribution of the Melbourne "aggregate expenditure" has been published in previous issues of this publication, and the figures for December Quarter, 1951, are shown in the fourth column of the table for comparison with those of the *base period*.

Group.	Section.	Proportion of Aggregate Expenditure.			
		1923–27 (Base). Six Capital Cities.		Dec. Qtr., 1951. Melbourne.	
		%		%	
I. Food and Groceries	A Groceries	17.44	38.66	13.82	41.36

	N Other Miscellaneous	10.54		8.74	
			100.00		100.00

4. **Base Periods of the Indexes.**—The base period originally adopted by the Bureau for its retail price indexes was the year 1911. When the collection of the prices of clothing and miscellaneous items was undertaken for the purposes of the "C" Series Index, the month of November, 1914, was adopted as the base period for this series. The desirability of computing retail price indexes to a new base was considered by a Conference of Statisticians in 1929, and it was resolved that from 1st January, 1930, the five years 1923–27 should be adopted as the base period, and since this date the retail price indexes

have been published on this base. The aggregate to which all index-numbers are related is the weighted "aggregate expenditure" of the regimen in the six capital cities during the period taken as base, expressed as an index-number of 1,000. Conferences of Statisticians in 1949 and 1950 left consideration of the adoption of a new base period to be made in conjunction with the next general review of the index. In the *Monthly Review of Business Statistics* the index is recomputed with the three years ended June, 1939 as base.

§ 7. Tabular Statements of Retail Price Index-Numbers.

1. **General.**—The results of inquiries into price movements are available as follows :—

(i) *Monthly.* The *Monthly Review of Business Statistics* contains annual, quarterly and monthly index-numbers to the latest available date.

(ii) *Quarterly.* A statement is issued about three weeks after the end of each quarter giving the "C" Series index-numbers for that quarter and immediately preceding quarters in respect of each of the 30 cities and towns originally adopted and for certain other towns, e.g., Canberra, for which the "C" Series index-numbers are now compiled. The *Quarterly Summary of Australian Statistics* contains annual, quarterly and monthly index-numbers to the latest available date. This publication also contains the average prices of the items of food and groceries for each month of the last available quarter, in the 30 towns covered by the investigation. Particulars of movements in certain avarage rents of 4 and 5-roomed houses in these towns are also shown therein.

(iii) *Annual.* The *Labour Report* contains index-numbers for past years, and the monthly and quarterly results for recent years. The average prices for the last year of the items of food and groceries and house rents are also published in this report. This publication contains information similar to, but in less detail than, that published in the *Labour Report.*

2. **All Items ("C" Series) Retail Price Index.**—On page 380 published a table of weighted averages for the six capital cities combined of "C" Series index-numbers, together with index-numbers for each of the four main groups of items in the "C" Series Index for each year 1914 to 1951 and quarterly for the years 1939 and 1947 to 1951.

In the pages immediately following are published :—

(i) the "C" Series index-number for the last quarter of each year 1939 and 1946 to 1951 (page 387) and for the month of November of each of the years 1914 to 1920 (page 388), for each capital city and for the six capital cities combined, and showing also separate indexes for each of the four main groups of items ; and

(ii) the "C" Series index-number for November, 1914, 1921 and the years 1929, 1939 and 1946 to 1951 (page 389) for each of the 30 towns with the weighted averages for each State, the six capital cities and 30 towns, together with index-numbers for the same periods for four additional towns for which this index is tabulated.

ALL ITEMS ("C" SERIES) RETAIL PRICE INDEX-NUMBERS(a): CAPITAL CITIES.

3. **"B" Series Retail Price Index: Food, Groceries and Rent.**—This index measures the prices of food and groceries and the rent of 4 and 5-roomed houses. It was first compiled for the year 1925, and retrospectively for several earlier years. It was designed to replace the "A" Series Index (food, groceries and rent of all houses), which was the original index compiled in 1912. The first of the two tables following is split up into the various sections of the regimen, and covers only the six capital cities,

while the second represents the whole regimen and covers the 30 Towns included in the tabulation of the " B " Series Index, with the weighted averages for the 5 towns in each State, the Six Capital Cities and the 30 Towns.

RETAIL PRICE INDEX-NUMBERS(*a*): CAPITAL CITIES—" B " SERIES.

(*Base of each Section : Weighted Average of Six Capital Cities*, 1923–27 = 1,000.)

§ 8. Changes in the Regimen.

1. **General.**—Since the original compilation of retail price indexes by the Bureau in 1912, the regimens of the several groups and sections have undergone some modifications. These are fully described in *Labour Report* No. 39 for 1950, pp. 32–35. These changes are made from time to time with a view to improving the index-numbers as measures of price variations. They comprise chiefly the elimination or replacement of articles no longer in demand, or which experience had shown to be unsuitable media for the measurement of price variations; the alteration of units of quantity in certain cases to conform with those most in general use; the adjustment of the mass unit allotted to certain articles to bring them into accord with present-day consumption habits; the

re-adjustment of the population and household weights applicable to the several groups and sections of the regimen in accordance with general Census results; and improved methods of collecting and weighting average house rentals.

2. **Method of Effecting Changes.**—Changes of the nature mentioned are commonly made in price indexes without seriously impairing their continuity. In accordance with established principles of procedure in changing the regimen (see *Labour Report* No. 9, Appendix I., Part II., paragraphs 14 and 18), the general level of the index is taken as determined by the old regimen for the quarter in which the change is made, and the new regimen is used to measure variations in the price-level after that date. The linking up of the index-numbers on the old and the new basis is effected by the usual method of equating the respective weighted aggregate costs of the old and the new regimens in the six capital cities.

There are two methods of effecting this, as follows :—Up to June Quarter, 1942, all such changes were made by equating the new aggregate of the section embodying the changes to the former aggregate. This course was adopted when items were added to or omitted from the regimen, and when a change was made in the standard of any item. From September Quarter, 1942, however, all changes of standard were effected mainly by an appropriate adjustment of the "mass unit" or "weight" so as to preserve the percentage weight which the item carried in the aggregate from time to time and, wherever possible, the "weight" of any item dropped from the regimen was transferred to an article of a similar nature which would serve as a more appropriate medium for the measurement of the variations in the price of the article dropped than the remaining items of the section. The "mass units" of the remaining items under the former procedure were in effect proportionately increased to carry the aggregate of the item dropped, or reduced to admit a new item added. (*See also* par. 2 on page 384.)

While the foregoing involves no break of continuity in the index-numbers for the six capital cities as a whole, upon the basis of which all such changes are effected, slight alterations of the relative positions of individual towns are inevitable on account of the alteration of former standards. The effect, however, is more noticeable in the group index-numbers than in those covering a combination of groups, wherein the losses and gains tend to balance out.

3. **The Regimen under War Conditions.**—Although war conditions produced some variations from normal consumption in 1940 and 1941 it was not until 1942 (*see also* § 2 (5) of this chapter) that fundamental changes began to occur. As there explained, the years 1942, 1943 and 1944 produced temporary changes of a far-reaching character which, if permanent and stable, must have necessitated fundamental re-adjustments in the regimen and mass units of the index. But the resultant changes in the index would have been so extensive as virtually to create a new index which would not have been continuously comparable with the "C" Series Index as compiled either pre-war or post-war. Consideration of the matter led to the conclusions—

- (i) that it was desirable to continue the "C" Series Index substantially on its pre-war regimen in order to ensure continuity of comparison of price movements on a clearly defined basis;
- (ii) that it was impossible to reconstruct the "C" Series Index to take account of recurrent temporary departures from normal consumption.

4. **The Regimen since 1945.**—The "C" Series Index was reviewed at the Conferences of Commonwealth and State Statisticians in 1949 and 1950. The resolutions of the 1949 Conference were reprinted on page 157 of *Labour Report* No. 38, while those of the 1950 Conference were reprinted on page 161 of *Labour Report* No. 39.

§ 9. Retail Price Indexes and Basic Wage Variations.

Two distinct procedures are adopted by the Commonwealth Court of Conciliation and Arbitration in fixing and varying basic or living wages as follows :—

- (i) The Court periodically *fixes* the amount of wage in the light of evidence submitted by parties appearing before it. Such evidence usually covers a wide range of facts as to economic conditions.

(ii) Having determined the amount of basic wage the Court further determines whether or not it shall be subject to automatic adjustment for changes in price level and, if so, by what method such *variation* shall be made. This again is decided in the light of evidence and of representations by the parties concerned

The "C" Series Index is used by the Court to derive the "Court" series of retail price index-numbers upon which the basic* portion of the wages prescribed in awards is varied automatically for changes in price levels quarterly, half-yearly or yearly. These are commonly referred to as "cost of living adjustments" although in fact they relate only to that part of the *change in cost of living* which is due to variations in prices. The Court itself determines from time to time at public sittings the amount of the basic wage, having regard to evidence submitted in relation to other aspects of "cost of living" and other relevant considerations. In fixing the amount of the basic wage the Court does not have regard to either the regimen used in compiling the retail price index or the cost of such regimen. The regimen of the index would not be suited to such a purpose.

The considerations upon which the basic wage is fixed are set out in successive judgments of the Court and briefly summarized in Chapter III. (§ 4) of the *Labour Report*. On this matter, reference should be made to the Basic Wage Judgments of the Court, particularly those of 1934, 1937, 1941 and 1950, and to the general statement of principles set out in the judgment on the "Munition Workers' Case" of 1943. Certain State industrial tribunals use the index-numbers directly for automatic or quasi-automatic adjustments of the rates of wages determined by them as tribunals, while some State tribunals have regard to the index-numbers and other factors in considering what "cost of living" variations they should make in rates of wages.

The use of indexes by industrial authorities for purposes of adjusting rates of wages for changes in price level is a practice of long standing, dating in the case of the Commonwealth Court of Conciliation and Arbitration, for example, back to the year 1913. The tribunals form their own judgment as to relevance of the indexes to their purposes, and periodically hear the representatives of employers and employees on the issues involved, including questions as to whether the index is satisfactory for the purposes to which it is applied by the tribunal. In such proceedings the Statistician or his officers are called at times as witnesses on questions of fact and technical matters relating to the indexes.

The automatic adjustments in wages prescribed in awards of the Court on the basis of retail price index-numbers are sometimes referred to as "cost of living" adjustments and the index is popularly referred to as a "cost of living index". This at times creates misconceptions as to the nature of the retail price index since the term "cost of living" connotes not only change in cost of living due to changes in prices, but also changes in cost of living due to changes in standard of living. Beyond that, use of the term "cost of living" index sometimes creates the erroneous impression that the retail price index purports to embrace all that should be included in a desirable standard of living. As pointed out in paragraph 4, page 377, of this chapter, the "C" Series Index is a retail price index of specific meaning. As there indicated the regimen or list of items, on which the index is based, is representative of a high proportion of the expenditure of wage-earner households. While this statement remains broadly true, it relates (in the circumstances of 1951) more specifically to what may be termed the basic wage portion of wage-earner expenditures. The index has hitherto been used by industrial tribunals to provide automatic adjustments in the basic wage itself and, until December, 1950, to a basic wage which did not vary very much in real terms of purchasing power in relation to "C" Series units. In 1950 and especially in 1951 various factors produced both a steep rise in prices and an increasingly wide dispersion of price movements as affecting consumer expenditures on items within and without the index. There has been arising concurrently a tendency to assume, without inquiry, that the index (constructed primarily to measure the incidence of price changes on expenditures from incomes at or about basic wage level) is equally applicable to such diverse matters as measuring the changing incidence of price variations on secondary or marginal portions of wages, on total wages or on total incomes in groups considerably higher than the basic wage, and even on money settlements in some business transactions. While such assumptions may be reasonably reliable during periods in which all prices tend to move together, they should not be made at any time without due inquiry and particularly not in periods (such as the present) when price movements are very marked and are subject to wide dispersion.

---

* The "needs" portion only was adjustable from July, 1937, to December, 1950.

Reference should be made to *Labour Report* No. 39 for the actual Automatic Adjustment Scales used for the adjustment of the Commonwealth basic wage.*

B. WHOLESALE PRICES AND PRICE INDEXES.

§ 1. General.

Two indexes of wholesale prices have been compiled by the Bureau. These are :—

(i) The Melbourne Wholesale Price Index ;

(ii) The Wholesale Price (Basic Materials and Foodstuffs) Index.

Particulars of the Melbourne Wholesale Price Index, which is now obsolescent, are given in § 3 commencing on page 397 of this chapter.

After reviewing the regimen and weighting of this index the 1930 Conference of Statisticians resolved that a new index of wholesale prices of basic materials and foodstuffs should be compiled. This index—the Wholesale Price (Basic Materials and Foodstuffs) Index—which extends back to the year 1928 and is compiled monthly, is a special purpose index and one of a series of Wholesale Price Indexes designed for special purposes.

§ 2. Wholesale Price (Basic Materials and Foodstuffs) Index.

1. **Price Quotations.**—The prices used in the index have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets.

Commodities in the index are priced in their primary or basic form wherever possible and in respect of imported materials as nearly as may be at the point where they first make effective impact on the local price structure. Thus the price of imported goods is not taken at the time of import, but rather on an ex-bond (or into factory) basis.

Broadly, where home-consumption prices exist for local products, they have been used in this index. During the year 1950–51 wool for local manufacture was subsidized. Whilst the home-consumption price for wool was used to calculate the index-numbers shown in the body of the table (*see* paragraph 4), footnotes to the table show the index calculated on the basis of open market prices for wool (*see* paragraph 5).

2. **Commodities and Grouping.**—For purposes of this index "basic" materials (as opposed to certain of the Foodstuffs) are commodities in the primary or basic forms in which they first enter into productive processes carried out in Australia. The regimen comprises 80 commodities, divided into seven main groups. Each group is sub-divided into goods which are mainly imported, and goods which are mainly home-produced. A full list of these commodities is set out below, showing the quantity-multipliers (weights) for each commodity, and the percentage of the total aggregate value in 1950 contributed by each commodity and group.

3. **Method of Construction.**—The index is constructed on the simple aggregative fixed-weights formula. The weights (quantity-multipliers) are based on estimates of the average annual consumption of the commodities in Australia during the period 1928–29 to 1934–35 inclusive. Changes in usage, changes of category as between "imported" and "home-produced" as affecting some commodities, and changes in the industrial structure have affected the validity of some of the weights in the index. These and other problems (e.g. dual prices for some commodities) are being examined with a view to revision of the regimen, its grouping and weighting, when conditions are more stable.

---

(*a*) Represents only such imported commodities as are included in the wholesale price index. This index does not measure changes in price of imports generally. (*b*) These index-numbers are computed using the price of raw wool for local manufacture. For computation using the auction room price of wool *see* paragraph 5.

NOTE.—The figures given in this table are comparable in the vertical columns but are not directly comparable horizontally.

5. **Effect of Wool Bounty.**—Legislation which became effective on 14th December, 1950, had the effect of reducing (by bounty) the price paid for raw wool for local manufacture in Australia below the open market (auction room) price. Such reductions were virtually retrospective to August, 1950, and continued until 30th June, 1951. The effective prices paid for raw wool for local manufacture (i.e. auction room price less bounty) have been used in calculating the index-numbers shown in the table above. The following table shows these same indexes calculated on the auction room prices for wool. Only the four columns marked (*b*) in the table above are affected, and only these are shown below.

§ 3. Melbourne Wholesale Price Index.

1. **General.**—An index of Melbourne wholesale prices was first computed in 1912. It relates chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that date. Neither the component items of the regimen, nor the weighting have been varied. Consequently, the index is outmoded for current use and is a measure of variations in wholesale prices based on the weighting originally determined. It has some historic significance as a measure of changes in the prices of its component items combined in the proportions in which they were in common use about the year 1910. It is now published only on an annual basis and is mainly used as an approximate indication of long term trends since the year 1861, for which it was first compiled. A description of the index and a list of the commodities included in it were published on pages 43 to 45 of *Labour Report* No. 38 for 1949.

2. **Index-numbers.**—Index-numbers for each group of commodities as well as for all groups combined are shown in the following table :—

MELBOURNE WHOLESALE PRICE INDEX-NUMBERS.

(*Base of each Group : Year* 1911 = 1,000.)

Year.	I. Metals and Coal.	II. Wool, Cotton, Leather, etc.	III. Agricultural Produce, etc.	IV. Dairy Produce.	V. Groceries.	VI. Meat.	VII. Building Materials.	VIII. Chemicals.	All Groups.

NOTE.—The figures given in this table are comparable in the vertical columns but are not directly comparable horizontally.

(*a*) Computed using, for wool, the effective home-consumption price. This group index-number computed using the auction room price for wool is 6,079 (*see* paragraph 5 on page 397). (*b*) The regimen and weighting of the original Building Materials group of this index has become unreal. The movement shown here for this group between 1949 and 1950 has been calculated in accordance with the movement occurring in the Building Materials group of the Basic Materials and Foodstuffs Index. (*c*) Computed using, for wool, the effective home-consumption price. The all groups index-number computed using the auction room price for wool is 3,921.

C. CONTROL OF PRICES DURING AND SINCE THE 1939-45 WAR.

1. **General.**—An account of the measures taken by the Commonwealth Government to control prices from September, 1939 (immediately after the outbreak of war), until 29th May, 1948 (the date of the Prices Referendum), is given in Official Year Book No. 37, pp. 458–464.

2. **Transfer of Price Control to the States.**—Consequent upon the rejection of the proposal embodied in the Prices Referendum held on 29th May, 1948, that permanent power to control rents and prices (including charges) be conferred on the Commonwealth Government, responsibility for price fixation was assumed by the State Governments and steps were taken to pass State Prices Acts. These acts were proclaimed to operate simultaneously on 20th September, 1948. Except in the case of Queensland, each Act was to remain in force for a specific period, but the period varied from State to State.

An amendment of the National Security (Prices) Regulations on 15th September, 1948, provided that the Minister may, by declaration published in the *Gazette*, declare that from and including a date specified prices for the sale of goods and rates for the supply of services in a State or Territory of the Commonwealth specified in the declaration would cease to be controlled under the Regulations. In pursuance of this power, the Minister for Trade and Customs issued declarations on 17th September, 1948, providing for the relinquishment of price control by the Commonwealth in the States as from 20th September, 1948.

On 20th September, 1948, each State Government issued declarations covering uniform lists of goods and services, which were brought under price control. Existing Commonwealth Prices Regulation Orders continued to apply to these goods and services until specially varied in accordance with the terms of the State legislation. At the same time, the Commonwealth Government issued an identical list of declared items to operate in the Australian Capital Territory and other Territories of the Commonwealth.

In the operation of State price control, the State Prices Commissioners closely collaborate. Conferences of Commissioners are held at intervals of approximately two months. The Commissioners are vested with certain powers of price control under the Prices Acts, and it is the usual procedure after the administrative conference for State Prices Ministers to meet to discuss matters of policy and any specific questions referred to them for determination. Thus a large degree of uniformity is attained in controlling and decontrolling items and in the fixation of margins and prices of major items.

3. **Price Stabilization.**—Expenditure by the Commonwealth Government on Price Stabilization Subsidies reached a peak in 1947–48 and since then the Commonwealth Government has progressively reduced the range of commodities eligible for subsidy.

In addition to those subsidies which had been an integral part of the Price Stabilization Plan, the Commonwealth Government paid bounties and subsidies for assistance to primary production, and these payments also had a stabilizing influence on prices.

For details of expenditure by the Commonwealth Government on Price Stabilization and other Subsidies and Bounties, see Chapter XVII.—Public Finance.

D. WAGES.

§ 1. Operations under Wages Board and Industrial Arbitration Acts.

Particulars regarding operations under the Commonwealth and State Acts for the regulation of wages, hours and conditions of labour were first compiled for the year 1913, and reviews to the end of each annual period appear in the *Labour Reports* up to and including No. 36, in the *Quarterly Summaries of Australian Statistics* up to and including No. 190 and in previous issues of the Official Year Book (*see* No. 37, p. 465). Owing to the lack of comparability between States, which rendered the figures of doubtful value and to difficulties encountered in the collection of these statistics they have been discontinued.

§ 2. Rates of Wage and Hours of Labour.

1. **General.**—The collection of information respecting the current rates of wage payable in different callings and in occupations in various industries was first undertaken by this Bureau in the early part of 1913. The particulars are obtained primarily from awards, determinations and agreements under Commonwealth and State Industrial Acts, and are therefore the minimum rates prescribed. They refer generally to the capital city in each State, but in industries which are not carried on in the capital cities, e.g., mining, agriculture, etc., the rates in the more important centres are taken. In cases where no award, determination, or agreement is in force, particulars are taken of the ruling union or predominant rate. During recent years the number of predominant rates of wage included in the tabulations has been reduced considerably, as most of the industries and occupations are now covered by awards, determinations, or industrial agreements. The figures of nominal wages and hours are in course of revision to meet changes in industrial structure. The amounts should not be regarded as actual current averages, but as an index of changes expressed in money and hour terms.

The index-numbers for male adult workers are computed with the weighted average wage in 1911 as base (= 1,000). In the case of females, however, it has not been possible to secure information for the years prior to 1914, and the index-numbers are therefore computed with the weighted average rate of wage payable to adult female workers in Australia at 30th April, 1914 as base (= 1,000).

An extensive tabular presentation of the minimum rates of wage for adult male and female workers in the main occupations in the capital city of each State is given each year in the Appendix to the *Labour Report*.

2. **Weekly Rates of Wage, 1939, 1946 to 1950.**—(i) *General*. The average rate of wage for each industrial group is computed by taking the arithmetic average of the rates of wage payable for all classified occupations within that group. These averages are weighted to give the average for the States and for Australia.

(ii) *Adult Males—States*. The following table gives the weighted average nominal weekly rates of wage payable to adult male workers at the dates specified :—

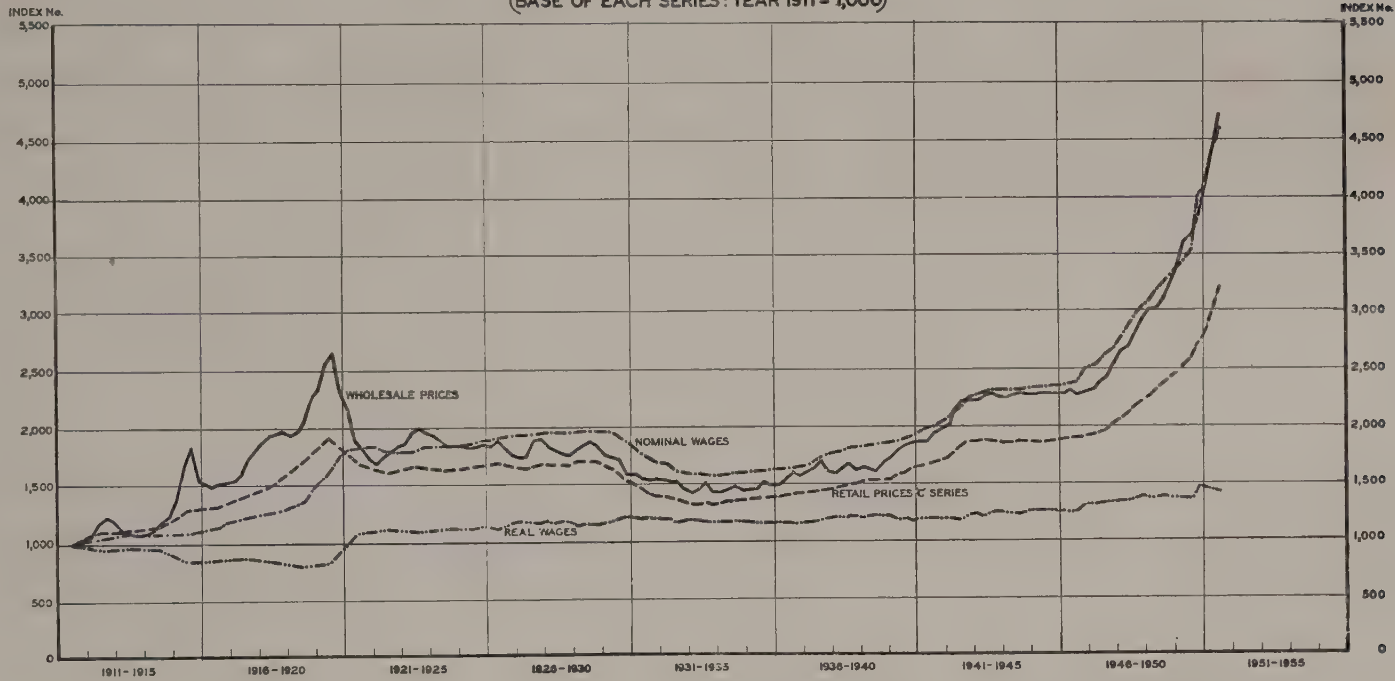
31st December, 1950 ..	4,088	3,989	3,900	3,911	4,064	3,895	4,009

(a) The figures of nominal wages and hours of labour are in course of revision to meet changes in industrial structure. The amounts shown should not be regarded as actual current averages but as an index of changes expressed in money and hour terms. (b) As at 31st December, 1950.

During the early war years nominal weekly wages advanced annually in each State, the greatest increase occurring in 1942 (11 per cent. for Australia), followed by an increase of 3 per cent. in the following year, after which they remained comparatively stable until the fourth quarter of 1946 when they advanced 5.4 per cent. due mainly to the increase in the "needs" wage granted by the Commonwealth Court of Conciliation and Arbitration in its judgment of 13th December, 1946. With the relaxation of the Wage Pegging Regulations and the end of Price Stabilization wages rose rapidly during 1947 and subsequent years. At the end of 1950 the upward movement was accelerated as a result of the Basic Wage increases which followed the 1949–50 Basic Wage Inquiry (*see* page 415).

WHOLESALE AND RETAIL PRICES, NOMINAL, AND EFFECTIVE OR REAL WAGES—INDEX-NUMBERS AUSTRALIA, 1911 TO 1951

(BASE OF EACH SERIES: YEAR 1911 = 1,000)



EXPLANATION.—The index-numbers in the graph above are for the Six Capital Cities as a whole, with the exception of those for Wholesale Prices up to the fourth quarter of 1927, which are for Melbourne. They are all calculated to the common base 1911 = 1,000, the scale for which appears on the left of the graph. The wholesale prices graph shows the trend of prices according to the "old" Melbourne Index up to the fourth quarter of 1927, but thereafter, this index having been "spliced" with the Basic Materials and Foodstuffs Index, the curve line moves in accordance with the variations of the latter. The price quotations for this index are, in the main, obtained from Melbourne sources, but their movements may be taken as representative of fluctuations in most Australian markets. Points in this graph are plotted quarterly from 1912 onward. The "C" Series Retail Price index-numbers (food, groceries, rent of 4 and 5-roomed houses, clothing and miscellaneous household expenditure) are shown *quarterly* from 1925. For the period 1911–1914 the "C" Series index-numbers are taken back from the true base (November, 1914 = 1,000) by means of the "A" Series Index (Food and Rent of All Houses). Nominal Wages are shown *quarterly* from 1914, and Real Wages *quarterly* from 1925. Real wages are computed on the basis of the "C" Series Retail Price Index.

Male wages at 31st December, 1950, were 115.7 per cent. higher than in December, 1939, and 68.7 per cent. higher than in September, 1946.

(iii) *Adult Males—Industrial Groups.* The following table shows for Australia the average weekly rates of wage and index-numbers in each industrial group and for all groups at the dates specified.

WAGE RATES OF ADULT MALES.

WEIGHTED AVERAGE NOMINAL WEEKLY RATES FOR A FULL WEEK'S WORK AND INDEX-NUMBERS OF WAGE RATES IN EACH INDUSTRIAL GROUP(*a*).

NOTE.—Index-numbers for each industrial group and for all industrial groups are based on the average wage for all groups in 1911 (51s. 3d.) = 1,000. The index-numbers in this table are comparable throughout :—

(*a*) *See* note (*a*) on page 400. (*b*) Includes the value of victualling and accommodation where supplied. (*c*) Includes the value of board and lodging where supplied.

The foregoing table shows that the highest average weekly wage at 31st December, 1950, was recorded in Group XI. (Shipping, etc.), 230s. 2d. per week, followed by Groups V. (Books, Printing. etc.), 228s, 9d., XII. (Agricultural, etc.), 222s. 2d., VII. (Building), 215s. 11d., VIII. (Mining, etc.), 211s., IV. (Clothing, Textiles, etc.), 202s. 10d. and III. (Food, drink, etc.), 199s. 11d. The lowest average rate was recorded in Group XIII., (Domestic, etc.), 186s. 8d. Compared with those prevailing at 31st December, 1949, rates of wage increased in all industrial groups during 1950.

(iv) *Adult Females—States.* The following table shows the weighted average nominal weekly rates of wage payable to adult female workers for a full week's work in each State and Australia at the dates specified.

(*a*) *See* note (*a*) to table on page 400. (*b*) As at 31st December, 1950.

It should be noted that the base of these index-numbers is 1914 and not 1911 as in the foregoing tables for adult males. This is because there is no tabulation for adult female rates prior to 1914.

As with the rates for males, increases were recorded in all States during the war years and after, especially after September, 1946 when female rates were increased under the National Security (Female Minimum Wage) Regulations. The weighted average rate for Australia at 31st December, 1946, had advanced by 37s. 4d. per week over that ruling on 31st December, 1933. Female rates have risen rapidly since December, 1946, partly because of the increase in marginal rates but mainly because of the increase in the female basic wage rates. The weighted average rate for Australia at 31st December, 1950 (140s. 5d.) was the highest recorded to that date and was 166.6 per cent. above the average at 31st December, 1939.

(v) *Adult Females—Industrial Groups.* The following table shows the weighted average weekly rates of wage payable in Australia to adult female workers in the industrial groups in which they are mainly employed, and in all groups combined.

(*a*) *See* note (*a*) to table on page 400. (*b*) Includes the value of board and lodging, where supplied.

During 1950 the rate of wage for female employees in each industrial group increased as follows :—III. (Food, etc.), 30s. 4d. per week ; IV. (Clothing, etc.), 29s. 9d. per week ; I. II., V. and VI. (all other manufacturing), 35s. 2d. ; XIII. (Domestic, etc.), 34s. 8d. and XIV. (Miscellaneous), 30s. 8d. The weighted average for all groups increased by 31s. 4d. per week.

3. **Relative Hours of Labour and Hourly Rates of Wage, 1939 to 1950.**—(i) *General.* The rates of wage referred to in preceding paragraphs are the minima payable for a full week's work. The number of hours constituting a full week's work differs, however, in some instances between various trades and occupations in each State, and between the same trades and occupations in the several States. To secure what may be for some purposes a better comparison, the results in the preceding paragraphs are reduced to a common basis, namely, the rate of wage per hour. Particulars as at the end of the years 1946 to 1950 compared with 1939 are given in the following table, for males and females separately in each State. These particulars relate to (*a*) the weighted average nominal weekly wage ; (*b*) the weighted average number of working hours constituting a full week's work ; and (*c*) the weighted average hourly wage. The weighted average weekly wage relates to all industrial groups combined and includes the value of board and lodging where supplied in land occupations, and the value of victualling and accommodation where supplied in marine occupations, whereas the number of working hours and the hourly wage relate to all industrial groups other than Groups XI. (Shipping), and XII. (Agricultural, Pastoral, etc.). Some of the occupations included in these groups are of a casual or seasonal nature, and the hours of labour are not generally regulated either by awards or determinations of industrial tribunals or otherwise, hence the necessary definite particulars for the computation of the average number of working hours are not available.

The downward tendency in hours of labour for Australia commenced in the December quarter of 1924, when the weighted averages were 46.66 for males and 46.02 for females, and, excepting for slight increases in 1929 and 1930, the reduction has continued. During the second half of 1947 hours for males and females in New South Wales were reduced owing to the introduction of the forty-hour week in occupations under the jurisdiction of State arbitration. In Australia generally, the forty-hour week operated from 1st January, 1948 and was responsible for substantial reductions in hours in that year. The weighted averages for Australia at 31st December, 1950 were 39.96 hours for males and 40.00 hours for females.

The general effect of reducing the rates of wages to a common basis (i.e., per hour) is to eliminate any difference between the several States which may be due to unequal working time.

(ii) *Adult Males and Females.* Particulars of the weekly and hourly wages and hours of labour for adult males and females at the close of the years 1946 to 1950 compared with 1939 are given in the table hereunder.

(*a*) *See* note (*a*) to table on page 400. (*b*) Weighted average weekly rate for all industrial groups combined. (*c*) Weighted average working hours per week (excluding overtime), and computed hourly rates of wage for all industrial groups excepting Groups XI. (Shippng, etc.), and XII. (Agricultural, Pastoral, etc.) Working hours have not been generally regulated by industrial tribunals for some of the occupations classified in industrial groups XI. and XII.

(iii) *Index-numbers.* The effect of changes in hours of labour on the hourly rate of wage as compared with the general increase in the weekly wage is readily seen from the comparative index-numbers for all classes combined given in the following table. It should be noted that these comparative index-numbers for males and females are on the 1914 base as against the 1911 base of the earlier tables for adult males. This is because there is no tabulation for adult female rates prior to 1914 :—

INDEX-NUMBERS OF WEEKLY AND HOURLY WAGE RATES AND WEEKLY HOURS OF LABOUR : ADULT WORKERS.(*a*)

(*Base : Weighted Average for Australia, 30th April,* 1914* = 1,000.)

4. **Nominal and Effective Wages.**—(i) *General.* Index numbers of wage rates are said to be *nominal* when they represent changes in the wage rates themselves but are described as *effective* or *real* when they represent changes in equivalent purchasing power, that is, the purchasing power of the corresponding wages in terms of some definite composite unit or regimen the cost of which can be ascertained at different times. The relation between *nominal* and *effective* or *real* wages was discussed at some length in *Labour Report* No. 6, and was also referred to in *Labour Report* No. 11.

Since it is possible to measure purchasing power over more than one composite unit or regimen it is equally possible to convert any given nominal wage series into more than one series of effective or real wages. Prior to 1936 it was the practice of this Bureau to compute effective wage index-numbers by dividing the nominal wage index-numbers by the corresponding retail price index-numbers for food, groceries and rent of all houses (" A " series). While wage rates were generally varied on the basis of the " A " series index-numbers there was a good deal to be said for this procedure. When the Commonwealth Court abandoned the " A " series, the merits of the " C " series for " deflating " nominal wage rates were strengthened and real wages to the end of 1937 were measured in terms of their purchasing power over both regimens. Since 1938 when computations of the " A " series was discontinued, real wages have been measured in terms of their purchasing power over the " C " series only. The " C " series covers food, groceries, rent of four and five-roomed houses, clothing and miscellaneous household requirements.

(ii) *Nominal Weekly Wage Index-numbers, Adult Males,* 1911 *to* 1950—*States.* The following table shows for the period 1911 to 1950 the weighted average nominal weekly rates of wage payable for adult males in each State, the weighted average rate for Australia in 1911 being taken as the base (= 1,000). These results are based generally upon rates of wage prevailing in the capital city of each State, but in certain industries, such as mining, rates are necessarily taken for places other than the capital cities. The index-numbers for 1911 are based on rates current at the end of December, annual averages not being available. For 1914 and subsequent years, however, the index-numbers are based on the average rates current at the end of the four quarters of each year :—

(iii) *Effective or Real Wage Index-numbers, Adult Males,* 1911 *to* 1950—*States.* In obtaining the effective wage index-numbers in the following table, the nominal wage index-numbers shown above have been divided by the corresponding retail price index-numbers for the capital city and multiplied by 1,000. Since the " C " series index-numbers were not compiled for periods prior to November, 1914, it has been assumed that fluctuations between 1911 (the base of the table) and 1914 in the " C " series would have been similar to the fluctuations observed in the " A " series. A table showing effective or real wage index-numbers from 1901 to 1937 measured in terms of purchasing power over the " A " series regimen appeared in earlier issues of the Official Year Book, *see* No. 37, page 473.

EFFECTIVE OR REAL WAGE INDEX-NUMBERS: ADULT MALES (FULL WORK).

Measured in terms of purchasing power over the " C " series regimen.

(*Base : Weighted Average Real Wage in Australia in* 1911 = 1,000.)

In the table above, the effective wage index-numbers are computed to the one base, that of Australia for 1911. As the index-numbers are comparable in all respects, comparisons may be made as to the increase or decrease in the effective wage index-number for any State over any period of years.

(iv) *Effective or Real Wage Index-numbers,* 1901 *to* 1950—*Australia.* In the following table similar index-numbers are given for Australia as a whole under both the "A" and "C" series. These are obtained by dividing the nominal wage index-numbers for Australia for the year concerned by the corresponding retail price index-numbers for the six capital cities and multiplying by 1,000.

(a) Not available.

NOTE.—For years prior to 1914 the nominal wage index-numbers relate to the end of the year only, but from 1914 onwards these figures, in addition to those for retail prices, are averages for the whole year.

§ 3. Basic Wages in Australia.

1. **General.**—Basic wages in Australia are fixed by various industrial tribunals operating under Commonwealth and State Arbitration Acts, and are varied from time to time according to changes in cost of living, constitution of the family unit, etc. In the industrial legislation of New South Wales, Queensland, South Australia and Western Australia, provision is made for the tribunals appointed under the Acts to determine the basic rates of wage to be paid to adult unskilled workers. In Tasmania provision for the

declaration of a basic rate of wage is not included in the industrial Acts in force. The Wages Board system operates in this State, and each Wages Board determines the rate of wage to be paid to the unskilled worker when the determination for an industry or calling is under review. In Victoria, however, while the same Wages Board system exists, the Factories Act obliges Wages Boards to adopt Commonwealth Award rates and conditions "which such Boards are under the Factories and Shops Acts empowered to include in their determinations." As the power of the Commonwealth Arbitration Court is limited by the Constitution to the settlement, by conciliation and arbitration, of industrial disputes extending beyond the limits of any one State, no similar provision respecting the determination of a basic wage is to be found in the Commonwealth Conciliation and Arbitration Act. In practice, the Court does declare a Commonwealth basic wage, and uses the wage so declared as a basis for all awards made by it in the exercise of its jurisdiction, except in the case of awards made for Whyalla and Iron Knob where the basis of awards has, since 1947, been the South Australian "living" wage plus 5s. That is, upon a new basic wage being declared, the awards made in the settlement of all interstate industrial disputes are re-opened and amended accordingly. In addition to the "basic" wage, these tribunals also determine what is known as the "secondary" wage—"the extra payment to be made for trained skill or other exceptional qualities necessary for an employee exercising the functions required."* The term "minimum" wage, as distinct from the "basic" wage is used to express the lowest rate payable in a particular industry, and is either equal to, or greater than, the "basic" wage.

2. **The Commonwealth Basic Wage.**—(i) *Early Judgments.* The doctrine of a basic wage was propounded as far back as 1890 by Sir Samuel Griffith, Premier of Queensland, and the same principle was enunciated in the New South Wales Arbitration Court in somewhat similar terms by Mr. Justice Heydon in 1905. In spite, however, of these pronouncements and the fact that wage-fixing tribunals had been in operation as early as 1896 (in the State of Victoria), it was not until 1907 that the first basic wage, as such, was declared by a Court in Australia. This was made by Mr. Justice Higgins, President of the Commonwealth Court of Conciliation and Arbitration, and it was defined as the lowest wage which can be paid to an unskilled labourer on the basis of "the normal needs of an average employee regarded as a human being living in a civilized community."† This declaration was made by way of an order in terms of Section 2 (*d*) of the Excise Tariff 1906 in the matter of an application by H. V. McKay, of the Sunshine Harvester Works, Victoria, from which was derived the title of the "Harvester Wage" by which it is popularly known. The rate of wage declared in this case was 7s. per day or £2 2s. per week for Melbourne, the amount considered reasonable for "a family of about five."‡ The constituent parts of this amount were £1 5s. 5d. for food, 7s. for rent, and 9s. 7d. for all other expenditure.

The "Harvester" basic rate was adopted by the Commonwealth Arbitration Court for incorporation in its awards, and practically the same rates continued until 1913, when the Court took cognizance of the retail price index-numbers, covering food and groceries and rent of all houses ("A" series), for the 30 more important towns of Australia, which had been published by the Commonwealth Statistician for the first time in the preceding year. These index-numbers had been taken back to 1901, with the year 1911 as base, and disclosed not only considerable percentage increases since 1907, but also large disparities in the relative purchasing power of money in the various towns. The basic rates for towns were thereafter fixed largely on their respective index-numbers, taking the index-number 875 for Melbourne for the year 1907 as being equivalent to the "Harvester" rate of 42s. per week, or the base of the index (1,000) as being equivalent to 48s. per week. Exceptions were made in the case of many country towns, where certain "loadings" were applied to counterbalance their lower index-numbers due to cheaper rentals.§

---

* Mr. Justice Higgins—*A New Province of Law and Order.*

† Ibid.

‡ *See* page 414 for Court's interpretation in 1940 Basic Wage Inquiry of the "family unit".

§ As these indexes covered only about 60 per cent. of household expenditure, a low index due to low rentals would wrongly presume low costs in the remaining uninvestigated 40 per cent. of household expenditure and *vice versa*.

In 1922 an amount known as the "Powers' 3s."* was added as a general "loading" to the weekly wage for the purpose of securing to the worker during a period of rising prices the full equivalent of the "Harvester" standard. In the same year the system was instituted of making regular quarterly adjustments of the basic wage to accord with variations in purchasing power as disclosed by the "A" Series retail price index-numbers, and of basing the adjustments on the index-number for the quarter in place of that for the previous calendar year or the year ended the preceding quarter.

The Commonwealth Conciliation and Arbitration Act provides that the "basic" wage, or any alteration therof including the principles on which it is computed, together with any variation or interpretation of any award involving any such alteration, shall be considered by a Court constituted by the Chief Judge and not less than two other Judges, and must be approved by a majority of the members of that Court. By a judgment of the High Court on 21st April, 1933, the "basic" wage is taken to mean, for the foregoing purpose, not only the "Harvester" wage but any "loadings" forming part of the primary wage of an unskilled labourer. A "loading" is defined as an addition to the "basic" wage as compensation for some peculiar condition of labour or environment, and not by way of "margin for skill". The wage payable for skilled labour is assessed on the basis of the "basic" wage, including "loadings".

The adequacy or otherwise of the "Harvester" standard has been the subject of much discussion, the author of the judgment himself urging on several occasions the need for its review. The abnormal conditions during and for some time after the 1914–18 War hindered such a review which was regarded as less urgent by reason of the fact that wages throughout Australia were being automatically adjusted to changes in retail prices. A Royal Commission (referred to later) was appointed in 1919 to assess a basic wage, but its recommendations were not carried out.

No change was made in the method of fixation and adjustment of the basic wage until the onset of the depression which began to be felt severely during 1930. Applications were then made to the Court by employers for some greater measure of reduction of wages than that afforded by the automatic adjustments to falling retail prices. An account of the proceedings which resulted in the Court reducing all wages under its jurisdiction by 10 per cent. from 1st February, 1931, is given in *Labour Report* No. 23, page 74. Reference is also made to the Court's refusal in June, 1932, and May, 1933, to remove this special reduction.

(ii) *Basic Wage Inquiry*, 1934. The "Harvester" standard, adjusted to retail price variations, continued as the theoretical basis of the wage of the Commonwealth Court until 30th April, 1934, when it was superseded by a judgment delivered on 17th April, 1934, full particulars of which appear in Official Year Book No. 29, 1936, page 545. The basic wage declared on this occasion (subsequently referred to as the "Needs" Basic Wage 1934) was as follows for the six capital cities :—

	s. d.		*s. d.*
Sydney	67 0	Adelaide	64 0
Melbourne	64 0	Perth	66 0
Brisbane	61 0	Hobart	67 0

Six Capital Cities, 65s. 0d.

A comparison for the capital cities of the basic rates granted by the judgment and those ruling under previous practices of the Court is given in Official Year Book No. 38, p. 426.

The 10 per cent. special reduction in wages referred to above ceased to operate upon the introduction of the new rates, and the basis of the periodical adjustments to retail price variations was transferred from the "A" and the "D" Series to the "C" Series of index-numbers which covers Food and Groceries, Rent of 4-roomed and 5-roomed

---

* Awarded by Mr. Justice Powers in the Gas Workers' Case.

Houses, Clothing, Fuel, Light, Household Utensils, Household Drapery, Fares, and other Miscellaneous household requirements. The base of the index (1,000) was taken by the Court as equal to 81s. per week. This gave the above rates for the capital cities on the basis of their respective index-numbers. In effect, the new rate for the six capital cities was the same as that previously paid under the "A" Series, without the "Powers' 3s." and without the 10 per cent. reduction. Certain towns gained and others lost in comparison with rates under the "A" Series, owing to the different relationship of towns under the "A" and the "C" Series.

(iii) *Basic Wage Inquiry*, 1937. In May, 1937, the Commonwealth Court heard an application by the combined unions for an increase in the basic wage. The unions asked that the equivalent of the base (1,000) of the "C" Series Index be increased from 81s. to 93s. which on current index-numbers would have represented an average increase of about 10s. per week. The hearing extended from 10th May to 4th June, 1937, and the Court delivered judgment on 23rd June. The chief features of the judgment were :—

(*a*) Various amounts were added to the basic wage not as an integral, and therefore adjustable, part of that wage, but as "loadings" on the rates payable under the "shilling table" as determined by the 1934 judgment. The latter was referred to in the judgment as the "needs" portion of the total resultant basic wages. The "loadings" and resultant "total basic wages" for the six capital cities were as follows :—

City.	"Needs" Basic Wage.	"Loading."	Total Basic Wage.
	s. d.	*s. d.*	*s. d.*
Sydney	72 0	6 0	78 0
Melbourne	69 0	6 0	75 0
Brisbane	68 0	6 0	74 0
Adelaide	68 0(*a*)	4 0	72 0
Perth	70 0(*a*)	4 0	74 0
Hobart	70 0(*b*)	4 0	74 0
Six Capitals	70 0	5 0	75 0

(*a*) An additional 1s. was actually being paid under the "2s. minimum adjustment" provision.
(*b*) One shilling less was being paid under the "2s. minimum adjustment" provision.

(*b*) The basis of the adjustment of wages in accordance with the variations shown by retail price index-numbers was transferred from the "C" series to a special "Court" series based upon the "C" series (*see* page 393).

(*c*) Female and junior rates were left for adjustment by individual Judges when dealing with specific awards.

The main parts of the judgment are reprinted in Official Year Book No. 30, and in *Labour Report* No. 28, p. 77.

(iv) "*Lag*" *in Adjustments*. The Commonwealth Court on 10th December, 1939 heard an application by the unions that the date of adjustment of the basic wage in accordance with the variations in the "Court" Series of index-numbers be brought nearer to the period upon which the variation was based. In a judgment delivered on the same day the Court directed that such adjustments be made one month earlier. The effect, therefore, was to make future adjustments operative from the beginning of the first pay-period to commence in a February, a May, an August or a November.

(v) *Basic Wage Inquiry*, 1940. On 5th August, 1940 the Full Court commenced the hearing of an application by the combined unions for an increase in the existing basic wage by raising the value of 1,000 (the base of the "C" Series Index upon which the "Court" Series are based) from 81s. to 100s. per week, and the abolition of the existing "Prosperity Loadings", which would be regarded as incorporated in the new rate mentioned. Judgment was delivered on 7th February, 1941, the Court unanimously refusing to grant any increase, and deciding that the application should not be dismissed but stood over for further consideration after 30th June, 1941. The application was refused mainly owing to the uncertainty of the economic outlook under existing war conditions (*see* (vi) following). Extracts from the judgment were published in earlier issues of the Official Year Book (*see* No. 38, p. 428) and the *Labour Report.*

In regard to the popular idea that the basic wage of the Commonwealth Court of Conciliation and Arbitration was identified with a specific family unit, the Chief Judge made the following statements to clarify the position: "The Court has always conceded the 'needs' of an average family should be kept in mind in fixing a basic wage. But it has never as the result of its own inquiry specifically declared what is an average family or what is the cost of a regimen of food, clothing, shelter and miscellaneous items necessary to maintain it in frugal comfort, or that a basic wage should give effect to any such finding. In the end economic possibilities have always been the determining factor . . . . . . What should be sought is the independent ascertainment and prescription of the highest basic wage that can be sustained by the total of industry in all its primary, secondary and ancillary forms . . . . More than ever before wage fixation is controlled by the economic outlook".

The Chief Judge also suggested that the more logical system would be to grade the basic wage according to family responsibilities by means of a comprehensive system of child endowment, and that if a scheme of this nature were established, as recently announced by the Commonwealth Government,* future fixations of the basic wage would be greatly simplified.

(vi) "*Interim*" *Basic Wage Inquiry*, 1946. As the result of (*a*) an application made on 30th October, 1946 (during the course of the Standard Hours Case) by the Attorney-General for the Commonwealth for the restoration to the Full Court List of certain adjourned 1940 basic wage applications (*see* (v) above), (*b*) a number of fresh cases which had come to the Court since 1941, and (*c*) an application by the Australasian Council of Trade Unions on behalf of the unions for an "interim" basic wage declaration, the Court, on 25th November, 1946, commenced the hearing of this case. The case ended on 10th December, 1946 and judgment was delivered on 13th December, 1946 whereby an increase of 7s. per week was granted in the "needs" portion of the basic wage then current and based on the weighted average "Court" index-number for the Six Capital Cities (as a whole) for the September quarter, 1946. This had the effect of raising the base (1923-27) index-number of the "Court" Series Index from 81.0 to 87.0, the corresponding "needs" basic wage from 81s. to 87s. per week, and the current rate for the Six Capital Cities as a whole from 93s. to 100s. per week. All "loadings" on the basic wage were retained at their existing amounts until otherwise ordered by the Court.

The immediate monetary effect was to increase by 7s. per week the basic wage in each of the capital cities (with the exception of Hobart, where the increase was 6s.), and in most of the other towns or combinations of towns—the position of the index-number for a town in the new Automatic Adjustment Scale (on the new base rate of 87s.) determining whether the increase was 7s. or 6s. The date of operation for the majority of workers affected was the beginning of the first pay-period commencing in the month of December, 1946, in certain industries as from 1st December, 1946 and for certain other groups of workers from dates fixed by Judges dealing with individual applications for the increase.

Further details of this judgment may be obtained from *Labour Report* No. 38, page 79.

---

* Legislation covering a scheme to become operative on 1st July, 1941, was actually passed by the Commonwealth Parliament on 3rd April, 1941—*see* page 425 for details.

(vii) *Basic Wage Inquiry* 1949–50. This case really finalized the case begun in 1940 and continued in 1946 (*see* above). After certain procedural matters had been disposed of in February, 1949, and later dates, the general hearing of the Unions' claims was commenced on 17th May, 1949. Evidence was completed on 22nd August, 1950, and the three judges (Kelly, *C.J.*, Foster and Dunphy, *J.J.*) delivered separate judgments on 12th October, 1950.

In 1946 the Chief Judge ruled that the claim for an increase in the basic wage should be heard concurrently with the "40-Hour Week" claims then before the Court. The Unions, however, objected to this course being followed, and, on appeal to the High Court, that Court in March, 1947, gave a decision which obliged the Arbitration Court to proceed with the "Hours" case to its conclusion without the interpolation of the contemporaneous hearing of the Basic Wage case.*

In the judgments of 12th October, 1950, which were in the nature of general declarations, a majority of the Court (Foster and Dunphy, *J.J.*) was of the opinion that the basic wage for adult males should be increased by £1 per week, and that for adult females should be 75 per cent. of the adult male rate. Kelly, *C.J.*, dissenting, considered that no increase either in the male or female wage was justified.

On 24th October, 1950, and 23rd November, 1950, the Court made further declarations regarding the "Prosperity Loading" of 1937 (*see* page 413) which was being paid at rates between 3s. and 6s. per week according to localities, etc., and the future basis of quarterly adjustments. The "Prosperity Loading" was standardized at a uniform rate of 5s. per week for all towns and was declared to be an adjustable part of the basic wage. The Court also declared that the "War Loading" was not part of the basic wage.

With regard to other "loadings" the Court on 17th November, 1950 proceeded to examine the individual awards in the claims before it, for the purpose of determining to what extent such "loadings" formed part of the basic wage. The members of the Court, earlier in the hearing, had given interim opinions for the guidance of the parties as to the meaning of the definition of "basic wage" in section 25 of the Conciliation and Arbitration Act, the majority view being that it would be necessary to examine each award and to ascertain either from the award itself or other sources whether "loading" additions were part of the basic wage or not. It should be noted that any "loading" declared to be part of the basic wage ceased to be paid as a separate entity, but apart from the special case of the Australian Capital Territory there were very few "loadings" which fell within this category.

The first payment of the new rates was expressed to operate from the beginning of the first pay period in December, 1950, by way of a flat-rate addition of £1 5s. in all cases to the "needs" rate (2nd series) on the indexes of September quarter, 1950. This £1 5s. comprised the £1 addition announced on 12th October, 1950, and the "Prosperity Loading" (first instituted in 1937) now standardized at 5s. in all relevant cases.

The Court decided to create a new Court Series Index for automatic variation of the new basic wage in accordance with future variations in retail prices. The first automatic quarterly adjustment of the new basic wage on this basis became operative from the beginning of the first pay period commencing in February, 1951, on the basis of the index numbers for the December quarter, 1950.

The basic wage rate for the Six Capital Cities (Weighted Average) arrived at by the Court after applying the foregoing declarations was £8 2s., comprising £6 17s. "needs" (2nd Series) plus 5s. uniform "Prosperity Loading" plus the £1 addition. For the purpose of determining the corresponding rates to be paid in respect of individual cities and towns, and combinations thereof, and their future automatic adjustment, this new rate of £8 2s. was equated to the "C" Series retail price index-number 1572 for the Six Capital Cities (Weighted Average) for September quarter, 1950. From this was derived the new "Court" Index—in future to be known as the "Court" Index (Third Series)—with 103.0 equated to 1000 in the "C" Series Index.

(*a*) Rates include "prosperity loadings" where applicable. (*b*) Generally from the beginning of the first pay period commencing in the month indicated.

3. **Australian Territories.**—A full account of the bases upon which the basic wages are determined in the Australian Capital Territory and in the Northern Territory (both north and south of the 20th parallel of South Latitude) may be found on pages 89 to 96 of *Labour Report* No. 39 for 1950.

In the Australian Capital Territory the rates payable as from the beginning of the first pay period in November, 1951, were £10 6s. for adult males and £7 14s. 6d. for adult females.

In the Northern Territory there are two basic wages operating, one in respect of areas north of the 20th parallel of South Latitude, generally referred to as the "Darwin" rate and the other in respect of areas south of that parallel and extending down to the 26th parallel (the "Port Augusta" rate).

The basic wage rates payable as from the beginning of the first pay period in November, 1951, were :—" Darwin " rate, adult males, £10 10s., adult females, £7 17s. 6d. ; " Port Augusta " rate, adult males, £10 10s., and adult females, £7 17s. 6d.

In addition to the above rates special loadings were prescribed in Northern Territory awards following the fixation of the new basic wage rates operative from November, 1951.

4. **Basic Wage Rates for Females.**—Reference should be made to *Labour Report* No. 39, 1950 (page 86) for a statement of the general principles followed by the Commonwealth Court of Conciliation and Arbitration in fixing basic wage rates for females in relation to those of males.

5. **State Basic Wages.**—(i) *New South Wales.* The first determination under the New South Wales Industrial Arbitration Act of a standard "living" wage for adult male employees was made on 16th February, 1914, by the Court of Industrial Arbitration. The Board of Trade was established in 1918 with power to determine the "living" wage for adult male and female employees in the State. The Board made numerous declarations from 1918 to 1925, but ceased to function after the Industrial Arbitration (Amendment) Act 1926 established the Industrial Commission of New South Wales, which exercised the powers of the Board of Trade as from 15th April, 1926.

The adult male rate was determined on the family unit of a man, wife and two children from 1914 to 1925 ; a man and wife only in 1927, with family allowances for dependent children ; and a man, wife and one child in 1929, with family allowances for other dependent children. With the adoption in 1937 of the Commonwealth basic wage referred to below, however, the identification of a specified family unit with the basic wage disappeared.

Employees in rural industries are not covered by the rates in the table referred to below ; a wage for rural workers of £3 6s. per week was in force for twelve months from October, 1921, and a rate of £4 4s. operated from June, 1927, to December, 1929, when the power of industrial tribunals to fix a living wage for rural workers was withdrawn.

A table showing the variations in the living wages determined by the industrial tribunals of New South Wales up to 27th April, 1937 was published in previous issues of the Official Year Book (*see* No. 37, page 481). Since 27th April, 1937, changes have been made automatically in accordance with the procedure outlined in the next paragraph, and the latest current rate payable will be found in the table in sub-par. vi., page 424.

Following on the judgment of the Commonwealth Arbitration Court referred to on page 413, the Government of New South Wales decided to make the State Basic Wage accord with the Commonwealth rates ruling in the State, and secured an amendment of the Industrial Arbitration Act to give effect thereto. The Act (No. 9 of 1937) was passed on 7th October, 1937, and came into operation from the commencement of the first pay period in October, practically from 1st October, 1937. The general principles laid down by the Commonwealth Court were followed as closely as practicable, and provision was made for the automatic adjustment of wages in conformity with variations in retail prices as shown by the Commonwealth Court's " All Items " Retail Price Index-numbers, shortly known as the " Court " Series of Index-numbers. The Commonwealth Court's principle of treating the " prosperity loadings " as a separate and non-adjustable part of the total basic wage was adopted. The basic rate for adult females was fixed at 54 per cent. of the adult male rate to the nearest sixpence. The provisions of the main Acts for the periodic declaration of the living wage by the Industrial Commission were repealed, but the amending Act placed on the Commission the responsibility of altering all awards and agreements in conformity with the intentions of the new Act ; to define boundaries within which the various rates are to operate ; and to specify the appropriate " Court " Series retail price index-numbers to which they are to be related.

The judgment of the Commonwealth Court of Conciliation and Arbitration on 12th October, 1950 necessitated attention by the legislature to the clauses of the Industrial Arbitration Act providing for the automatic adjustment of rates of pay based on the Commonwealth Basic Wage Judgment of 23rd June, 1937.

An amendment to the Industrial Arbitration Act was assented to on 23rd November, 1950 which empowered the Industrial Commission to vary the terms of awards and industrial agreements affecting male rates of pay, to the extent to which the Commission thought fit, to give effect to the alteration in the basic wage for adult males made by the Commonwealth judgment. In the case of female rates of pay the Commission was empowered to review the terms of awards and industrial agreements and to vary such terms as in the circumstances the Commission decided proper, but no variation was to fix rates of pay for female employees lower than the Commonwealth basic wage for adult females.

To facilitate the work of the Commission, awards were divided into separate classes, and orders issued regarding the variations to be made to those in each class. The rates for adult males were increased by the same amounts as the corresponding Commonwealth rates, with special provision to cover the cases of apprentices, casual workers and employees on piecework. In deciding the variation for female employees the Commission prescribed an increase in the total wage rate (i.e. basic wage plus marginal rate) of £1 4s. 6d. per week subject to the statutory provision (incorporated in the amendment of 23rd November) that the minimum total rate was to be not less than the basic wage for adult females prescribed in Commonwealth awards, that is, at least 75 per cent. of the corresponding male basic wage rate.

In the judgment delivered on 9th March, 1951, giving reasons for its decision on female rates, the Commission decided that the basic wage for adult females prescribed by the Commonwealth Court in reality included a portion "due to secondary considerations," and could not be considered a "reasonable and proper basic wage for the assessment of rates of female employees under the Industrial Arbitration Act".

In discussing the composition of the amount of £6 3s. 6d., which the Commonwealth Court in its judgment of October, 1950 had prescribed as the basic wage for adult females in New South Wales, the Commission stated "After giving the matter fullest consideration, we think in the circumstances it is reasonable to allocate £1 of the said sum of £6 3s. 6d. to secondary considerations and to regard the amount of £1 4s. 6d. as an addition proper to be made to the pre-existing basic wages in New South Wales of £3 19s. The total, £5 3s. 6d., becomes therefore the true female basic wage in New South Wales. To state the decision the Commission has reached in other words, the commission assesses the true basic wage or foundational wage which it is proper to apply when adjusting, or in the course of making future awards assessing rates of female employees under the Industrial Arbitration Act, as £5 3s. 6d. per week."

As a consequence of the overriding statutory requirement that no rate for adult females in State awards shall fall below the Federal basic wage for adult females, the amount of the quarterly adjustments to the female basic wage for changes in the "Court" series index numbers is the same in Federal and State awards.

By an amendment of the Industrial Arbitration Act in June, 1951, the differentiation in rates for the basic wage in different districts and for employees under Crown awards was eliminated as a general rule, making the basic wage throughout the State equal to that paid in Sydney, with the main exception of the Broken Hill district where a different basic rate still prevails.

The basic wage rates applicable in the metropolitan area from the beginning of the first pay period commencing in November, 1951, were £10 7s. per week for adult males and £7 15s. for adult females.

The principle of supplementing wages by a payment in respect of dependent children under fourteen years of age was operative in New South Wales from July, 1927 until superseded by the Commonwealth Government Scheme operative from 1st July, 1941, and a brief account of the main features of the system appears in Official Year Book No. 37, pp. 485–6.

(ii) *Victoria and Tasmania.* A State basic rate of wage is not declared in Victoria and Tasmania. In these States the Wages Board system of wage fixation is in operation, and each Board determines the minimum rate of wage to be paid in the industry or calling under review. In the majority of cases the practice of the Commonwealth Arbitration Court of adjusting wages in accordance with variations in retail prices has been followed in the past by these bodies. In the case of Victoria, by amendments of the Factories and Shops Act No. 4275 of 1934 and No. 4461 of 1936, it is obligatory on all Wages Boards to adopt provisions of Commonwealth Awards "which such Boards are empowered under the Factory and Shops Acts to include in their determinations". The Secretary of Labour is also empowered under this Act to make adjustments of wages according to variations in retail price index-numbers without calling the Board together.

In accordance with the decisions of the Commonwealth Court of Conciliation and Arbitration to increase the male and female basic wages from December, 1950 (*see* page 415) the Wages Boards in both States met and incorporated the new Commonwealth rates in their determinations. The Commonwealth weekly adult male rate operative from the beginning of the first pay period commencing in November, 1951, was £9 19s. for Melbourne and £9 19s. for Hobart. Female basic wages are 75 per cent. of these rates.

(iii) *Queensland.* The first formal declaration by the Industrial Arbitration Court in this State of a basic wage was gazetted on 24th February, 1921. Prior to this declaration the rate of £3 17s. per week for adult males had been generally recognized by the Court in its awards as the basic or living wage. The basic wage is nominally intended to provide for the needs of a man, his wife and three children. The variations in the adult basic wages determined by the Industrial Arbitration Court up to 1st April, 1937, were published in previous issues of the Official Year Book (*see* No. 37, page 482). Variations since that date are shown below :—

BASIC WAGE VARIATIONS IN QUEENSLAND. (*State Jurisdiction.*)

Date of Operation.	Adult Basic Wage.					
	Male.			Female.		
	£	s.	d.	£	s.	d.
1st April, 1938	4	1	0	2	3	0
7th August, 1939	4	4	0	2	5	0
31st March, 1941	4	9	0	2	8	0
4th May, 1942 (*a*)	4	11	0	2	9	6
23rd December, 1946 (*b*)	5	5	0	3	0	6
7th December, 1950 (*b*)	7	14	0	5	2	6

(*a*) Quarterly adjustments provided by judgment of 21st April, 1942—*see* below. (*b*) Consequent upon basic wage increases granted by the Commonwealth Court of Conciliation and Arbitration.

The rates shown above are applicable throughout the Southern Division (Eastern District), which includes the metropolitan area ; allowances are added for the following divisions—Northern (Eastern District), 10s. ; Northern (Western District), 17s. 4d. ; Mackay, 5s. 6d. ; and Southern (Western District), 7s. 4d. Half of these allowances are granted to females.

On 15th April, 1942, the Court declared the rates operative from 31st March, 1941 as adequately meeting the requirements of Section 9 of the Industrial Conciliation and Arbitration Act 1932, having regard to the level of the "C" Series (All Items) Retail Price Index for Brisbane for the December quarter, 1941. In order to ensure, however, that it would continue to do so under present exceptional conditions, the Court decided to make a quarterly declaration of the basic wage on the basis of the variations in the "cost of living" as disclosed by the "C" Series Index for Brisbane, commencing with the figures for the March quarter, 1942. This declaration was duly made by the Court on 21st April, 1942, at the rates of £4 11s. for adult males, and £2 9s. 6d. for adult females. Since then, quarterly adjustments have been made to the basic wage in accordance with changes in the "C" Series (All Items) Index.

In view of the "interim" basic wage judgment of the Commonwealth Court of Conciliation and Arbitration in December, 1946 (*see* page 414), the Queensland Industrial Court granted increases of 7s. and 5s. in the basic wages for adult males and adult females respectively to operate from 23rd December, 1946.

Following the decision of the Commonwealth Court of Conciliation and Arbitration to increase the male and female basic wages from December, 1950 (*see* page 415) the Industrial Arbitration Court of Queensland conducted an inquiry as to what change should be made to the State basic wage for Queensland. By a majority decision on 30th November, 1950, the Industrial Court granted an increase of 15s. weekly to both adult males and adult females thus increasing the metropolitan rates to £7 14s. per week and £5 2s. 6d. per week respectively operative from 7th December, 1950. The new male rate of £7 14s. corresponded to the Federal basic wage for the Brisbane metropolitan area and this parity has since been maintained although the dates on which the quarterly changes become operative do not necessarily correspond with those prescribed for Commonwealth awards. The new female rate of £5 2s. 6d. represents 66 per cent. of the male rate instead of 63 per cent. (approximately) as previously, and this 66 per cent. determines the basic wage payable to adult females. The judgment of the Queensland Industrial Court may be found in the supplement to the Queensland Industrial Gazette, Vol. 35, No. 4, page 1253.

The rates payable in accordance with regular quarterly variations from 29th October, 1951, were £9 5s. for adult males and £6 3s. for adult females.

(iv) *South Australia.* The Industrial Code 1920–1950 provides that the Board of Industry shall after public inquiry declare the living wages to be paid to adult male and female employees. The Board has power also to fix different rates to be paid in different defined areas.

The family unit is not specifically defined in the Code, but the South Australian Industrial Court in 1920 decided that the average employee in respect of whom the living wage is to be declared is a man with a wife and three children.

The first declaration by the Board of Industry was made on 15th July, 1921, when the living wage for adult male employees in the metropolitan area was determined at £3 19s. 6d. per week.

Following on the declaration of an "interim" increase in its "needs" basic wage by the Commonwealth Court of Conciliation and Arbitration on 13th December, 1946 (*see* p. 414) the South Australian Parliament, by virtue of the Economic Stability Act No. 52 of 1946, and other enabling powers, provided for the Governor, by proclamation, to declare the "daily living wage" for adult males in the metropolitan area to be one-sixth of the Commonwealth weekly basic wage for this area (102s. per week, inclusive of the "prosperity loading" of 4s.) and to be operative from 7th January, 1947. The Act mentioned also provided for similar proclamations in respect of any adjustment of such wage, but the powers of the Board of Industry to declare a "living wage" were retained, and any such wage so declared will supersede that declared by proclamation.

The variations in the living wages determined by the Board of Industry up to 25th November, 1937, were published in previous issues of the Official Year Book (*see* No. 37, page 483). Variations since that date are shown below :—

19th May, 1949	6	5	0	3	8	6

(*a*) Commonwealth rate for metropolitan area adopted.

The Industrial Code Amendment Act No. 65 of 1949 made provision for the quarterly adjustment of the "living wage" in accordance with the variations in the Commonwealth basic wage consequent on the changes in the Court Series index of retail prices for Adelaide. In effect this resulted in parity between the State living wage and the Commonwealth basic wage from the beginning of the first pay period commencing in February, 1950.

The prescribed adjustment to the female "living wage" was seven-twelfths of the same adjustment to the Commonwealth male basic wage.

The Board of Industry retained power to amend the "living wage" but any new "living wage" was to be adjusted quarterly as above.

Following the decisions of the Commonwealth Court of Conciliation and Arbitration in the 1949–50 Basic Wage Inquiry (*see* page 415), the South Australian legislation was amended to enable, *inter alia*, the "living wage" to be altered by proclamation "in order to avoid unjustifiable differences between rates of wage fixed under Commonwealth and State laws respectively".

By proclamation dated 30th November, 1950, the South Australian Living Wage in the metropolitan area was increased from £6 17s. to £7 18s. for adult males and from £3 14s. 11d. to £5 18s. 6d. for adult females, operative from 4th December, 1950. These new rates were identical with the December rates fixed by the Commonwealth Court of Conciliation and Arbitration for the metropolitan area of South Australia.

There was thus an increase of £1 1s. per week for adult males and £2 3s. 7d. for adult females. The larger increase for females was attributable to the change in the percentage of the male rate upon which the female rate was based. Previously the female rate had been approximately 54 per cent. of the male basic wage but by the proclamation the female basic wage was increased to 75 per cent. of the corresponding male rate.

The rates payable in accordance with the quarterly adjustments notified by the President of the Board of Industry operating from the beginning of the first pay period commencing in November, 1951, were £9 15s. per week for adult males, and £7 6s. for adult females.

(v) *Western Australia.* The Industrial Arbitration Act 1912–1950 provides that the Court of Arbitration may determine and declare a basic wage at any time on its own motion and must do so when requested by a majority of industrial unions or by the Western Australian Employers' Federation, with the limitation that no new determination shall be made within twelve months of the last preceding inquiry.

The term "basic" wage is defined in the Act as "a wage which the Court considers to be just and reasonable for the average worker to whom it applies". In determining what is just and reasonable the Court must take into account not only the "needs of an average worker" but also the "economic capacity of industry" and any other matters the Court deems relevant.

Provision is also made in the Act for quarterly adjustments of the "basic" wage by the Court of Arbitration when an official statement supplied to the Court by the State Government Statistician relating to the cost of living shows that a variation of 1s. or more per week has occurred, compared with the preceding quarter. These adjustments apply from the dates of declaration by the Court.

The first declaration of the basic wage by the Court of Arbitration, since the authority to fix one was vested in the Court in 1925, was made on 11th June, 1926. The family unit is not specifically defined in the Act, but it has been the practice of the Court to take as a basis for its calculations a man, his wife and two dependent children. The variations in the annual declarations of the Court of Arbitration up to 1937 were published in previous issues of the Official Year Book (*see* No. 37, page 484). Annual and special declarations since 1937 are shown in the following table :—

(*a*) Applicable from 24th April, 1939. (*b*) Applicable from 28th April, 1941. (*c*) Special declarations following basic wage increases granted by the Commonwealth Court.

The increased basic wage of 26th February, 1947 was granted after an inquiry by the Western Australian Court of Arbitration consequent upon the "interim" basic wage judgment of the Commonwealth Court of Conciliation and Arbitration in December, 1946 (*see* page 414).

Following the judgment of the Commonwealth Court of Conciliation and Arbitration in the 1949–50 Basic Wage Inquiry (*see* page 415) the Western Australian Court of Arbitration resumed an inquiry which had been adjourned, to ascertain what change should be made in the State basic wage rates. In its judgment of 7th December, 1950 the Court decided that the basic wage should be increased by £1 per week for adult males and by 15s. per week for adult females. The rates in the metropolitan area then became £8 6s. 6d. for adult males and £4 14s. 1d. for adult females operative from 18th December, 1950.

In relation to the female rate the Unions' claim had been for a basic wage equal to 75 per cent. of the male rate instead of the existing 54 per cent. basis. Although this claim was not granted it was intimated that the increase of 15s. should not necessarily be regarded as the Court's final word on the subject.

The judgment of the Court may be found on page 336 of the Western Australian Industrial Gazette, Volume 30, No. 3–4.

As the result of a subsequent inquiry the basic wage for adult females was increased to 65 per cent. of the corresponding male rate, operative from 1st December, 1951. This was subject to the condition that the increase should be offset by the reduction in or deletion of existing margins between the basic wage and the total wage as specified by the appropriate award or determination.

The rates payable in the metropolitan area in accordance with the quarterly adjustments declared by the Court, operative from 22nd October, 1951 are £10 5s. 8d. for adult males and £5 16s. 3d. for adult females.

(vi) *State Basic Wage Rates.* The " basic " wage rates of State industrial tribunals operative in November, 1951 are summarized in the following table :—

STATE BASIC WAGE—WEEKLY RATES.

(*a*) Operative from beginning of first pay period commencing in month shown. (*b*) None declared but rates (capital city) shown are those of Commonwealth Court of Conciliation and Arbitration which are followed to a large extent. (*c*) Allowances added for other areas :—Males—Southern Division (Western District), 7s. 4d. ; Mackay Division, 5s. 6d. ; Northern Division (Eastern District) 10s. ; Northern Division (Western District), 17s. 4d. ; Females—half of these allowances. (*d*) Increased female rates operative from 1st December, 1951 as follows :—Metropolitan area, 133s. 8d. ; South-West Land Division, 133s. ; Gold-fields and other areas, 137s. 1d. The increase in the basic wage element for females in December, 1951 was partly offset by a decrease in the margin between the basic wage and total wage.

6. **Royal Commission on the Basic Wage, 1920.**—Only one comprehensive attempt has been made by the Commonwealth authorities to ascertain specifically what the actual requirements were in the various States according to reasonable standards of comfort, including all matters comprised in the ordinary expenditure of a household in respect of a family consisting of a man, wife and three children under fourteen years of age.

The attempt referred to was made by a Royal Commission which in its report, issued in 1920, recommended the following amounts for the various capital cities :—

	£ *s.* *d.*
Sydney	5 17 1
Melbourne	5 16 6
Brisbane	5 6 2
Adelaide	5 16 1
Perth	5 13 11
Hobart	5 16 11
Six Capitals (Weighted Average)	5 15 8

The recommendations of this Commission were not carried out owing largely to the marked advance of the amounts suggested over ruling rates* and the grave doubts expressed as to the ability of industry to pay such rates.

---

* The " Harvester " equivalent for Melbourne at the time (September quarter, 1920) was £4 13s. per week, but only £3 18s. to £4 2s. was being paid on the basis of an annual index-number.

§ 4. Child Endowment in Australia.

1. **General.**—The principle of supplementing wages by a payment in respect of dependent children under sixteen years of age became prominent in Australia following the recommendations of the Royal Commission on the Basic Wage of 1920, and was implemented in Australia as described in the following paragraphs. The system has been in force in various forms in England and on the Continent as far back as 1795, the first instance occurring in England in that year.

2. **National Scheme.**—The Commonwealth Government, in June, 1927, called a conference in Melbourne of the Premiers of the several States to consider the question from a national standpoint. The Prime Minister submitted various estimates of the cost of endowing dependent children under fourteen years of age in Australia at 5s. per week. After discussion, it was decided to refer the matter to a Royal Commission, to be appointed by the Commonwealth Government.

The Commission submitted its report on 15th December, 1928. It was not unanimous in its findings, and the opinions and recommendations of the members were embodied in two separate reports, which dealt exhaustively with the constitutional aspects, existing systems, industrial legislation, the basic wage, standard of living, regulation of wages, working conditions and cognate matters.

At the conference of Commonwealth and State Ministers held in Canberra in May, 1929, the Prime Minister stated that the Commonwealth Government was not prepared to adopt the scheme financed entirely from the proceeds of taxation, as had been recommended in the minority report. The Commonwealth Government agreed with the majority of the Commission that child endowment could not be separated from the control of the basic wage—a power which the Commonwealth did not possess and which the States were not prepared to relinquish. The Government, therefore, did not propose to establish any system of child endowment. It was generally agreed that any scheme which would increase the charges upon industry would be unwise at that particular time. The matter of child endowment was accordingly left to be dealt with as the State Governments should think proper.

The findings and recommendations in the *majority* and *minority* reports are given in *Labour Report*, No. 19.

In 1941, the Commonwealth Government introduced a scheme of child endowment throughout Australia. The necessary legislation* was introduced into Parliament on 27th March, and finally passed on 3rd April, and came into operation from 1st July, 1941. As amended to date (November, 1951) its main features are as follows :—

(*a*) Any person who is a resident of Australia and has the custody, care and control of one or more children under the age of 16 years, or an approved institution of which children are inmates shall be qualified to receive an endowment in respect of each child.

From the 20th June, 1950, the rates of endowment have been :—

- (i) where the endowee has one child only, 5s. per week ;
- (ii) where the endowee has two or more children—in respect of the elder or eldest child, 5s. per week and in respect of each other child, 10s. per week ;
- (iii) in the case of the endowee being an approved institution the rate is 10s. per week for each child inmate.

(*b*) There are provisions to cover cases of families divided by reason of divorce, separation, death of a parent or other circumstances. In such cases payment may be made to the father, mother, or other person.

---

* Act No. 8, 1941 (Child Endowment Act) as amended by No. 5, 1942, and Nos. 10 and 41, 1945 (now incorporated in Part VI. of the Social Services Consolidation Act 1947–1950); Act No. 2, 1941 (Pay-roll Tax Assessment Act); and Act No. 3, 1941 (Pay-roll Tax Act).

A child born during the mother's temporary absence from Australia is deemed to have been born here.

There is a twelve months' residential requirement for claimants and children who were not born in Australia, but this is waived if the claimant and the child are likely to remain permanently in Australia.

(*c*) Endowment will be paid for the children of members of the Naval, Military or Air Forces of the United Kingdom who are serving with the Australian Forces from the time of their arrival in Australia.

(*d*) From 1st July, 1941, when the scheme was introduced the rate of endowment was 5s. per week for each child in excess of one in a family and, for each child under 16 years in an approved institution, the rate being increased to 7s. 6d. a week from 25th June, 1945, and to 10s. per week from 9th November, 1948. There is no means test.

(*e*) Endowment in respect of the first child under 16 years in a family was first provided for by an amendment of the legislation in June, 1950.

(*f*) The scheme, which formerly was financed partly from Consolidated Revenue, partly from the abolition of the exemptions from taxation in respect of children after the first, and the major part from a tax of 2½ per cent. of all pay-rolls in excess of £20 per week, is now a charge on the National Welfare Fund.

A summary of the operations under the Child Endowment Scheme from 1st July, 1946 to 30th June, 1951, is given on pp. 314–5 of Chapter IX. " Welfare Services ".

3. **Earlier Schemes.**—Consequent upon the operation of the Commonwealth Child Endowment Scheme, appropriate steps were taken for the termination of the schemes operating in the Commonwealth Public Service and in New South Wales. The Commonwealth Public Service Scheme was the first system instituted in Australia and came into operation on 1st November, 1920. In New South Wales an abortive attempt to institute the system was made in 1919 and a scheme was adopted under the Family Endowment Act 1927 which operated from 23rd July, 1927. For further details of these schemes reference may be made to the Official Year Book No. 37, pages 485 and 486.

E. EMPLOYMENT.

§ 1. Employment.

1. **Total Occupied Persons.**—(i) *General.* The following estimates of the total numbers of occupied males and females are based principally on data from the 1933 Census (June), the National Register (July, 1939), The Civilian Register (June, 1943), the Occupation Survey (June, 1945) and the 1947 Census (June). These sources of information have been supplemented by Pay-roll Tax returns, which commenced in July, 1941. Owing to some difference in coverage, 1947 figures in the following tables differ slightly from Census figures as shown in Chapter XIII. The 1947 figures are subject to revision.

(ii) *Australia.* The estimates in the table below are divided into three categories (*a*) Defence Forces ; (*b*) all persons fully occupied as employers, or as self-employed in businesses or on farms ; and (*c*) wage or salary earners fully employed, or occupied as casual, part-time, intermittent or seasonal workers. Wage earners unemployed, in the sense that they are incapacitated or have no work to go to, are excluded, as also are persons engaged on Government relief works.

All unpaid helpers in non-rural industry have been included with wage and salary earners. Male unpaid helpers in rural industry have been included with employers and self-employed persons, as it is considered that the majority of these are sons or other close relatives of farmers working in an unofficial partnership, or as learners with the farm owner. Unpaid female helpers on farms are very numerous, but their exact number is not known. Generally, they combine part-time dairy or other farm work with part-time duties in the home. Together with women occupied in unpaid home duties they have been excluded from the category of occupied persons.

Statistics of net enlistments in the Defence Forces shown in the table below represent total enlistments for full-time duty less deaths and discharges. Prior to December, 1941, men in certain age-groups were called-up for short training courses but these men are excluded from the figures. In July, 1941, the number of such men was approximately 50,000.

1947—June ..	54.0	292.7	342.6	635.3	156.3	2,309.3*d*	2,465.6*d*	3,100.9*d*	3,154.9*d*

(*a*) Includes those serving outside Australia. (*b*) Excludes approximately 50,000 men called up for short training courses. (*c*) Occupation Survey, 1st June, 1945. (*d*) Subject to revision. (*e*) Includes females, in thousands, in private domestic service as follows :—106.7 in June, 1933 ; 124.5 in July, 1939 ; 100.0 in July, 1941 ; 41.5 in June, 1943 ; 47.6 in June, 1945 ; and 40.3 in June, 1947.

From June, 1933 to July, 1939, the number of occupied persons of both sexes increased by 488,900, due to the increase of 223,700 in the number of available breadwinners and to the decrease of 265,200 in the number unemployed from 563,200 to 298,000.

During the war years from July, 1939 to June, 1943, the number of males occupied as civilians decreased by 288,000, while females occupied as civilians increased by nearly 113,000, representing a net decrease of 175,000 persons. This decrease, together with decrease of unemployment (272,000), normal increase of breadwinners (91,000) and an abnormal war-time increase of 178,000 bread-winners (persons who would not otherwise have been working), balanced the net intake into the Defence Forces at June, 1943 (716,000). The estimate of 659,000 female wage and salary earners employed in non-rural industries as at June, 1947, includes 40,300 private domestics (the Census figure). The remaining 619,000 females in the estimate include females working part-time. The 1947 Census figure for the same industries (i.e. excluding rural and private domestic) was 579,200. Persons working regularly but for considerably less than normal working hours were instructed on the Census Schedule to exclude themselves from the work force, unless their earnings from such work formed their principal means of livelihood.

(iii) *States.* The following table shows total occupied males and females in each State in July, 1939, and June, 1947, divided into Defence Forces, Employers and Self-employed, and Wage and Salary Earners.

TOTAL OCCUPIED PERSONS: STATES.

(a) Includes those serving outside Australia. (b) Subject to revision. (c) Includes Australian Capital Territory and Northern Territory.

Between July, 1939 and June, 1947, the occupied population of Australia (including Defence Forces but excluding unemployed, pensioners, retired persons of independent means and dependants) increased by approximately 14.7 per cent. The proportionate increase in each State was as follows: New South Wales, 16.1; Victoria, 14.8; Queensland, 13.8; South Australia, 12.7; Western Australia, 8.3; Tasmania, 14.3.

2. **Wage and Salary Earners in Employment.**—(i) *Australia and States.* Estimates are made monthly of wage and salary earners in employment (excluding employees in rural industry and female domestics in private homes), based on Pay-roll Tax returns and statistics of Commonwealth Government employment. Pay-roll Tax returns cover only a small proportion of wage earners on rural holdings, and practically no private domestic servants. It is not possible to obtain actual numbers of farm employees and private domestic servants except when a Census or quasi-Census such as Occupation Survey (1st June, 1945) is taken, but estimates have been made from time to time using available data. The next table shows for each State and for Australia as a whole the trend in that section of wage and salary earning employment which it is possible to estimate monthly. Figures are shown as at June, 1933 (Census) and July, 1939 (based on National Register). From July, 1941 (commencement of Pay-roll Tax returns) the estimates are available for each month, and the table shows the level in June of the years 1945, 1947 and 1948, in May, 1949, and in June, 1950 and 1951.

(*a*) Includes employees of Australian Government Authorities (Commonwealth, State and Local) and of Allied Governments. (*b*) 1st June, 1945 (Occupation Survey). (*c*) Subject to revision. (*d*) *See* note (*d*) to table on page 429.

(iii) *Factories.* Actual mid-monthly factory employment derived from the results of annual factory censuses is published in the *Production Bulletin* issued by this Bureau.

Additional tables regarding employment in factories may be found in Chapter XXIV. "Manufacturing Industry".

An index of factory employment in Australia, published in the *Monthly Review of Business Statistics*, shows that in 1950–51 factory employment was 70 per cent. higher than the average employment for the three years ended June, 1939.

3. **Employment in Retail Trade.**—Estimates of the numbers of persons employed in retail trade in Australia and each State are published in the *Monthly Review of Business Statistics*. They are based on Pay-roll Tax returns, which commenced in July, 1941.

§ 2. Unemployment.

1. **Total Persons Unemployed.**—The total number of persons unemployed has been recorded only at the dates of the various censuses. The Census records include all persons who state that they are unemployed, and distinguish between unemployment on account of sickness, accident, scarcity of work, industrial dispute, and all other causes combined. The following table sets out the number of unemployed at the Censuses of 1911, 1921, 1933 and 1947, the National Register, 1939, and the Occupation Survey, 1945. The percentage which the unemployed bore at each date to all wage and salary earners of the same sex, comprising those estimated to be in employment and those unemployed, is also shown.

UNEMPLOYMENT (ALL CAUSES): AUSTRALIA.

Year and Month.	Wage and Salary Earners Unemployed.			Proportion of Wage and Salary Earners Unemployed.		
	Males.	Females.	Total.	Males.	Females.	Total.
	'000.	'000.	'000.	%	%	%
1911—April (Census) ...	48.0	8.3	56.3	4.3	2.7	4.0
1921—April ,, ..	139.4	21.5	160.9	10.7	5.7	9.6
1933—June (*a*) ,, ..	460.2	103.1	563.3	27.9	19.1	25.8
1939—July (*b*) ..	264.0	34.0	298.0	15.0	5.7	12.6
1945—June (*c*) ...	39.9	16.2	56.1	2.7	2.3	2.6
1947—June (Census) (*d*)	66.0	16.8	82.8	3.5	2.5	3.2

(*a*) The figures shown for 1933 are in excess of those actually recorded at the Census through an allowance having been made for a number of youths and girls who would normally have been wage and salary earners, but who, on account of the economic depression, having never been employed, were not classed as wage and salary earners. (*b*) Derived from National Register, 1939. (*c*) Derived from Occupation Survey, 1945. (*d*) Persons in the work force who were not at work at the time of the Census.

The estimates and percentages of unemployment given above for periods subsequent to the Census of 1933 should be interpreted in conjunction with the notes below.

The estimates for 1939 were based on the National Register, which covered males aged 18–64 years, and data available from other sources. Owing to the use on the Occupation Survey (1945) card of the definition "a person normally working for wages but without a job on 1st June", it appears that the 1945 figures exclude some persons who were temporarily absent from their jobs at the date of the survey.

The proportion of wage earners unemployed in July, 1939, immediately prior to the 1939–45 War, was estimated at approximately 12½ per cent. In July, 1941, it was about 4 per cent. and by June, 1943, under conditions of intensive mobilization of manpower for war purposes involuntary unemployment was practically nil.

Of the numbers at the 1947 Census shown above 25.6 per cent. were not at work owing to sickness or accident and 26.6 per cent. stated that they were resting. Of the latter approximately half said they expected to resume their former jobs.

2. **Unemployment of Members of Trade Unions.**—(i) *General.* The particulars given in the following tables are based upon information furnished by the secretaries of trade unions. The percentages of unemployment derived from trade union returns are an indication of the trend of unemployment among trade unionists as estimated or recorded by secretaries of trade unions which supply returns. The membership of the unions furnishing regular reports exceeds 830,000, consisting predominantly of males and representing about 52 per cent. of the total trade union membership, and between 25 and 30 per cent. of all wage and salary earners. Unemployment returns are not collected from unions whose members are in permanent employment, such as railway and tramway employees, and public servants, or from unions whose members are casually employed (wharf labourers, etc.). Very few of the unions pay unemployment benefit, but the majority of the larger organizations have permanent secretaries and organizers who are closely in touch with the members and with the state of trade within their particular industries. In some cases unemployment registers are kept, and provision is made in the rules for payment of reduced subscriptions by members out of work. Seasonal fluctuations in unemployment have been provided for by collecting returns quarterly since 1st January, 1913. The quarterly figures relate to persons who were out of work for three days or more during a specified week in each quarter: they include persons out of work through sickness but exclude persons out of work through strikes and lock-outs, except those outside the industry who are indirectly affected. The yearly figures quoted represent the average of the four quarters.

(ii) *Summary for Australia,* 1939 *to* 1950. The following table gives a summary for Australia for the years 1939 and 1946 to 1950 and quarterly for the years 1939 and 1948 to 1950. Particulars of unemployment percentages at intervals since 1911 will be found on page 431:—

(a) Includes all members of reporting unions indirectly affected by the dispute in the coal mining industry; those directly affected are, however, excluded.

NOTE.—Similar figures for each of the four quarters of the years since 1912 will be found in the *Labour Reports.* The quarterly figures show the number of persons who were out of work for three days or more during a specified week in each quarter, and the annual figures, the average of the four quarters; the returns do not include persons out of work through strikes or lock-outs, except those outside the industry concerned who are indirectly affected.

The highest percentage of unemployed (30.0) was recorded in the quarter ended June, 1932.

(iii) *Australia, Industrial Groups,* 1949 *and* 1950. Below are shown the percentages unemployed in industrial groups. Industries or occupations in which employment is stable, such as railways, and those which are subject to exceptional fluctuations, such as wharf labour, agricultural, pastoral, etc., are not included. Other occupations—domestic, hotel employees, etc.—are included in the " Other and Miscellaneous " group, as their returns are not sufficiently representative :—

(iv) *States,* 1949 *and* 1950. In making interstate comparisons of unemployment percentages, allowances must be made for the circumstance that the industries included in the returns from trade unions are not quite identical in the various States, and that for some States the returns are more representative than for others. The State percentages shown below, therefore, should not be read as indicating the relative degree of unemployment amongst unionists in the individual States but as an indication of the trend of unemployment as reported by the trade unions.

§ 3. Commonwealth Employment Service.

The Commonwealth Employment Service was established under Section 47 of the Re-establishment and Employment Act of 1945, and under the Social Services Legislation Declaratory Act 1947.

The principal function of this Service, as set out in Section 48 of the first-mentioned Act, is to provide services and facilities in relation to employment for the benefit of persons seeking to change employment, or to engage labour, and to provide facilities to assist in bringing about and maintaining a high and stable level of employment throughout the Commonwealth. The Act also gives the Service a number of specific functions in relation to the re-establishment of ex-servicemen.

The Service also assists in the administration of the Unemployment and Sickness Benefits, provided under the Social Services Consolidation Act 1947, as well as the Re-Employment Allowance, provided under the Re-Establishment and Employment Act for certain classes of discharged members of the Forces. All persons who wish to claim unemployment benefits or re-employment allowances must register with their residential Employment Office which is responsible for checking the claim and arranging for payment of benefit, if appropriate, and if no suitable employment can be offered to the applicant.

While advice on employment problems is a function of all employment officers, the Service maintains in each State other than New South Wales, a staff of qualified psychologists providing free vocational guidance. (In New South Wales a similar service

INDUSTRIAL DISPUTES: AUSTRALIA, 1913 TO 1950

WORKING DAYS LOST

is provided by officers of the New South Wales Department of Labour and Industry and Social Welfare who act as agents for the Service in this regard.) While this Service is available to any individual, it is provided particularly for juveniles entering employment for the first time, for ex-servicemen and for physically and mentally handicapped persons. Invalid pensioners being considered by the Department of Social Services for training under the provisions of the Social Services Consolidation Act 1947–1951 are examined by the Vocational Guidance Branch before training is provided. During the twelve months ended June, 1951, the Service provided vocational guidance for 14,027 individuals.

Under the scheme operated by the International Refugee Organization for the resettlement of Displaced Persons from Europe following the 1939–45 War, the Commonwealth Employment Service is responsible for placing the workers amongst these people in employment where their services will be of most use in increasing production. Up to 30th June, 1951, a total of 98,658 Displaced Persons had been so placed.

Toward the middle of 1950 the Service assumed a new responsibility, that of placing migrants from Great Britain under the Commonwealth-Nominated Migration Scheme. The numbers coming forward under this scheme will increase as the Displaced Persons Scheme tapers off. Arrangements have also been made with the Dutch and Italian Governments to ensure a steady flow of European workers into the country.

The Service functions within the Employment Division of the Department of Labour and National Service, and is under the control of a Director of Employment. It functions on a decentralized basis. The Central Office is in Melbourne, and there are State Head Offices in each of the capital cities, with 124 District Employment Offices and Branches in suburban and the larger provincial centres, and with some 250 agents in the smaller country centres who are responsible to the various District Employment Offices. The District Offices and Branches are distributed as follows :—New South Wales, 47 ; Victoria, 32 ; Queensland, 20 ; South Australia, 10 (including Darwin) ; Western Australia, 11 ; Tasmania, 4.

The Service completed its fifth year of operation in May, 1951, and monthly average statistics of the principal items of business transacted during the year ended June, 1951, were as follows :—applicants for employment—new registrations 39,092, referred to employers 36,229, placed in employment 727,293 ; vacancies—new notifications 41,204, unfilled at end of month 121,942 ; and persons receiving advice or information 38,381.

§ 4. Industrial Disputes.

1. **General.**—Information with regard to the collection of particulars and the methods of tabulation of industrial disputes involving stoppage of work are given in previous issues of the Official Year Book, and also in the annual *Labour Reports* of this Bureau.

In *annual* tabulations particulars are included of all disputes which either *commenced* or were *current* during the year under review. As regards " number of disputes ", " establishments involved ", and " workpeople involved ", therefore, duplication will take place in respect of those disputes which started in and were unsettled at the end of a preceding year ; the number involved will, however, be indicated in a footnote, to permit of due allowance being made in any calculations made from the tables.

2. **Industrial Disputes Involving Stoppage of Work, Classified in Industrial Groups, 1950.**—The following table gives particulars of industrial disputes which either commenced or were current during 1950, classified according to industrial groups. Figures for 1949 may be found in *Labour Report* 1949, No. 38, page 122.

3. **Industrial Disputes, Australia, 1939, 1946 to 1950.**—The following table gives particulars of the number of industrial disputes, the number of workpeople involved, and the losses in working days and wages caused by disputes which either commenced or were current during each of the years 1939 and 1946 to 1950, classified according to industrial groups.

Satisfactory comparisons of the frequency of industrial disputes in classified industries can be made only after omitting those which are recorded for coal-mining (Group VIII.(i)). For 1913 the number of disputes in the mining industry represented practically 50 per cent. of the total number recorded. In subsequent years the proportion remained high ranging from 45 per cent. in 1917 and 1918 to 85 per cent. in 1948. In the five years 1946 to 1950 working days lost through dislocations involving workpeople engaged in coal-mining amounted to 2,334,560, representing 28 per cent. of the total toss of working days during the period.

7. Other Causes..	5,212	86,370	72,533	268,991	142,657	158,324	207,441
Total	623,528	459,154	1,947,844	1,338,728	1,662,686	1,333,990	2,062,888

The main causes of industrial disputes are "Wage" questions, "Working Conditions," and "Employment of Particular Classes or Persons." In each of the years 1913 to 1925 with the exception of 1922, the number of dislocations concerning "Wages" exceeded those caused by any other question. From 1913 to 1950 the proportions varied between 19 per cent. in 1942 and 45 per cent. in 1916. Since 1925 the number of disputes concerning "Wages" has averaged about 20 per cent. of the total number for each year. The majority of the dislocations of work classified under the heading, "Employment of Particular Classes or Persons," are stoppages for the purpose of protesting against the dismissal of certain employees, who, in the opinion of their fellow-workers, have been unfairly treated or victimized. This class of dispute occurs very frequently in the coal-mining industry, and was the principal cause of industrial disturbance in most of the years from 1925 to 1942, averaging about 30 per cent. of the total number for each year during that period. Since 1942 the number of dislocations classified under the heading "Working Conditions" and "Other Causes" has increased proportionately, the percentages of the total in 1950 being 24 and 23 respectively. The number of disputes over "Trade Union" questions has averaged below 10 per cent. of the total number of disputes during the years under review. Stoppages of work concerning "Hours of Labour" increased during 1926 and 1927, but have been relatively unimportant during recent years.

The numbers of disputes concerning "Wages" were 169 in 1949 and 254 in 1950 representing 20 per cent. of the total in both years. Stoppages concerning "Employment of Particular Classes or Persons" numbered 114 in 1949 and 324 in 1950, 13 per cent. and 25 per cent. respectively of the totals, and those concerning "Working

Conditions" 214 in 1949 and 306 in 1950 or 25 per cent. and 24 per cent. respectively. Disputes classified under these three headings numbered 497 or 59 per cent. of the total dislocations during the year 1949 and 884 or 69 per cent. in 1950.

7. **Results of Industrial Disputes.**—The results of industrial disputes during 1939 and each of the years 1946 to 1950 are shown in the following table :—

INDUSTRIAL DISPUTES CLASSIFIED ACCORDING TO RESULTS(*a*) : AUSTRALIA.

Year.	Number.				Workpeople Involved.				Working Days Lost.			
	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.
1939..	75	302	19	20	22,517	117,445	6,233	6,635	104,192	256,602	43,569	54,791

(*a*) *See* note to previous table.

Prior to 1947 the majority of disputes were settled by direct negotiation between employers and employees, the proportion so settled since 1913 ranging between 39 per cent. in 1942 and 78 per cent. in 1937. In 1949 and 1950, however, the majority of disputes were settled by "Other methods". The percentage settled by direct negotiations was 29 in 1949 and 27 in 1950. The proportion of dislocations settled by compulsory conferences or the intervention and assistance of officials under State or Commonwealth Arbitration Acts has varied considerably during the period under review, ranging between 3 per cent. in 1915 and 22 per cent. in 1913. The proportion was 12 per cent. in 1949 and 13 per cent. in 1950. In connexion with the comparatively large number of disputes which are classified as having been settled "By other methods", many stoppages of work occur each year, principally at collieries, but the cause of such stoppages is not officially known to the employers or their representatives. Such stoppages usually last for one day, and work is resumed without negotiations for a settlement of the trouble. In 1949 the percentage of disputes settled by "Other methods" rose to 53 while the percentage in 1950 was 60, the highest recorded for that class of settlement.

F. ASSOCIATIONS.

Labour Organizations.

1. **Registration.**—(i) *Under Trade Union Acts.* The benefits obtained by registering trade unions under the Trade Union Acts in force in the various States are not considered of much value, consequently the statistics of registered trade unions of employees do not accurately represent the position of unionism. Further, the returns for past years are so defective as to be practically valueless, inasmuch as no reliable indication is afforded of the numerical and financial position of the unions. Some of the registered unions fail to supply returns; this non-supply may lead to cancellation of the registration. Others have obtained the cancellation of their certificates of registration, the apparent reason being that they proposed to register under the Commonwealth Conciliation and Arbitration Act or a State Arbitration Act. In Queensland, some of the largest labour unions withdrew from registration during 1911, mainly on account of the necessity for closer restriction of their objects as set forth in their rules, consequent on legal decisions affecting trade unions. In Victoria and in South Australia very few of the existing unions are registered under the Trade Union Acts. It will be seen, therefore, that the available information under this heading is too meagre for statistical purposes.

(ii) *Under Industrial Arbitration Acts.* Information with regard to registrations of employers' associations and trade unions under the various State Industrial Arbitration Acts will be found in previous issues of the Official Year Book. The latest information available as to registrations is as follows:—New South Wales, 220 industrial unions of employers and 161 industrial unions of employees, the membership not being available in either case; Queensland, 22 industrial unions of employers with approximately 24,738 members, and 76 industrial unions of employees with approximately 246,072 members; South Australia, 38 organizations of employees with approximately 58,654 members; Western Australia, 37 organizations of employers with 1,506 members and 134 organizations of employees with approximately 78,713 members. There is no provision in the South Australian Industrial Acts for the registration of organizations of employers and in Victoria and Tasmania, where Wages Board systems of wage fixation are in operation, organizations of employers and employees are not required to register. Registration under Commonwealth legislation began in 1906. In that and the four years following, there was but one union of employers; another was registered in 1911. The unions of employees registered in 1906 were 20, with 41,413 members. At the end of 1950 the number of employers' organizations registered under the provisions of the Commonwealth Conciliation and Arbitration Act was 52. The number of unions of employees registered at the end of 1950 was 146, with a membership of approximately 1,331,379 representing 83 per cent. of the total membership of all trade unions in Australia.

2. **Particulars regarding Trade Unions.**—(i) *Types.* The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organization, which, in its turn, may be a branch of an international body. Broadly speaking, there are four distinct classes of labour organizations:—(i) the local independent; (ii) the State; (iii) the interstate; and (iv) the Australasian or international; but a number of variations occur from each of these classes. The schemes of organization

of interstate or federated unions vary greatly in character. In some unions the State organizations are bound together under a system of unification with centralized control, while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes. The leading characteristics of each of these types are briefly outlined in *Labour Report* No. 2 (pp. 7–9) issued by this Bureau.

(ii) *Number and Membership.* As already stated, the figures for trade unions registered under the Acts do not represent the position of unionism in Australia. In 1912 the Labour and Industrial Branch of the Commonwealth Bureau of Census and Statistics was established and with the cordial co-operation of the officials of the labour organizations comprehensive figures relating to the development of organized labour are now available. The following table shows the position at the end of 1949 and 1950 :—

TRADE UNIONS : NUMBER AND MEMBERSHIP, 1949 AND 1950.

State or Territory.	Number of Separate Unions.		Number of Members.	
	1949.	1950.	1949.	1950.
New South Wales	212	222	606,139	642,145
Victoria	150	152	382,503	406,317
Queensland	125	128	259,339	262,586
South Australia	138	138	127,292	137,504
Western Australia	152	156	97,706	103,582
Tasmania	97	98	40,700	45,044
Northern Territory ..	12	14	2,860	2,438
Australian Capital Territory	21	28	4,375	5,728
Australia	(a) 349	(a) 360	1,520,914	1,605,344

(a) Without interstate duplication. *See* letterpress below.

In the table just given, under the heading " Number of Separate Unions ", a union with members in a State is counted as one union within that State. The figures by States do not add to the Australian total (shown in the last line) because a union represented in more than one State is included in the figure for each State in which it is represented, but is counted only once in the Australian total.

Because of the difficulties involved, the collection of statistics relating to the " Number of Branches " of Trade Unions appearing in previous issues of this publication, has now been discontinued.

(iii) *Classification in Industrial Groups.* The following table shows the number of unions and members therof in Australia at the end of each of the years 1939 and 1946 to 1950. Compared with 1939, membership in 1950 had increased by 75 per cent.

The only industrial group in which membership in 1950 was less than in 1939 was " Mining, Quarrying, etc." ; all other groups registered increases. In 1950 increases were recorded in all groups except " Food, Drink, Tobacco, etc. " and " Domestic, Hotels, etc." where decreases occurred.

(iv) *Trade Unions : Numbers of Male and Female Members and Ratio to Total Wage and Salary Earners, Australia.* Prior to 1939 the numbers of male and female wage and salary earners (including unemployed) aged 20 years and over were estimated by increasing the numbers of such persons enumerated at the 1933 Census in ratio to the annual increases in males and females aged 20 to 64 years. Similarly, for wage and salary earners (including unemployed) under 20 years the numbers of such persons at the 1933 Census were increased in ratio to the annual increases in males and females 15 to 19 years. Further, allowance was made for (*a*) increase in the proportion of females who became wage and salary earners and (*b*) youths and girls who were without occupation but were not recorded in the wage-earning group at the 1933 Census. While the foregoing method of estimation would produce fairly accurate results during normal times, the drastically altered conditions of employment over the period of the recent war necessitated the adoption of more direct methods. Since 1939, the estimates of numbers of male and female wage and salary earners (including unemployed) have been based on data obtained largely from the National Register of July, 1939, the Civilian Register of June, 1943, the Occupation Survey of June, 1945, records of Defence Forces and the 1947 Census. The estimated numbers of wage and salary earners for the years shown in the table below *include* (*a*) persons who were "not gainfully occupied" before the outbreak of war, but who subsequently entered wage-earning employment and (*b*) persons who in normal times would be occupied in their own business but undertook wage and salary earning employment during the war and immediate post-war period.

The following table shows the number of males, females and persons who are members of trade unions and the ratio of members to the estimated number of all wage and salary earners. The estimated number of wage and salary earners includes all persons in receipt of wages or salary, as well as those unemployed, and therefore embraces a number of persons who are not eligible for membership of any trade union, such as certain persons employed in professional occupations, as well as others who, while eligible for membership so far as the nature of their trade or occupation is concerned, do not reside in a locality which is covered by any union devoted to their particular trade or occupation.

TRADE UNIONS: NUMBER OF MALE AND FEMALE MEMBERS AND RATIO TO TOTAL WAGE AND SALARY EARNERS(*a*), AUSTRALIA.

(*a*) Includes allowance for unemployed. (*b*) Figures revised.

(v) *Interstate or Federated Trade Unions.* The following table gives particulars of the number and membership of interstate or federated unions in 1950:—

INTERSTATE OR FEDERATED TRADE UNIONS: AUSTRALIA(*a*), 1950.

Particulars.	Unions Operating in—					Total.
	2 States.	3 States.	4 States.	5 States.	6 States.	
Number of Unions ..	13	13	17	38	59	140
" " Members ..	41,369	41,000	121,180	395,012	832,918	1,431,479

(*a*) Certain unions in this group have, in addition to branches in the States, branches in the Northern Territory and the Australian Capital Territory.

The number of organizations operating in two or more States increased from 72 in 1912 to 140 in 1950, and the ratio of the membership of such organizations to the total membership of all organizations rose from 65 to 89 per cent. during the same period.

3. **Central Labour Organizations.**—In each of the capital cities and in a number of industrial centres elsewhere, delegate organizations, consisting of representatives from a group of trade unions, have been established. Their revenue is raised by means of a

per capita tax on the members of each affiliated union. In most of the towns where such central organizations exist, the majority of the local unions are affiliated with the central organization, which is usually known as the Labour or the Trades Hall Council, or the Labour Federation. In Western Australia a unified system of organization extends over the industrial centres throughout the State. In this State there is a provincial branch of the Australian Labour Party, having a central council and executive, and metropolitan and branch district councils, to which the local bodies are affiliated. The central council, on which all district councils are represented, meets periodically. In the other five States, however, the organization is not so close, and, while provision usually exists in the rules of the central council at the capital city of each State for the organization of district councils or for the representation of the central council on the local councils in the smaller industrial centres of the State, the councils in each State are, as a matter of fact, independent bodies.

A Central Labour Organization, called the Australasian Council of Trade Unions, came into being during 1927. The Council was created to function on behalf of the Trade Unions of Australia, and was founded at an All-Australian Trade Union Congress held in Melbourne in May, 1927. The Australasian Council is based on the Metropolitan Trades and Labour Councils in each State, such bodies having the right to appoint two representatives to act on the Executive of the Council. The Metropolitan Trades and Labour Councils are the branches of the Australasian Council. In addition to the representatives from the Metropolitan Councils, the Executive consists of four officers—the President, two Vice-Presidents, and a Secretary, who are elected by and from the All-Australian Trade Union Congress.

The objective of the Council is the socialization of industry, i.e., production, distribution and exchange. The methods to be adopted are :—(*a*) The closer organization of the workers by the transformation of the Australasian Trade Union Movement from the craft to an industrial basis by the establishment of one Union in each industry; (*b*) the consolidation of the Australasian Labour Movement with the object of unified control, administration and action; (*c*) the centralized control of industrial disputes; and (*d*) educational propaganda among unions. The Australasian Council of Trade Unions is the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the Trade Union movement generally. It is also the body responsible for submitting to the Commonwealth Government the names of persons suitable for selection as the Australian workers' delegate to the Annual International Labour Conference.

The table below shows the number of metropolitan and district or local labour councils, together with the number of unions and branches of unions affiliated therewith, in each State at the end of the year 1950 :—

CENTRAL LABOUR ORGANIZATIONS : NUMBER AND UNIONS AFFILIATED, 1950.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Total.
Number of Councils	10	9	13	6	10	5	1	54
Number of Unions and Branch Unions affiliated ..	248	272	152	134	434	97	21	1,358

The figures given in the preceding table concerning the number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated with the local trades councils in the several towns in which they are represented.

Between the trade union and the central organization of unions may be classed certain State or district councils organized on trade lines, and composed of delegates from separate unions whose members' interests are closely connected because of their occupations. Delegate councils of bakers, bread carters and mill employees, or of unions connected directly or indirectly with the iron, steel, or brass trades, or with the building trades, may be so classed.

G. COMPARATIVE INDEX-NUMBERS.

In order to show the relative movements of certain price and related data, the following table of annual and quarterly index-numbers for the six capital cities combined has been compiled with a common base 1911 = 1,000.

COMPARATIVE INDEX-NUMBERS FOR THE SIX CAPITAL CITIES COMBINED.

(*a*) The index-numbers given in the separate columns of the table cannot be compared with each other in order to show, for example, the relative cost of housing and food and groceries, since the cost in 1911 *in each group or combination of groups* is made equal to 1,000. (*b*) *See* footnote (*b*) on page 383. (*c*) Index of nominal weekly wage rates for adult males divided by "C" Series Retail Prices Index-number. (*d*) Taken back from true base (November, 1914 = 1,000) by means of the "A" Series Index (Food and Rent of all Houses). (*e*) Includes all members of reporting unions indirectly affected by the industrial dispute in the coal-mining industry; those directly affected are, however, excluded.

CHAPTER XII.

TRADE.

§ 1. Introductory.

Constitutional Powers of the Commonwealth in regard to Commerce.—The powers vested in the Commonwealth Parliament by the Commonwealth Constitution with respect to oversea trade and commerce will be found in Sub-section 51 (i) and Sections 86 to 95 thereof (see pp. 15 and 21–22 *ante*).

§ 2. Commonwealth Legislation affecting Oversea Trade.

1. **General.**—In previous issues of the Official Year Book brief particulars of the various Commonwealth Acts and amendments thereof affecting oversea trade are given in chronological order. The Customs Acts represent the administrative or machinery Acts under which the Department of Trade and Customs operates, while the Customs Tariff provides the statutory authority for imposing the actual rates of duties operative from time to time.

The Acts at present in force are: The Customs Act 1901–1950; Customs Tariff 1933–1950; Customs Tariff (Canadian Preference) 1934–1950; Customs Tariff (Industries Preservation) Act 1921–1936; Customs Tariff (New Zealand Preference) 1933–1950; Customs Tariff (Papua and New Guinea Preference) 1950: Customs Tariff (Southern Rhodesian Preference) 1941–1948; Customs Tariff (Primage Duties) 1950; Trading with Enemy Act 1939–1947.

2. **Customs Tariffs.**—The Customs Tariff 1921–1930 provided a British Preferential Tariff, an Intermediate Tariff and a General Tariff. The Intermediate Tariff was omitted from the Customs Tariff 1933 but was restored by the Customs Tariff 1936.

" British Preferential Tariff " rates of duty apply to goods the produce or manufacture of the United Kingdom provided such goods comply with the laws and statutory regulations for the time being in force affecting the grant of British preference, and that the goods have been shipped in the United Kingdom to Australia and have not been transhipped, or, if transhipped, it is proved to the satisfaction of the Collector of Customs that the intended destination of the goods, when originally shipped from the United Kingdom, was Australia. The benefits of the British Preferential Tariff may be extended wholly or in part to any British non-self-governing colony, British protectorate or to certain territories governed under British mandate. The benefits of the British Preferential Tariff have been extended by separate Trade Agreements to certain goods the produce of the Dominions of Canada and New Zealand and to certain goods the produce of British non-self-governing colonies.

In submitting tariff schedules to Parliament on 20th March, 1936, the Minister for Trade and Customs said; " Another new feature of the schedules is the Intermediate Tariff. It has been re-introduced to provide a convenient avenue for expressing the level of duties which the Government proposes should form the basis for trade treaties. The rates proposed under the protective items of the Intermediate Tariff express, in every case, a protective level for Australian industry as well as preserving the margins required under the Ottawa Agreement." The Customs Tariff 1933–1950 provides that the Governor-General may from time to time by proclamation declare that the Intermediate Tariff shall apply from a date and time specified to goods specified in the proclamation which are the produce or manufacture of the British or foreign country specified in the proclamation. The Intermediate Tariff was brought into operation on 1st January, 1937, by Customs Proclamations Nos. 338, 342, 343 and 360, which granted intermediate rates of duty to specified goods the produce of " Proclaimed Countries." The countries proclaimed include the United Kingdom, the Dominions and Colonies in respect of goods which do not comply with the conditions prescribed for the application of a lower tariff and most foreign countries under the terms entitling them to most-favoured-nation treatment. The United States of America was an important exception until 17th February, 1943, when Customs Proclamation No. 571 included it in the list of "Proclaimed Countries".

The "General Tariff" applies to all importations excepting :—

(a) Goods the produce or manufacture of the United Kingdom, shipped in the United Kingdom ;

(b) Goods the produce or manufacture of the following countries when admissible under the British Preferential Tariff or at a special rate of duty : Canada, New Zealand, Norfolk Island, Papua and New Guinea, Southern Rhodesia, and British non self-governing Colonies, British Protectorates and certain Territories governed under British mandate.

(c) Goods admitted under the provisions of the Intermediate Tariff.

The Customs Tariff 1933–1950 provides for duties on certain goods to be deferred. Where a deferred duty on any goods is provided in the Schedule, the Minister shall refer to the Tariff Board for inquiry and report on the question whether the deferred duty should or should not operate on and after the date to which it has been deferred. The Board shall report whether the goods in respect of which the deferred duty is provided are being made or produced in Australia or will be so made or produced on, or immediately after, the date to which the duty has been deferred—(a) in reasonable quantities ; (b) of satisfactory quality ; and (c) at a reasonable price having regard, among other things, to the probable economic effect of the imposition of the deferred duty upon other industries concerned, and upon the community in general. Upon receipt of a report from the Tariff Board, the Minister may defer the duty further by notice published in the *Commonwealth Gazette*.

3. **Preferential Tariff.**—(i) *British Preference.* The Commonwealth Tariff 1908 provided Preferential Tariff rates in favour of specified goods produced or manufactured in the United Kingdom. Subsequent legislation has extended the list of articles to which these rates apply. For the purpose of preferential treatment the following goods are deemed by Section 151A of the Customs Act 1901–1950 to be the produce or manufacture of the United Kingdom provided the final process of their production or manufacture was performed in that country :—

(a) Goods which are wholly produced or wholly manufactured in the United Kingdom from materials in one or more of the following classes—
  (i) Materials wholly produced or wholly manufactured in the United Kingdom or in Australia ;
  (ii) Imported unmanufactured raw materials ;
  (iii) Imported manufactured raw materials as determined by the Minister.

(b) Goods of the factory or works cost of which not less than seventy-five per cent. is represented—
  (i) by labour or material of the United Kingdom ; or
  (ii) by labour or material of the United Kingdom and labour or material of Australia.

(c) Goods of a class or kind not commercially produced or manufactured in Australia and of the factory or works cost of which not less than twenty-five per cent. or fifty per cent. if the Minister so determines is represented—
  (i) by labour or material of the United Kingdom ; or
  (ii) by labour or material of the United Kingdom and labour or material of Australia.

The benefits of the British Preferential Tariff have also been extended by separate Trade Agreements to certain goods the produce of the Dominions of Canada and New Zealand and by separate Tariff legislation to the Territories of Papua and New Guinea and the above-mentioned conditions apply *mutatis mutandis* to each.

At the Imperial Economic Conference held at Ottawa, Canada, during July and August, 1932, a trade agreement providing for special preferential trade conditions was made between the Governments of the United Kingdom and the Commonwealth of

Australia. A summary of the provisions of this agreement appears in Official Year Book No. 20, pp. 868–873 and further references have been made in subsequent issues.

The five years' currency of the agreement terminated on 19th August, 1937, but, in view of the negotiations then in progress between the Governments of the United Kingdom and the United States of America for a trade agreement, a review of the terms of the Ottawa Agreement became a matter of urgency. The United Kingdom Government at the time sought the concurrence of the Dominions in the modification of certain preferences granted under the Ottawa Agreement in order to facilitate the satisfactory conclusion of an agreement with the United States of America. As a consequence, a conference of United Kingdom and Australian Ministers was held in London early in 1938 and a joint statement setting out the result of the conference was issued by the two Governments in the form of a Memorandum of Conclusions which was published by the United Kingdom Government on 20th July, 1938. Details of the Memorandum have been published in previous issues of the Official Year Book. The full text may be found on pages 479–482 of Official Year Book No. 32.

The future of the agreement and of Empire preferences generally has been discussed in connexion with the proposals for the establishment of an International Trade Organization which are referred to in paragraph 6.

(ii) *Intermediate Tariff.* The Intermediate Tariff came into operation on 1st January, 1937, in respect of a selected list of items. This list has been substantially extended from time to time but many rates have not yet been proclaimed to come into operation. Those items which have been proclaimed apply to goods from countries with which specific most-favoured-nation arrangements exist, including goods from all members of the British Commonwealth of Nations not receiving preferential Tariff treatment. They apply also to goods from certain other Foreign countries in respect of which Australia has no formal obligation to accord Intermediate Tariff treatment.

(iii) *Exchange Adjustment.* The Customs Tariff (Exchange Adjustment) Act 1933–1939 provides for adjustments in Duties of Customs consequent upon depreciation in the value of Australian currency relative to sterling. This Act came into operation on 5th October, 1933 and ceased to operate on 15th November, 1947, as a result of the Customs Tariff (Exchange Adjustment) Act Repeal Act 1948.

A summary of the provisions of the Customs Tariff (Exchange Adjustment) Act 1933–1939 is contained in previous issues of the Official Year Book.

(iv) *Papua and New Guinea Preference.* The Customs Tariff (Papua and New Guinea Preference) Act 1936–1950 which repealed the Act of 1934 provides for Customs Preference on goods the produce of the Territory of Papua and on goods the produce of the Territory of New Guinea. Imports into Australia direct from the Territory of Papua or the Territory of New Guinea, of such of the goods specified in the schedule to the Act as were produced in the Territory from which they were imported, shall, notwithstanding anything contained in the Customs Tariff 1933–1950, be free of duty. The goods specified in the schedule to the Customs Tariff (Papua and New Guinea Preference) 1936–1950 are coffee, dried lychee fruit, various native fresh fruits, edible fungi, green and dry ginger, coco-nuts, Rangoon beans, kapok and sesame seeds, areca nuts, cocoa beans, massoi oil, nuts (edible), sago, tapioca, spices, vanilla beans, gums, pyrites, denatured spirit and tea.

4. **Primage Duty.**—From 10th July, 1930 a primage duty of 2½ per cent. ad valorem was imposed on all goods whether dutiable or not dutiable, in addition to the duties collected in accordance with the Customs Tariff 1921–1930, excepting bullion, specie, radium and certain special governmental and other imports. The rate of primage duty was subsequently increased to 4 per cent. as from 6th November, 1930.

A proclamation of 14th May, 1931 exempted certain aids to primary production, and on 11th July, 1931 a further amendment, in addition to extending the list of these goods and also exempting some minor imports from primage duty, provided for a rate of 4 per cent. ad valorem on a few other items, mainly aids to production, and increased the ad valorem rate of primage duty to 10 per cent. on all other articles imported. Amendments promulgated since 11th July, 1931 have greatly increased the list of goods exempt from primage duty.

The Customs Tariff (Primage Duties) Act 1934 imposed primage duty at rates of 4, 5, and 10 per cent. and provided for preferential treatment of certain goods admitted under the British Preferential Tariff. A proclamation of 12th December, 1934 exempted from primage duty goods the produce or manufacture of Fiji, and a proclamation of 25th September, 1935 exempted from primage duty goods the produce or manufacture of the Territories of New Guinea and Papua. Under the Customs Tariff (New Zealand Preference) Act goods the produce or manufacture of New Zealand are exempt from primage duty. Similarly under the Norfolk Island Act 1913 goods the produce or manufacture of Norfolk Island are exempt from primage duty.

Customs proclamations, which came into force on 1st January, 1937 and later dates, provide in respect of specified tariff items exemptions from, and reduced rates of 4 and 5 per cent., primage duty on imports the produce or manufacture of "Proclaimed Countries". All countries whose goods are admissible to Australia under the intermediate customs tariff rank as proclaimed countries and include the United Kingdom, the Dominions and Colonies, the United States of America (from 18th February, 1943), and most foreign countries.

Further proclamations have provided for exemption of additional tariff items from primage duty. Of proclamations of recent date, those operative from 19th November, 1947, were the principal.

5. **Trade Agreements.** (*See also* para. 6 following)—(i) *United Kingdom.* A reciprocal trade agreement between the United Kingdom and Australia came into force on 14th October, 1932, and is referred to briefly in paragraph 3 above. Broadly speaking, Australia secured preferences in the United Kingdom market for a wide range of Australian export commodities and in return Australia incurred obligations to the United Kingdom in respect of Tariff rates and the grant of preferences to United Kingdom goods.

(ii) *Dominion of Canada.* A reciprocal trade agreement between Canada and Australia which came into force on 1st October, 1925, was superseded by a new agreement operating from 3rd August, 1931. The basis of the new agreement was, generally, the mutual accord of British Preferential Tariff treatment. The only exceptions to this general rule were listed in the schedules to the agreement.

Australian commodities to which the British Preferential Tariff does not apply on their importation into Canada include: Butter, brandy, champagne, cheese, currants, eggs, eucalyptus oil, fresh apricots, pears, quinces, nectarines, grapes, oranges and passion fruit, dried prunes, apricots, nectarines, pears and peaches, fruit pulp, fruits in cans, gelatine, hops, rice (uncleaned), meat (fresh and canned), peanuts, raisins, sugar, tallow, veneers and wine.

Canadian commodities to which the British Preferential Tariff does not apply on their importation into Australia include: Goloshes and rubber sand boots, barbed wire, timber, typewriters, vehicles—motor chassis (assembled and unassembled)—vehicle parts (bodies, gears, rubber tyres and tubes, storage batteries, sparking plugs and shock absorbers), agricultural machinery and pianos.

Certain administrative provisions, including a special concession to Canada in respect of the inland freight charges to be included in the dutiable value of Canadian goods on importation into Australia, were incorporated in the agreement.

The Customs Tariff (Canadian Preference) Act 1934–1950 gives effect to the agreement so far as Australia is concerned.

(iii) *Dominion of New Zealand.* A reciprocal trade agreement between New Zealand and Australia came into force on 1st December, 1933, superseding an earlier agreement of 1922. The basis of the new agreement was, generally, the mutual accord of British Preferential Tariff treatment. The only exceptions to this general rule were listed in the schedules to the agreement.

The Customs Tariff (New Zealand Preference) Act 1933 giving effect to the agreement repealed earlier acts and provides that duties on all goods specified in the schedule to the Act shall be at the rates indicated therein, and that all goods other than those provided for in the schedule shall be subject to the rates in force under the British Preferential Tariff. An amendment to this Act in 1934 provides that, where the rate of duty upon any class of goods under the New Zealand British Preferential Tariff is less than that operating in Australia under the British Preferential rate, upon request by the New Zealand Government such goods may, after proclamation, be admitted at the lower rate. The rates of duty on goods re-exported from New Zealand (not being goods the produce or manufacture of New Zealand) and which are imported into Australia, and which if they had been imported into Australia direct from the country of origin would have been subject to the rates of duty under the British Preferential Tariff, shall be the rates of duty in force under that tariff.

The Act provides also that films produced in New Zealand by or for the Government of New Zealand for publicity purposes shall be admitted free of duty, also that cocoa beans the produce of Western Samoa shall not be subject to any higher duties than those paid on cocoa beans the produce of any British non-self-governing Colony or Protectorate or any Territory under British mandate. The provisions of the Act do not, however, apply to goods the produce of Cook Islands.

Goods the produce or manufacture of the Dominion of New Zealand are exempt from primage duty.

The conditions of preference in the Act provide that goods shall be deemed to be the produce or manufacture of New Zealand if they conform to the laws and regulations in force in Australia which apply to such goods when imported under the British Preferential Tariff (*vide* section 151A of Customs Act 1901–1947) except that goods not wholly produced or manufactured in New Zealand need not contain more than 50 per cent. of New Zealand labour and/or material in their factory or works cost, instead of 75 per cent. under the conditions of the United Kingdom preference.

(iv) *Southern Rhodesia.* An agreement between Southern Rhodesia and Australia came into operation on 9th April, 1941.

Under the agreement the principal undertakings by the Commonwealth Government were—(*a*) to accord a preferential rate of ninepence per lb. lower than the British Preferential Tariff on unmanufactured tobacco from Southern Rhodesia; and (*b*) to admit raw asbestos and chrome at rates of duty not higher than those applicable to these products from other countries, and to admit them free of primage duty.

The Southern Rhodesian Government on its part agreed—(*a*) to admit free of duty a schedule of Australian goods comprising 33 items; (*b*) to accord specified preferential rebates ranging from 10 per cent. to 50 per cent. from the duties applicable to United Kingdom goods on a schedule of Australian goods comprising 19 items; (*c*) to accord British Preferential Tariff rates to a schedule of Australian goods comprising 14 items and (*d*) to accord similar tariff treatment to Australian wheat and wheat flour, in the event of permits being issued for importation from any other country at rates of duty lower than those accorded to Australia under the agreement.

The Trade Agreement (Southern Rhodesia) Act 1941 approved the agreement, which was given effect to so far as Australia is concerned by the Customs Tariff (Southern Rhodesian Preference) Act 1941.

(v) *Union of South Africa.* A trade agreement between Australia and the Union of South Africa came into force as from 1st July, 1935.

This agreement provides that the products of the Union of South Africa or of the mandated territory of South-West Africa entering Australia and the products of Australia entering the Union of South Africa or the mandated territory of South-West Africa shall be subject to customs duties not higher than those imposed by the importing country on like products from the most favoured foreign nation. A reciprocal tariff arrangement under which products of Mozambique are admitted duty free to the Union of South Africa is exempt from the agreement.

The Trade Agreement (South Africa) Act 1936 approves the terms of this agreement.

(vi) *Foreign Countries.* Trade agreements between the Commonwealth Government and the Governments of Belgium, Czechoslovakia and France were in operation prior to the outbreak of war in September, 1939, but were inoperative during the war, owing to the provisions of the Trading with the Enemy Act 1939–1940. These agreements are again in full force.

The trade agreement concluded in 1938 between Australia and Switzerland continued in limited operation during the war period.

Between December, 1939 and April, 1944 the Commonwealth Government also entered into trade agreements with Brazil and Greece.

Summaries of the texts of these agreements appear in previous issues of the Official Year Book.

6. The Charter for an International Trade Organization and the General Agreement on Tariffs and Trade.—(i) *The Charter for an International Trade Organization.* Details of the passage of events leading up to the drafting of the Havana Charter for an International Trade Organization and of the scope of the Charter itself, may be found in Commonwealth Year Book No. 38, p. 466.

In accordance with the decisions reached at the conclusion of the United Nations Conference on Trade and Employment in March, 1948, the Havana Charter was submitted to Governments of the countries represented at the Conference. Because of the predominant influence of the United States of America in world trade most other countries waited for a decision from that country before determining their own attitudes to the Charter.

On 6th December, 1950, the United States Government announced that it did not propose to resubmit the Havana Charter to Congress for approval, but would ask Congress to consider legislation to make American participation in the General Agreement on Tariffs and Trade more effective. It now seems unlikely that the Charter will ever come into force in its present form.

(ii) *The General Agreement on Tariffs and Trade.* On 10th April, 1947 (about a month prior to the resumption of the Charter discussions) the member nations of the Preparatory Committee engaged in negotiations with the object of arriving at a satisfactory basis on which the reduction of tariff barriers could be effected.

The Tariff negotiations were kept quite distinct from the Charter discussions as the aim was to bring the results into effect without necessarily awaiting the establishment of the International Trade Organization.

The results of the negotiations were incorporated in a draft General Agreement on Tariffs and Trade which was tabled in the House of Representatives on 18th November, 1947, together with the tariff schedules implementing the tariff reductions which Australia had undertaken to afford.

A Protocol of Provisional Application provided that, upon signature by Australia, Belgium, Canada, France, Luxembourg, the Netherlands, the United Kingdom and the United States of America not later than 15th November, 1947, those countries should undertake to apply provisionally on and after 1st January, 1948—

(1) Parts I. and III. of the Agreement,

(2) Part II. of the Agreement to the fullest extent not inconsistent with existing legislation in their respective countries.

These conditions were satisfied and the Agreement is provisionally in force. Tariff reductions undertaken by Australia operated from 19th November, 1947. The General Agreement is now being provisionally operated by Australia, Belgium, Brazil, Burma, Canada, Ceylon, Chile, Cuba, Czechoslovakia, Denmark, Dominican Republic, Finland, France, Greece, Haiti, India, Indonesia, Italy, Liberia, Luxemburg, Netherlands, New Zealand, Nicaragua, Norway, Pakistan, Southern Rhodesia, Sweden, Union of South Africa, United Kingdom and the United States of America. China, Lebanon and Syria have withdrawn from the General Agreement.

The agreement does not come definitively into force until 30 days after instruments of acceptance have been lodged by countries accounting for 85 per cent. of the total external trade of the countries signatory to the Final Act. The percentage is to be calculated in accordance with a table set out in Annexe H to the Agreement. No country has yet definitively accepted the agreement, but as in the case of the Charter, Parliament has approved Australia lodging an instrument of acceptance when the United Kingdom and United States of America have done likewise.

Many of the articles of the General Agreement are identical with articles in the Charter and were only incorporated in the Agreement to prevent tariff concessions being circumvented by other measures pending the coming into force of the Charter. Had the Charter come into force, Part II. of the General Agreement which contains such articles would have been suspended.

The three component parts of the Agreement contain briefly—

Part I. Schedules of negotiated tariff reductions and an undertaking to extend most-favoured-nation treatment to other participating countries except where existing preferences are deemed valid.

Part II. Undertakings regarding commercial policy to prevent tariff concessions being offset by other protective measures.

Rights are preserved, however, to—

(1) Impose new duties for protective purposes except in respect of commodities where rates of duty have been bound under the general agreement;

(2) impose import restrictions to protect the balance of payments;

(3) take emergency action where any industry is endangered by any negotiated tariff or preference reduction.

Part III. Mainly machinery provisions.

Under the tariff negotiations associated with the Agreement concessions were offered to Australia on almost all the principal products of which Australia is an actual or potential exporter to the individual countries concerned. Generally the offers were made directly to Australia, but in some cases benefits will arise indirectly from concessions granted to third countries which are more important suppliers of the particular product. These latter benefits occur through the operation of the most-favoured-nation principle.

In April, 1949 a second series of tariff negotiations commenced at Annecy in France between the 23 Contracting Parties which were then operating the General Agreement on Tariffs and Trade and eleven additional countries which had expressed a desire to accede to the General Agreement. Nine of these countries—Denmark, Dominican Republic, Finland, Greece, Haiti, Italy, Liberia, Nicaragua and Sweden subsequently acceded to the Agreement.

In addition, Ceylon, which, for domestic reasons, had been unable to operate concessions it negotiated at Geneva in 1947, took the opportunity of re-negotiating with certain countries including Australia.

The tariff concessions made by Australia at Annecy were put into effect from 12th May, 1950.

A third series of tariff negotiations was conducted at Torquay, England, from September, 1950 to April, 1951 and was attended by representatives of all contracting parties except Burma, Liberia, Nicaragua and Syria, and by representatives of seven new countries—Austria, Korea, Peru, Philippines Republic, Turkey, Western Germany and Uruguay. Australia completed agreements with Austria, Denmark, Philippines, Turkey, Western Germany and Sweden. These tariff concessions were put into force on 27th September, 1951.

Questions of interpretation concerning the provisions of the Agreement and of other matters arise from time to time and the Contracting Parties have held six sessions to deal with such matters: the first at Havana in March, 1948; the second at Geneva in August, 1948; the third at Annecy during 1949; the fourth at Geneva in February–April, 1950; the fifth at Torquay in November–December, 1950; and the sixth at Geneva in September–October, 1951.

7. **Customs (Import Licensing) Regulations.**—The Customs (Import Licensing) Regulations were promulgated and became effective on 1st December, 1939. These regulations were complementary to the National Security (Monetary Control) Regulations and the Customs (Overseas Exchange) Regulations, which were already in operation, in that the chief immediate aim of the licensing measure was to conserve resources of non-sterling exchange and, in particular, to prevent the absorption of those resources in the

purchase of unessential imports to the detriment of more vital national needs. Other objectives were to enable priority in shipping space to be given to essential imports should a shortage develop and to gather information on the relative importance of particular imports to enable future restrictions (if required) to be soundly based.

However, during 1941 the deterioration of Australian sterling balances in London and changes in the general war situation made it necessary in December, 1941 to bring imports from sterling countries within the scope of the regulation. The extension of the restrictions to sterling goods was a necessary corollary to the measures adopted in Australia and throughout the British Commonwealth to divert manpower, machinery and raw materials to war production. Conservation of shipping space was also an important consideration.

With the cessation of hostilities and the improvement in London balances and in accordance with the Government policy of relaxing all forms of war-time restrictions wherever possible, a large range of goods of sterling origin was removed from control in January, 1946. In January, 1947, with the exception of a small number of goods, import licensing control was removed from all goods of United Kingdom origin. In the post-war period import licensing restrictions have been relaxed whenever balance of payments conditions have allowed. At the present time (July, 1951) nearly all goods of United Kingdom origin are exempt from the provisions of the Customs (Import Licensing) Regulations and a wide range of goods originating in the other countries of the sterling area and in the easy currency countries is also exempt.

The sterling area still has balance of payments problems with a small number of non-sterling countries (the hard currency countries). Australian policy in respect of importations from these countries (the chief of which are those which comprise the dollar area) is to restrict importations to those goods which are of an essential nature and are unobtainable from sterling or easy currency sources.*

8. **Export Control.**—(i) *General.* Powers for the normal measures of control or supervision over exports are conferred by section 112 (1) of the Customs Act and they provide for the prohibition of the exportation of arms, explosives and military and naval stores, and of any goods—

(*a*) the exportation of which would be harmful to the Commonwealth ;
(*b*) the prohibition of the exportation of which is necessary for the preservation of the flora or fauna of Australia ;
(*c*) in order to preserve the standard and quality of Australian goods for export ;
(*d*) the prohibition of the exportation of which is necessary for the protection of the revenue or the prevention of fraud or deception.

Action has been taken under these powers to prohibit the exportation of a large range of goods and these prohibitions apply at all times. They may be general, or restricted and absolute, or conditional.

In addition to these normal measures, restrictions were imposed on the exportation of goods during the war years and many have been continued in the post-war period. These restrictions provide for both monetary and commodity controls and are explained hereunder.

(ii) *Monetary Control.* As an integral part of the framework of exchange control, a control over goods exported from Australia was introduced in 1939 by the promulgation of the Customs (Overseas Exchange) Regulations which were subsequently superseded by Part IIA. of the National Security (Exchange Control) Regulations in December, 1943. The objectives were to ensure that—

(*a*) the oversea funds accruing from the exportation of goods were made available to the Australian banking system ; and
(*b*) payment for goods exported was made in the currency and the manner prescribed by the Commonwealth Bank of Australia.

---

* Australian balances in London deteriorated in 1952 and import restrictions were reimposed on goods from both sterling and non sterling areas. The restrictions commenced to operate in March, 1952, and embrace a wide range of goods.

On the conclusion of the war it was decided to continue exchange control measures and provision was made in the Banking Act 1945 to enable the introduction of the necessary regulations. On 19th December, 1946 the Banking (Foreign Exchange) Regulations were promulgated and Part III. of these regulations now authorizes the control previously exercised under Part IIA. of the National Security (Exchange Control) Regulations.

Under Regulation 16 of the Banking (Foreign Exchange) Regulations the exportation of any goods is prohibited unless a licence to export has been granted under the regulations or the goods are excepted from the application of the regulations. Provision is made for the granting of export licences subject to such terms and conditions as may be imposed. On the receipt in Australia by the Commonwealth Bank, or by a Bank acting as its agent, of advice that foreign currency has been paid to the Commonwealth Bank or to an agent of the Bank in payment for goods exported in accordance with a licence granted under the regulations, the Bank or agent of the Bank pays the licensee, or such other person as may be entitled to receive it, an amount in Australian currency equivalent to the foreign currency received.

In addition to commercial transactions, exports by private individuals are rigidly controlled and in the case of persons leaving Australia for overseas a restriction applies to the value of specified articles of jewellery and other effects of high intrinsic value which they are permitted to take with them. Their baggage is subject to the regulations and, if containing goods of the nature mentioned, may require an export licence. Any goods contained in passengers' baggage which are restricted exports under the Customs Act require to be covered by an export permit.

(iii) *Commodity Control.* For various reasons, the principal of which were—

(*a*) to conserve supplies of essential commodities for Australia's requirements ;

(*b*) to implement price determinations ;

(*c*) to control exports of goods which are the subject of Empire Marketing Agreements ; and

(*d*) to strengthen the control of the exportation of capital in the form of goods, instituted by Part III. of the Banking (Foreign Exchange) Regulations,

a large range of commodities was prohibited from exportation (unless the consent of the Minister for Trade and Customs was first obtained) by proclamation promulgated under section 112 (1A.) of the Customs Act.

These prohibitions were imposed as a war-time measure but post-war conditions have necessitated continued export control of a number of goods. However, the matter is kept under continual review to ensure that restrictions are removed as soon as conditions permit.

9. **Industries Preservation.**—The Customs Tariff (Industries Preservation) Act 1921–1936 provides that, after inquiry and report by the Tariff Board, special duties shall be collected in the following cases when the importation of the goods referred to might be detrimental to an Australian industry :—In the case of goods sold for export to Australia at a price less than the fair market value for home consumption or at a price which is less than a reasonable price, a special dumping duty shall be collected equal to the difference between the price at which the goods were sold and the fair market value or the difference between the price at which the goods were sold and a reasonable price. Similar provision is made for goods consigned to Australia for sale. With regard to goods exported to Australia at rates of freight less than the normal rate of freight the dumping freight duty shall be—on goods carried free—the amount payable as freight at the normal rate ; and in the case of any other goods—an amount equal to the difference between the freight paid and the freight which would have been payable at the normal rate. Special duties are also imposed in the case of goods imported from countries whose currency is depreciated. Provision is also made for the protection of the trade of the United Kingdom in the Australian market from depreciated foreign currency.

The Act provides that the Minister for Trade and Customs, after inquiry and report by the Tariff Board, may publish a notice in the *Commonwealth Gazette* specifying the goods upon which the special rates of duty under this Act shall thereupon be charged and collected.

10. **Imperial Preference in the United Kingdom.**—(i) *Preferential Tariff of the United Kingdom.* Prior to 1919 the United Kingdom levied duties on a limited number of items for revenue purposes and did not extend preferential treatment to any of the Empire countries. The majority of imported goods entered the United Kingdom free of duty and, in fact, there was no scope for preferential treatment. In 1919, however, the range of revenue duties was extended and preferential rates of duty were established on some eighteen items. Of these, the preferential rate on twelve items was to be equivalent to five-sixths of the full rate, on four to two-thirds of the full rate and on another (wine) to 50–70 per cent. of the full rate. The items so affected of interest to Australia at that time were currants, dried and preserved fruit, sugar, molasses and wine.

The extension of preferential treatment was conditional on the goods being consigned from and grown, produced or manufactured in the British Empire. In the case of manufactured articles, preference applied only where a prescribed proportion of their value was the result of labour within the British Empire. The conditions have been embodied in all subsequent preference arrangements in substantially the same form.

During the period from 1919 to 1932 it became increasingly obvious that the United Kingdom, for economic reasons, was being forced to depart from the free trade principles which had conditioned trade during the years preceding the 1914–18 War. Every time a new duty was introduced provision was made for further preferential treatment to Empire products, although, in a great many cases, the preferences were of little or no significance to Australia because the new duties were on products which were neither grown nor manufactured in Australia. The Safeguarding of Industries Act 1921 provided for the imposition of duties on imports of key industry goods from foreign countries with free entry or preferential rates on similar goods from Empire countries. The purpose of these duties was to provide protection to vital United Kingdom industries in order to encourage their growth without fear of foreign competition. Similarly the Dyestuff Import Regulation of the previous year allowed the unrestricted import of dyestuffs of Empire origin whereas imports of foreign dyestuffs were subjected to licensing restrictions. In 1925 preferences were accorded or increased on sugar (for ten years), tobacco, dried fruit, wine and several other items. In succeeding years Key Industries Duties were imposed on a further range of industrial goods and in 1927, screening quotas for British films and in 1928 further sugar concessions, were introduced.

By 1931, therefore, the United Kingdom imposed duties on a fairly wide range of goods, provision being made in all cases for preferential treatment to Empire goods. The important preferences for Australia which emerged from these enactments were those on sugar, dried fruits, wine and jams and jellies. Even at this time, however, the United Kingdom adhered to the principles of free trade and by far the greater part of imports was free of duty.

In order to counteract the flood of dumping which followed the collapse of world trade in 1929–30 the United Kingdom introduced emergency tariff legislation in 1931. Ad valorem duties were imposed on almost all goods imported into the United Kingdom with the exception of certain raw materials, goods from Empire countries being exempt from these duties. These temporary measures were embodied in the Import Duties Act of March, 1932, by the enactment of which the United Kingdom finally abandoned free trade as a policy. This Act provided for free entry for Empire goods pending the conclusion of some permanent agreement. The Ottawa Agreement Act of November, 1932, emerged from the Imperial Economic Conference held in Ottawa and embodied agreements concluded between the various Dominions which participated. For the purpose of considering the present preferences enjoyed by Australia in the United Kingdom, it is expedient to regard the Import Duties Act and the Ottawa Agreements Act as complementary.

The Import Duties Act provided for the imposition of a general ad valorem duty of 10 per cent. on all imports with certain exceptions (i.e. those on the Free List and those already dutiable under previous enactments). Additional duties could be imposed and items on the Free List subjected to duty, and in fact, the range of items subject to duties under this Act has been extended from time to time since its enactment.

The freedom of Empire goods from these duties was guaranteed under the Ottawa Agreements Act, which also provided for the imposition of new duties on imports from foreign, but not Empire, countries of a number of products of special interest to the Empire countries concerned. Whilst free entry was guaranteed to Empire producers on a wide range of products, the margins of preference thereby applicable were not bound and the duties could be varied up or down by the United Kingdom Government without the consent of Empire countries. On a selected range of items, however, which are specified in the schedules to the Ottawa Agreements Act, the duties may not be varied by the United Kingdom without the consent of the other party to the respective agreement.

(ii) *The Australia-United Kingdom Trade Agreement.* This Agreement is a unit of the Ottawa Agreements and through it, preferences in the United Kingdom were established on a number of export items of considerable importance to Australia. The preferences accorded are summarized as follows :—

(*a*) Continued free entry was guaranteed for three years for Australian eggs, poultry, butter, cheese and other milk products. (This freedom of entry still continues). Similar foreign goods were subjected to duty thus giving Australia a preference of 1s. to 1s. 9d. per great hundred eggs ; 10 per cent. ad val. on poultry ; 15s. per cwt. on butter ; 15 per cent. ad val. on cheese ; 5s. per cwt. on sweetened whole condensed milk ; and 6s. per cwt. on unsweetened whole condensed milk and milk powder and other unsweetened preserved milk.

(*b*) Preferences were created on the following products by imposing a duty on like foreign articles whilst guaranteeing free entry to Australian produce : wheat (2s. per quarter) ; apples and pears (4s. 6d. per cwt.) ; canned apples (3s. 6d. per cwt.) ; other canned fruits (15 per cent. ad val.) ; certain dried fruits, raisins, etc. (10s. 6d. per cwt.) ; honey (7s. per cwt.) ; oranges (3s. 6d. per cwt. in season) ; raw grapefruit (5s. per cwt. in season) ; and grapes (1½d. per lb. in season).

(*c*) The preferential margins on the commodities mentioned in (*a*) and (*b*) above were not to be reduced without the consent of the Australian Government and this provision also applied to the 10 per cent. preference on leather, tallow, canned meats, barley, wheat flour, macaroni, dried peas, casein, eucalyptus oil, meat extracts and essences, copra, sugar of milk, sausage casings, wattle bark, asbestos and certain dried fruits.

(*d*) The Agreement also provided for a preference of 2d. per lb. on unwrought copper, but this was never implemented as Empire producers could not demonstrate their ability to continue offering their copper on first sale to the United Kingdom at prices not exceeding the world price, which was a condition of the preference. A similar condition applied to wheat, zinc and lead. In the case of zinc and lead the duty was changed from an ad valorem rate of 10 per cent. to a specific rate at an early stage in the life of the Agreement.

(*e*) Australia, although not securing in the Agreement with the United Kingdom a commitment on the amount and duration of the preference margin applying to a number of commodities of some importance to Australia (e.g. rice), had its interests safeguarded by the fact that such items were usually covered by the United Kingdom's agreement with another Empire country. Such benefits were generalized to Australia.

(*f*) The United Kingdom agreed to regulate meat imports and stated that its policy was to give the Dominions an expanding share of United Kingdom meat imports.

(*g*) Preferential tariff advantages were also obtained in the British non-self-governing colonies and protectorates.

The preferences operating before, and not increased by, the Ottawa Agreement were continued. Thus the preferential margins on heavy wines, sugar, the sugar content of goods containing added sweetening matter, currants, etc., remained in operation.

(iii) *Developments since the Ottawa Agreement.* The Australia-United Kingdom Agreement operated with virtually no alteration until the beginning of 1939. Since then three major factors have been responsible for altering its terms or significance :—

(*a*) *The United Kingdom-United States of America Trade Agreement*, 1938. This Agreement became effective from 1st January, 1939, and, to enable the United Kingdom to secure concessions from the United States of America, Australia agreed to the following reductions in the preferences which her products were enjoying in the United Kingdom :—

Wheat (preference eliminated); apples and pears (1s. 6d. per cwt. in Northern Hemisphere season); honey (2s. per cwt.); canned apples (1s. 3d. per cwt.); canned grapefruit (preference eliminated). The ad valorem duty of 15 per cent. was replaced by specific duties of 5s. 6d. per cwt. on canned fruit salad, 5s. per cwt. on canned pineapples and 4s. per cwt. on canned loganberries.

(*b*) *Long-term Contracts with United Kingdom.* During and since the war Australia has made contracts under which the United Kingdom is obligated to purchase the whole or a substantial part of the exportable surplus of several important Australian products normally entitled to preferential treatment. Meat, sugar, dried fruits, apples and pears, butter, cheese and eggs are notable examples. The tariff preference is not significant whilst these contracts are operative and is further depreciated in importance since Australia would experience no difficulty in selling primary products in a wide range of markets if supplies were available.

(*c*) *The General Agreement on Tariffs and Trade.* Australia has participated in the three rounds of tariff negotiations under this agreement held at Geneva, 1947, Annecy, 1949, and Torquay, 1950–51. In order to reach agreements with the various countries participating in these tariff negotiations Australia consented to a number of reductions in preference margins guaranteed to her under the Ottawa Agreements in return for more favorable tariff treatment in some twenty-seven countries with which agreements have been made. The reductions are summarized below :—

Apples (margin eliminated during Northern Hemisphere season); raisins (2s. per cwt.); canned peaches, pears and apricots (3 per cent. ad val.); non-tropical canned fruit salad (margin eliminated); dried apricots (2s. 6d. per cwt.); dried prunes, apples, peaches and nectarines (margin eliminated); honey (nil to 1s. 6d. per cwt. according to value for duty.) The preference margin was also modified on a number of items in which Australia was interested but on which her consent to reduction was not required under the Ottawa Agreement. Examples are fruit pulp, pig iron, rice, hard soap, glue, gelatine and size. The preference on light wine was increased from 4s. per gallon to 10s. per gallon.

11. **Tariff Board.**—The Tariff Board Act 1921–1947 provides for the appointment of a Tariff Board consisting of four members, one of whom shall be an administrative officer of the Department of Trade and Customs. This member may be appointed Chairman of the Board. Members of the Board are appointed for a term of not less than one year nor more than three years, and two members may be appointed as a Committee for making special inquiries. The purpose of the Tariff Board is to assist the Minister in the administration of matters relating to trade and customs. The more important matters which the Minister shall refer to the Board for inquiry and report include disputes arising out of the interpretation of any Customs or Excise Tariff; the necessity for new, increased or reduced duties; the necessity for granting bonuses; any proposal

for the application of the British Preferential Tariff to any part of the British Dominions or any foreign country; and any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff by charging unnecessarily high prices for his goods or acting in restraint of trade. The Minister may refer to the Board for inquiry and report the following matters:—the classification of goods under items of the Tariff that provide for admission under By-laws; the determination of the value of goods for duty; the general effect of the working of the Customs Tariff and the Excise Tariff; the fiscal and industrial effects of the Customs laws of the Commonwealth; the incidence between the rates of duty on raw materials and on finished or partly finished products; and any other matter affecting the encouragement of primary and secondary industries in relation to the Tariff.

Inquiries conducted by the Board relating to any revision of the Tariff, any proposal for a bounty, or any complaint that a manufacturer is taking undue advantage of the protection afforded him by the Tariff shall be held in public, and evidence in such inquiries shall be taken in public on oath, unless any witness objects to giving any evidence in public which the Board is satisfied is of a confidential nature, when the Board may take such evidence in private. Evidence taken by the Board in connexion with any inquiry under the Customs Tariff (Industries Preservation) Act 1921–1936 shall be taken in public on oath.

12. **Trade Descriptions.**—The Commerce (Trade Descriptions) Act 1905 as amended by the Acts of 1926, 1930 and 1933 gives power to compel the placing of a proper description on certain prescribed goods, or on packages containing the same, being imports or exports of the Commonwealth. The goods to which a trade description must be applied are:—(*a*) Articles used for food or drink by man, or used in the manufacture or preparation of articles used for food or drink by man; (*b*) medicines or medicinal preparations for internal or external use; (*c*) manures; (*d*) apparel (including boots and shoes) and the materials from which apparel is manufactured; (*e*) jewellery; (*f*) seeds and plants; and (*g*) brushware.

13. **Acts Passed in 1949 and 1950.**—The following Commonwealth Acts relating to Australian production and trade were assented to during the years 1949 and 1950:—

ACTS PASSED IN 1949.

Customs Act, No. 45 of 1949. An Act to amend the Customs Act 1901–1947.

Excise Act, No. 46 of 1949. An Act to amend the Excise Act 1901–1947 and for other purposes.

Customs Tariff Act, No. 76 of 1949. An Act relating to Duties of Customs.

Excise Tariff Act, No. 77 of 1949. An Act relating to Duties of Excise.

Customs Tariff (New Zealand Preference) Act, No. 78 of 1949. An Act to amend the Customs Tariff (New Zealand Preference) 1933–1948.

Customs Tariff (No. 2) Act, No. 79 of 1949. An Act relating to Duties of Customs.

Coal Excise Act, No. 81 of 1949. An Act relating to Excise on Coal.

Excise Tariff (No. 2) Act, No. 82 of 1949. An Act relating to Duties of Excise.

ACTS PASSED IN 1950.

Tariff Board Act, No. 13 of 1950. An Act to amend the Tariff Board Act 1921–1947.

Customs Tariff Act, No. 22 of 1950. An Act relating to Duties of Customs.

Customs Tariff (New Zealand Preference) Act, No. 23 of 1950. An Act to amend the Customs Tariff (New Zealand Preference) 1933–1949.

Customs Tariff (No. 2) Act, No. 32 of 1950. An Act relating to Duties of Customs.

Customs Tariff (Canadian Preference) Act, No. 33 of 1950. An Act to amend the Customs Tariff (Canadian Preference) 1934–1948.

Superphosphate Bounty Act, Repeal Act, No. 53 of 1950. An Act to repeal the Superphosphate Bounty Act, 1941.

Flax Canvas Bounty Act, No. 54 of 1950. An Act to provide for the Payment of a Bounty on the Production of Flax Canvas.

Wool Products Bounty Act, No. 55 of 1950. An Act to provide for the Payment of Bounty on the production of certain Wool Products.

Customs Act, No. 56 of 1950. An Act to amend the Customs Act 1901–1949.

Tractor Bounty Act, No. 57 of 1950. An Act to amend the Tractor Bounty Act 1939–1947.

Customs Tariff (Export Duties) Act, No. 59 of 1950. An Act relating to Export duties of Customs.

Customs Tariff (No. 3) Act, No. 60 of 1950. An Act relating to Duties of Customs.

Excise Tariff Act, No. 61 of 1950. An Act relating to Duties of Excise.

Excise Tariff (No. 2) Act, No. 62 of 1950. An Act relating to Duties of Excise.

Egg Export Control Act, No. 63 of 1950. An Act relating to Membership of the Australian Egg Board pending the holding of Elections of Members to represent Producers in each State.

§ 3. Trade Commissioner Service.

Empire and foreign countries have deemed it necessary in their trade interests to establish generous overseas representation and have for many years maintained extensive oversea trade services.

Prior to 1929, Australian representation abroad was limited to the High Commissioner's Office, in London, with a subsidiary agent in Paris, and the Office of the Commissioner-General for Australia in New York. Apart from the facilities afforded by those offices, the only form of oversea trade representation available to Australia was that of the British Oversea Trade Service, a service whose activities are naturally more particularly devoted to the development of United Kingdom rather than Dominion trade.

The growing importance of Australia's trade with Canada led to the appointment in 1929 of an Australian Trade Commissioner in that country. The part played by that official in the subsequent negotiation of the Trade Agreement with Canada, in the cultivation of close and cordial relations with the Canadian authorities, and in general in focussing interest on Australia and Australian products, amply demonstrated the value of such appointments both to the Commonwealth Government and the Australian trading community.

The general advantages to be derived from the appointment of Trade Commissioners may be briefly stated as follows :—(*a*) fostering of goodwill, (*b*) correction and avoidance of misunderstandings, and (*c*) dissemination of knowledge concerning the respective countries. Particular facilities which they are able to afford to the trading community are (*a*) information as to present and prospective demand for goods, (*b*) information as to foreign and local competition, (*c*) advice as to best selling methods, (*d*) reports as to the standing of foreign buyers, (*e*) specification of articles in demand, (*f*) dealing with trade inquiries, (*g*) advice and assistance to commercial visitors regarding trade matters, (*h*) settlement of difficulties between exporters in Australia and buyers abroad, and (*i*) furnishing of information as to foreign import requirements, customs duties, trade regulations, etc.

In addition to the foregoing particular trading functions, it is the duty of a Trade Commissioner to watch and advise the Government regarding any developments in his Territory affecting not only trade and commerce, but any other matters of concern to his home Government.

Trade Commissioners are drawn either from the commercial world or from the ranks of the Public Service as circumstances dictate. With each Trade Commissioner, however, it is customary to provide an Assistant Trade Commissioner, who is selected to undergo training in the service and qualify at a later stage for appointment as a Trade Commissioner. The staffing arrangements are in this way designed to enable the Government to avail itself of the best procurable executives of either the Public Service or the commercial world and at the same time to build up a first class personnel to carry out a vigorous policy of expansion in connexion with Australia's oversea trade.

The oversea trade representation is shown in Chapter XXIX.—Miscellaneous.

§ 4. Method of Recording Imports and Exports.

1. **Customs Area.**—The Customs Area, to which all oversea trade statistics issued by this Bureau apply, is the whole area of the Commonwealth of Australia, comprising the States of New South Wales (including the Australian Capital Territory), Victoria, Queensland, South Australia, Western Australia and Tasmania, and the Northern Territory. Non-contiguous territories and mandated areas are treated as outside countries, and trade transactions between Australia and these non-contiguous territories are part of the oversea trade of Australia. Such transactions are shown separately, i.e., the trade of Australia with each particular country is separately recorded and tabulated.

2. **The Trade System.**—There are two generally accepted systems of recording oversea trade statistics, namely, (*a*) special trade and (*b*) general trade. The United Nations Statistical Office defines the two systems as follows :—

(*a*) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption and withdrawals from bonded warehouses or free zones for domestic consumption, transformation or repair. Special exports comprise exports of national merchandise, namely goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods. (Nationalized goods are goods which, having been included in special imports, are then exported).

(*b*) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. Direct transit trade and trans-shipment under bond are excluded. General exports are the combined total of national exports and re-exports of imported merchandise including withdrawals from bonded warehouse or free zone for re-export.

Both special and general trade statistics are published by the Bureau, greater emphasis being placed on the latter. Special exports can be readily identified in the general export tabulations while special imports are obtained from separate tabulations.

Except for those appearing in § 14 para. 2, the tables which follow refer to general trade.

3. **Statistical Classification of Imports and Exports.**—Statistics of oversea imports and exports from which the summary tables in this issue of the Official Year Book have been extracted were compiled according to the revised classification which came into operation on 1st July, 1945. This classification which is designed to allow for the inclusion of items which become significant with varying trade conditions provides for nearly 3,000 separate import items and approximately 1,500 export items.

4. **The Trade Year.**—From 1st July, 1914 the statistics relating to Oversea Trade have been shown according to the financial year (July to June). Prior to that date the figures related to the calendar year. A table is included in § 15 showing the total value of imports and exports in the calendar years 1939 and 1949 to 1951 inclusive.

5. **Valuation.**—(i) *Imports.* The recorded value of goods imported from countries beyond Australia as shown in the following tables represents the amount on which duty is payable or would be payable if the duty were charged ad valorem. By Act No. 54 of 1947, which operated from 15th November, 1947, the Customs Act was amended to provide that the value for duty of goods imported into Australia should be the f.o.b. value in Australian currency instead of the British currency f.o.b. value plus 10 per cent.

Section 154 (1) of the Customs Act 1901–1947 provides that "when any duty is imposed according to value, the value for duty shall be the sum of the following :—

(*a*) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction, or

(ii) the current domestic value of the goods, whichever is the higher ;

(*b*) all charges payable or ordinarily payable for placing the goods free on board at the port of export ;".

"Current domestic value" is defined as "the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of those goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country". All import values shown throughout this and other chapters of this issue of the Official Year Book are therefore uniform f.o.b. values in Australian currency.

(ii) *Exports.* Prior to 1st July, 1929 the recorded value of all goods exported was taken as representing the value in the principal markets of Australia in the ordinary commercial acceptation of the term. Owing to the inflated values arbitrarily allotted in recent years to commodities which are subject to governmental control or subsidy, some change in the practice of valuation of exports of such commodities became desirable. Accordingly a new basis was adopted, as from 1st July, 1929, for the statistical valuation of exports of sugar, butter and goods on which bounty or rebate was paid, which would show for (*a*) *Sugar*—the value f.o.b. at which sold to oversea buyers, or a f.o.b. value equal to the London market price if shipped on consignment ; (*b*) *Goods on which bounty or rebate was paid on export*—the value in the principal markets of Australia in the ordinary commercial acceptation of the term, less the value of any bounty or rebate. Until 31st March, 1934, the basis adopted for the value of exports of *butter* was the current market value, less the amount paid as export bonus. From 31st March, 1934 to 30th June, 1937, the basis was (*a*) sold in Australia for export—the f.o.b. equivalent of the price at which the butter was sold, and (*b*) shipped on consignment—the f.o.b. equivalent of the ruling price overseas.

From 1st July, 1930 to 30th June, 1937, the basis adopted for the value of *wool* exported was (*a*) sold in Australia for export—the actual price paid plus the cost of services incurred in placing the wool on board ship, and (*b*) shipped on consignment—the f.o.b. equivalent of ruling Australian prices.

From 1st July, 1932 to 30th June, 1937, the basis adopted for the value of *wheat* exported was (*a*) sold in Australia for export—the f.o.b. equivalent of the price at which the wheat was sold, and (*b*) shipped on consignment—the f.o.b. equivalent of the current selling price overseas.

From 1st July, 1934 to 30th June, 1937, the basis adopted for the value of *flour* exported was (*a*) sold in Australia for export—the f.o.b. equivalent of the price at which the flour was sold, and (*b*) shipped on consignment—the f.o.b. equivalent of ruling Australian prices.

Since 1st July, 1937, the following revised definitions of f.o.b. values have been adopted for exports generally :—

(1) Goods sold to oversea buyers before export—the f.o.b. equivalent of the price at which the goods were sold (e.g. as regards wool, the actual price paid by the oversea buyer plus the cost of all services incurred by him in placing the wool on board ship).

(2) Goods shipped on consignment—the Australian f.o.b. equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were despatched for sale (as regards wool, the f.o.b. equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. equivalent of the price ultimately received).

Exporters are required to show all values in terms of Australian currency, and to include cost of containers.

6. **Inclusions and Exclusions.**—(i) *Ships' Stores.* Prior to 1906 goods shipped in Australian ports on oversea vessels as ships' stores were included as exports. From 1906, ships' stores have been specially recorded as such, and omitted from the tabulation of exports. A table showing the value of these stores (including bunker coal and oil) shipped each year since 1942–43 compared with 1938–39 is shown in § 10. page 497.

(ii) *Outside Packages.* Outside packages have always been included in the tabulation of imports but apart from those received from United Kingdom a classification according to country of origin has been available only since 1950–51.

(iii) *Trade on Government Account.* Imports and exports on Government account are treated as normal transactions and are an integral part of oversea trade transactions.

(iv) *Currency and Coinage.* Currency notes and coins of base metal are included in the oversea trade statistics at their commodity value only.

(v) *Gold Content of Ores and Concentrates.* The value of ores and concentrates imported and exported includes the value of the gold content. The latter is not recorded separately for purposes of inclusion in imports and exports of gold.

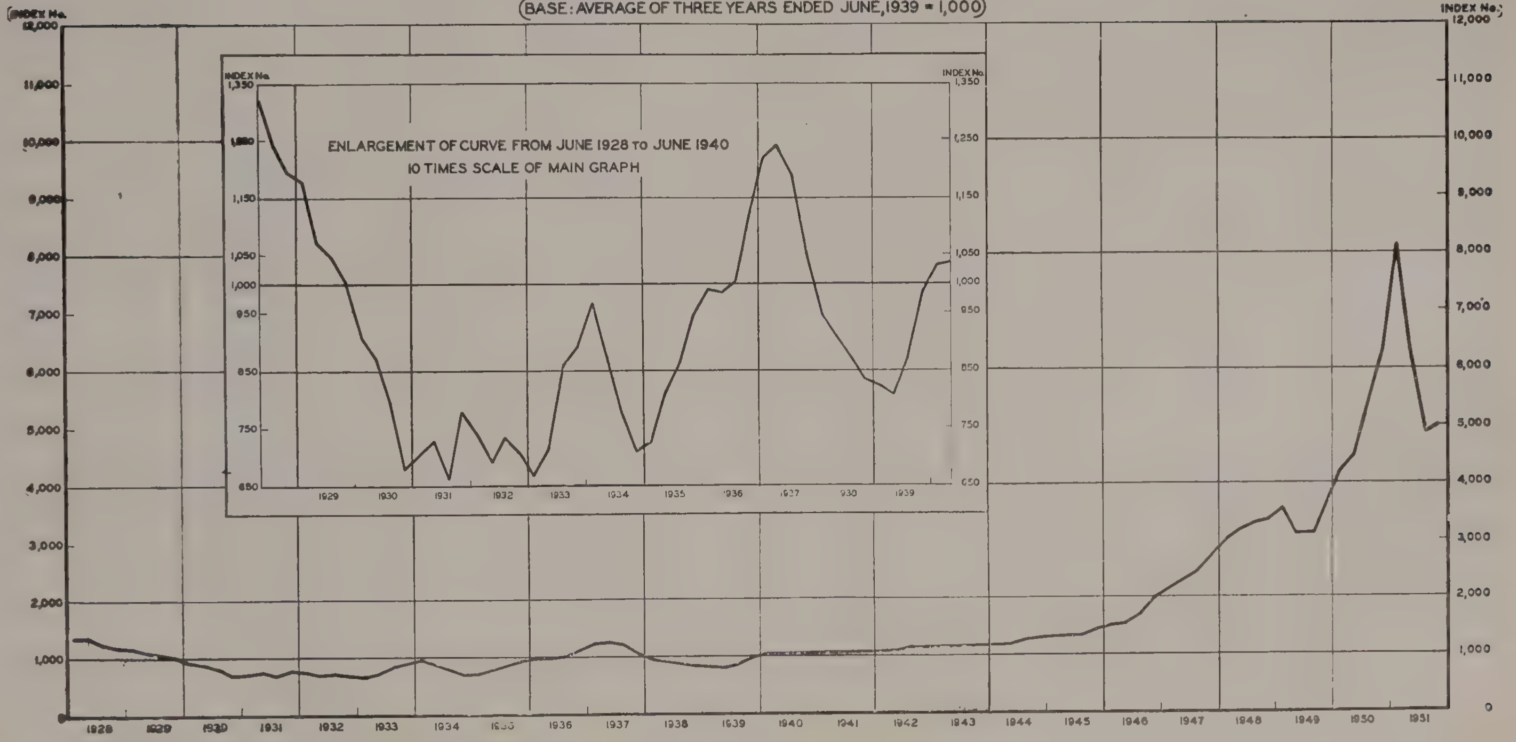
7. **Pre-Federation Records.**—In the years preceding Federation each State independently recorded its trade, and in so doing did not distinguish other Australian States from foreign countries. As the aggregation of the records of the several States is necessarily the only available means of ascertaining the trade of Australia for comparison with later years, it is unfortunate that past records of values and the direction of imports and exports were not on uniform lines. The figures in the following tables for years prior to Federation have been carefully compiled and may be taken as representative of the oversea trade of Australia as a whole. On the introduction of the Customs Act 1901 the methods of recording values were made uniform throughout the States.

8. **Countries to which Imports Relate.**—From 1st January, 1905, in addition to the record of the countries whence goods directly arrived in Australia, a record of the countries of their origin was kept as it was considered that classification of imports according to country of origin was of greater interest and value than classification according to country of shipment. Up to and including the year 1920–21, imports continued to be classified both according to country of shipment and according to country of origin but the former tabulation was discontinued as from the year 1921–22.

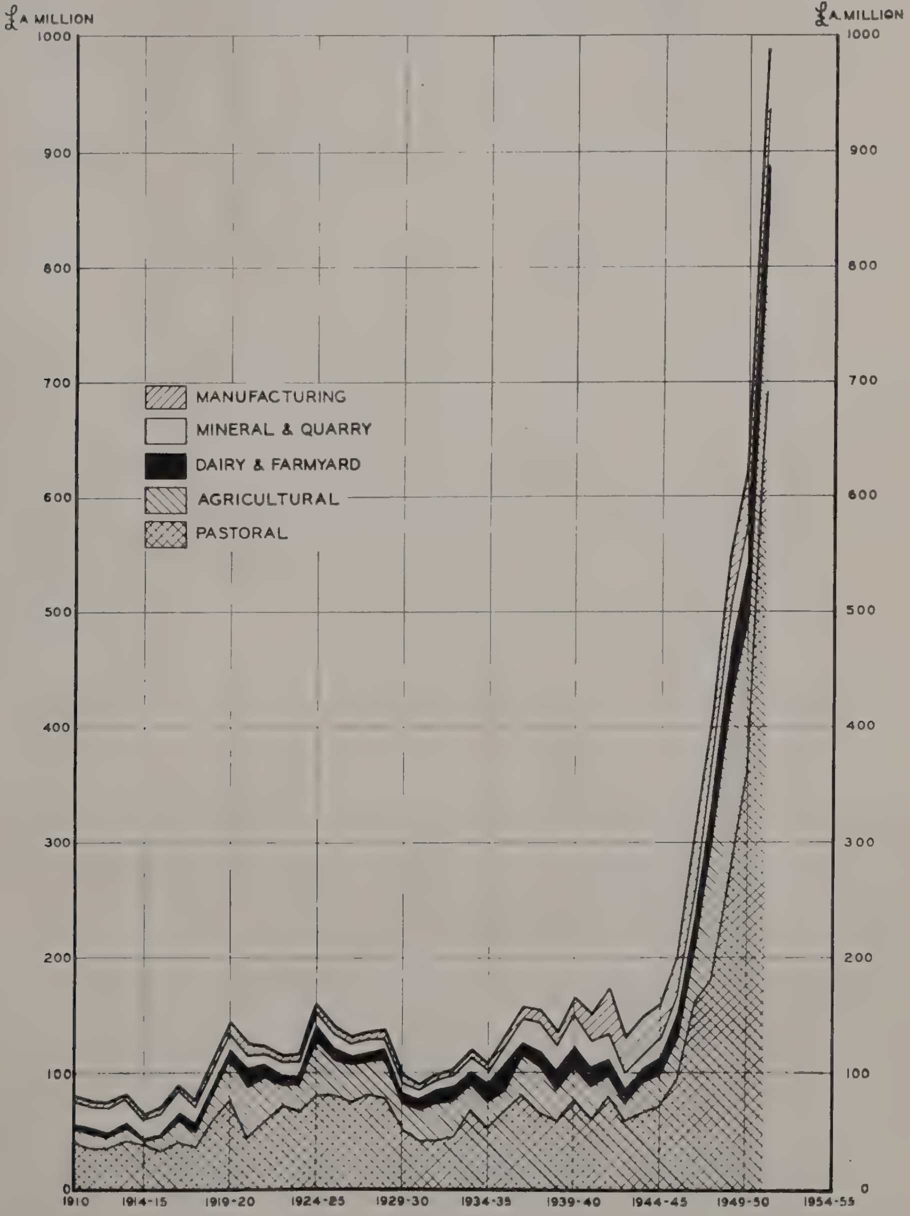
EXPORT PRICE INDEX-NUMBERS: AUSTRALIA, 1928 TO 1951

SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS

(BASE: AVERAGE OF THREE YEARS ENDED JUNE, 1939 = 1,000)

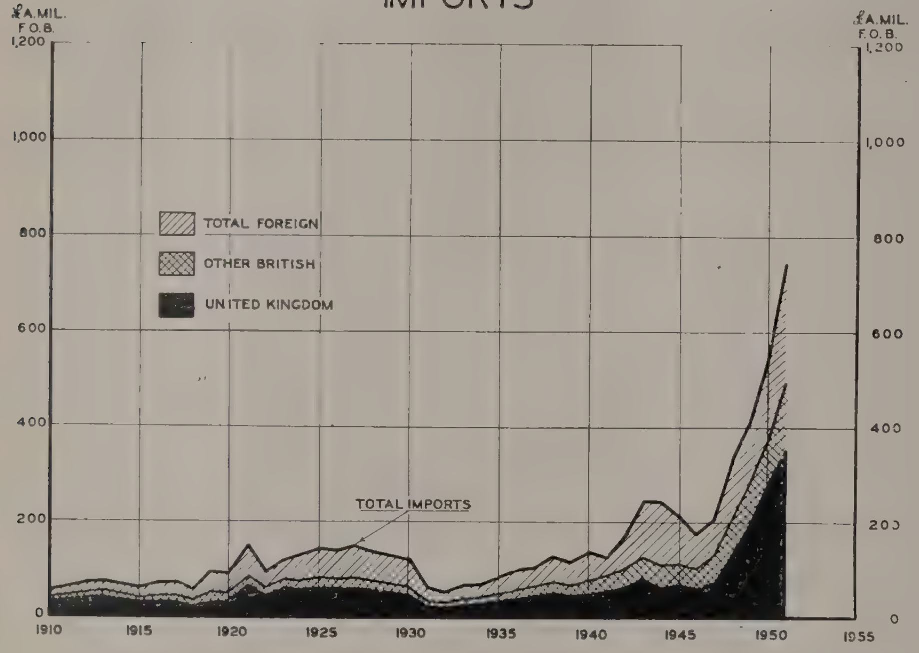


EXPORTS OF AUSTRALIAN PRODUCTS ACCORDING TO INDUSTRY, 1910 TO 1950-51

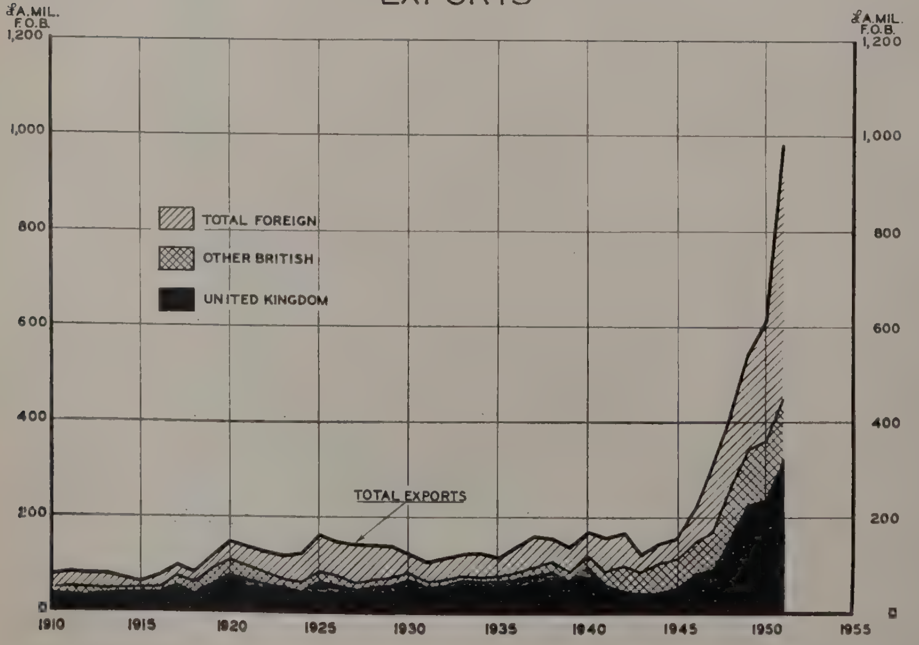


OVERSEA TRADE: AUSTRALIA, 1910 TO 1951

IMPORTS



EXPORTS



§ 5. Oversea Trade.

1. **Total Oversea Trade.**—(i) *Including Gold.* The following table shows the total trade (including gold) of Australia with oversea countries from the earliest date for which records are available. To save space, the period 1826 to 1940–41 has been divided into five-yearly periods, and the figures shown represent the annual averages for the periods specified. Figures for individual years were published in earlier issues of the Official Year Book but it should be borne in mind that the figures for imports in issues prior to No. 38 are in British currency. (*See* note to following table.)

In this chapter the values in all tables of imports and exports are shown in Australian currency f.o.b.

TOTAL OVERSEA TRADE: AUSTRALIA.

(INCLUDING GOLD.)

Period.(*a*)	Value (£'000).			Value per Head of Population.			Ratio of Exports to Imports.
	Imports.	Exports.	Total.	Imports.	Exports.	Total.	
				£	£	£	%
1826 to 30	580	153	733	9.7	2.5	12.2	26.4

(*a*) The figures shown for the years 1826 to 1940–41 represent the annual averages for the periods covered. The trade of the individual years will be found in Official Year Book No. 35 and earlier issues but it should be noted that imports are shown in British currency. From 1914–15 onwards the particulars relate to financial years. (*b*) Prior to 1906, ships' stores were included in exports. For value of such goods shipped on oversea vessels each year since 1938–39 *see* later table, § 10.

In issues of the Official Year Book prior to No. 23 fluctuations in the value of the oversea trade of Australia for earlier years have been treated in some detail. The enhanced prices ruling for commodities and the peculiar conditions affecting Australian trade were responsible for the high value of imports in the years following the 1914–18 War and these factors should be taken into consideration in making comparisons with earlier years.

In 1924–25 the total value of oversea trade exceeded £300 million for the first time. Of the total value of trade, amounting to £318,454,000, imports represented £157,143,000 and exports £161,311,000. Imports in 1924–25, however, included an exceptionally large quantity of bullion and specie valued at £10,543,000. In the three years ended 1928–29 imports fell but exports were well maintained, but in 1929–30 both imports and exports declined substantially. The full effects of the economic depression are reflected in the greatly diminished trade figures for 1930–31 and some years thereafter. The lowest level was recorded in 1931–32 when the total trade amounted to £137,538,000. Following a gradual improvement in 1933–34 and 1934–35, recovery was more rapid in the three years ended 1937–38, owing generally to higher prices for exports of primary products and the rising flow of imports. In 1937–38, however, export prices fell sharply and declined still further in 1938–39. In 1939–40 the value of trade rose substantially as a result of increases in the value of both imports and exports, but declined again in 1940–41, mainly due to import restrictions and scarcity of shipping.

The outbreak of war in the Pacific in 1941 resulted in an enormous increase in the value of imports during the years 1941–42 to 1945–46. Fluctuating yearly increases in the value of exports were recorded during the same period. During 1946–47 the value of total trade reached £518,514,000, due largely to substantial increases in import and export prices.

Import and export values continued to soar during the following four years. The total value of trade in 1947–48 amounted to £749,700,000 (imports, £339,746,000 and exports, £409,954,000); in 1948–49 to £957,867,000 (imports, £415,194,000 and exports, £542,673,000); in 1949–50 to £1,151,766,000 (imports, £538,069,000 and exports £613,697,000); and in 1950–51 the record total of £1,725,667,000 was reached, when imports and exports attained the record totals of £743,871,000 and £981,796,000 respectively.

(ii) *Excluding Gold.* The fluctuations in merchandise trade (including silver as merchandise) are shown more clearly in the following table, from which *all* gold movements have been excluded :—

OVERSEA TRADE : AUSTRALIA.

(EXCLUDING GOLD.)

Year.	Imports excluding Gold.	Exports excluding Gold.	Total Trade excluding Gold.	Value per Head of Population. Imports.	Value per Head of Population. Exports.	Value per Head of Population. Total Trade.	Ratio of Exports to Imports.

2. **Balance of Trade.**—The table on page 475 shows the ratio of exports to imports (including gold) for five-yearly periods from 1826 to 1940–41 and for each year from 1941–42 to 1950–51, while the table above shows the ratio of exports to imports (excluding gold) for each year 1946–47 to 1950–51 compared with 1938–39. Reference to the first-mentioned table shows that subsequent to the five-yearly period 1886–90 the balance of trade, for all periods to 1936–37 to 1940–41, had been on the side of exports. The

position was reversed, however, during the war years 1941–42 to 1944–45 when each year recorded a substantial excess of imports. The post-war years to 1950–51 have again shown record balances in favour of exports.

In the following table the balance of commodity trade, including the value of gold currently produced in Australia, has been separated from the monetary movement of gold :—

COMMODITY BALANCE OF TRADE AND MONETARY MOVEMENT OF GOLD.

(£ Million.)

Year.	A. Total Imports other than Gold.	B. Total Exports other than Gold.	C. Gold produced in Australia.	D. Total of Merchandise Exports and Gold Production.	E. Commodity Balance of Trade.	F. Net Exports of Gold in excess of Production.	G. Total Balance.

1950–51 ..	741.4	981.8	13.6	995.4	254.0	−16.1	237.9

(*a*) First six months only.

NOTE.—From 1939–40 onward, under contracts with the British Government, Australia received payment for some exportable commodities (e.g., wool, etc.) irrespective of when the goods were shipped. Payments for exportable goods were somewhat larger than the recorded value of exports, and payments relating to the balance of trade were more favorable than is indicated by the figures above which relate only to goods actually shipped.

The balance of visible trade, including the net movement of precious metals, does not present a complete picture of Australia's international transactions during each year. Allowance must also be made for unrecorded imports and exports, for services rendered and received, and for international capital and interest transactions. Tables analysing these values for the years 1948–49 to 1950–51 will be found in § 17 of this chapter.

§ 6. Direction of Oversea Trade.

1. **Imports according to Country of Origin.**—(i) *Values.* The following table shows the value of the imports into Australia, during the years 1946–47 to 1950–51 compared with the year 1938–39, of commodities stated to be the produce or manufacture of the undermentioned countries.

(a) Outside packages distributed according to country of origin.

Imports from the United Kingdom were 48.14 per cent. of the total value of imports during 1950–51 compared with 40.67 per cent. during 1938–39. Imports from the United States of America have diminished during recent years to 8.21 per cent. in 1950–51 compared with 14.74 per cent. during the year 1938–39.

2. **Exports according to Destination.**—(i) *Values.* The following table shows the value of commodity exports to the principal countries during the years 1938–39 and 1946–47 to 1950–51.

(ii) *Percentages.* The relative importance of various countries as markets for Australian produce is shown by the following table of percentages. Exports to the United Kingdom were 32.65 per cent. and all British countries 45.46 per cent. of the total in 1950–51, compared with 54.45 per cent. and 69.51 per cent. respectively during 1938–39.

Foreign countries absorbed 54.54 per cent. of the total exports during 1950–51 compared with 30.49 per cent. during the year 1938–39.

(*a*) Excludes outside packages. (*b*) Excludes £338,000, country of origin not stated.

NOTE.—Minus sign (—) indicates excess of imports.

The balance of trade with single countries is of little significance, since in the first place there is still a fair proportion of Australian produce distributed through the United Kingdom either immediately, by transhipment or re-sale, or ultimately, by incorporation in manufactures. Further, in very many cases international balances are equated directly by services or indirectly by exchange of goods between several countries. (*See also* § 17 below.)

§ 7. Australian Oversea Trade with the United Kingdom.

1. **Imports.**—The following table shows, according to statistical classes, the value of imports into Australia of United Kingdom origin during the years 1946–47 to 1950–51 compared with the year 1938–39.

(*a*) Excludes undressed timber not measured in super. ft.

5. **Proportion of Trade from United Kingdom and Competing Countries.**—Since 1908 permanent resident Commissioners appointed by the British Board of Trade have been located in Australia for the purpose of advising manufacturers and merchants in the United Kingdom with regard to Australian trade affairs. From 8th August, 1907, the Commonwealth Customs Tariffs have provided preferential rates of Customs Duties on certain goods the produce or manufacture of the United Kingdom with the object of assisting the British manufacturer to retain or improve his position in this market in relation to other countries. The main provisions in these Acts relating to preference are dealt with on previous pages in this Chapter.

In an investigation into the relative position occupied by the United Kingdom in the import trade of Australia, the comparison must, of course, be restricted to those classes of goods which are produced or manufactured in the United Kingdom. The imports into Australia include many commodities, such as tea, rice, raw coffee, unmanufactured tobacco, petroleum products, copra, timber, etc., which the United Kingdom could not supply. These items, in addition to others not available from that country, have, therefore, been omitted from the computation following.

The imports into Australia have been classified under nine headings, and the trade of the United Kingdom therein is compared with that of France, Germany, Japan, and the United States of America. These countries have been selected as the principal competitors in normal times with the United Kingdom for the trade of Australia under the specified headings. Totals for the years 1913, 1938–39, 1949–50 and 1950–51 are shown in the following table.

AUSTRALIAN IMPORTS OF PRODUCTS OF VARIOUS COUNTRIES : VALUE.

(£.)

Nature of Imports.	Year.	United Kingdom.	France.	Germany.	Japan.	United States of America.	All Countries.

	1950–51	48.14	2.21	1.99	2.08	8.21	100.00

The total value of the commodities included in the competitive classes increased from £50,135,071 in 1913 to £77,654,086 in 1938–39 and to £389,840,749 in 1949–50. In 1950–51 it had increased to £534,705,031. The principal classes of competitive imports are metals, metal manufactures and machinery (value £289,768,944 in 1950–51) and apparel, textiles and manufactured fibres (value £138,668,670 in 1950–51). The value of goods included in these two group represented 80.3 per cent. of the total value of competitive commodities during 1950–51.

In 1938–39 the United Kingdom supplied 52.69 per cent. of the total value of competitive goods. In 1913 the corresponding figure was 58.38 per cent. and in 1950–51 59.63 per cent.

The share of Japan in the competitive trade increased in proportion to other countries from 1.24 per cent. in 1913 to 5.02 per cent. in 1938–39. Owing to the effects of war it was reduced to 0.06 per cent. in 1946–47. In 1950–51 it was 2.78 per cent.

The proportion of the United States of America in the competitive trade improved from 10.86 per cent. in 1913 to 13.42 per cent. in 1938–39 and to 20.28 per cent. in 1947–48, but had fallen to 7.9 per cent. in 1950–51.

The proportion of France declined from 3.61 per cent. in 1913 to 1.21 per cent. in 1938–39 but in 1950–51 had risen to 2.68 per cent.

The proportion of the competitive imports supplied by Germany was 10.68 per cent. in 1913, and 4.66 per cent. in 1938–39. In consequence of the war, the proportion of imports from Germany fell to 0.52 per cent. during 1948–49 but has since risen and in 1950–51 was 2.78 per cent.

§ 8. Trade with Eastern Countries.

1. **Imports of Merchandise from Eastern Countries.**—The values of imports into Australia from Eastern countries during the year 1938–39 and the years 1946–47 to 1950–51 are shown in the following table. The principal commodities imported in 1950–51 according to countries of origin were :—Ceylon—Tea, £9,184,232 ; India—Bags and Sacks, £12,985,393, Cotton and Linen Piecegoods, £5,939,370, Hessians, £2,916,760, Tea, £3,723,003 ; Malaya—Crude Rubber, £17,580,811 ; Singapore—Crude Rubber, £2,053,753, Petroleum Spirit, £5,391,715, Solar and Residual Oil, £2,219,205 ; Indonesia—Crude Rubber, £1,326,361, Kerosene, £3,533,330, Petroleum Spirit, £9,510,016, Residual and Solar Oil, £4,735,910 ; Japan—Cotton and Linen Piecegoods, £2,346,516, Iron and Steel, £8,503,414.

Total, Merchandise	113,216,993	208,342,396	338,085,254	414,055,790	536,124,083	741,378,161
Total, Specie and Bullion ..	3,537,036	1,142,427	1,660,874	1,138,410	1,944,760	2,492,426
Grand Total	116,754,029	209,484,823	339,746,128	415,194,200	538,068,843	743,870,587

8. **Imports and Net Customs Revenue.**—The percentage of net Customs revenue collected on the total value of all merchandise imported in each year was as follows :—1938–39, 21.9 per cent. ; 1946–47, 17.1 per cent. ; 1947–48, 14.9 per cent. ; 1948–49, 14.0 per cent. ; 1949–50, 13.4 per cent. and 1950–51, 16.3 per cent. Primage duty was in force during these years and adding this to net Customs revenue, the percentages were as follows :—1938–39, 25.0 per cent. ; 1946–47, 19.8 per cent. ; 1947–48, 17.0 per cent. ; 1948–49, 15.3 per cent. ; 1949–50, 14.5 per cent. ; and 1950–51, 12.4 per cent. The percentages of net Customs revenue, omitting primage, on the total value of dutiable goods only were—1938–39, 37.1 per cent. ; 1946–47, 32.3 per cent. ; 1947–48, 26.0 per cent. ; 1948–49, 24.7 per cent. ; 1949–50 24.6 per cent. ; and 1950–51, 22.4 per cent. The calculations are based on Australian currency values and on the assumption that the value of clearances approximated to the value of imports during the same period.

9. **Protective and Revenue Customs Duties.**—The value of goods cleared for Australian consumption classified under protective and revenue duties and the gross duty collected are shown in respect of the United Kingdom and other countries for each of the years 1937–38 to 1939–40 in Official Year Book No. 37, page 418. Information for later years is not available.

§ 10. Ships' Stores.

Prior to 1906, goods shipped in Australian ports on board oversea vessels as ships' stores were included in the general exports. From 1906, ships' stores have been specially recorded as such, and have been omitted from the export figures. The value of these stores shipped each year during the period 1942–43 to 1950–51, compared with 1938–39, with fuel oils separate, is shown in the following table :—

VALUE OF STORES SHIPPED ON OVERSEA VESSELS : AUSTRALIA.

(£.)

Period.	Fuel Oils.	All Stores (including Fuel Oils).	Period.	Fuel Oils.	All Stores (including Fuel Oils).
1938–39	606,515	2,105,619	1946–47 ..	1,684,502	4,506,599
1942–43	3,833,414	6,016,334	1947–48 ..	2,551,736	5,509,945
1943–44	6,078,800	8,478,714	1948–49 ..	3,830,986	7,814,722
1944–45	8,229,307	11,373,252	1949–50 ..	3,169,374	7,580,959
1945–46	2,849,156	6,331,657	1950–51 ..	4,635,486	9,358,022

In addition to fuel oils, the principal items of ships' stores supplied to oversea vessels in 1950–51 were—Meats, £1,519,009 ; Fruit and Vegetables, £522,994 ; Bunker Coal, £248,828 ; Butter, £187,689 ; Oils, other than Fuel, £185,400 ; Eggs, £165,869 ; Fish, £157,190 ; and Milk and Cream, £121,796.

§ 11. Movement of Specie and Bullion.

1. **Imports and Exports.**—The following tables show the values of gold and silver specie and bullion, and of bronze specie imported into and exported from Australia during the years 1938–39 and 1946–47 to 1950–51.

§ 12. Exports according to Industries.

1. **Classification.**—The following table provides an analysis of the exports of Australian produce, according to the main classes of industry in which the goods were produced, for the years 1949–50 and 1950–51 in comparison with those for the years 1913 and 1938–39. The index-number based on the year 1913 shows the variations in the total recorded value only of exports in each industrial group, and has not been adjusted either for price-changes or in accordance with the variation of the Australian £ in relation to sterling.

A graph is published on page 473 of this chapter which shows the value of exports of Australian produce according to industrial groups from 1910 onward.

EXPORTS OF AUSTRALIAN PRODUCE ACCORDING TO INDUSTRIAL ORIGIN : VALUE.

Industrial Group.	1913.(*a*)		1938–39.		1949–50.		1950–51.

Total ..	82,352	100	135,094	164	620,959	754	989,181	1,201

(*a*) Base Year. (*b*) Australian production of gold substituted for exports of gold each year.

2. **Relative Importance of Industrial Groups.**—In the previous table the value of commodities in each industrial group of exports of Australian produce is that recorded at the date of shipment from Australia, with the exception that the value of the production

of gold in Australia in each year has been substituted in the Mines and Quarries group for actual shipments of gold in each year. This has been done to eliminate the exports of gold for monetary purposes. In order of importance the pastoral group occupied the highest place, representing in 1913, 51.1 per cent. of the total exports, as compared with 43.7 per cent. in 1938–39, 58.4 per cent. in 1949–50, and 69.8 per cent. in 1950–51.

Exports of agricultural produce rank next in importance. From 13.0 per cent. of the total exports in 1913, agricultural produce increased to 19.5 per cent. in 1938–39. It represented 21.5 per cent. and 16.3 per cent. in 1949–50 and 1950–51 respectively.

According to value, exports of dairy and farmyard produce increased from 4.7 per cent. in 1913 to 11.6 per cent. in 1938–39, but declined to 7.3 per cent. in 1949–50 and to 3.6 per cent. in 1950–51. Though the products of mines and quarries declined seriously subsequently to the year 1913, a recovery was made in later years, the figures for 1938–39 representing 17.7 per cent., but in 1949–50 and 1950–51 the percentages were only 6.0 and 5.0 respectively. The manufacturing groups of exports, which represented 2.8 per cent. in 1913, had increased to 6.4 per cent. in 1938–39 and to 15.7 per cent. in 1945–46. In 1949–50 these groups represented 6.3 per cent. and in 1950–51 4.9 per cent.

§ 13. Australian Index of Export Prices.

1. **General.**—Over the past fifty years the exports of Australia have become increasingly diversified but, although the proportion of highly manufactured exports has increased, it is still small in relation to total exports. Most of these exports still consist of basic products, such as wool, wheat, butter, etc.

2. **Historical.**—An annual index of export prices has been published by this Bureau since its inception.

The first index was compiled annually for the years 1901 to 1916–17. The method of computation was to select all those articles of export which were recorded by units of quantity, and to apply to the quantities of these export commodities actually exported during any year the average price per unit ruling in the year 1901 (adopted as the basic year). The total value so obtained was divided into the total actual (recorded) value of these exports for that year. The quotient (multiplied by 1,000) thus obtained was the export price index-number for that year.

The method was changed in 1918. A weight for all principal exports was calculated on the average quantities of exports for the nineteen and a half years from 1st January, 1897, to 30th June, 1916. To these weights were applied the " average unit export values " of each export in successive years, and a weighted aggregative index of " price " variations was derived. It was published for the years 1897 to 1929–30, and particulars of this index were last published in Official Year Book No. 24, 1931, on page 147.

After the 1914–18 War, however, the relative importance of different exports changed considerably. In addition, the pattern of exports had become liable to vary considerably from year to year.

3. **Present Indexes.**—For the reasons just mentioned, two new series of monthly export price indexes—one using fixed weights, the other changing weights—were published in 1937, computed back to 1928. These are the only export price indexes now published.

The data on which both series are based differ from those utilized in the old series of annual index-numbers. The most important change was the use of actual (or calculated) export parities, based on actual price quotations, in place of the " unit-values " declared at the Customs.

The old index took no account of gold exports. The omission is natural and reasonable for countries which produce little or no gold. For gold-producing countries, although some exports of gold would be irrelevant (e.g., the Australian shipments of gold reserves during the depression), the exports of newly-produced gold should be taken into account. In the new series, therefore, gold is included, but the weight given to it is not the quantity exported but the quantity produced.

The two series are compiled monthly, and both relate to commodities which normally constitute about 80 per cent. of the total value of exports of merchandise and silver and gold production.

4. **Monthly Index (Fixed Weights).**—This is a weighted aggregative index of price variations. It was computed back to 1928, with that year taken as base. It is now usually published on the base—average of three years ended June, 1939 = 100.

The purpose of this index is to provide comparisons, over a limited number of years, of the level of prices of those commodities normally exported from Australia, making no allowance for any benefit or disadvantage accruing from variations during the period in the relative proportions of the different kinds of exports.

(*a*) *Weights.* The original weights (used for the period 1928 to 1936) were, in round figures, the average annual exports (or production, in the case of gold) during the five years 1928–29 to 1932–33.

From July, 1936, the weights were revised, and are now based on the average annual exports (production in the case of gold) during the three years 1933–34 to 1935–36. The break of continuity has been bridged by the usual method of splicing. Consideration is being given to adopting weights for a post-war period.

The weight adopted for wheat takes into account the wheat equivalent of flour exported, the weight allotted to greasy wool takes account of the greasy equivalent of scoured wool, tops, and wool on skins, whilst for some metals allowance is made for the metallic content of ores and concentrates exported.

The twenty items, together with the units of quantity and the weights or "quantity multipliers", are given in the following table.

EXPORT PRICE INDEX : COMMODITIES AND WEIGHTING SYSTEM.

(FROM 1ST JULY, 1936.)

Item.	Unit of Quantity.	"Quantity Multipliers".	Percentage Distribution of Aggregative Value.			
			Base Period 1936–37 to 1938–39.		Year 1950–51.	
			Excluding Gold.	Including Gold.	Excluding Gold.	Including Gold.
Wool	lb.	975,000,000	49.05	45.63	70.95	69.62

Hides—						
Cattle	lb.	28,000,000	0.64	0.59	0.70	0.69
Calf	"	1,800,000	0.08	0.07	0.08	0.08
Gold	Oz. (fine)	937,000	..	6.98	..	1.88
			100.00	100.00	100.00	100.00

(*a*) Includes "wheat equivalent" of flour.

The percentage distributions of the "Aggregative Values" shown in the foregoing table are of importance, firstly, as showing their variations from time to time as the result of differential price movements as between the various commodities, and secondly, as regards the effect on the indexes as a whole of the percentage price variations in each commodity.

(*b*) *Prices.* The adoption of current market prices (as distinct from the former average unit export values) in the present indexes permitted the use of standards for each commodity. All export parities are calculated from price quotations from the most reliable and representative sources available. In most cases, the prices used are those at which current sales are being effected. Of recent years, however, great difficulty has been experienced in obtaining appropriate current market price data for some commodities. It has become impossible to adhere to a common principle. Actual (or calculated) export parities currently prevailing, priced at f.o.b. Australian ports, are still used whenever possible. However, since dual or multiple price systems have become operative for some exports, the prices used in the index for wheat (detailed notes were given on pages 508 and 509 of Official Year Book No. 38 for 1951) and certain metals represent average actual realizations for current *shipments.* Current market prices used for the main commodities are :—

(i) the price for wool is a weighted average (based on clean scoured prices) of representative types at Sydney auctions, expressed in terms of pence per lb., greasy ;

(ii) where contracts exist between the Australian and the United Kingdom Governments for certain commodities and when most of the exports of such items are sold at these rates, contract prices are used (e.g. meats, butter, dried fruits, tallow) ; and

(iii) for those metals which are at present not actually exported, Australian export parities are estimated on the basis of the prices ruling in London.

(*c*) *Index Numbers.* The following table shows export price index-numbers for Australia for individual commodities, groups of commodities, and all groups combined for each financial year from 1936–37 to 1950–51 and monthly for the year 1950–51.

EXPORT PRICE INDEXES : AUSTRALIA.

June ..	717	447	271	751	219	426	303	354	726	176	562	535

(*a*) Non-Ferrous—silver, copper, tin, zinc, lead. (*b*) Beef, lamb, mutton, pork. (*c*) Sultanas, lexias, currants. (*d*) Cattle hides, calf skins. (*e*) For "All Groups (including Gold)"—applicable from 1936–37. (*f*) For "All Groups (excluding Gold)"—applicable from 1936–37. (*g*) Nominal.

Reference to the group indexes in the table above will show the great increases and the wide dispersion of prices of export commodities in recent years. In particular, very great movements upwards and downwards occurred in the price of wool during the twelve months ended June, 1951. Similar, but less marked, movements have occurred in prices of metals and hides. Since wool is a predominant export (with 46 per cent. of the Base Aggregate of the index) fluctuations in wool prices obscure the movements affecting the other components in the All Groups index. For purposes of comparison they are shown separately below.

RECENT TRENDS—EXPORT PRICE INDEX: WOOL AND "OTHER GROUPS".

(Base of each section: Average of three years ended June, 1939 = 100.)

Year ended June—	Wool.	Other Groups.	All Groups.	Month.	Wool.	Other Groups.	All Groups.

(a) Nominal.

5. **Monthly Index (Changing Weights).**—This series was designed for shorter period comparisons—from one or more months of the current year to the corresponding months of the previous year. It is compiled in such a way as to take closer account of the actual quantities of each article exported at current prices; and hence to indicate with rather greater accuracy the extent to which price movements have affected the actual value of our current exports.

For any given month, the procedure is to multiply the price of each commodity in that month, and its price in the corresponding month of the previous year, by the quantity exported during the given month. A comparison of the resulting aggregates gives one possible measure of the change in prices over the period; i.e., the change assuming that the proportions of the different kinds of exports whose prices are to be measured were the same as their proportions in the given month. Another possible measure is given by assuming that the proportions of the different kinds of exports in the given month had been the same as their proportions in the corresponding month of the previous year. Accordingly the first step in the procedure is repeated, substituting the quantities exported during the corresponding month of the previous year.

The index-numbers so obtained have been proved over a period of years to lie very close together. As it is convenient for practical reasons to have one single figure rather than two close alternatives the two index-numbers are multiplied together and the square root of the product extracted. This is taken to be the index-number for the month, the prices of the corresponding month of the previous year being taken as base.

The index-numbers for two or more months of one year, as compared with the corresponding period of the previous year, are computed in very much the same way. The process merely involves the cumulative addition of the aggregates computed for the individual months, and extraction of the index-numbers as explained above.

Index numbers computed on this basis are shown in the following table for the years 1949–50 and 1950–51:—

MONTHLY EXPORT PRICE INDEX (CHANGING WEIGHTS) : AUSTRALIA.

(*Base : Weighted Average Price Level in corresponding months of preceding year* = 100.)

Month.	*Month stated* compared with same month of preceding year.				*Period of trade year ending in month stated* compared with same period of preceding year.

June	115	149	114	119	101	120	114	178

Monthly export price index-numbers are issued in regular press notices, in the *Monthly Review of Business Statistics* and in the *Quarterly Summary of Australian Statistics*.

§ 14. External Trade of Australia and other Countries.

1. **Essentials of Comparisons.**—Direct comparisons of the external trade of any two countries are possible only when the general conditions prevailing therein, and the system of record, are more or less identical. For example, in regard to the mere matter of record, it may be observed that in one country the value of imports may be the value at the port of shipment, while in another the cost of freight, insurance and charges may be added thereto. Again, the values of imports and exports in one may be declared by merchants, whereas in another they may be the official prices fixed from time to time by a commission constituted for the purpose. In later years, moreover, a very substantial

difference in the value of imports would rise from the different methods of converting the moneys of foreign countries, i.e., from the application of current rates of exchange or of the mint par. Lastly, the figures relating to the external trade of any country are also affected in varying degree by the extent to which they include transit or re-export trade. This class of trade represents a much greater proportion of the trade of Switzerland and Belgium than that of other countries. France and the United Kingdom also re-export largely, whereas in Canada, Australia and New Zealand the same class of trade represents a comparatively small proportion of the total trade.

2. **"Special Trade" of Various Countries.**—In the following table the figures, which represent Australian currency values, relate as nearly as possible to imports entered for consumption in the various countries specified, and to exports of their domestic products. It is to be noted, however, that these figures do not invariably denote the same thing throughout, since, in the United Kingdom and other manufacturing countries, raw or partly manufactured materials are imported as for home consumption, and, after undergoing some process of manufacture or further modification, are re-exported as domestic production. Nevertheless, a comparison of this character reveals approximately the extent of the external trade which otherwise would not be manifest. The latest figures relating to foreign countries have been extracted from the publications of the United Nations and converted to Australian currency.

IMPORTS FOR HOME CONSUMPTION, AND EXPORTS OF DOMESTIC PRODUCTS (MERCHANDISE ONLY) : VARIOUS COUNTRIES, 1950.

Country.	Trade (£A. Million.)			Trade per Head of Population (£A.).		
	Imports.	Exports.	Total.	Imports.	Exports.	Total.

§ 16. Excise.

Although excise goods have no immediate bearing on oversea trade the rates of excise duty are in some cases related to the import duty on similar goods. Moreover, as the Excise Acts are administered by the Department of Trade and Customs it is convenient to publish here the quantities of Australian produce on which excise duty has been paid. Particulars of Customs and Excise Revenue are shown in Chapter XVII. —Public Finance. The following table shows the quantities of spirits, beer, tobacco, etc., on which excise duty was paid in Australia during the years 1946–47 to 1950–51 compared with the year 1938–39.

QUANTITIES OF SPIRITS, BEER, TOBACCO, ETC., ON WHICH EXCISE DUTY WAS PAID : AUSTRALIA.

§ 17. The Australian Balance of Payments.*

1. **General.**—The last two decades have seen a great increase in the use of balance of payments statistics, both in the consideration of economic policy by governments and, generally, in the analysis of economic conditions. Information on the Australian balance of payments has always been of peculiar importance in view of the marked effect which fluctuations in world trade tend to exercise on the level of activity of the Australian economy.

The presentation of comprehensive estimates of Australia's balance of payments was recently resumed with the publication of *The Australian Balance of Payments* 1928–29 *to* 1948–49, which contains a full explanation of the principles on which the estimates are based and the techniques used in their compilation. In the main, the pattern used in the presentation of Australian balance of payments statistics follows closely that used by the International Monetary Fund, but several modifications have been introduced which are believed to be more suitable to Australian conditions.

As detailed information in respect of some items is not available for periods ranging up to twelve months after the end of the financial year the estimates given for 1950–51 in the following pages are of a preliminary nature.

Continuous investigations are being conducted with a view to improving the methods of estimation employed and further revisions may be necessary to current estimates as more refined techniques are adopted in the future.

2. **Australia's Balance of Payments on Current Account, 1948–49 to 1950–51.**—The table on page 509 shows estimates of Australia's balance of payments on current account from 1948–49 to 1950–51.

After a deficit of £48.8 million in 1946–47 and a favourable balance on current account of £2.8 million in 1947–48, a favourable balance of £28.2 million was achieved in the third post-war year 1948–49, owing mainly to a favourable trade balance of £106.8 million. In 1949–50 Australia's favourable trade balance fell to £55.5 million; freight and insurance payments on imports and investment income payable overseas increased by £22.7 million and £13.7 million respectively, and as fluctuations in other invisibles tended to offset one another the net result was an unfavourable balance on current account of £49.6 million.

In 1950–51, the favourable balance of trade rose to £236.0 million, the highest figure ever recorded. There was little change in invisible credits between 1949–50 and 1950–51, but there were increases of £37.7 million, £10.5 million and £8.0 million respectively in freight and insurance paid on imports, investment income payable overseas and government expenditure overseas. The value of donations and reparation payments fell by £7.7 million. As a result of these movements and minor fluctuations in other items a favourable balance of £84.3 million was achieved in 1950–51, and at 30th June, 1951 the value of Australia's international reserves stood at £843.0 million as compared with £273.5 million at 30th June, 1948.

The value of exports increased by £71.7 million between 1948–49 and 1949–50 and by a further £385.3 million between 1949–50 and 1950–51. Both movements were due mainly to increases in the value of wool exports, the recorded value of which rose by £81.8 million between 1948–49 and 1949–50 and by £322.3 million between 1949–50 and 1950–51. Most other exports experienced moderate increases between 1949–50 and 1950–51, but exports of butter and meats declined from their 1949–50 levels. Price rises have been much more important than volume changes in the increases in the value of Australia's exports in 1949–50 and 1950–51. The Commonwealth Statistician's Export Price Index (excluding gold) which stood at 348 (wool 365) in 1948–49 rose to 399 (wool 473) in 1949–50 and increased further to 690 (wool 999) in 1950–51.

There were no major changes in invisible credits in 1949–50 and 1950–51. The overall increase in these items was £11.2 million in 1949–50 and £5.2 million in 1950–51.

The value of Australia's imports increased by £123.0 million between 1948–49 and 1949–50 and by £204.8 million between 1949–50 and 1950–51. These increases were spread fairly generally over the main classes of imports. The increases were partly due to increased prices for imports, but increases in the volume of imports were responsible for most of the rise in the value of imports in 1949–50 and in 1950–51.

---

* *See* Appendix to this volume for more recent figures.

BALANCE ON CURRENT ACCOUNT		28.2		−49.6		84.3

Nearly all invisible debit items showed increases over the period 1948–49 to 1950–51. The largest increases were recorded in freight and insurance payments on imports and investment income payable overseas.

Freight and insurance on imports rose from £45.9 million in 1948–49 to £68.6 million in 1949–50 and to £106.3 million in 1950–51. The increase between 1948-49 and 1949–50 was mainly attributable to the increased volume of imports, but the rise between 1949–50 and 1950–51 was caused in the main by increases in freight rates which rose on the average by 30 per cent. between the two years.

Investment income payable overseas, which was £44.8 million in 1948–49, rose to £58.5 million in 1949–50 and increased further to £69.0 million in 1950–51. These increases were due mainly to movements in the value of item 13 (*d*)—Undistributed Income, etc. (*see* table on p. 509). The value of this item was £8.5 million in 1948–49, £20.3 million in 1949–50 and £30.0 million in 1950–51.

The value of donation and reparation payments fell by £7.7 million between 1949–50 and 1950–51. This was due mainly to the non-recurrence in 1950–51 of the gift of £10 million to the United Kingdom in 1949–50.

3. **Australia's Balance of Payments on Capital Account, 1948–49 to 1950–51.**—The table on p. 511 sets out estimates of Australia's balance of payments on capital account from 1948–49 to 1950–51.

The balance of payments on capital account records the net changes in Australia's international assets and liabilities in each year. Theoretically, the balance of payments on current account and the balance of payments on capital account together constitute a complete system of accounts on the double-entry principle recording Australia's international transactions in each year, and the favorable (unfavorable) balance on current account should coincide with the net increase (decrease) in assets shown in capital account.

In practice, because of various imperfections in the estimates, it is necessary to introduce an item "Errors and Omissions" (*see* table on page 511, item 22) in the capital account in order to make that account balance at the same figure as the current account.

These "errors and omissions" consist of errors in estimating the balance on current account, errors in estimating other items in the table, and other capital account transactions which cannot yet be accurately measured. This last group is considered to be by far the most important component of "errors and omissions" and in recent years is believed to consist mainly of various types of private capital movements.

The individual items in the table may be conveniently examined in groups.

Items 6 and 17 record transactions on capital account between the Joint Organization (Wool) and the Australian Wool Realization Commission. The assets item consists of the share of Joint Organization profits accruing to Australia each year and the liabilities item is the increase in Joint Organization investments in Australia in each year.

Items 7 and 19 record the payment of the increased Australian currency equivalent of the subscriptions to the International Monetary Fund and the International Bank for Reconstruction and Development following the devaluation of the Australian pound in September, 1949. Item 18 shows Australia's liability in respect of $20 million purchased from the Fund in 1949–50 and drawings of $9 million in 1950–51 under the $100 million loan from the International Bank.

Item 13 shows the substantial repayments of public authority debt domiciled overseas from 1948–49 to 1950–51. Item 14 should be read in conjunction with this item.

Australia's international reserves increased by £569.5 million during the three years 1948–49 to 1950–51 (*see* items 10, 11), their value at 30th June, 1951 being £843.0 million.

The main reason for this increase in international reserves may be found in a group of items (items 3, 4, 16, 20 (*a*) (ii), 20 (*b*) (ii), 21 and 22) which may be conveniently grouped as "other private capital movements (including errors and omissions in other items)".

Items 3, 4, 20 (*a*) (ii), 20 (*b*) (ii) and 21 are based on the results of a *Survey of Companies with Overseas Affiliations* which has been conducted annually by the Commonwealth Statistician since 1947–48. No results are available as yet for 1950–51 but it seems unlikely that the net capital inflow located by the Survey will exceed £120 million for the three years 1948–49 to 1950–51.

After allowing for other forms of long-term capital investment in Australia it appears that possibly £260 to £310 million of the "other private capital movements (including errors and omissions in other items)" which occurred from 1948–49 to 1950–51 was originally of a temporary and possibly speculative nature.

The remaining items in capital account are of minor importance only.

4. **Australia's Balance of Payments on Current Account—Various Countries, 1949–50 and 1950–51.**—The overall improvement in the balance of payments on current account between 1949–50 and 1950–51 was £133.9 million and the regional statistics presented in the table on page 512 show that this improvement was concentrated mainly in the balance of payments with the dollar area and with non-sterling countries which were members of the Organization for European Economic Co-operation. These movements were offset to some extent by an increase in the unfavorable balance of payments with the sterling area.

5. **Australia's Balance of Payments with the Dollar Area, 1948–49 to 1950–51.**—The estimates of the balance of payments with the dollar area included in the table on page 512 are on a purely geographic basis. The more detailed estimates presented in the table on page 513 include, in addition, transactions with non-dollar areas which result in the receipt or payments of dollars by Australia. The statistics in this table are expressed in United States dollars.

Australia's estimated net drawings of dollars from the Sterling Area Dollar Pool which were $164 million in 1947–48 decreased to $73 million in 1948–49 and then fell to only $2 million in 1949–50. In 1950–51 Australia made a net contribution to the Pool of $101 million.

The main reason for the improvement in the dollar balance of payments between 1949–50 and 1950–51 was a favorable movement of $237 million in the balance of trade.

The value of exports to the United States of America and Canada increased by $237 million to $374 million. Of this increase $217 million was due to the increase in the value of wool exports to those countries.

Invisible credits declined from $23 million in 1948–49 to $19 million in 1950–51 while invisible debits increased from $96 million in 1948–49 to $115 million in 1950–51. The balance of trade, however, has been the main factor affecting the balance of payments on current account.

The most notable feature of the transactions on investment account from 1948–49 to 1950–51 shown in this table was the apparent outflow of private capital of $45 million in 1950–51—the first in the five years for which estimates are available.

The final section of the table shows how Australia's dollar surplus or deficit in each year was financed. After taking into account dollars received from international financial institutions, sales of gold to the United Kingdom and movements in Australia's dollar balances, Australia's transactions with the Sterling Area Dollar Pool showed an estimated improvement of $71 million between 1948–49 and 1949–50 and a further estimated improvement of $103 million between 1949–50 and 1950–51.

28. Movement in Australian dollar balances (increase −) ..	− 2	− 4	− 4
29. Total	+ 103	+ 48	− 75

(*a*) No estimate is available yet for identified private capital inflow in 1950–51.

§ 18. Interstate Trade.

Prior to the federation of the Australian Colonies (now States), each Colony published statistics of its trade with the other Colonies. A similar record was continued by the Commonwealth Government under the provisions of the Constitution (Section 93). On the expiry of the "book-keeping" period, these records were discontinued as from 13th September, 1910, and the latest published statements were for the year 1909. Later, the Governments of Western Australia and Tasmania revived the records, and relevant statistics are available again for those States.

At the Conference of Statisticians held in January, 1928 it was resolved that efforts should be made in other States to record the interstate movement of certain principal commodities.

The Government Statist for South Australia publishes some figures for that State made up from the records of Western Australia and Tasmania, and from various other sources. Since February, 1940, statistics in some detail have been collected by the Government Statistician of Queensland. The statistics of interstate trade for New South Wales and Victoria are very meagre. The Melbourne Harbour Trust publishes, in its annual report, the quantities of various commodities of interstate trade loaded and discharged in the Port of Melbourne. The trade with individual States is not disclosed.

CHAPTER XIII.

POPULATION.

§ 1. Population Statistics.

Population statistics relating to Australia or to the component States and Territories as at specific dates are of two types—

(i) *Those ascertained by census enumeration.* These results attain a very high degree of accuracy and may generally be accepted without reservation.

(ii) *Estimates derived by the application of vital and migration statistics to census data.* In general, three estimates are made for any specific date:

- (*a*) Original estimates for dates subsequent to a census made before another census is taken.
- (*b*) Two-stage revision of the original estimates for each newly completed intercensal period to adjust for the difference between the new census result and the comparable estimate. This is to bring intercensal estimates into line with the two census populations. The first revision is reconciled with preliminary census results and the second revision with final census results.

Final revised figures become the permanent population estimates. For purposes requiring a mean population for any twelve-monthly period such mean is calculated as described in § 4. As populations at specific dates are used in these calculations consequential revisions are made in mean populations when the estimates for specific dates are revised as described above.

In accordance with this policy all population statistics shown in this Year Book for dates up to 30th June 1947, and all mean populations for calendar years up to 1946 and financial years up to 1946–47 are final. Population statistics for dates or years subsequent to these are subject to revision when another census is taken.

Since the establishment of the Commonwealth Bureau of Census and Statistics the populations of the States and Territories have been estimated in a comparable manner and attention has been given to the improvement of the basic demographic data from which the estimates are compiled. The principal source of error in early estimates lay in the migration records, both oversea and interstate, and efforts were directed towards their improvement. The 1911 Census disclosed an error in the precensal estimates equivalent to a proportion of 14.5 per cent. and 10.0 per cent., respectively, of recorded male and female oversea departures from Australia. These proportions were used as adjusting factors to recorded oversea departures during the intercensal period 1911–21. These adjusting factors were reduced after the 1921 Census to 1 per cent. for males and 4.5 per cent. for females and were discontinued altogether after the 1933 Census. From the results of the 1947 Census it would again appear that the accuracy of the records of oversea migration is such that in future little adjustment to recorded figures will be necessary for Australia as a whole.

It is improbable that the same degree of accuracy as has been attained in the record of oversea migration can be reached in the case of interstate movements. Records are made of interstate passengers by sea, rail and air, but it is impracticable, with occasional important exceptions, to record the movements by road.

§ 2. The Census.

1. **Census-taking.**—Although "musters" of the population were carried out at least annually from 1788 to 1825, the first regular Census in Australia was not taken until 1828 when a count of the population of the Colony of New South Wales was made. Subsequent Censuses were taken sporadically in the various colonies until 1881, when a Census was taken on the same date throughout Australia.

In 1891 and 1901 Census-taking was still in the hands of the Government Statisticians of the States, but, in 1911, under the provisions of the Commonwealth Census and Statistics Act, which provides for the enumeration to be made from one centre instead of by each State as formerly, the Commonwealth Statistician undertook the first Census for the Commonwealth of Australia. The second was taken in 1921 and the third should have been taken in 1931, but, because of restrictions on Governmental expenditure at that time, was deferred until 30th June, 1933.

Owing to the 1939–45 War, the fourth Commonwealth Census, due to be taken in 1941, was deferred until June, 1947, the Census for the whole of Australia being taken as or the night between 29th and 30th June, 1947.

2. **Population recorded at Censuses.**—State and Territorial totals recorded at the Censuses taken over the period 1828 to 1947 are shown in the following table. The figures relate to the political boundaries of the several States (or Colonies) as they existed at the date of each Census except that Northern Territory has been shown separately from South Australia for three censuses prior to its transfer from that State. The years of formation of the separate Colonies and transfer of the Territories are shown in Chapter I, § 3. and § 4.

The results of the 1947 Census of the Australian External Territories will be found in § 12 of this chapter.

The population of each sex enumerated in Australia as a whole at each Census since 1881 was as follows :—

POPULATION OF AUSTRALIA AT EACH CENSUS, 1881 TO 1947.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

Date.	Males.	Females.	Persons.
3rd April, 1881	1,214,913	1,035,281	2,250,194
5th April, 1891	1,705,835	1,471,988	3,177,823
31st March, 1901	1,977,928	1,795,873	3,773,801
3rd April, 1911	2,313,035	2,141,970	4,455,005
4th April, 1921	2,762,870	2,672,864	5,435,734
30th June, 1933..	3,367,111	3,262,728	6,629,839
30th June, 1947..	3,797,370	3,781,988	7,579,358

3. **Increase since 1881 Census.**—The increases in the populations of the several States and Territories and of Australia as a whole during the last six intercensal periods were as shown in the following table, which distinguishes the numerical increases, the proportional increases (which do not allow for the differences in the length of the intercensal periods) and the average annual rates of increase.

POPULATION : INTERCENSAL INCREASES.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

Aust. Cap. Territory ..	(b)	(b)	(b)	4.14	10.71	4.65
Australia	3.51	1.73	1.67	2.01	1.63	0.96

(a) Includes Australian Capital Territory. (b) Part of New South Wales prior to 1911.
NOTE.—Minus sign (−) denotes decrease.

The numerical increase during the period 1933–47 (14 years) was less by 244,586 than that for the period 1921–33 (12½ years) and the percentage increase declined from 21.97 for 1921–33 to 14.32 for 1933–47. During the earlier period the increase corresponds to 1.63 per cent. per annum, and in the latter to 0.96 per cent. per annum.

§ 3. Growth and Distribution of Population.

1. **Growth of Population.**—The table which follows shows the growth in the population of each sex in the various States and Territories as measured by the estimated population at 31st December in 1788 and thereafter at decennial intervals from 1790 to 1950. Each year of the last decennium is included in order to show recent fluctuations in greater detail.

ESTIMATED POPULATION : 1788 TO 1950.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

(*a*) Previously included with New South Wales. (*b*) Previously included with South Australia in which Northern Territory was incorporated prior to 1911. (*c*) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment. (*d*) Revised estimates based on the results of the Census of Canberra on 14th—16th September, 1951, are as follows :—1947, 18,838 ; 1948, 19,312 ; 1949, 22,113 ; and 1950, 23,629.

Estimates of population for intercensal years are obtained in the manner outlined in § 1. Figures for interstate migration are liable to error owing to the impracticability of tracing movements of motor traffic. The estimates of populations of the Australian Capital Territory and the Northern Territory are particularly affected by this difficulty. In view of the uncertainty of war-time records of interstate migration, the populations of the States subsequent to 30th June, 1943, and until the 1947 Census, were estimated on the basis of natural increase, deaths of defence personnel and oversea migration.

The estimated population as at 31st December each year from 1788 to 1950 on the same basis as in the last table is shown in *Demography Bulletin* No. 68, 1950. A graph illustrating the growth of the population of Australia and of each State and Territory thereof appears on page 539.

2. **Present Numbers.**—The population of Australia on 31st December, 1950 was estimated at 8,315,791 persons of whom 4,196,640, or 50.47 per cent., were males and 4,119,151, or 49.53 per cent., were females. The increase during 1950 was 264,909, equal to 3.29 per cent., males having increased by 146,095 or 3.61 per cent., and females by 118,814, or 2.97 per cent. This increase was due to an excess of births over deaths, of 112,404, together with a net gain by migration of 152,505 persons.

3. **Proportion of Area and Population, Density and Masculinity.**—A previous table shows the estimated number of persons in each of the States and Territories on 31st December, 1950. In the following table the proportions of the total area and of the total population represented by each State or Territory are given, together with the density and the masculinity of population :—

DENSITY AND MASCULINITY OF POPULATION, 1950.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

State or Territory.	Proportion of Total Area.	Proportion of Estimated Population, 31st December, 1950.			Density. (a)	Masculinity. (b)

(a) Average number of persons per square mile. (b) Number of males per 100 females.

Additional information regarding density and masculinity of population appears in later sections of this chapter.

4. **Urban and Rural Distribution.**—At the 1947 Census, information was obtained regarding the distribution of the population amongst metropolitan, provincial and rural areas. Metropolitan Divisions relate to the capital cities of the States and adjoining urban municipal areas within boundaries used for Census purposes at the dates of the respective Censuses. At the 1947 Census the Metropolitan Division of Victoria included areas (with a population of 30,490 persons) not included in that division at the 1933 Census when the population was 991,934. No changes occurred in boundaries of Metropolitan Divisions in other States.

Urban Provincial Divisions comprise the capital cities of the Territories and, in States other than Tasmania, cities and towns outside the Metropolitan Divisions which are separately incorporated. In Tasmania, where most of the towns included are not separately incorporated, boundaries were determined for Census purposes. In New South Wales a number of towns which in 1933 were separately incorporated have since been included in shires.

Rural Divisions comprise the remaining portion of each Territory and State and are affected by the intercensal changes in the areas of the Metropolitan and Urban Provincial Divisions. Figures for Rural Divisions represent therefore only a broad general classification based on administrative rather than geographical considerations. For instance, in New South Wales most of the increase in population shown for "Rural Division" was due to abolition of municipalities which in 1933 were classified as Urban Provincial; in Victoria a large part of the decrease in population shown for "Rural Division" was due to transfer in 1947 to the Metropolitan Division of adjoining urban parts of shire areas.

Persons on board ships in Australian ports or travelling on long-distance trains or planes throughout Census night were classed as migratory.

The results obtained at the Census for each State and Territory are shown in the following table :—

URBAN AND RURAL POPULATION : 1947 CENSUS.

NOTE.—Minus sign (−) denotes decrease.

At 30th June, 1947, the Metropolitan Divisions contained 50.72 per cent. of the total population of Australia as compared with 46.87 per cent. at the 1933 Census. Victoria had the largest proportion of population residing in the metropolitan area (59.69 per cent.) but was closely followed in this respect by South Australia (59.20 per cent.). During the intercensal period, however, the highest rates of increase in metropolitan population were experienced in Queensland and Western Australia.

A feature of the metropolitan population is its high femininity. In 1933, 52.5 per cent. of the metropolitan population was composed of females; in 1947 the proportion had fallen slightly to 51.9 per cent., being highest in Tasmania at 52.3 per cent.

5. **Metropolitan Population : Australia and Other Countries.**—In Australia there is an abnormal concentration of population in the capital cities, which are the only cities of outstanding importance in the various States. A comparison with the capitals of the more important countries is given in the following table. There is some doubt as to the comparability of the figures because of the abnormal conditions during the war and immediately following the war.

METROPOLITAN POPULATION : AUSTRALIA AND OTHER COUNTRIES.

State or Country.	Metropolis.	Year.	Metropolitan Population.
New South Wales ..	Sydney	1950	(a) 1,584,830

Canberra	15,156

(*a*) From 24th September, 1947, the municipalities of Illawarra North and Wollongong and the shires of Bulli and Illawarra Central were united to form the City of Greater Wollongong. (*b*) Comprises municipalities of Geelong, Geelong West, and Newtown and Chilwell. (*c*) Comprises municipalities of Ballaarat and Sebastopol. (*d*) Comprises municipalities of Bendigo and Eaglehawk. (*e*) Exclusive of urban population in any contiguous shire. (*f*) Includes Fremantle and suburbs, 27,934.

7. **Provincial Urban Areas.**—In par. 4, pages 522-3, the proportion of the total population of each State which was located in incorporated urban provincial areas at the 1933 and 1947 Census is shown. In the following table, however, the aggregate population at the 1947 Census of all cities and towns outside the metropolitan area of each State with 2,000 or more and 3,000 or more inhabitants is shown, irrespective of whether such centres are incorporated separately or not. In addition, the proportion of the aggregate population of these cities and towns to the total population of the State is shown.

AGGREGATE POPULATION OF CITIES AND TOWNS OF SPECIFIED SIZE : 1947 CENSUS.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

§ 4. Mean Population.

1. **General.**—Mean populations are calculated for twelve-monthly periods to provide a satisfactory average basis for calculations requiring allowances for the continuous change in population figures during such periods.

2. **Method of Calculation.**—From 1901 onwards the mean population for any year has been calculated by the formula :—

$$\text{Mean Population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where a, b, c, d and e, respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters, e.g., in the case of a calendar year, 31st December of the preceding year and 31st March, 30th June, 30th September and 31st December of the year under consideration. This formula gives a close approximation to the mean of a theoretical population progressing smoothly through the five values a, b, c, d, e. Section V. of Population and Vital Statistics Bulletin No. 1, 1907 sets out in some detail the principles underlying the adoption of the formula.

3. **Results.**—(i) *Calendar Years.* The following table shows the mean population for each State and Territory for the calendar years 1940 to 1950 :—

MEAN POPULATION : CALENDAR YEARS, 1940 TO 1950.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

Year ended 31st Dec.—	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Australia.

(*a*) Includes all defence personnel enlisted in Australia irrespective of movements subsequent to enlistment. (*b*) Revised estimates based on the results of the Census of Canberra on 14th–16th September, 1951, are as follows :—1948, 18,105 ; 1949, 19,988 ; and 1950, 22,607.

§ 5. Elements of Increase.

1. **Natural Increase.**—(i) *General.* The two factors which contribute to the growth of a population are the " natural increase," i.e., excess of births over deaths, and the " net migration," i.e., the excess of arrivals over departures. In earlier issues of the Official Year Book particulars of the natural increase from 1861 are given for each sex and State (*see* No. 22, page 899).

The natural increase for Australia from 1861 to 1950 inclusive was 5,467,771, consisting of 2,548,959 males and 2,918,812 females, and represented 76.26 per cent. of the total increase in population. During the present century the rate of natural increase grew until it reached the maximum rate of 17.44 per thousand of population in 1914, but it steadily declined after that year to 7.07 in 1934. There was little change until 1939, but during the war and in the post-war period the rate rose sharply, reaching the level of 14.37 in 1947. In 1948 it dropped to 13.12 but rose slightly to 13.74 in 1950.

In the following table particulars of the natural increase for each sex are given in States for each quinquennium from 1901 to 1950 and for the ten years 1941 to 1950. For the purposes of this analysis the natural increase for the period from September, 1939 until June, 1947 has been taken as excess of births over civilian deaths, i.e., no account is taken of deaths of defence personnel.

POPULATION : NATURAL INCREASE (EXCESS OF BIRTHS OVER DEATHS), 1901 TO 1950.

(*a*) Excess of births over deaths per 1,000 mean population. (*b*) Part of New South Wales prior to 1911. (*c*) Excess of births over civilian deaths per 1,000 mean population from September, 1939 to June, 1947.

NOTE.—Minus sign (−) denotes excess of deaths over births.

The table above shows the decline which has taken place in the rate of natural increase in all States of Australia since the beginning of the century. The decline is evident notwithstanding the stepping-up of the rate occasioned by increased births since the commencement of the 1939–45 War and the overstatement due to the omission of deaths of defence personnel. During the first five years of the present century the average increment to the population of Australia by this means was 56,886 persons per annum. The increment rose to 81,695 persons per annum in 1921–25, but thereafter fell to 52,050 persons per annum in the quinquennium 1931–35, increasing during 1936–40 to 54,489. During 1941–45 the average annual excess of births over civilian deaths was 74,750, while during 1946–50 the annual excess of births over deaths was a record high average of 106,035, there being 112,404 in the year 1950.

(ii) *Comparison with other Countries.* Notwithstanding its low birth-rate, Australia has a higher rate of natural increase than most European countries, owing to the fact that its death-rate is very low. The following table gives a comparison between the rates of natural increase in 1949 and 1950 for the several States of Australia and for the Dominion of New Zealand, and those of some of the principal countries for which such information is available. Corresponding average annual rates for the period 1909–13 have also been appended.

2. **Net Migration.***—The other factor of increase in the population, namely, the excess of arrivals over departures, known as "net migration," is, from its nature, much more subject to variation than is "natural increase".

Particulars of the increase by net migration are given below for quinquennial periods from 1901 to 1950 and annually for the ten years 1941–50. Disturbances in war-time migration records were caused by interstate troop movements, which prevented accurate count of civilians travelling interstate. Interstate passenger traffic was, for this reason, excluded from migration records from 30th June, 1943 to the date of the Census, 30th June, 1947.

(*a*) Part of New South Wales prior to 1911. (*b*) Excludes troop movements from September, 1939 to June, 1947. (*c*) Excludes interstate migration from July, 1943 to June, 1947.

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

There was a loss of population by migration in the first five years of the present century; in the next five quinquennial periods there were varying gains which averaged about 115,000 per quinquennium.

In the five years ended 1935 there was a net emigration of 10,886 and in the five years ended 1940 a net immigration of 43,128. During the war period 1941–45 net immigration fell to 7,809 persons. A large net loss by migration of 15,148 persons in 1946 was due mainly to the departure of refugees and evacuees, and also fiancées, wives and children of British and Allied servicemen. With increasing transport facilities after the war and the resumption of assisted migration, net gains of 10,611 and 55,115 persons were recorded in 1947 and 1948 respectively. The net gains increased considerably in 1949 and 1950, for which the figures were 150,001 and 152,505 respectively; these were the highest gains recorded for individual years with the exception of 1919 which included troops returning from the 1914–18 War.

3. **Total Increase.**—The total increase of the population is obtained by combining the natural increase with the increase by net migration. For the period September, 1939 to June, 1947, deaths of defence personnel have been deducted from the total increase so derived. The results of the 1947 Census disclosed some unrecorded movement of population during the intercensal period July, 1933 to June, 1947, and particulars of total increase, after taking into account deaths of defence personnel, have been adjusted for this discrepancy. No separate adjustment has, however, been applied to individual elements of increase during this period, although intercensal discrepancies disclosed by previous Censuses were adjusted on recorded oversea departures.

The total increment to the population from the beginning of 1861 to the end of 1950 was 7,170,206, while that from 1901 to 1950 was 4,550,452. The annual results for the last ten years are shown below, together with quinquennial figures from 1901 to 1950. For the reasons stated in the previous paragraph, the figures for the period 1933 to 1947 differ from the totals of figures for natural increase and net migration shown in preceding tables by an amount equal to the net total of deaths of defence personnel and unrecorded movement of population.

(*a*) Part of New South Wales prior to 1911. (*b*) Includes recorded deaths of defence personnel whether inside or outside Australia, from September, 1939 to June, 1947. (*c*) Excludes interstate migration from July, 1943 to June, 1947.

NOTE.—Minus sign (—) denotes decrease.

4. **Rates of Increase.**—(i) *Australia.* The annual rates of increase per cent. of population in Australia during each of the years 1940 to 1950 were as follows:—1940, 1.04; 1941, 0.93; 1942, 0.80; 1943, 0.95; 1944, 1.06; 1945, 1.13; 1946, 1.18; 1947, 1.61; 1948, 2.05; 1949, 3.28; 1950, 3.29.

The annual rate of increase of the population during the present century has averaged 1.60 per cent., but the results from year to year have deviated widely from this figure. In the following table the period 31st December, 1900 to 31st December, 1950 has been arranged into certain defined groups of years according to the occurrence of influences markedly affecting the growth of population:—

POPULATION: PERIODICAL RATES OF INCREASE.

Period.	Interval.	Total Increase.	Average Annual Numerical Increase.	Average Annual Rate of Increase.		
				Natural Increase.	Net Migration.	Total.
	Years	Thousand	Thousand	Per cent.	Per cent.	Per cent.
1901 to 1913 ..	13	1,128	87	1.59	0.53	2.04
1914 to 1923 ..	10	862	86	1.50	0.15	1.64
1924 to 1929 ..	6	680	113	1.28	0.64	1.88
1930 to 1939(*a*) ..	10	569	57	0.82	0.03	0.85
1940 to 1946(*a*) ..	7	513	73	0.98	0.03	1.01
1947 to 1950(*a*) ..	4	798	199	1.39	1.21	2.55

(*a*) Population figures include Australian defence forces overseas from September, 1939 to June, 1947.

Up to 1913 the rate of natural increase was rising, and this factor, coupled with the impetus given to immigration from 1911 onwards by increased governmental assistance, was responsible for the comparatively high annual rate of 2.04 per cent. during this period. The 1914–18 War was a dominating influence in the decade 1914–23, and its effects can be seen in the reduction of the rate from 2.04 to 1.64 per cent. In the next span, 1924–29 a more settled and prosperous era was experienced; encouraged migration was resumed on a large scale and, despite a further decline in the rate of natural increase owing to the persistent fall in the birth-rate, the annual rate of growth rose to 1.88 per cent. After 1929 came the economic depression, and immigration ceased—in fact Australia actually lost people through an excess of departures over arrivals in 1930, 1931, 1932 and 1935. The rate of natural increase also fell, and the rate of growth of the population receded to 0.85 per cent. per annum. With the outbreak of war in 1939, Australia entered a new phase in her demographic history, the full effects of which will not be seen for some time to come. The immediate effect of the war was to increase the number of marriages and to reverse the downward trend in fertility. The number of births increased each war year from 1940 to 1945, and these increases more than offset the rise in deaths due to war casualties and higher civilian death rates. As might be expected, migration over these years was negligible. The post-war period 1946 to 1950 was marked by a continued high natural increase and a resumption of immigration, the latter resulting in a substantial net gain of 152,505 persons in 1950. The annual rate of growth for the period was 2.28 per cent.

Rates of increase from 1860 to 1950 may be found for each State and Territory of Australia in *Demography Bulletin,* No. 68, 1950.

(ii) *Various Countries.* The table hereunder gives approximate rates of increase of the population of Australia and its component States, in comparison with those for other countries :—

(*a*) Includes Australian Capital Territory. (*b*) Includes Northern Territory. (*c*) Excludes armed forces overseas at 31st December, 1941. (*d*) Not available. (*e*) Excludes war losses. (*f*) Territory defined by 1947 peace treaty.

NOTE.—Minus sign (−) denotes decrease.

§ 6. Density.

1. **General.**—From certain aspects population may be less significant in respect of its absolute amount than in its relation to the area of the country. Australia, with an area of 2,974,581 square miles, and an estimated population on 31st December, 1950 of 8,315,791, excluding about 47,000 full-blood aboriginals, has a density of only 2.80 persons to the square mile, and is, therefore, the most sparsely populated of the civilized countries of the world. For the other continents and sub-continents the densities are approximately as follows :—Europe (excluding U.S.S.R.), 205 ; Asia (excluding U.S.S.R.), 121 ; U.S.S.R., 22 ; Africa, 17 ; North and Central America, 25 ; and South America, 16. The population of Australia has thus about one-sixth of the density of South America and of Africa ; about one-eighth of that of U.S.S.R. ; about one-ninth of that of North and Central America ; about one-forty-third of that of Asia (excluding U.S.S.R.) ; and about one-seventy-first of that of Europe (excluding U.S.S.R.).

On account of the very large area of Australia and the unsuitability for settlement of much of the country, the density of population must necessarily increase slowly. In Australia as a whole the figure has increased from 1.29 per square mile in 1901 to 2.80 in 1950. Victoria's density, however, has grown from 13.77 to 25.39 and that of New South Wales from 4.43 to 10.59 in the same period.

A map showing the density of population throughout Australia at the 1947 Census appears on page 541. When comparing the density of population of the several States consideration should be given to the average annual rainfall distribution in each State as an indication of the climatic influence upon probable population numbers. The area of New South Wales receiving less than 10 inches of rainfall is 20 per cent.; Victoria, nil; Queensland, 13 per cent.; South Australia, 83 per cent.; Western Australia, 58 per cent.; Tasmania, nil; and Australia, 38 per cent.

2. **Main Countries of World.**—Number and density of population of the most important countries of the world at 30th June, 1949, are shown in the following table. In some instances, more particularly in the cases of Asia and Africa, the numbers must be considered as rough approximations only.

POPULATION OF THE MAIN COUNTRIES OF THE WORLD : NUMBER AND DENSITY, 1949.

(*a*) Number of persons per square mile. (*b*) Includes Dodecanese Islands. (*c*) Not available. (*d*) Includes European Territory. (*e*) Population 1946. (*f*) Includes 47,000 full-blood aboriginals.

The populations shown in the above table are, in the main, in accordance with figures published in the *Demographic Year Book*, 1949–50, published by the United Nations, and the countries have been arranged in accordance with the continental groups used therein.

§ 7. General Characteristics.

1. **Sex Distribution.**—(i) *States.* The number of males to each hundred females has been adopted as a measure of the "masculinity" of the population. On pp. 163–5 in the second issue of the Official Year Book a table was included showing the masculinity of the population of each of the States for each year from 1796 to 1907. In the fifth issue, on p. 123, the figures in this table for the years 1901 to 1907 were modified in accordance with the results of the 1911 Census.

With the exception of some dislocation arising from the two World Wars, there has been a continuous diminution of the masculinity of the population. In 1900 the masculinity was 110.55; in 1910, 107.87 and in 1920, 103.47. After 1921, however, the masculinity tended to rise until 1927 (104.54), since when it gradually fell to 100.36 in 1945 but rose again to 101.88 in 1950.

A reduction in the masculinity of a population may be expected where persons in the higher age-groups constitute an increasing proportion of the total population. This is a direct consequence of the greater longevity of females. A falling birth-rate tends to reduce masculinity while a rising birth-rate tends to increase it.

The following table shows the masculinity of the population at quinquennial intervals from 1901 to 1945 and thereafter for each year :—

POPULATION : MASCULINITY, 1901 TO 1950.

(NUMBER OF MALES PER 100 FEMALES.)

As at 31st December—	N.S.W.	Victoria.	Q'land.	S. Aust.	W.Aust.	Tas.	Nor. Terr.	Aust. Cap. Terr.	Aust.

2. **Age Distribution.**—The precise age distribution of the population is obtained only at a Census; for other times it is estimated in accordance with data available. The following table shows the variation which took place in the age distribution of the population during the 14 years following the 1933 Census.

Of the 7,579,358 persons enumerated at the 1947 Census, 10.0 per cent. were under 5 years of age; 8.0 per cent. were 5 years of age and under 10 years; 7.1 per cent. from 10 to 14 years; 7.7 per cent. 15 to 19 years; and 34.4 per cent. were under age 21. At the 1933 Census 8.6 per cent. were under 5 years; 9.5 per cent. 5 to 9 years; 9.4 per cent. 10 to 14 years; 9.3 per cent. 15 to 19 years; and 38.6 per cent. under 21 years of age.

Owing mainly to the fall in the birth-rate, the number of young people in Australia in the age group 5 to 19 years in 1947 showed a serious decline of 142,680 compared with the number in this age-group in 1933. The corresponding increase in this age-group from 1921 to 1933 was 277,154 persons. Although the decrease in the 5 to 19 years age-group in 1947 is offset by an increase of 191,422 persons in the age-group 0 to 4 years, the proportion of persons under 21 years of age in Australia has decreased from 38.6 per cent. in 1933 to 34.4 per cent. in 1947 whilst the proportion of persons aged 21 years and over has increased from 61.4 per cent. to 65.6 per cent. over the same period.

In order to provide information as to changes in the age distribution of the population since the last census estimates have been made to show the population at each age as at 30th June of each year 1948 to 1950. These estimates are based on the adjusted age distribution for the Census of 30th June, 1947, and on births, recorded ages at death and recorded ages of migrants from 1st July, 1947 to 30th June, 1950.

Particulars of the estimates for single years of age are published in *Demography Bulletins* No. 67, 1949 and No. 68, 1950 for their respective years. Summarized in five-yearly age groups they are as follows:—

POPULATION: AGE DISTRIBUTION, AUSTRALIA, 1947 AND 1950.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

Age Group (Years).	Census 30th June, 1947.(a)			Estimated 30th June, 1950.

(a) Unspecified ages have been distributed over the population aged 15 years and upwards.

The next table shows the change which has been taking place in the age composition of the population of Australia since 1871. Each successive Census except 1921 has revealed a larger proportion of the population 15 years of age and over than was recorded at the previous Census. Since the 1947 Census, however, available information on which estimates of the age distribution is based indicates that there has been a reversal of this tendency.

(*a*) Latest estimate, 30th June.

3. **Conjugal Condition.**—Of the total population of Australia at the 1947 Census, 47.3 per cent. had never married ; 46.4 per cent. were married ; 5.6 per cent. widowed ; and 0.7 per cent. divorced. Since the 1933 Census the number never married had decreased by 2.4 per cent. ; those married increased by 35.2 per cent. ; the widowed by 28.4 per cent. ; and the divorced by 148 per cent.

From a demographic point of view the most important change in the conjugal condition of the population of Australia since 1933 was the decrease in the number of persons who had never married and the relative increase in the number of married persons. In 1947, 62.0 per cent. of all persons 15 years of age and over, who stated their conjugal condition, were married, compared with 54.2 per cent. in 1933. If the latter proportion had obtained in 1947 there would have been approximately 440,000 fewer married persons at 30th June, 1947.

The number of widowed females recorded in Australia in 1947 was 309,383, or nearly three times as many as the number of widowed males. This disparity is the result of two influences. The first is the greater longevity of females coupled with the usually younger age at marriage ; and the second is that a larger proportion of males cancel their widowhood by remarriage.

The number of divorced persons increased by 31,280 between 1933 and 1947 compared with an increase of 12,585 between 1921 and 1933. The numbers of divorced males and females at 30th June, 1933 in the following table differ slightly from those shown on page 269 where the conjugal conditions of those for whom particulars were not given at the Census have been distributed proportionately among the various groups

POPULATION : CONJUGAL CONDITION, AUSTRALIA, 1933 AND 1947.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

(*a*) Includes persons permanently separated (legally or otherwise).

NOTE.—Minus sign (−) denotes decrease.

4. **Dependent Children under 16 years of age.**—At the 1947 Census 927,453 males and 66,418 females stated they had children under 16 years of age dependent on them at 30th June, 1947, the total number of dependent children under age 16 claimed being 1,962,791, of whom 1,853,314 or 94.4 per cent. were dependent on males and 109,477 or 5.6 per cent. were dependent on females. This represented an average of 2.00 for each male with dependent children and 1.65 for each female with dependent children.

Further information concerning dependent children may be found in Official Year Book No. 38, page 549.

POPULATION : PERSONS WITH DEPENDENT CHILDREN UNDER SIXTEEN YEARS OF AGE, AUSTRALIA, CENSUS, 30th JUNE, 1947.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

5. **Birthplace.**—At 30th June, 1947, the Australian-born element of the population of Australia represented 90.2 per cent. as compared with 86.4 per cent. at the 1933 Census. The number of Australian-born increased by 1,108,605 or by 19.4 per cent. since 1933, the total at June, 1947, being 6,835,171. On the other hand, the population born overseas declined during the same period by 159,086 or by 17.6 per cent. The principal contribution to the decline of the oversea-born population was the decrease of approximately 171,000 in the number of persons born in the British Isles. At 30th June, 1947, Australian residents born in England, Wales, Scotland and Ireland numbered 541,267, while those born in other European countries numbered 110,339, and there were 43,610 of New Zealand birth.

There was little change during the intercensal period in the number of persons of Asiatic, African or American birthplace, but persons born in these continents form a very small proportion of the population of Australia. The numbers of such persons at 30th June, 1947 were respectively 24,096 (British India and Ceylon, 8,160, China 6,404), 7,537 (Union of South Africa, 5,866), and 11,630 (Canada, 4,009, United States of America, 6,232)

Of persons born outside Australia, 56 per cent. were males and 44 per cent. females.

For a table showing the number of persons in Australia at each of the last two census dates, classified according to birthplace, reference should be made to Official Year Book No. 38, page 550.

6. **Period of Residence in Australia.**—The decline, until recently, in immigration into Australia is reflected in the figures recorded at the June, 1947 Census. They show that, of persons born outside Australia who stated their period of residence, 5.7 per cent. had resided in Australia for a period of less than 5 years, 11.2 per cent. for less than 10 years, and 14.8 per cent. for less than 15 years, compared with 5.7, 25.5 and 39.5 per cent. respectively at the previous Census in 1933.

A table showing, for each of the last two census dates, the number of completed years of residence of persons born outside Australia may be found on page 551 of Official Year Book No. 38.

7. **Nationality.**—At the 1947 Census the number of foreign nationals in Australia had decreased since the 1933 Census by 36 per cent.—males by 40 per cent. and females by 18 per cent.—as compared with an increase of 15 per cent. in the number of British nationality. There was little change, however, in the proportion of foreign nationals relative to the total population, 99.5 per cent. of the population being British subjects, as compared with 99.1 per cent. at the previous Census. The principal foreign nationals in Australia were Italian, 7,172; Chinese, 4,858; Greek, 4,504; United States of America, 3,351; German, 2,361; Yugoslav, 2,096; and Dutch, 2,001.

The number of persons in Australia who were born in countries outside the British Commonwealth totalled approximately 128,000, and of this number 38,653, or 30 per cent., were of foreign nationality at 30th June, 1947, the remainder being British subjects mainly by naturalization.

A table showing the nationality of Australian residents at 30th June, 1933 and 30th June, 1947 may be found in Official Year Book No. 38, page 552.

8. **Race.**—The people of Australia may be classified into two groups with respect to racial characteristics, namely, non-indigenous and indigenous. The former group comprises the European and other races who have migrated to Australia and their descendants born in Australia, while the latter group consists of the full-blood aboriginal natives of Australia whose estimated number at 30th June, 1944, was about 47,000, but who are not included in the general population figures of Australia. The non-indigenous population of Australia is fundamentally British in race and nationality.

At 30th June, 1947, 7,524,129 persons or 99.3 per cent. of the population were of full-blood European race and 0.7 per cent. of non-European and half-caste. Full-blood non-Europeans decreased from 22,780 in 1933 to 21,495 in 1947, but the number of half-castes increased from 27,066 to 33,734 during the same period.

The principal full-blood non-Europeans in Australia were Chinese, 9,144; Polynesian, 5,332; Natives of India, 2,480; and Syrian, 1,675; while half-caste Australian aboriginals, who increased from 20,620 in 1933 to 27,179 in 1947, represented 80.6 per cent. of the total half-caste population. A table showing the comparative numbers of each sex at each of the last two census dates, classified according to race, may be found in Official Year Book No. 38, page 553.

9. **Religion.**—At the 1921 Census 92,258 persons in Australia, or 1.7 per cent., gave no reply to this question, but in 1933 and again at the 1947 Census, when the public was informed there was no legal obligation to answer this question, 848,948 persons, or 12.8 per cent., and 824,824 or 10.9 per cent., respectively, gave no reply. Of males 11.7 per cent. and of females 10.0 per cent. did not state their religion in 1947.

Of those who stated their religion, the greatest numerical increase during the intercensal period between 1933 and 1947 was recorded by the Church of England, followed by the Roman Catholic and Catholic (so described), which it is thought may be grouped without serious error, as the latter term usually signifies Roman Catholic. Then followed Methodist, Presbyterian and Church of Christ in that order. Amongst the denominations with the largest number of adherents, the greatest proportional increases since 1933 were recorded by Methodists, 27.4 per cent.; Roman Catholic and Catholic combined, 21.8 per cent.; Church of England, 15.3 per cent.; and Presbyterian, 4.2 per cent.

In 1933 and again in 1947, 99 per cent. of those who stated their religion professed the Christian faith. Since the previous Census, the number who stated they were of non-Christian religion increased by 28 per cent., and those specifically stating they had no religion increased by 71 per cent.

The number of stated adherents at 30th June, 1947 was greatest for the Church of England, at 2,957,032; then followed Roman Catholic and Catholic combined (1,569,726), Methodist (871,425), Presbyterian (743,540), and Baptist (113,527). In all, 6,672,936 professed the Christian faith, 36,562 stated they were of non-Christian religion, 18,708 were classified as indefinite, while 26,328 professed no religion.

Further information relative to the religions of the population may be found in a table on page 554 of Official Year Book No. 38.

10. **Industry.**—In the following table the male and female populations of Australia are classified according to the industry in which they are usually engaged. At the Census on 30th June, 1947, 124,439 persons failed to answer the question relating to industry, and the replies of 108,095 persons did not give an entirely satisfactory description of their industry. For practically all of these persons occupation particulars were recorded, and in the table below it has been possible to allocate them to their appropriate industries on the basis of occupational representation in those industries which were adequately described on the Census schedules. The number of persons "in the work force" was 3,196,431, of whom 2,479,269 were males and 717,162 were females. The remainder of the population, totalling 4,382,927 (1,318,101 males and 3,064,826 females), were classified as not being in the work force. The term "in the work force" includes persons of all ages who are employers, self-employed or working on their own account, wage and salary earners, unpaid helpers engaged in industry, and those who usually work for their living but who have lost their jobs.

Persons who do not earn their living by doing work for monetary reward, such as children, housewives, full-time students, retired persons, pensioners, and permanent inmates of institutions are regarded as not being in the work force.

On the average, 65 in every 100 of the male population and 19 in every 100 of the female population were in the work force, or in other words there were, in 1947, 3½ males to every female in the work force.

Of the males in the work force, those engaged in Manufacturing represented the largest proportion, namely 28.7 per cent., followed next in order by those in Primary Production, 19.4 per cent.; Commerce, 12.0 per cent.; Building and Construction, 10.7 per cent.; Transport and Storage, 10.3 per cent.; and Public Authority (n.e.i.) and Professional Activities, 8.8 per cent.

As with the males, females in the work force were mostly engaged in Manufacturing, 28.6 per cent.; followed next in order by those in Public Authority (n.e.i.) and Professional Activities, 20.8 per cent.; Commerce, 19.6 per cent.; and Amusement, Hotels, Cafés, Personal Service, etc., 19.3 per cent.

POPULATION CLASSIFIED ACCORDING TO INDUSTRY(*a*) : AUSTRALIA, 1947.

(EXCLUDING FULL-BLOOD ABORIGINALS.)

Persons not in the Work Force..	1,318,101	3,064,826	4,382,927
Total Population	3,797,370	3,781,988	7,579,358

(*a*) The numbers of persons whose industry was either not specified or inadequately described have been distributed (*see* letterpress above).

11. **Occupational Status.**—The term "occupational status" has been substituted for "grade of occupation" formerly in use, and it relates to the capacity in which persons are engaged in the various branches of industry.

The number of employers in Australia at 30th June, 1947, was 221,289 compared with 207,680 at the previous Census. Persons who were self-employed or working on their own account increased from 369,375 in 1933 to 387,137 in 1947. The number of employees in receipt of salaries or wages increased from 1,618,504 in 1933 to 2,447,493 in 1947, but in this connexion it should be remembered that the number who were out of a job at the 1933 Census, which was taken during the depression, was 481,044 compared with only 82,774 in 1947. Helpers not in receipt of salaries or wages declined from 46,016 in 1933 to 28,725 in 1947.

At the Census of 30th June, 1947, 29,013 persons gave no answer to the question regarding occupational status, but disclosed that all of these persons belonged to the work force. Including the latter, the total number in the work force in 1947 was 3,196,431, consisting of 2,479,269 males and 177,162 females.

In 1933, wage-earners who were employed part-time were asked to indicate that fact on the Census Schedule in answer to the question regarding occupational status, and all those who so described themselves are included in the work force for that year. In 1947, however, persons working regularly, but for considerably less than normal working hours, were instructed on the Census Schedule to exclude themselves from the work force, unless their earnings from such work formed their principal means of livelihood.

POPULATION: OCCUPATIONAL STATUS, AUSTRALIA, 1933 AND 1947.

(Excluding Full-blood Aboriginals.)

(*a*) Includes persons who were (1) unable to secure employment; (2) temporarily laid off from their jobs; or (3) not actively seeking work at the time of the Census on account of sickness or accident, industrial dispute, resting between jobs or for any other reason. (*b*) *See* last preceding paragraph above.

Note.—Minus sign (−) denotes decrease.

12. **Persons not at Work.**—The number of persons who were usually engaged in industry, business, trade or service but were out of a job on 30th June, 1947 was 82,774, consisting of 66,009 males and 16,765 females, or 3.5 per cent. of the males and 2.6 per cent. of the females in the wage-earning group, including those not at work. At the previous Census, which was taken in 1933 during the depression, 405,269 males and 75,775 females were unemployed, representing 25.5 per cent. of the males and 14.8 per cent. of the females in the wage-earning group. During the period of heavy unemployment in 1933 approximately 91 per cent. of unemployment was due to scarcity of work, but in 1947 only 41 per cent. was due to this cause. The balance consisted of those who stated that they were not actively seeking work at the time of the Census, and these in turn consisted almost entirely, and in approximately equal proportions, of those who were indisposed through sickness or accident, and those who were resting between jobs.

Of those persons usually in industry, business, trade or service, who at the 1947 Census stated the period since last working, 7.0 per cent. had not been working for a period of less than one week, 16.4 per cent. for less than two weeks, 25.2 per cent. for less than three weeks, 32.4 per cent. for less than four weeks, 50.1 per cent. for less than eight weeks, and 67.9 per cent. for under sixteen weeks.

Tables showing persons not at work at 30th June, 1947, classified according to cause and duration, may be found in Official Year Book No. 38 (*see* pp. 1303 and 1304).

13. **Other General Characteristics.**—Questions regarding orphanhood, and the ability to read and write a foreign language (of persons who could not read and write English), were not asked on the schedules of the 1947 Census. Consequently, the latest Census data available concerning these questions are those of the 1933 Census, as published in previous issues of the Year Book (*see* No. 36, pp. 482 and 487).

§ 8. Dwellings.

1. **General.**—In addition to the questions relating to the personal particulars of the individual members of the household there were a number of important questions on the Census Schedule designed to elicit information concerning the dwellings in which the population was housed at the date of the Census. From the replies to these questions much valuable information was tabulated concerning housing conditions. In Official Year Book No. 38, pages 557 to 571, a comprehensive summary of this information was published but some detailed tables have been omitted from the present issue in order to conserve space. For the purpose of a Census a "dwelling" is defined as a room or a collection of rooms occupied by a household group living together as a "family unit" whether comprising the whole or only part of a house or other building (including temporary structures). Included in this definition are private houses, flats, tenements, hotels, boarding houses, hospitals, institutions, and any other structure used for the purpose of human habitation.

2. **Number of Dwellings.**—During the period 1933 to 1947, the number of dwellings in Australia, including those being built, increased by 371,194, or 22.9 per cent., a much higher rate of increase than that of the population during the same period, namely 14.3 per cent.

The following table represents a summary of the information relating to the number of dwellings in Australia at 30th June, 1947.

DWELLINGS: STATES, CENSUS, 30th JUNE, 1947.

Total	1,907,895	47,041	34,758	1,989,694	100.00

Between 30th June, 1947, and 31st December, 1950, 185,168 new houses and 4,498 new flats were completed in Australia, while at 31st December, 1950 there were 71,347 houses and 3,334 flats being built.

3. **Class of Occupied Dwelling, Etc., and Inmates.**—As previously indicated, the dwellings in which the people are housed comprise private houses, tenements, flats, hotels, boarding-houses, charitable institutions, etc. It is desirable when considering the question of housing to exclude those forms of accommodation which do not represent the normal housing conditions associated with family life, and the statistics which follow relate mainly to private dwellings only, i.e., private houses, shares of private houses, tenements and flats.

For Census purposes a "flat" is defined as part of a house or other building ordinarily intended for occupation by a separate family group, and is a self-contained dwelling unit with both cooking and bathing facilities. A "tenement" is part of a house or other building ordinarily intended for occupation by a separate family group but is not a self-contained unit, and consists in the main of a room or rooms with cooking facilities.

Owing to the shortage of houses in Australia in 1947, information was sought at the Census as to the extent of house-sharing, and particulars as recorded are shown separately for 1947 in the following tables. In a number of cases where private houses were shared by more than one family unit, however, only one Householder's Schedule was returned for the whole of the house, instead of separate schedules for each portion occupied separately. These are shown in the tables as "Private Houses (Shared by Two or More Families)" and represent not "occupied dwellings" as defined for Census purposes, but "houses" occupied by more than one family.

In the case of the remaining private houses shared by more than one family, separate schedules were furnished for each portion occupied separately and these portions are shown in the tables as separate dwellings under the heading "Share of Private House".

In the next table, occupied dwellings are distributed according to class and the total number of persons in Australia are distributed according to the dwellings in which they were recorded on Census night. At the 1947 Census 1,873,623, or 98.2 per cent. of the total occupied dwellings in Australia, were private dwellings, as compared with 1,509.071, or 97.6 per cent., at the 1933 Census. During the intercensal period the number of private dwellings in Australia increased by 363,952, or 24.1 per cent.; those in the metropolitan areas increased by 248,581, or 34.9 per cent.; those in the urban provincial by 76,466, or 30.6 per cent., and those in the rural areas by 38,905, or 7.1 per cent.

Of the total population in 1947, 92.71 per cent. were living in private dwellings —houses, flats and tenements—whilst 552,598 persons, or 7.29 per cent. of the population, spent the night in hotels, boarding houses, hospitals, institutions, etc., or on ships or were camping out.

CLASS OF OCCUPIED DWELLING, ETC. AND INMATES: AUSTRALIA, CENSUS, 30th JUNE, 1947.

(*a*) Includes all persons sleeping out on verandahs or in sleep-outs. (*b*) Private house shared by two or more family units or household groups in respect of which only one Householders' Schedule was furnished. (*c*) Portions of shared private houses in respect of which portions separate Householders' Schedules were furnished. (*d*) Includes 18,603 migratory (shipping, railway and air travellers).

4. Occupied Private Dwellings.—(i) *Materials of Outer Walls and of Roof.* In the following table occupied private dwellings are classified according to the materials of which the outer walls and the roof were built.

Wood has been the most extensively used material in the construction of the walls, followed by brick and fibro cement, the respective proportion for Australia for occupied private dwellings for which the material of the walls was specified being—wood, 47.4

per cent., brick, 34.8 per cent. and fibro cement, 6.3 per cent. The latter has shown a most spectacular increase since 1933 when the number recorded was only 23.696 compared with 117,631 in 1947. Brick dwellings represented 57.6 per cent. of all occupied private dwellings in the Metropolitan Divisions whilst in the Urban Provincial and Rural Divisions wooden dwellings predominated, the respective proportions of such dwellings being 63.0 per cent. and 62.4 per cent.

OCCUPIED PRIVATE DWELLINGS CLASSIFIED ACCORDING TO MATERIAL OF OUTER WALLS: AUSTRALIA, 1933 AND 1947.

(EXCLUDING DWELLINGS OCCUPIED SOLELY BY FULL-BLOOD ABORIGINALS.)

Material of Outer Walls.	Number of Occupied Private Dwellings.

Calico, Canvas, Hessian ..	873	3,554	33,428	37,855	656	1,539	13,255	15,450	− 22,405
Other Materials	3,164	1,221	12,924	17,309	4,430	1,774	9,902	16,106	− 1,203
Not stated ..	1,991	726	2,964	5,681	4,049	782	2,178	7,009	1,328
Total Private Dwellings	712,906	249,611	547,154	1,509,671	961,487	326,077	586,059	1,873,623	363,952

NOTE.—Minus sign (−) denotes decrease.

Particulars regarding the materials of which the roofs of dwellings were constructed were not collected at the 1933 Census, but the results for 1947 show that, of the occupied private dwellings for which the materials of the roofs were specified, 1,257,559 (68.1 per cent.), had roofs of iron, which was by far the most popular material used for roofing private dwellings in Australia, 418,014 (22.6 per cent.) had tiled roofs, 107,048 (5.8 per cent.) had slate roofs, 35,985 (2.0 per cent.) had roofs of fibro-cement, 13,344 (0.7 per cent.) had calico, canvas, or hessian roofs, while 15,418 (0.8 per cent.) had roofs of other materials. The material of which the roof was constructed was not stated in 26,255 cases (1.5 per cent. of the total).

(ii) *Number of Rooms.* For Census purposes, the kitchen and any permanently enclosed sleep-out or portion of a verandah were included in the number of rooms in the dwelling, but the bathroom, pantry, laundry and storehouse were excluded unless generally used for sleeping. The average number of rooms per private house (one family) in Australia at 30th June, 1947, was 5.11 which was slightly higher than the average of 5.07 rooms for all private houses in 1933. The average number of rooms per private house (one family) in 1947 was highest in the metropolitan areas, namely 5.27 rooms and lowest in the rural areas, 4.89 rooms.

The average number of rooms for tenements and for flats was less than that for private houses, the average for tenements being 2.07 rooms and for flats 4.06 rooms. Tenements and flats were not recorded separately at the Census of 30th June, 1933, but the combined average at that date was 3.35 rooms.

Excluding houses with rooms unspecified, private houses of four, five and six rooms represented 79.3 per cent. of the total number of private houses (one family) in Australia at 30th June, 1947, and practically the whole of the total increase in the number of private houses since 1933 has been confined to houses containing these numbers of rooms.

The following table shows, for Australia as a whole, the number of occupied dwellings of each class, at 30th June, 1933 and 1947, classified according to number of rooms. Similar details for Metropolitan, Urban Provincial, and Rural Areas may be found in Official Year Book No. 38 (*see* pages 562 and 563).

(*a*) Includes kitchen and enclosed sleep-out or portion of a verandah that has been permanently enclosed but does not include bathroom, pantry, store or outhouse, unless generally used for sleeping. (*b*) Private house shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished. (*c*) Portions of shared private houses in respect of which portions separate Householder's Schedules were furnished.

NOTE.—Minus sign (−) denotes decrease.

(iii) *Number of Inmates.* A classification of occupied private dwellings according to the number of inmates is shown in the following table. The table gives details for Australia only, but similar information for Metropolitan, Urban Provincial, and Rural areas may be found on pages 564 and 565 of Official Year Book No. 38.

The most frequent number of inmates residing in private houses occupied by one family for Australia as a whole was four, followed very closely by three and then by two and five inmates in that order. The average number of inmates in such private houses was 3.87 compared with an average of 4.15 inmates for all private houses in 1933.

It was known that "House sharing" existed during the economic depression at the time of the 1933 Census, but information concerning its extent was not sought from householders on that occasion. In the circumstances, it may be more appropriate to compare the average number of inmates in private houses in 1933 with a figure obtained after combining dwellings consisting of private houses and shares and their inmates in 1947. If shares of private houses are converted to actual houses on the basis of the average number of family groups residing in private houses shared by two or more families, the estimated average number of inmates in all private houses in 1947 would rise to 3.97 persons.

Two inmates predominated in flats, but tenements with one inmate were slightly in excess of those with two inmates. The averages for Australia were flats, 2.84 persons and tenements, 2.18 persons.

OCCUPIED PRIVATE DWELLINGS CLASSIFIED ACCORDING TO NUMBER OF INMATES: AUSTRALIA, 1933 AND 1947.

(a) Includes all persons sleeping out on verandahs or in sleep-outs. (b) Private house shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished. (c) Portions of shared private houses in respect of which portions separate Householder's Schedules were furnished.

NOTE.—Minus sign (—) denotes decrease.

(iv) *Nature of Occupancy.* At the 1947 Census, 50.8 per cent. of the private houses occupied by one family in Australia for which particulars were supplied were occupied by owners; 9.0 per cent. by purchasers by instalments; 37.3 per cent. by tenants; and 2.9 per cent. by others. The proportions for all private houses in 1933 were—owners, 42.8 per cent.; purchasers by instalments, 13.5 per cent.; tenants, 39.1 per cent.; and others 4.6 per cent.

In the metropolitan areas 56.0 per cent. of the occupants of private houses occupied by one family were owners or purchasers by instalments, as compared with 60.2 per cent. in the urban provincial areas, and 64.8 per cent. in the rural. In the latter areas, however, the ownership of the house is associated with the ownership of the land acquired as a means of livelihood.

Tenants occupied 88.9 per cent. of the flats and 96.2 per cent. of the tenements in Australia in 1947. Separate particulars for flats and tenements were not recorded in 1933, but taking flats and tenements together at that date 91.4 per cent. were occupied by tenants.

In the following table Occupied Private Dwellings at 30th June, 1933 and 1947 have been classified for Australia as a whole, according to nature of occupancy. Similar information for Metropolitan, Urban Provincial, and Rural Areas was published in Official Year Book No. 38 (*see* pp. 566 and 567).

OCCUPIED PRIVATE DWELLINGS CLASSIFIED ACCORDING TO NATURE OF OCCUPANCY: AUSTRALIA, 1933 AND 1947.

(*a*) Private house shared by two or more family units or household groups in respect of which only one Householder's Schedule was furnished. (*b*) Portions of shared private houses in respect of which portions separate Householder's Schedules were furnished.

NOTE.—Minus sign (−) denotes decrease.

(v) *Rent per Week.* (*a*) *All Tenanted Private Dwellings.* Information tabulated concerning rents was restricted to the actual rent paid per week by tenants occupying unfurnished private dwellings. For 6.4 per cent. of private houses occupied by one family at 30th June, 1947, the rent was less than 10s. per week; for 29.9 per cent., between 10s. and £1 per week; for 40.3 per cent., between £1 and £1 10s. per week; for 17.9 per cent., between £1 10s. and £2 per week; and for 5.5 per cent., £2 per week and over. Ninety per cent. of the houses with rents of less than 10s. per week were located outside the metropolitan areas.

Throughout Australia the average rent for unfurnished private houses occupied by one family was 22s. 7d. per week. In the metropolitan areas the average was 25s. 8d. per week, in the urban provincial areas 21s. 5d., and in the rural areas 15s. 5d.

The average rent for unfurnished flats in the metropolitan areas was 37s. 9d. per week, or 47 per cent. more than that paid for private houses (one family) in the same areas, notwithstanding that private houses (one family) in the metropolitan areas contain nearly 30 per cent. more rooms than flats. In the urban provincial and rural areas, the rent of flats was approximately 30 per cent. and 51 per cent., respectively, higher than for private houses (one family). Nearly 86 per cent. of the tenanted flats were located in the metropolitan areas, 10.8 per cent. in the urban provincial areas, and only 3.2 per cent. in the rural areas. For 5.3 per cent. of all tenanted flats in Australia the rent was less than £1 per week; for 23.5 per cent. between £1 and £1 10s. per week; for 37.0 per cent. between £1 10s. and £2 per week; and for 34.2 per cent. £2 per week and over.

During the latest intercensal period the average rent per week for unfurnished private houses rose by 33 per cent. or from an average of 17s. per week for all private houses in 1933 to an average of 22s. 7d. per week for private houses occupied by one family in 1947. Similar comparisons for flats and tenements are not possible as data were not tabulated separately for these dwellings in 1933. The average rent for all private dwellings including private houses, shares of private houses, flats and tenements rose by 38 per cent. from 1933 to 1947.

The following table shows tenanted private dwellings classified, for Australia as a whole, according to weekly rent. Similar information for Metropolitan, Urban Provincial and Rural areas may be found in Official Year Book No. 38, pages 568 and 569.

(a) Private house shared by two or more family units or household groups in respect of which only one Householder's hedule was furnished. (b) Portions of shared private houses in respect of which portions separate Householders' Schedules were furnished.

NOTE.—Minus sign (−) denotes decrease.

(b) *Private Houses of Three to Six Rooms.* Special tabulations of rents were undertaken for tenanted private houses of three to six rooms with walls of wood or of brick or stone. The particulars for this group of private dwellings, which represented about 80 per cent. of all tenanted private houses in Australia, provide a very convenient summary of average rents ruling at the time of the Census.

Rents were summarized for 468,536 tenanted private houses (occupied by one family) in this group. Forty-nine per cent. had walls of brick or stone and 51 per cent. of wood, compared with proportions of 46 and 54 per cent. respectively for all rented private houses in a similar tabulation in 1933. During the intercensal period there was little variation in the numbers of rented houses of three, four and six rooms, but the number of rented houses of five rooms increased by nearly 13 per cent. Brick dwellings were largely responsible for this increase.

The average rent of 25s. per week for all private houses, three to six rooms, of wood, brick or stone in the metropolitan areas at the 1947 Census was 6s. 7d., or 35.7 per cent., higher than the corresponding average in 1933. In the urban provincial sections the average rent was 21s. 3d. per week, or 36.4 per cent. higher than in 1933, while in the rural areas the average rent of 15s. 7d. was 35.5 per cent. higher than that at the 1933 Census.

An interesting comparison regarding the rent of private houses is that based on the average weekly rent per room. At the 1947 Census the average rent per room for wooden houses of three to six rooms in the metropolitan areas of Australia was 4s. 9d. per week, an increase of 1s. 4d. or 39 per cent. over the average of 3s. 5d. per week at the 1933 Census. Similarly, the average of 5s. 6d. per room for brick or stone houses in the metropolitan areas showed a corresponding increase of 1s. 5d. or 35 per cent.

In the urban provincial sections the average rent of 4s. 3d. per room for wooden houses was 1s. 2d., or 38 per cent., higher than the 1933 Census figure of 3s. 1d. per week, while the rent of 4s. 9d. per week for brick or stone houses was 36 per cent. higher than the previous figure of 3s. 6d. per week. The average rent per room in the rural areas also showed increases—from 2s. 6d. to 3s. 3d. per week (30 per cent.) for wooden houses, and from 2s. 7d. to 3s. 8d. per week (42 per cent.) for those of brick or stone. With the exception of brick houses in the metropolitan and rural areas, the average rent per room for houses of three rooms was generally higher than for houses of four, five or six rooms. The increase since the 1933 Census in the rent per room was somewhat similar for all houses of three to six rooms but was generally lower in the urban provincial and rural areas than in the metropolitan areas.

AVERAGE WEEKLY RENT (UNFURNISHED) (*a*) OF TENANTED PRIVATE HOUSES (ONE FAMILY), THREE TO SIX ROOMS, WITH WALLS OF WOOD, BRICK OR STONE: AUSTRALIA, 1933 AND 1947.

(*a*) Rents relate to all tenanted private houses in 1933 and to tenanted private houses (one family) in 1947.

(vi) *Facilities.* At the 1947 Census, householders were asked for the first time to state whether their dwellings were supplied with electricity, gas and running water, and whether thay had such facilities as a bathroom, flush toilet, laundry and cooking facilities. In addition they were asked to indicate the means of cooking mostly used. Statistics of these facilities are given on page 571 of Official Year Book No. 38.

§ 9. Oversea Migration.

1. **Oversea Migration during Present Century.**—Earlier issues of the Official Year Book contain in summary form tables showing the increase of population by net migration from 1861 to the latest date, while the *Demography Bulletins* issued by this Bureau give this information for individual years. The following table shows for Australia arrivals and departures and net migration since 1901 :—

OVERSEA MIGRATION : AUSTRALIA.

(*a*) Includes movements of defence personnel. (*b*) Excludes movements of defence personnel from September, 1939 to June, 1947.

NOTE.—Minus sign (—) indicates excess of departures over arrivals.

As the encouragement of immigration by Governmental assistance has been a feature of Australian immigration policy, a clear indication of the significance of migration movements is obtained when "assisted" and "unassisted" movements are distinguished. This has been done, broadly, in the following table.

"ASSISTED" AND "UNASSISTED" MIGRATION : AUSTRALIA.

Period.	Arrivals.			Departures.	Excess of "Unassisted" Arrivals over All Departures.
	Nominated and Selected ("Assisted").	Other ("Unassisted").	Total.

1946–50(*b*)	273,195	428,725	701,920	348,836	79,889
1946(*b*)	..	34,890	34,890	50,038	— 15,148
1947(*b*)	6,303	61,465	67,768	57,157	4,308
1948	28,943	(*a*) 86,780	(*a*)115,723	(*a*)60,608	26,172
1949	118,840	(*a*)114,295	(*a*)233,135	(*a*)83,134	31,161
1950	119,109	(*a*)131,295	(*a*)250,404	(*a*)97,899	33,396

(*a*) Includes movements of defence personnel. (*b*) Excludes movements of defence personnel from September, 1939 to June, 1947.

NOTE.—Minus sign (—) indicates excess of departures.

It is not possible in the statistics of departures to distinguish the return movement of persons who came to Australia as "assisted" migrants and consequently the separate net migration of "assisted" and "non-assisted" persons cannot be ascertained. Nevertheless the basis on which the above table has been compiled is sufficient to throw into relief the major trends in Australian migration statistics.

During the 1914–18 War, 331,781 members of the Australian Imperial Forces embarked for service overseas and have been included in the departures. The arrivals likewise include the surviving members who returned, so that the net migration of the years affected by such movements understates the true position by the equivalent of war losses (approximately 60,000 all told). During the 1939–45 War and up to 30th June, 1947, Australian defence personnel overseas were included as Australian population irrespective of their whereabouts, and their movements have not been recorded in the migration statistics.

In the half century 1901–1950 a gross number of 698,451 persons entered Australia in four distinct phases of its encouraged migration programme. The number of these who returned overseas is not known precisely but indications are that it would be relatively small. In the same period the excess of non-assisted arrivals over all departures was only 255,713. Thus it may be seen that during the half century the net number of "assisted" migrants was more than double the number of "unassisted", even after making allowance for war losses and those assisted migrants who did not, in the end, remain in Australia.

As the depression years with which the century opened gave way to a period of more stable economic conditions assisted migration was resumed about 1906. Immigration gained impetus during the years 1910 to 1912, but this movement was interrupted by war in 1914. After the war the resumption of assisted migration was accompanied by a flow of unassisted migrants greater than for many decades, but this movement was interrupted by depression and when encouraged migration was resumed in 1939 it was almost immediately stopped by the outbreak of war in September. In the immediate post-war years encouraged migration was again resumed and although the numbers brought to Australia by such means were far greater than for any other comparable period they were not accompanied by a correspondingly high number of "unassisted" migrants.

A detailed review of assisted migration into Australia in recent years is given in § 10.

2. Classes of Arrivals and Departures.—(i) *General.* Since 1st July, 1924, all oversea travellers have been classified according to their declared intention in regard to residence made at the time of arrival or departure. For various reasons the intentions of travellers are subject to subsequent modification and the classification headings used must therefore be accepted as indicating intention only. The numbers so classified since 1st January, 1926 are as follows.

MIGRANTS CLASSIFIED ACCORDING TO INTENDED RESIDENCE : AUSTRALIA.

ARRIVALS.

Period.	Permanent New Arrivals.	Australian Residents Returning from Abroad.	Temporary Visitors.	Total.
1926–30	224,010	121,395	125,029	(a) 470,480
1931–35	54,444	84,554	100,325	239,323
1936–40	(b) 88,712	104,870	127,730	321,312
1941–45	(b) 32,624	11,150	20,151	63,925
1946–50	457,988	108,736	135,196	701,920
1946	18,217	6,330	10,343	34,890
1947	31,765	18,305	17,698	67,768
1948	65,739	23,813	26,171	115,723
1949	167,727	28,116	37,292	233,135
1950	174,540	32,172	43,692	250,404

DEPARTURES.

Period.	Australian Residents Departing Permanently.	Australian Residents Departing Temporarily.	Temporary Visitors.	Total.
1926–30	103,209	111,714	125,772	(c) 340,773
1931–35	71,670	79,426	99,108	(d) 250,209
1936–40	51,006	94,650	132,528	278,184
1941–45	22,399	9,163	24,554	56,116
1946–50	105,968	101,787	141,081	348,836
1946	29,806	6,702	13,530	50,038
1947	19,579	18,764	18,814	57,157
1948	17,271	19,557	23,780	60,608
1949	18,457	25,351	39,326	83,134
1950	20,855	31,413	45,631	97,899

(a) Includes 46 arrivals whose period of intended residence was not stated. (b) Includes evacuees arriving in Australia during the war years as follows :—1936–40, 4,543 ; 1941–45, 12,586. (c) Includes 78 departures whose length of stay abroad was not stated. (d) Includes 5 departures whose length of stay abroad was not stated.

(ii) *Permanent Movement.* In the table above "permanent" residence means residence for a year or longer, in Australia in the case of arrivals or overseas in the case of departures.

Although permanent new arrivals increased during each of the eight years prior to 1939 the number in the latter year was considerably below the annual average for the quinquennium 1926–1930. The war caused a large drop from 1940, but after the war the number rose progressively, reaching 174,540 in 1950, the highest on record.

Permanent departures were far more numerous in the years 1928 to 1931 than in earlier years but they declined during each of the six years ended 1937, the number in the latter year being the lowest recorded until the outbreak of war in 1939. As in the case of arrivals, although not to the same extent, the number of Australian residents departing permanently rose rapidly after the war.

Up to and including 1929 there was a considerable net gain of permanent residents, but during 1930 and 1931 there was a heavy net loss. The loss was very much reduced in 1932, 1933 and 1934, whilst during the five years up to and including 1939 there was a net gain in permanent residents of more than 28,000. Except for the arrival of evacuees, little movement took place during the war period, but in 1946 a net permanent loss of 11,589 persons occurred, owing in large measure to the departure for the United States of

America of Australian wives and children of American servicemen, and, when conditions permitted after the war, the departure of Australians to Papua and New Guinea and of large numbers of war evacuees who were returned to their home countries. Subsequently large net gains were recorded, amounting to 48,468 in 1948, 149,270 in 1949 and 153,685 in 1950.

(iii) *Temporary Movement.* Temporary movement refers to persons intending residence for periods shorter than one year and includes Australian residents and visitors from overseas. Since 1st July, 1947, it also includes Australian defence personnel and their dependents irrespective of length of intended residence. Although considerable in number, the temporary movement is of little significance from the point of view of population growth, as it represents principally the movement of business people and tourists.

3. **Extent of Journey.**—(i) *General.* Since 1st January, 1945, the journeys undertaken by passengers have been recorded for Australian oversea migration statistics in two ways: (*a*) according to country or State of embarkation or disembarkation and (*b*) according to country or State of last or future permanent residence. In the case of a complete journey in a single stage to or from Australia there is no difference in result between the two methods. With multiple-stage journeys, however, one method distinguishes only the first stage of outward journeys or the last stage of inward journeys, whilst the second method records the complete journey.

Detailed statistics of journeys are published in the annual *Demography Bulletins* (*see* Bulletins No. 67, 1949 and No. 68, 1950). The following brief explanations indicate the principles followed in the compilation of these statistics.

(ii) *Arrivals.* (*a*) *Country of Embarkation*—refers to the country in which the passenger embarked on the particular ship or aircraft which brought the passenger to Australia. Therefore in multiple-stage journeys to Australia these statistics refer only to the last booked stage.

(*b*) *State of Disembarkation*—refers to the State in which the passenger actually disembarked, irrespective of the State to which originally booked or of State of ultimate destination. Passengers embarking on fresh journeys from one Australian port to another are recorded as interstate migration.

(*c*) *Country of Last Permanent Residence*—This is taken from the passengers' own statement and is not necessarily the country from which the single-stage or multiple-stage journey to Australia commenced. Permanent residence means residence for one year or longer.

(*d*) *State of Intended Future Permanent Residence*—In the administration of the encouraged migration schemes large numbers of migrants are disembarked in States other than the State for which they are destined, and their subsequent movements in Australia to State of ultimate destination are recorded as interstate migration in which distinction between individuals is not practicable. The classification by State of intended future permanent residence was introduced to permit compilation of statistics which show the true effect of oversea arrivals on the populations of individual States.

(iii) *Departures.* (*a*) *State of Embarkation*—refers to the State in which the passenger actually embarked on the ship or aircraft to leave Australia. The interstate travel of any such passengers prior to embarking is recorded as interstate migration.

(*b*) *Country of Disembarkation*—refers to the intended country of disembarkation from the particular ship or aircraft which takes the passenger from Australia. In multiple-stage journeys from Australia these statistics refer only to the first booked stage and changes in this, subsequent to departure, are not recorded.

(*c*) *Country of Intended Future Permanent Residence*—refers to the ultimate destination, after a complete single-stage or multiple-stage journey, of the passenger, as intended at the time of embarkation.

(*d*) *State of Last Permanent Residence*—refers to the State in which the passenger was last resident for a period of 12 months or longer, irrespective of the State in which actual embarkation on an oversea ship or aircraft took place. In the case of temporary visitors leaving Australia who have not resided for at least twelve months in any one State, the State of embarkation is regarded as the State of last permanent residence.

4. **Racial Origin.**—Statistics of racial origin of migrants are based on the passengers' own statement as to race, which in some cases may express the country of birth or nationality rather than actual race.

Up to 30th June, 1948, the system of classifying racial origin was a compromise based partly on nationality and partly on racial origin. This has been superseded from 1st July, 1948 by statistics of racial origin compiled, irrespective of nationality, for the four broad racial groups shown in the following table. Statistics of nationality have been compiled independently and are referred to in the next paragraph.

RACIAL ORIGIN OF ARRIVALS AND DEPARTURES: AUSTRALIA.

Racial Origin.	Arrivals.			Departures.			Net Migration.		
	July–Dec., 1948.	1949.	1950.	July–Dec., 1948.	1949.	1950.	July–Dec., 1948.	1949.	1950.
European ..	61,471	230,297	247,321	25,697	80,836	95,995	35,774	149,461	151,326

NOTE.—Minus sign (–) indicates excess of departures over arrivals.

5. **Nationality.**—Because the particulars of racial origin as stated by migrants closely reflect their nationalities no attempt was made prior to 1st July, 1948 to compile detailed statistics of nationality. Up to 31st December, 1944, a composite classification according to "Nationality or Race" was the only one made (*see* para. 4) apart from a special tabulation of nationality distinguishing only "British" and "Alien". From 1st July, 1948 a detailed classification of the nationalities of migrants as shown on their passports has been made, independent of racial origin. The principal nationalities recorded since that date are as follows:—

NATIONALITY OF ARRIVALS AND DEPARTURES: AUSTRALIA.

Nationality.	Arrivals.			Departures.			Net Migration.		
	July–Dec., 1948.	1949.	1950.	July–Dec., 1948.	1949.	1950.	July–Dec., 1948.	1949.	1950.

(*a*) Includes Stateless Pole. (*b*) Includes Stateless Russian. (*c*) Excludes Stateless Pole, Stateless Russian and Stateless (so described). (*d*) Included in "Other".

6. **Age Distribution.**—The annual *Demography Bulletins* show particulars of total arrivals and departures of oversea travellers classified according to intention as to residence (*see* para. 2 above) and dissected into five-yearly age-groups (*see Demography Bulletin* No. 68 for 1950 figures). A summary of the age distribution of permanent arrivals and departures during 1950 is as follows :—

AGE DISTRIBUTION OF PERMANENT ARRIVALS AND DEPARTURES : AUSTRALIA, 1950.

Age Group (Years).	Permanent New Arrivals.			Permanent Departures.		
	Males.	Females.	Persons.	Males.	Females.	Persons.
0–14	21,210	19,948	41,158	1,214	1,280	2,494
15–44	71,801	43,175	114,976	6,425	6,878	13,303
45–64	7,784	7,828	15,612	1,545	2,386	3,931
65 and over . .	1,154	1,640	2,794	431	696	1,127
Total . .	101,949	72,591	174,540	9,615	11,240	20,855

7. **Conjugal Condition.**—Particulars of the oversea arrivals and departures classified according to intention as to residence (*see* para. 2 above) are also dissected to show conjugal condition. Particulars of each classification by conjugal condition for 1950 are shown in *Demography Bulletin* No. 68. Details for the permanent movement during 1950 are as follows :—

CONJUGAL CONDITION OF PERMANENT ARRIVALS AND DEPARTURES : AUSTRALIA, 1950.

Conjugal Condition.	Permanent New Arrivals.			Permanent Departures.		
	Males.	Females.	Persons.	Males.	Females.	Persons.
Never Married . .	61,082	32,241	93,323	5,517	5,959	11,476
Married	39,494	35,879	75,373	3,788	3,993	7,781
Widowed	790	3,779	4,569	226	1,109	1,335
Divorced	583	692	1,275	84	179	263
Total . .	101,949	72,591	174,540	9,615	11,240	20,855

8. **Occupation.**—A classification of the occupations of males who arrived or departed permanently during 1950 is published in *Demography Bulletin* No. 68. Summarized into the main occupational groups the figures are as follows :—

OCCUPATIONS OF PERMANENT MALE ARRIVALS AND DEPARTURES : AUSTRALIA, 1950.

Occupational Group.	Permanent New Arrivals.	Permanent Departures.	Occupational Group.	Permanent New Arrivals.	Permanent Departures.
Rural, Fishing and Hunting	13,305	428	Indefinite or Not Stated	3,468	342
Professional and Semi-professional . .	3,238	1,207	Not Gainfully Occupied—		
Administrative . .	1,421	421	Children not attending school . .	13,449	815
Commercial and Clerical	6,929	1,582	Full-time Students	9,851	682
Domestic and Protective Service . .	3,278	552	Pensioners and others	860	386
Craftsmen	27,764	2,179			
Operatives	10,576	657			
Labourers	7,810	364	Total . .	101,949	9,615

§ 10. Immigration.

(A) Assisted Migration into Australia.

1. **Joint Commonwealth and States' Scheme.**—Details of the joint scheme of assisted immigration arrived at by agreement between the Commonwealth and State Governments which operated from 1920 to 1939 may be found in previous issues of the Official Year Book (*see* No. 38, page 576).

2. **Suspension of Assisted Passage Scheme during War.**—After the outbreak of hostilities in 1939 it was decided to discontinue the grant of assisted passages for the duration of the war.

3. **United Kingdom Free and Assisted Passage Agreement, March, 1946.**—(i) *General.* Resumption of assisted migration was the subject of negotiations between the Commonwealth and United Kingdom Governments towards the end of 1945, and an agreement was signed in March, 1946 between the Commonwealth and British Governments for free and assisted passages for British residents desirous of migrating to Australia. As from the opening date, 31st March, 1947, the Commonwealth Government undertook to accept eligible persons provided they are medically fit and otherwise regarded as suitable for settlement. Information concerning conditions and opportunities for employment is provided by the Australian High Commissioner for the guidance of all prospective settlers. Expenses incurred in the selection of applicants are borne by the Commonwealth Government, which has also undertaken to provide free transportation from the port of disembarkation to the ultimate destination in Australia and temporary accommodation for a limited period wherever necessary. Since the opening of the schemes administrative arrangements have been in force with the State Governments in regard to the handling of personal and group nominations lodged by friends and relatives, or employers, for migrants and their reception, placement and after-care upon arrival.

To maintain the intake of British migrants the Commonwealth itself in 1950 implemented a supplementary nomination scheme, under which large numbers of settlers (including families) are introduced and accommodated in Commonwealth hostels throughout Australia whilst they remain in the type of essential employment for which they are selected.

Substantial rights, including health, medical services, sickness and unemployment benefits, maternity allowances and child endowment under the Australian Social Security Services Scheme are extended to settlers as from the date of arrival; but it has not been possible to extend employment preference to British ex-servicemen and women. Prospective settlers will not, however, be granted passages unless there is a reasonable assurance that they will obtain employment on arrival.

Any adult resident of Australia may nominate for free or assisted passages friends or relatives resident in the United Kingdom who are eligible for consideration.

(ii) *Free Passages.* This part of the scheme is financed by the United Kingdom Government as part of its re-settlement programme. Persons eligible for consideration are British ex-servicemen and women, together with their dependants, if they were resident in the British Isles on 1st September, 1938, or were in the United Kingdom Forces overseas on that date and subsequently served in a full-time capacity in the Armed Forces or Merchant Navy of the United Kingdom during any period after 25th May, 1939.

Applications for passages under this scheme were required to be lodged within certain time limits and the final closing date was the 31st December, 1950. However, applications accepted prior to that date remain valid and the persons concerned, if otherwise eligible, are still entitled to receive free passages.

(iii) *Assisted Passages.* Assisted passages are granted under the Empire Settlement Acts of the United Kingdom to suitable British subjects normally resident in the United Kingdom who do not come within the scope of (ii) above. However, the Commonwealth is not normally prepared to accept single persons or married persons without children if they have reached their forty-sixth birthday before the date of sailing. However, if otherwise acceptable under the scheme, the parents or close relatives of intending migrants or of persons established in Australia may be granted passages irrespective of age.

Each settler, male or female, of 19 years of age and over is required to contribute £10 (English currency) towards the cost of a passage, and each juvenile of 14 years, but not more than 18 years, £5 (English currency). Children under 14 years of age travel free. The costs of passages, after the migrants' contributions have been taken into account, are borne by the United Kingdom and Commonwealth Governments.

(iv) *Numbers Arrived.* The following numbers arrived under the scheme :—1947, 4,747; 1948, 15,910; 1949, 37,845; and 1950, 37,712.

4. **Number of Persons Assisted.**—The number of British assisted migrants for the years 1933 to 1950 inclusive, and the total from the earliest years up to the end of 1950 are given in the following table :—

IMMIGRATION : NUMBER OF PERSONS OF BRITISH ORIGIN ASSISTED.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	A.C.T.	Australia.
1933	11	3	1	1	56	..	..	72

(*a*) Assisted migration was suspended during the years 1941 to 1946. *See* following paragraphs.

5. **Child Migration.**—(i) *General.* Since the commencement of the Assisted Passage Migration Schemes in 1947, the immigration of unaccompanied children and youths from the United Kingdom has been encouraged under the auspices of approved voluntary organizations. Those organizations at present introducing child migrants include Fairbridge Farm Schools of New South Wales and Western Australia, Dr. Barnardo's Homes, Big Brother Movement of New South Wales and Tasmania, Northcote Children's Emigration Fund. All principal religious denominations are also participating in the schemes. At present a total of over 40 institutions are caring for child migrants.

(ii) *Financial Assistance.* Maintenance allowances are payable on the following basis to approved organizations caring for child migrants: the United Kingdom Government contributes 12s. 6d., and the Commonwealth Government 10s. per week in respect of each child under 16 years of age; a minimum of 3s. 6d. per week for each child up to the age of 14 years is contributed by the State Governments. In addition, the State and Commonwealth Governments have each agreed to contribute one third of capital expenditure approved as necessary to provide accommodation for child migrants to be introduced by an approved organization.

(iii) *Numbers Introduced.* From the beginning of 1947 to the end of 1951, a total of 1,571 British children and youths arrived in Australia under the sponsorship of voluntary organizations; of these 723 arrived in New South Wales, 557 in Western Australia, 180 in Victoria and 111 in other States.

6. **Assisted Passage Scheme, Eire.**—In November, 1948, the Commonwealth Government approved a scheme for the granting of limited financial assistance to natural born citizens of Eire normally residing in the British Isles, or natural born British citizens residing in Eire, who wish to emigrate to Australia and who are selected as suitable for settlement here. This scheme, however, only applies to prospective new settlers and their dependants who are not eligible for free or assisted passages under the schemes agreed to with the United Kingdom Government (*see* para. 3 above).

The maximum amount of assistance granted toward an adult passage is £30 sterling, with varying amounts for children according to age.

It is not essential for an applicant to have been nominated by a friend or relative in Australia before being considered for financial assistance under the scheme. Single men or women may be accepted, but owing to the acute difficulty of finding accommodation for family units, families are, at present, only being accepted if they have nominators in Australia able to accommodate them or if they can make arrangements regarding accommodation before arrival.

Under this scheme 109 persons arrived in 1949 and 457 in 1950.

7. **Maltese Migration.**—On 31st May, 1948, the Commonwealth Government entered into an agreement with the Government of Malta under which assistance to travel to Australia is jointly given by the two Governments to selected settlers from Malta. The maximum contribution by the Commonwealth is £30 sterling in the case of an adult's passage money, and is subject to the Government of Malta contributing not less than a like amount.

Persons already established in Australia may nominate individual Maltese under this scheme and nominations for groups of migrants may be submitted by prospective employers or by organizations. In either case, the nominator undertakes to provide accommodation and, in the case of group nominations, employment.

The Commonwealth retains the right of final selection of all migrants under the scheme, including group and personal nominees. The Government of Malta has undertaken to attend to after-care of Maltese migrants arriving under this scheme.

Maltese settlers who arrived under this scheme during the years 1948, 1949 and 1950 totalled 7,013.

Forty-eight unaccompanied Maltese children in total were introduced to approved institutions in Western Australia during 1950.

8. **Empire and Allied Ex-Servicemen's Scheme.**—With the principal object of giving servicemen of Empire and Allied countries who had served in Australia during the recent war an opportunity to return here for permanent settlement, the Australian Government on 26th May, 1947 initiated a scheme of financial assistance toward the cost of the passages to Australia of eligible Empire ex-servicemen not covered by the United Kingdom–Australia Free and Assisted Passage Agreement, and ex-Servicemen of the United States of America and their immediate dependants. The maximum amount of assistance granted toward an adult passage is £30 sterling with varying amounts for children according to age.

The scheme was later extended to provide similar assistance to ex-Servicemen and former members of the Resistance movements of the following countries :—Holland, Norway, Belgium, France and Denmark, with their dependants. The nationalities of the 9,295 migrants who arrived in Australia under this scheme during the years 1947 to 1950 were 6,097 Dutch, 2,389 United States of America, 383 French, 301 British, 57 Belgian, 44 Danish and 24 Norwegian.

9. **Dutch Migration Agreement.**—An agreement was made in December, 1946, between the Commonwealth Government and the Netherlands Emigration Foundation, which is sponsored by the Netherlands Government, for the introduction of migrants from Holland. The agreement provides for the admission of Dutch settlers who are required to possess a very much smaller amount of landing money than is usually required of foreign migrants. The Netherlands authorities are responsible for providing shipping for these migrants. The Netherlands Emigration Foundation has appointed a representative in Australia to attend to the reception, placement in employment and after-care of migrants arriving under this agreement.

The number of migrants who settled in Australia under this agreement to the end of 1950 was 568.

10. **Migration of Former European Displaced Persons.**—On 21st July, 1947, the Commonwealth Government entered into an agreement with the International Refugee Organization covering the resettlement in Australia of European displaced persons who are under the protection of that body.

Under this agreement, the International Refugee Organization undertook responsibility for provision of transport and the care of the displaced persons until their disembarkation in Australia. The Commonwealth undertook selection in Europe and responsibility for reception in Australia, placement in employment and after-care after arrival. The Commonwealth also undertook to make an *ex gratia* payment to the International Refugee Organization of £10 sterling per person towards the cost of travel of each adult migrant carried under the agreement.

Eligibility for selection is based on similar standards of age, physical fitness and general suitability of settlement as apply under other schemes of encouraged migration operated by the Commonwealth. There is no restriction on the nationality of migrants selected, the only limiting factor in this regard is that applicants must be displaced persons within the definition accepted by the International Refugee Organization.

All applicants within the worker age limits under this scheme enter into an undertaking to remain in the employment found for them by the Commonwealth for a period of two years from the date of their arrival, and their continued residence in the Commonwealth is subject to their observing this undertaking. On completion of this period, these migrants may be granted indefinite admission to the Commonwealth. Migrants arriving under this scheme are in the same position as other foreign migrants admitted to the Commonwealth, and are eligible to receive health and medical service benefits, sickness and unemployment benefit, maternity allowance and child endowment.

In order to ensure suitable arrangements for the reception of these migrants and their absorption into the community, the Commonwealth has set up Reception and Training Centres at Bathurst in New South Wales and Bonegilla in Victoria. At these Centres migrants are medically examined and X-rayed (to reveal any disabilities which may have developed since the medical examination at the time of selection) and interviewed individually to assess their employment potential. During the period of their stay in Reception and Training Centres, which is usually three or four weeks, they are given a course of instruction in utilitarian English and the Australian way of life, and are paid a special social service benefit from which an amount is deducted towards the cost of their upkeep, leaving them 5s. per week for incidental expenditure. To cope with the numbers arriving during 1950, the temporary Reception and Training Centres established in 1949 were maintained at Greta, New South Wales and Northam in Western Australia.

At the end of this training period, breadwinners amongst the arrivals are placed in employment where employer-found accommodation near the job is available. In cases where there is no accommodation near the job available for the breadwinner's dependants they, instead of accompanying him to the job, are provided with accommodation at the breadwinner's expense in specially established Immigration Dependants' Holding Centres until such time as he is able to find other accommodation for them. These Holding Centres have been established in all States; generally former Service Camps have been adapted for the purpose.

Priority in employment placements is given to essential industries which are experiencing difficulties in obtaining adequate supplies of Australian labour, and particularly those industries associated with the supply of building materials, such as the timber industry, the clay products industry and the cement industry. In some cases, Workers' Hostels have been established by the Commonwealth Government to accommodate migrant workers in these and similar industries. Priority is also given to road and rail construction and to water and sewerage undertakings associated with housing projects.

Single women and married women without children are, for the most part, employed as nurses, nurses' assistants and as domestics in hospitals and private homes.

Under this scheme Australia agreed to take 167,000 migrants. Limitations of shipping restricted the numbers received in the first two years and only 840 arrived in 1947 and 9,953 in 1948. Thereafter shipping became more freely available to the International Refugee Organization, and 75,486 migrants arrived in 1949 and 70,212 in 1950. The total of arrivals from the inception of the scheme to the end of 1950 was 156,491.

The Commonwealth Government is considering the negotiation during 1951 of Assisted Passage Migration Agreements with the Governments of the Netherlands and Italy* to replace the Displaced Persons Scheme, which has provided the greater part of Australia's intake of alien migrants during the three year period 1948–1950.

---

* The Australia-Netherlands Passage Migration Agreement was signed on 22nd February, 1951 and operative from 1st April, 1951; the Australia-Italy Assisted Passage Migration Agreement was signed on 29th March, 1951 and operative from 1st August, 1951.

(B) The Regulation of Immigration into Australia.

1. Powers and Legislation of the Commonwealth.—(i) *Constitutional.* Under Section 51, xxvii. and xxviii. of the Commonwealth Constitution, the Parliament of the Commonwealth is empowered to make laws with respect to immigration and emigration and the influx of criminals.

(ii) *Legislation.* A summary of the provisions of the Immigration Act 1901–1925 and the Contract Immigrants Act 1905 (except the provisions of the Amending Immigration Acts of 1920, 1924 and 1925, which will be found in Official Year Book No. 21, p. 927), containing particulars regarding the admission of immigrants, prohibited immigrants, the liabilities of shipmasters and others, and kindred matters will be found in Official Year Book No. 12, pp. 1166–8.

The Immigration Act 1930.—Under this Act it is provided that Section 5, sub-section (1) of the Immigration Act 1901–1925 applies to any person, who, since the commencement of the Immigration Restriction Act 1901, evaded an officer when entering Australia, or gained admission or re-admission by fraudulent means. Steps can be taken to deal with such persons as prohibited immigrants at any time after they have landed in Australia.

The Immigration Act 1932.—This Act provides (*a*) that any alien who fails to satisfy an officer that he holds a landing permit, or that his admission has been authorized, may be prohibited from landing; (*b*) for the increase from three to five years of the period during which a person may be declared a prohibited immigrant; (*c*) that a person not a British subject and who has been convicted of a crime of violence against the person may be deported pursuant to an order of the Minister without his being subjected to a dictation test; (*d*) for the deportation of a person who has been convicted of a criminal offence or who has become an inmate of an insane asylum or public charitable institution within five years from the date of arrival instead of three years as hitherto; and (*e*) that where the wife of a person whom it is proposed to deport so desires, her name and the names of her dependent children may be included in her husband's deportation order. This would of course apply only to wives and children who were themselves immigrants.

The Immigration Act 1933.—This Act provides that Section 8A, as amended by the Immigration Act 1932—*see* (*d*) above—shall apply to persons who arrived in Australia since the commencement of the Section, i.e., since 2nd December, 1920. It also makes statutory provision for the taking of securities for compliance with the provisions of the Act.

The Immigration Act 1935.—The main purpose of this Act was to add a penalty clause to Section 5 of the principal Act, to overcome a legal difficulty which had arisen in regard to relying on Section 7 for the imposition of penalties on persons convicted under Section 5 on charges of being prohibited immigrants offending against the Act.

The Immigration Act 1940.—This Act provides (*a*) that the holder of a landing permit shall on demand satisfy an officer that he is able to comply with the conditions specified in the permit; (*b*) for the issue of, and extensions of, certificates of exemption; (*c*) that a non-British person who is convicted of a crime of violence against the person or of extorting any money or thing by force or threat, or of any attempt to commit such a crime or who is convicted of any other criminal offence for which he is sentenced to imprisonment for one year or longer may be deported; (*d*) for the exercise of discretion by the Minister in enforcing an order for the deportation of a person: and (*e*) for the provision and enforcement of maintenance guarantees in relation to persons seeking to enter Australia.

The Immigration Act 1948.—The main purpose of this Act is to provide for the registration of persons acting as agents in respect of (*a*) applications for the admission of intending immigrants to Australia; and (*b*) arranging or securing passages for intending migrants. The Act provides that only registered agents shall be permitted to receive fees for such services and it prescribes the charges which agents may make in return for their services.

The Immigration Act 1949.—This Act provides for the amendment of Section 4 of the Principal Act in relation to the grant of certificates of exemption. The object of the Act is to revalidate certificates which had become invalid following on a High Court decision.

The Aliens Deportation Act 1948.—This Act repeals the Aliens Deportation Act 1946 and empowers the Minister for Immigration to order the deportation of an alien who after investigation by a Commissioner is reported as not being a fit and proper person to be allowed to remain in Australia.

The War-time Refugees Removal Act 1949.—The purpose of the Act is to enable the Minister for Immigration to effect the repatriation to their own countries of persons given refuge in Australia during the war. Under the Act deportation is limited to persons in respect of whom orders for deportation were issued prior to 12th July, 1950.

The Immigration (Guardianship of Children) Act 1946–1948.—This Act provides that the Minister for Immigration becomes the legal guardian of every person under the age of 21 years who comes to Australia other than in the charge of, or for the purpose of living in the care of, a parent or relative. It is primarily administered through the child welfare authorities in each State who, as the Minister's delegates under the Act, supervise the welfare of each "immigrant child".

2. **Conditions of Immigration into Australia.**—(i) *Immigration of Non-European Persons.* In pursuance of the established policy, the general practice is not to permit Asiatics or other coloured immigrants to enter Australia for the purpose of settling permanently.

Special arrangements were made with India, China and other Eastern countries, under which facilities were afforded for subjects of those countries who were bona fide merchants, students, or tourists to enter and remain in Australia under exemptions whilst they retained their status. Permission is also given for nationals of these countries to enter Australia as assistants or substitutes for local traders domiciled in Australia. Such persons are permitted to remain so long as they retain their status.

(ii) *Immigration of White Aliens.* Aliens seeking to enter Australia for permanent residence are required to obtain landing permits or special authority for admission from the Department of Immigration.

The present immigration policy provides for the admission of aliens who satisfy the Commonwealth's requirements as to health, character, freedom from security risk and general suitability as settlers.

(iii) *General Information.* General information as to conditions of entry into Australia may be obtained from the following officers :—

(*a*) In Australia—the Secretary, Department of Immigration, Canberra, A.C.T., and Commonwealth Migration Officers in the capital cities of the various States ; (*b*) in Great Britain—the Official Secretary, High Commissioner's Office, Australia House, Strand, London ; (*c*) in other British Dominions—the High Commissioner for Australia ; (*d*) in other countries where Australia is represented—the Secretary, Australian Legation.

For details of the Dominions and countries included *see* the section entitled "Diplomatic and other Representatives Overseas and in Australia" in Chapter XXIX.

3. **Nationality or Race of Persons Arriving.**—For details of the nationality and racial origin of persons who arrived in Australia during the years 1949 and 1950 *see* § 9, paras. 4 and 5.

(C) Passports.

Provision is made in the Immigration Act 1901–1949 for the production of a passport by each person over 16 years of age who desires to enter Australia. Under the Passports Act 1920, it was compulsory also for each person over 16 years of age to be in possession of a passport or other document authorizing his departure. This Act has now been superseded by the Passports Act 1938, which repealed the compulsory provisions. The Act extends to the Territories of Australia, including Papua, Norfolk Island and the Trust Territory of New Guinea.

Although not compulsory under the 1938 Act to be in possession of a passport when leaving Australia, it is very desirable in their own interests that Australians proceeding abroad should provide themselves with a passport as a means of establishing their identity and nationality. The possession of a passport is necessary for admission into most countries overseas, and the holder of an Australian passport also has no difficulty in landing on return to Australia. The charge for an Australian passport is £1.

As a result of the Nationality and Citizenship Act 1948 (*see* below § 11) and the enactment of similar citizenship legislation in other British Commonwealth countries, it is now the general rule that Australian passports are issued only to Australian citizens. Citizens of other British Commonwealth countries secure passports from their own High Commissioners in Australia. Australian citizens abroad may now secure passports only from Australian representatives.

Diplomatic and Official passports are now issued to members of the Australian diplomatic service and other Government officials proceeding abroad on official business.

Applicants for passports are required to produce evidence of their identity and nationality (e.g. Birth Certificates).

§ 11. Citizenship and Naturalization.

1. **Commonwealth Legislation.**—The Nationality and Citizenship Act 1948 commenced on Australia Day (26th January), 1949, and repealed all previous Commonwealth legislation on this subject. The most significant effect of the Act was the creation for the first time of the status of "Australian Citizen". In this respect the Act was complementary to citizenship legislation passed or about to be passed by other countries of the British Commonwealth. All Australian citizens, and the citizens of other countries of the British Commonwealth, are deemed to be British subjects. Australian citizenship was automatically acquired as from 26th January, 1949, by persons who were British subjects at that date and who either (*a*) were born in Australia or New Guinea; or (*b*) were naturalized in Australia; or (*c*) had been residing in Australia during the five years immediately preceding 26th January, 1949; or (*d*) were born outside Australia of fathers to whom (*a*) or (*b*) above applied (provided the persons concerned had entered Australia without being placed under any immigration restriction); or (*e*) were women who had been married to men who became Australian citizens under the above headings (provided that the women concerned had entered Australia without being placed under immigration restriction).

After the Act's commencement citizenship may be acquired in the following ways:—(*a*) by birth in Australia; (*b*) by birth outside Australia, of a father who is an Australian citizen, provided that the birth is registered at an Australian Consulate; (*c*) by registration—Certificates of Registration as Australian citizens may be granted by the Minister to British Subjects or Irish citizens who make application and satisfy the Minister that they can comply with specified requirements as to residence in Australia, good character and intention to reside permanently in Australia; (*d*) by naturalization—Certificates of Naturalization as Australian citizens may be granted by the Minister to aliens who make application and can comply with requirements somewhat similar to those previously required under the Nationality Act 1920–1946. New requirements for naturalization are—(i) a Declaration of Intention to apply must be lodged at least two years before the final application; (ii) five years residence in Australia is required; (iii) applicants must have an adequate knowledge of the responsibilities and privileges of citizenship; (iv) Certificates do not take effect until the applicant takes the Oath of Allegiance. The Oath is now taken in open Court, where the Judge or Magistrate addresses the applicant upon the responsibilities and privileges of citizenship before the Oath is administered and the Certificate of Naturalization delivered to the applicant.

Under the Act, the independence of married women in nationality matters is recognized, and British nationality is restored to those women who had lost it through marriage to aliens. In future, marriage will not affect a woman's nationality. Alien women who marry Australian citizens may, however, be naturalized under somewhat easier conditions than those which apply to other aliens.

2. **Certificates Granted.**—(i) *Australia.* The following figures relate to certificates issued under the Nationality and Citizenship Act 1948 during the years 1949 and 1950 :—

NATURALIZATION : CERTIFICATES GRANTED, 1949 AND 1950.

Italy	682	352	Total	2,493	1,377

(a) Since Palestine became part of Israel, former residents of Palestine have been included as "Stateless" if unable to produce evidence of Israeli nationality.

(ii) *States.* The certificates of naturalization granted in 1950 (1949 figures in parentheses) were issued in respect of residents of the various States and Territories as follows :—New South Wales, 506 (866) ; Victoria, 346 (559) ; Queensland, 140 (295) ; South Australia, 119 (105) ; Western Australia, 206 (204) ; Tasmania, 34 (436) ; Northern Territory, 13 (11) ; Australian Capital Territory, 7 (13) ; and New Guinea, 6 (4) ; Total, 1,377 (2,493).

§ 12. Population of Territories.

At the Census of 30th June, 1947, arrangements were made to obtain complete information concerning not only the two internal territories of Australia—Northern Territory and Australian Capital Territory—but also the external Territories under the control of Australia, namely :—Norfolk Island ; Papua ; Trust Territory of New Guinea ; and Trust Territory of Nauru.

Figures respecting population and number of dwellings in each Territory at the Census of 1947 are summarized in the following table :—

POPULATION AND DWELLINGS : TERRITORIES, 30th JUNE, 1947.

(EXCLUDING INDIGENOUS POPULATION.)

Territory.	Population.			Dwellings.			
	Males.	Females.	Persons.	Occupied.	Unoccupied.	Being Built.	Total.
Northern Territory ..	7,378	3,490	10,868	2,697	34	22	2,753
Australian Capital Territory	9,092	7,813	16,905	3,615	52	316	3,983
Norfolk Island	505	433	938	279	43	5	327
Papua	2,057	1,182	3,239	(*a*) 769	(*b*)	(*b*)	(*b*)
Trust Territory of New Guinea	4,369	1,831	6,200	*a* 1,391	(*b*)	(*b*)	(*b*)
Trust Territory of Nauru ..	1,413	63	1,476	54	9	10	73

(*a*) Includes temporary dwellings constructed of iron, sisalcraft, native materials, canvas, etc., in war-devastated areas. (*b*) Not available.

Particulars concerning the indigenous populations of these Territories are included in Chapter X.—The Territories of Australia.

§ 13. The Aboriginal Population of Australia.

In Official Year Book No. 17, pp. 951–61, a brief account is given of the Australian aboriginal population, its origin, its numbers as estimated from time to time, and the steps taken for its protection. On pp. 914–16 of Official Year Book No. 22, particulars are shown for each of the States and Territories of Australia at successive periods, while a special article dealing with the estimated number and distribution of the native population at the date of first settlement of the white race in the continent appears on pp. 687–96 of Official Year Book No. 23.

The aboriginals are scattered over the whole of the mainland but the majority are concentrated in Western Australia, Queensland and the Northern Territory. Details of the number in each State at the June, 1947 Census are shown in the following table. Full-blood aboriginals in employment or living in proximity to settlements were enumerated at the Census, while estimates of the total numbers, including those living in the wild state, were furnished by the Protectors of Aboriginals. Half-caste aboriginals are included in the numbers of the population and are of course enumerated at the Census. The figures shown for Queensland are exclusive of 5,000 Torres Strait Islanders.

ABORIGINAL POPULATION, 30th JUNE, 1947.

State or Territory.	Full-blood.				Half-caste. (Enumerated at the Census).			Total, Full-blood and Half-caste.
	In Employment or Living in Proximity to Settlements.(*a*)			Estimate of Total Numbers.(*b*)				
	Males.	Females.	Persons.	Persons.	Males.	Females.	Persons.	Persons.
New South Wales	546	407	953	(*c*) 953	5,498	5,109	10,607	11,560
Victoria	100	108	208	(*c*) 208	537	532	1,069	1,277
Queensland	3,504	2,822	6,326	9,100	3,684	3,527	7,211	16,311
South Australia ..	259	205	464	2,139	1,103	1,054	(*d*)2,157	4,296
Western Australia ..	2,664	2,269	4,933	20,338	2,359	2,215	(*d*)4,574	24,912
Tasmania	..	..	..	..	127	87	214	214
Northern Territory ..	5,615	5,370	10,985	13,900	660	587	1,247	15,147
Aust. Capital Territory ..	..	..	..	..	58	42	100	100
Total	12,688	11,181	23,869	46,638	14,026	13,153	27,179	73,817

(*a*) Enumerated at the Census. (*b*) Furnished by the Protectors of Aboriginals. (*c*) Census totals. (*d*) In addition to these totals, the Protectors of Aboriginals estimated that there were 826 half-caste and mixed bloods in South Australia and 1,322 in Western Australia, presumably living in the nomadic state.

According to the Annual Reports of the Protectors of Aboriginals, there has been little change in the numbers of aboriginals in most States since 1947. In Western Australia, however, the estimate for those living beyond the confines of civilization has been revised, and the total number of full-blood and half-caste aboriginals in that State at 30th June, 1949 was estimated at 22,763.

CHAPTER XIV.

VITAL STATISTICS.

NOTE.—1. In the Vital Statistics chapter of Official Year Book No. 37, tables covered 1946 and, where possible, 1945. In issue No. 38 these tables covered 1948 and where possible, 1947. In the present issue these tables cover 1950 and, where possible, 1949. In some cases, however, space does not permit of the inclusion of figures for 1949. These figures will be found in *Demography Bulletin* No. 67 unless otherwise specifically indicated.

2. Figures for Australia throughout are exclusive of full-blood aboriginals.

§ 1. Marriages.

1. **Number, 1950.**—The number of marriages registered in Australia during the year ended 31st December, 1950 was 75,599, giving a rate of 9.24 per 1,000 of the mean population for the year. In 1942 both the number (86,060) and the rate (11.99) were the highest on record. A summary of the number of marriages registered in each State and Territory since 1861 is given in the following table :—

MARRIAGES.

Period.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N.T.	A.C.T.	Aust.
